Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—*Tuesday, July 23, 1985*

(Legislative day of Tuesday, July 16, 1985)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

"Dear God, give me the guidance to know when to hold on and when to let go and the grace to make the right decision with dignity."

Father in Heaven, that simple, anonymous prayer is profound in its implications and relevance to the tug and pull, hold-on and hold-out aspects of the present budget conflict. Lord, you know the hearts, minds, motivation and reasons of each on every side of this complicated, multifaceted issue. As the Senate, the House of Representatives, and the White House contend for their positions, dissolve attitudes and arguments which are intransigent and indifferent to the merits of the issue. Forbid it, Lord, that the Nation and its future should be hostage to debate that has no resolution. May truth and justice prevail. Guide to decision which will guarantee the welfare of the people and the prosperity of the Republic. In His name who is virtue incarnate. Amen.

RECOGNITION OF MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, to be followed by special orders, not to exceed 15 minutes each, for the following Senators: Senators PROXMIRE, HART, HATFIELD, MATTINGLY, and EVANS.

If time permits, there will be routine morning business, not to extend beyond 3 p.m.

At 3 p.m., a live quorum will begin, under the provisions of rule XXII of the Standing Rules of the Senate, to be followed by a vote on the cloture motion to proceed to S. 43, the line item veto.

Rollcall votes are expected today. We could have more than one rollcall vote today.

Shortly after the vote on cloture or at a later time this afternoon or evening, it will be the majority leader's intention to proceed to the consideration of S. 876, veterans' health care bill, if cleared by unanimous consent.

I also indicate that there are a number of other bills we hope to dispose of this week, including, but not limited to, the following: Senate Joint Resolution 77, compact of free association; S. 1404, Japanese trade practices; S. 367, veterans' judicial review; S. 876, veterans' health care; S. 410, Conservation Service Reform Act. I also understand that airport security legislation is in the process of being worked out.

It is still my hope that the farm bill, S. 616, will be available, at least for debate and opening statements on Friday.

There are some other measures. Perhaps not this week but next week we will have at least two appropriations bills—the legislative appropriations bill and the energy and water appropriations bill—and maybe the supplemental appropriations conference report.

I have discussed the FTC authorization bill with the distinguished chairman of that subcommittee, the Senator from Wisconsin [Mr. KASTEN], and the consumer products safety authorization. He would like to dispose of both those bills. I understand that the Senator from Iowa [Mr. GRASSLEY] has an amendment to the FTC authorization. I urge him to try to work out any problem he may have with the Senator who will manage those bills, Senator KASTEN.

I indicate that these are not, for the most part, major items of legislation; but we will have a very busy schedule in September and October, and some of these matters could slip and fall by the wayside. We have time in the next 10 days to deal with almost every one of the legislative items, and I hope that every Senator on both sides of the aisle will cooperate with us so that we might dispose of as many measures as possible.

(Mr. EVANS assumed the Chair.)

ORDER OF BUSINESS

Mr. DOLE. Mr. President, I reserve all but 5 minutes of my time, and I yield 5 minutes to the distinguished Senator from South Carolina [Mr. THURMOND].

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The distinguished Democratic leader is recognized.

Mr. BYRD. I ask unanimous consent that I may reserve the remainder of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I yield the floor.

The PRESIDING OFFICER. The Senator from South Carolina.

CRISIS IN THE TEXTILE INDUSTRY

Mr. THURMOND. Mr. President, almost daily, textile mills are closing or curtailing production. I hold in my hand a news article entitled "Springs Industries to Lay Off 100 at Kershaw Plant." The article reads as follows:

Springs Industries will lay off about 100 employees in two weeks when the company begins phasing out one-third of its weaving operation at its Kershaw plant.

Robert E. Slough, director of public relations for the Fort Mill-based textile firm, said the employees—mostly weavers, loom maintenance personnel and cloth inspectors—were notified of the layoff Tuesday.

He said about 550 employees will remain at the plant when the phaseout of 357 of the plant's 944 weaving looms is complete.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Slough said the layoffs and decrease in production are caused by import competition.

"The apparel fiber industry has been under great pressure from imports," he said.

Mr. President, that is the word we are getting almost every day from the textile mills and the apparel industry. The apparel industry is in every State in this Nation. These people are losing their jobs.

I want to see trade with other countries, but fair trade, not the kind of trade that closes down industries in our own country and puts people out of jobs by the thousands. In my State alone, we have lost more than 20,000 jobs in the last year or two. Nationwide, we have lost hundreds of thousands of jobs.

Mr. President, the textile industry—textile and apparel—employs over 1 million people.

As I say, it is in every State in the Nation and we are going to find they are going to begin to lay off in all the States. In fact, they are doing it now. Employment is way down. I hope the administration will wake up before it is too late because if it does not do so, these people have to go on relief unless they can get some other work.

Mr. President, it is inexcusable to follow a policy that allows thousands and thousands of Americans to lose their jobs simply because we allow excessive imports to come into this country.

We felt that the commitment the President made, which his people have not carried out, to allow import growth in proportion to the domestic growth was a fair arrangement. That is all we are asking. We are not asking to keep out all imports. We simply want the domestic growth to be in the same proportion as the import growth. We feel that is fair, we feel it is just, and we feel it should be done.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes.

THE GREAT SOVIET COMPUTER FLOP AND ARMS CONTROL

Mr. PROXMIRE. Mr. President, the Soviet Union is in big economic and military trouble. That intelligence does not come from counting troops or nuclear missiles or subs or tanks. It comes from the most significant recent improvement in economic and military capability in the past 25 years. The efficiency of economic production today depends much more on rapid fire gathering, organizing, directing and communicating information than ever before. Why? Because we are now in the computer age. Forty years ago we did not have this computer efficiency. Since 1976 literally 100 percent of industrial plants employing 500 or more in the United States had main frame computers. That is nearly a full decade of U.S. industrial total computerization. Today less than one-third of Soviet plants of similar size have main frames. In the July 8, 1985 issue of Fortune magazine, Daniel Seligman tells the story in an article he titles: "The Great Soviet Computer Screw Up." Seligman writes:

Soviet industry is in big trouble with computers. Its hardware isn't modern. Breakdowns occur endlessly. The telecommunications are terrible. And Soviet managers have lots of sneaky reasons for not wanting effective information systems.

Seligman goes on to observe:

At the enterprise level, the Russians have generally failed to exploit the fantastic efficiencies made possible by the new electronic technology, and this failure is a major reason for expecting the gap between the Soviet and Western economies to keep widening.

This is bad news for the Russians, Mr. President. From a military standpoint it is great news for the United States. First, our main adversary lacks now and will continue to lack for years to come the ability to pull their centralized totalitarian economy into the modern efficient system that characterizes American industry. Military strength depends on economic as well as technological and military training capability. So on the economic front our major adversary not only must do with an economy whose economic strength measured by its gross national product is only about 55 percent of the American economy. It also must stagger along with an economy that lacks the ability to run that much smaller economy with the modern efficiency that only a strong computer base can provide.

Of course, computers are vital today for industrial efficiency. They are also critical for efficient military operations. Obviously, this is true in command and control. It is also vital in the operation of military units as diverse as large capital ships, aircraft, organizing and directing troop deployment, and in virtually every aspect of nuclear missile guidance, tracking and control.

We have become familiar with other failings of the Russian military force. Alexander Cockburn's book "The Threat" spelled out in detail the crucial moral and training failures of a Russian military with a far lower level of education, technical skill, and even sobriety than the American military.

We have watched the 5 year fiasco suffered by the Russian military force in wandering around primitive and weak Afghanistan with so little success. The Defense Department itself reported to Congress just last March that the Soviets trail this country in 15 out of the 20 prime military technologies and are superior to the United States in literally none.

Mr. President, the last great superpower war was fought 40 years ago. Since then there has been a series of technological revolutions in military power and efficiency. How do the superpowers and their respective alliances stack up in this new technological age? The answer is easy. It is obvious. The United States and the NATO alliance have surely achieved a solid technological and military as well as economic advantage over the Soviet Union and the Warsaw Pact.

Again and again we hear leading administration figures telling Congress that we must build up the military before we negotiate an end to the nuclear arms race with the Soviet juggernaut. We have been fed the myth that the Russians somehow have a military advantage that might be frozen in place if we stopped nuclear weapons testing, production, and deployment.

The article in Fortune magazine on "The Great Soviet Computer Screw Up" provides additional evidence that the Russians are not 10 feet tall, that we can stop the arms race, stop it now and in the process both save hundreds of billions of dollars of military spending and provide greater military stability and security.

Mr. President, I ask unanimous consent that that article to which I have referred in the July 8, 1985, issue of Fortune magazine by Daniel Seligman be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Fortune, July 8, 1985]

THE GREAT SOVIET COMPUTER SCREW-UP

(By Daniel Seligman)

With some kicking and screaming along the way, the business managers of the Western world have long since adapted to computers. No sizable capitalist enterprise could be competitive nowadays without computer-driven management information systems—what the data-processing department calls MIS. A problem that Mikhail Gorbachev must find maddening these days, as he looks around for ways to cure the sick Soviet economy, is his country's broad failure in MIS. With every year that goes by, it is increasingly apparent that Soviet industry has fundamental problems with computers. Russian managers aren't exactly kicking and screaming, but they also aren't adapting very well.

Computers present several challenges to the Soviet leadership. Presumably it worries about the military implications of the U.S.S.R.'s inferiority in computer hardware. Gorbachev must also be concerned about the computer's implicit threat to the official Communist monopoly on ideas: a few Apple II computers hooked up to printers could make instant best-sellers out of dissident literature. So just about all computers in the Soviet Union are closely guarded in state-run institutions. Americans worry about hackers electronically breaking into institutions and gaining access to various business and military secrets. In the Soviet Union,

things are reversed: the state's problem is to prevent any computer users from breaking out of the institutions.

Thus far, at least, the regime seems to have dealt effectively with these widely publicized problems. It has been reasonably successful in stealing and otherwise acquiring Western technologies with military applications. And the KGB seems to have had little difficulty in preventing dissidents from getting their hands on printers and other duplicating devices. But the problem posed by computers for Soviet enterprises—the state-owned counterparts of Western corporations—is another matter. At the enterprise level, the Russians have generally failed to exploit the fantastic efficiencies made possible by the new electronic technology, and this failure is a major reason for expecting the gap between the Soviet and Western economies to keep widening.

Among those who have been most closely tracking the record at the enterprise level is a team at the University of Arizona's College of Business and Public Administration, under the direction of Seymour E. Goodman. The team's members have worked hard at interviewing the occasional Soviet émigré who is knowledgeable about information systems; most of their data, however, are based on exhaustive analysis of Soviet technical journals. Professor Goodman, who was recently in Brussels briefing NATO officials on Soviet computers, believes the Russians are deeply distressed by their shortcomings. "They sit there and watch this competition between Japan and the West over development of a fifth generation of computers," he observed recently. "They know they can't just sit out the contest. They know they have to at least look as though they're doing the same kinds of things, but that's not easy."

Their problems begin with the fact that the U.S.S.R. has trouble producing modern computers: its leading entries are copies of mainframes that IBM stopped making six to ten years ago. And even these copies are inferior to those produced in East Germany. The best computer a Soviet manager could ordinarily hope to get his hands on would be an East German ES-1055 model, roughly similar to a third-generation IBM System 370.

Most Soviet enterprises still lack mainframes of any kind. William K. McHenry, a colleague of Goodman's and author of a recent prodigious Ph.D. dissertation on management information systems in the Soviet Union, estimates that only 7.5% of the country's industrial enterprises—3,300 out of 44,000—had mainframes in 1984. To be sure, this minority includes a disproportionate number of large, high-priority enterprises. Even so, the evidence suggests that most sizable plants in the Soviet Union are still getting by without mainframes. McHenry, who will be an assistant professor at Georgetown's School of Business Administration beginning this fall, has assembled data showing that only one-third of large plants ("large" meaning at least 500 employees) had mainframes in 1984. With or maybe even without rounding, the comparable figure for the U.S. would be 100%.

The systems in use in the U.S. typically enable managers to instantly call up an infinity of data about payrolls, inventories, production, sales, and anything else useful. American managers take it for granted that they can function more effectively if these data are accurate and timely. But Soviet managers are frequently under pressures to falsify data, and so they are understandably nervous about computerized systems for keeping track of what's happening.

A Soviet manager who had a mainframe and was seriously trying to develop a management information system would confront some discouragements almost unimaginable in most Western countries. One is the quality of Soviet telecommunications. The basic telephone system in many areas can barely support 200- or 300-baud links (the baud being a measure of transmission speed), and even at that low level disconnections occur endlessly. To attain the 1,200-baud standard taken for granted by an ordinary personal-computer user in the U.S., the Soviet manager would probably need a dedicated phone line. Getting one would require him to have clout in the Ministry of Communications.

Another large discouragement would be the level of service, training, and repair offered by the computer's provider—that is, by the state. The level is dauntingly low. Furthermore, the manager acquiring a mainframe would have to deal with a dizzying variety of state organizations, some concerned with design work and software, some with telecommunications, some with peripherals, some with preparation of computer rooms. The computer rooms have been a particularly annoying problem. McHenry reports that nobody in the Soviet Union makes complete computer rooms, and managers are frequently encouraged to follow the designs specified by an organization ponderously labeled the Central Scientific Research and Experimental Design Institute of Industrial Buildings and Structures. For many years the institute recommended a false floor made of aluminum, said to be produced at a plant in Lativa. "Actually," McHenry notes in the dissertation, "this plant would only deliver raw sheets, which then had to be assembled by the customer himself; the customer was obligated to provide the raw aluminum in the first place, and the wait was five years."

Nowhere in the picture is there any equivalent of a vendor willing to take total responsibility for getting the equipment up and running. So a lot of expensive hardware in the Soviet Union is in the "arrived but not yet working" mode: McHenry's dissertion cites "cases . . . where the computer has been left 'under the stars,' gnawed by animals, or even left in boxes in the snow for longer than a year."

Even after they're up and running, the computers in use tend to break down more than would be acceptable in the West. Published data on mainframes used by the Ministry of Power and Electrification—presumably a preferred customer—show that in 1983 most had a "mean time to failure" of only 130 or 140 hours. In other words, they were breaking down once a week or so. Among the more interesting black markets in the Soviet Union these days are various covert enterprise-level deals to get around these problems. For example, the desperate manager can opt for off-the-books repair and servicing of computers by freelance technicians. He can also go out and buy stolen computer components.

Most managers who do have information systems run them with their own teams of specialists operating out of the enterprises' in-house computer centers. One alternative is to turn to a local service center—an institution somewhat similar to the time-sharing centers that flourished in the U.S. some 15 years ago. The service centers are strenuously encouraged by the state, and McHenry notes that the Soviet Communist party is a prominent customer. Some party officials originally viewed them as the ideal way for enterprises to use computers and also as a convenient way to ensure that information systems would be standardized throughout the Soviet Union. But years of squabbling over which ministry would control the service centers undermined this goal. The squabbling left the enterprises free to set up their own arrangements and left the state looking glumly at thousands of different and incompatible information systems.

The service centers have grown relatively rapidly in the past few years, but they have some large built-in disadvantages. One, which was also a problem for their predecessors in the U.S., is that it's much more prestigious to have your own computer. A second problem, one that Soviet managers presumably think deeply about, is that you can never really be sure what will happen when people outside your own organization get their hands on your fishy data. Finally, the service centers are badly handicapped by the phone-line problem, which makes it hard for them to rent computer time to remote-access users. Many Soviet managers using the service centers are reduced to sending their tapes or punch cards across town by messenger.

Soviet managers have many perverse incentives to misuse computers. One that nullifies productivity gains in many sectors of the economy is the regime's guarantee of employment to all workers. This means that the manager who acquires a mainframe can't easily use it to replace all the workers with abacuses who are now on his payroll—and his plant might literally have hundreds of them. Soviet enterprises typically consist of numerous small fiefdoms, each with its own statistical department, and the evidence thus far suggests that management information systems have not really dented these fiefdoms. Their survival is additionally ensured by the organizational rigidity of Soviet enterprises: an enterprise of a given size in a given industry is ordinarily required to have certain well-defined line and staff relationships. These requirements are intended to make it easier for the ministries to supervise the many enterprises under their jurisdiction, but, of course, the effect is to prevent managers from devising new organizational arrangements suitable to the computer age.

Another obstacle to productivity gains is the tidal wave of bureaucratic forms that flows over Soviet managers. "What we see over and over again," McHenry remarked recently, "is the enterprise getting the data out of the computer and then turning it over to clerks who laboriously hand-copy it onto all these forms."

As you might assume, the overriding obstacle to rational use of computers in the enterprises is the managers' recurring need to falsify much of their data. The garbage-in, garbage-out phenomenon is pervasive, and there is little the ministries can do about it. Soviet managers frequently have to make purchases in various black markets to get needed supplies. Knowing that such illegal purchases are often necessary, they may set up a slush fund by diverting money from, say, the payroll account; to make this possible they might overstate the number of workers at the enterprise, which would enable them to get extra wages from the ministry in charge. Meanwhile, their computers would inevitably be spitting out garbage.

In attempting to gauge the benefits of management information systems, the state

has a series of formulas that concentrate on measuring output and unit production costs before and after installation of the systems. Soviet data published several years ago proudly state that in 1965–70 some 680 million rubles were saved by these new computer systems; the savings are said to have risen to 2 billion rubles in 1971–75 and were expected to be 3.8 billion rubles in 1976–80.

Goodman and McHenry regard the formulas as something of a joke and the savings as largely fictitious, and they have a fair number of details to indicate that the Soviet authorities repeatedly measure the wrong things. They note, for example, that computer executives' bonuses in many sectors depend on the number of "tasks" being performed by their systems and also on the number of "subsystems" put in place. So instead of developing a comprehensive accounting system, say, the managers affected opt for lots of subsystems, which may be unrelated and cumulatively inefficient.

The pressures that drive managers to cook the books are clear enough. The economic system in which they operate features unrealistic planning targets, causing chronic shortages of resources—so they hoard resources, doing their best to conceal from the ministries the true state of inventories and the true number of production workers. The system provides bonuses for fulfillment of the plan but also tends to raise required norms for anyone who overfulfills it—so the managers suppress any data that might suggest they were capable of increased output. On the other hand, they tend to overstate performance when norms are not being met.

With all these fishy data swimming around, the managers tend to shy away from highly integrated information systems, which pull together many different kinds of data and would enable an overseer to examine a lot of different relationships in an enterprise. The more integrated the system, the more likely it is that falsified data will entangle the managers in obvious contradictions. In an integrated system, the manager who overstates production in order to meet his goals will find himself also obliged to overstate sales, leaving him ultimately responsible for revenues that he doesn't actually have. Soviet managers are especially leery of database management systems—software that combines information from many different company operations. Some such software, including the American program called Total, has been copied with minor modifications. (McHenry notes evidence that some Western programs are copied illegally in Bulgaria, where the accompanying manuals are also translated into Russian.) Total is a product of Cincom Systems, a privately owned company based in Cincinnati, and is probably the most popular database management program ever offered for mainframes. However, the prospects of the Soviet copy are plainly limited.

What's ironic about the wide-ranging Soviet problems with computers is that they were once widely viewed as a natural and perhaps even indispensable ally of central planning. In 1971 the Communist party essentially endorsed this proposition: the Ninth Five-Year Plan established the goal of creating a vast computer network that would link organizations at every level of the economy. Timely data would flow up from the enterprises to the ministries, which could incorporate the data into the planning goals flowing back down to the enterprises. Subsequent party congresses have re-endorsed this concept, while not specifying the date at which it should be implemented; the Twelfth Five-Year Plan, to be adopted next year, will undoubtedly repeat this exercise; It is still official doctrine that socialism is the ideal system for introducing computers. Yet it is hard to believe that any rational Soviet official still expects to see the day when computers make central planning work.

The Soviet economy's failure to assimilate computers is not only an economic disaster. The failure also has a symbolic dimension. Communism is, after all, an idea claiming to stand for progress, and computers are the quintessential symbol of progress. The performance of Soviet managers in the face of the new technology can be taken as another threat to the legitimacy of the regime.

MYTH OF THE DAY: THAT MOST OF THE UNEMPLOYED RECEIVE UNEMPLOYMENT COMPENSATION

Mr. PROXMIRE. Mr. President, today's myth of the day is that the Nation's prime safety net—unemployment compensation—is doing its job. Is that true? No, Mr. President, it is not true. It is a myth. The fact is that unemployment compensation today is failing dismally. Last month unemployment continued at the recession rate of 7.3 percent for the fifth consecutive month. There have been only 2 years since 1941 and until 1981 when unemployment was at that high a rate.

Most Americans believe that painful and discouraging as unemployment may be, at least those who lose their jobs have a modest unemployment compensation income to fall back on. Unfortunately, Mr. President, today that belief is wrong. It is a myth. In June there were more than 8,400,000 Americans out of work. How many of those unemployed received unemployment compensation? Ninety percent? No. Three-quarters? No. One-half? No. Only about one-fourth—26.9 percent to be exact received any unemployment compensation. Some safety net. That means that more than 6 million unemployed Americans received no unemployment compensation at all.

A thoughtful editorial in the Thursday, July 18, Washington Post contends that Congress cannot wisely solve the problem simply by grafting a supercomprehensive unemployment compensation addition on the present program. The regressive payroll tax that supports unemployment compensation could not support it. As the editorial concludes: "It may be time for society to rethink its approach to the problem. It is too easy to forget the unemployed."

I hope Members of Congress will dwell on this serious and tragic failure of our system. At a time of record Federal deficits, a time for determined reductions in programs that deepen the deficit or increase such regressive taxes as the payroll tax that finances unemployment compensation, we cannot realistically expect Congress to spring for tens of billions of dollars more for unemployment compensation.

But consider: It has been about 50 years, almost a half century, since Congress last revised the Nation's wage-hour laws to reduce unemployment by providing more job opportunities. Congress did that gradually through mandating a 40-hour week, 8-hour day, with time and a half for overtime. That reform culminated some 30 years of steady progress. The country moved from the 12-hour day and the 6-day week first to a 10-hour day, then to an 8-hour day, then to a 5-day week. But since the mid-1930's the 40-hour week has remained static and untouched for 50 years.

Meanwhile, labor-saving equipment has revolutionized industrial production throughout the world and especially in this country. And the labor supply has exploded. The entry of women into the work force has immensely increased the number of Americans seeking and holding jobs. In fact, today in spite of ge dm1:a23jy6.223 the high unemployment, the largest percentage of the working age U.S. population in history is working or seeking work. This expansion of the work force continues apace.

Meanwhile, with computers and robotics we are on the brink of a major breakthrough in productivity. Is the time coming for a serious consideration of a gradual reduction in the 40-hour week to 35 hours? Should Congress also consider modifying the present time and a half for overtime provision to double time? This latter change would according to some calculations increase employment almost immediately by 1 million. The change in the workweek would add an additional 5 million jobs. These changes would also increase leisure time for working people. But let us not kid ourselves. These changes would be resisted and would cost both present employees and employers. With a shorter workweek and less overtime present employees would earn less. For that reason they would press for compensating higher pay. In many cases they would receive that higher pay at least in part. That would increase wage costs. It would also put upward pressure on prices.

Since unemployment is now even worse in Europe and elsewhere in the world, this country should work for international progress toward the 35-hour week. Here's a reform Mr. President, that will take time. We should start working on it now. The reform starts with a recognition of the myth that unemployment is not a serious problem right now. It is. Three quarters of our unemployed have literally nothing, no job, no unemployment

compensation. They deserve a chance to work.

Mr. President, I ask unanimous consent that the editorial to which I referred in the July 19 Washington Post be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

UNEMPLOYED, UNINSURED

The continuing high unemployment rate—7.3 percent last month for the fifth month in a row—has overwhelmed the nation's unemployment insurance system. The Center on Budget and Policy Priorities, an advocacy group, reported earlier this month that only about a fourth of the unemployed—26.9 percent—are receiving unemployment benefits. That national rate is one of the lowest on record, and the rates in some states are lower still. Only 15 percent of the unemployed in Texas are receiving payments, 15.1 percent in Florida, 19.9 percent in Michigan. The recent figure for Virginia was 21.7 percent (compared with 40.2 percent in the District of Columbia and 36.7 percent in Maryland).

The support figures would be higher were it not for various budget cuts in the last five years. The center put emphasis on these, in particular the decision by the administration and Congress earlier this year to phase out a program of supplemental compensation to extend benefits for some workers for as much as a year. But the problem is not so much budget cuts as it is a fundamental mismatch between the insurance system and recent trends in the economy.

The insurance system was set up as a countercyclical device. It assumes a simple world in which people lose their jobs temporarily when the business cycle turns down, but easily regain them when the economy turns up again. Thus it provides up to 26 weeks—half a year of basic benefits. These basic benefits are paid for by state taxes, and each state has the right to set its own benefit levels and eligibility rules (one result of which is that many workers are excluded from the system entirely). In addition, there has come to be an extended benefit program financed half by state and half by federal funds, for up to 13 more weeks of benefits. The federally funded supplemental program phased out last spring was on top of that.

The supplemental program was put in place to combat the depth of the last recession. Unemployment touched 10.7 percent, the highest since the 1930s. That is one reason it remains so high. But a second reason is a shift in the nature of unemployment, from cyclical to structural. There are groups in the work force whose unemployment rates are chronically above average. Black teen-agers are the prime example. Workers displaced by sectoral shifts—from manufacturing to service industries, from North and East to South and West—may be another. The current mix of economic policy may also be extending unemployment, particularly in industries highly sensitive to interest rates or the value of the dollar.

It would be wrong to graft these problems onto the unemployment insurance system. It has neither the finances—it relies on a small, regressive payroll tax—nor the benefit structure to deal with them. Unemployment seems to have reached a new level of intractability; a 7 percent rate is where recessions used to end, but where the next one may start. It may be time for society to rethink its approach to the problem. It is too easy to forget the unemployed.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I am happy to yield to my friend from Louisiana.

Mr. LONG. Mr. President, will the Senator give me a figure of the number of people who are unemployed and the number who are drawing unemployment compensation? I would like to get the ratio, one to the other.

Mr. PROXMIRE. The number who are unemployed is about 8,413,000. The number not drawing unemployment compensation is about 6,300,000.

Mr. LONG. How many does the Senator say are not drawing unemployment compensation?

Mr. PROXMIRE. About 73 percent, almost three-quarters.

Mr. LONG. About three-quarters are not drawing any unemployment?

Mr. PROXMIRE. No unemployment compensation; the Senator is correct.

Mr. LONG. I think this is very unfortunate. I agree with the Senator about that.

Mr. PROXMIRE. I appreciate the Senator's view very much. There is no one in the Senate whose interest in this is more important than the distinguished ranking member of the Finance Committee, who has done so much in this area for so many years.

TORTURE IN UGANDA

Mr. PROXMIRE. Mr. President, Amnesty International recently released a report documenting countless incidents of torture and mysterious disappearances of detainees in Uganda.

However, the Ugandan Government continues to refute charges that civilians are ever taken into military custody or tortured.

Evidence clearly contradicts the Government's claims.

According to this report, detainees are routinely burned and beaten—often burned and beaten to death.

Many detainees simply disappear—never to be heard from again.

This document contains 16 detailed medical accounts of atrocities committed against Ugandan civilians.

The evidence of repeated torture is hideous and beyond any conception of human decency.

For example, one 56-year-old woman had burning rubber dripped over her, and then had corrosive liquid thrown on her.

She managed to escape to a hospital—only to soon be attacked by a group of soldiers.

Now she is left with scars all over her body—scars so severe that they should remind us that some people do not survive torture.

Scars that remind us of the genocide being committed in Uganda today.

But Amnesty International has been persistent in its pursuit of the criminals and their victims, to try and stop the carnage.

Their reports have brought these heinous crimes to our attention.

But our attention is not enough.

The Senate must take action to help prevent these atrocities.

We must ratify the Genocide Treaty.

Now, Mr. President, we must cease to be passive listeners.

We must stop being quiet onlookers.

We must join with the 96 other nations that have made a firm commitment to stop genocide.

These nations have ratified the Genocide Convention—and now we must also.

It is too late for us to help the people who have died and been tortured in Uganda, and we cannot give them back what has been so horribly taken away from them.

But, Mr. President, we can give their friends and families the hope that these crimes will not be allowed to continue.

We can—and we must—ratify the Genocide Treaty.

Mr. President, I ask unanimous consent that the remainder of my time be yielded to the distinguished Senator from Georgia, Senator MATTINGLY.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR HART

The PRESIDING OFFICER. Under the previous order, the Senator from Colorado is recognized for not to exceed 15 minutes.

MR. REGAN'S ATTACK ON CONGRESS

Mr. HART. Mr. President, last week, the Congress and the American people were treated to, if we wish to call it that, something between chastisement and a tirade by the present Chief of Staff of the White House, former Secretary of the Treasury, Mr. Donald Regan. We are familiar through published reports with Mr. Regan's remarks in which he, it was widely noted, pounded the table in presumed anger and frustration at the U.S. Congress for its inability to devise a budget which presumably Mr. Regan would like.

Mr. President, not by any way in defense of Congress—we have our problems and we are apparently a long way from solving them—but rather by way of setting some appropriate background for Mr. Regan's intemperate attacks on the Congress, I think it is helpful for the record to reflect the facts as they have mounted over the past 5 years.

First, let me say I am aware today of the symbolic and perhaps real peacepipes being passed around within the President's party. Whether that also extends to the Democratic Party and its leadership remains to be seen.

Nevertheless, in spite of those peacepipes, I want to endorse the remarks of the majority leader, the Senator from Kansas [Mr. DOLE], and the chairman of the Senate Budget Committee, the Senator from New Mexico [Mr. DOMENICI], that Mr. Regan would do well to cool his rhetoric on this issue. And the reason he would do well to cool his rhetoric when he says, "Why hasn't the Reagan budget been passed?" is because it could not attract more than four votes in our Republican-controlled Budget Committee in the Senate. That is fact No. 1, Mr. President, that the President of the United States and his Chief of Staff were not able to muster more than four votes from their own party in the Senate Budget Committee for the Reagan fiscal 1986 budget.

Now, in his attack on the Congress, Mr. Regan reverted to form; that is to say, he sought to shift the blame. He blamed the Congress. Previously, he has blamed the Federal Reserve Board. He has blamed Wall Street. He has blamed Mr. Murray Weidenbaum, he has blamed Mr. Martin Feldstein, and he, of course, along with others in the administration, continues to blame Jimmy Carter, even when it clearly is totally inappropriate.

Now, Mr. President, it is this former Treasury Secretary, Mr. Regan, who gave us the supply side miracle of a massive 1981-82 recession and who denies any link between huge present and projected deficits and unacceptably high real interest rates. And that same former Treasury Secretary is hardly in any position to lecture the Congress about fiscal responsibility.

Mr. Regan has asked, "Who is racking up deficits? Not us," presumably meaning the administration. Well, Mr. President, that is just flat wrong.

Leaving aside the staggering record of Reagan deficits since 1981, let us look at the deficits which Mr. Donald Reagan asked for over that period—deficits which he asked for. The fiscal 1982 to 1986 Reagan budget requests, Mr. President, propose a total of $686 billion in additional deficits. The total of five Reagan budgets asked for an additional $686 billion in deficits with $180 billion plus annual deficits for each of the last three proposed budgets.

Now, why has not this champion of a balanced budget amendment, Mr. Donald Regan, submitted a balanced budget to the Congress in the last 5 years? We might well thump on our desks about that one.

And why does not this true believer in the line-item veto advise the President to exercise the veto power he already has? Not one regular appropriation bill has been vetoed since this administration took office. If this administration is so anxious to veto something, why do they not do it?

Mr. Regan charges Congress with not being able to come to grips with spending. To the degree we have given the administration virtually everything it has asked for in defense spending, that charge may be true. It has only been in the last 24 months that Congress has returned to any kind of sanity, not to say integrity in its own views where the defense portion of our budget is concerned.

I think it is time—clearly the Congress is well ahead of the administration—to quit making this distinction between Government spending and defense spending. Defense spending is as much Government spending as food stamps. And until this President and his Chief of Staff acknowledge that fact, we are never going to get a balanced budget.

He is right: Congress has not been able to come to grips with spending, but it has been in the defense area. We have given the administration everything it asked for up until the last 2 years. But Congress has voted $176 billion in spending cuts since Mr. Donald Regan became Treasury Secretary and he ought to acknowledge that.

But these cuts, Mr. President, were swamped by massive revenue giveaways to the total of $326 billion and defense increases almost $100 billion over that same period. We cut the budget alright, but what we have done is merely shift those dollars that we have cut over to one agency which is often the most wasteful bureaucracy in Washington, and that is called the Pentagon.

Mr. President, the current budget impasse is largely a result of White House failure to consult with the Senate and House leadership before taking all items of substance off the table, so to speak, in budget negotiations.

And, Mr. President, that failure can be traced directly to the White House Chief of Staff, Mr. Donald Regan.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that I may yield such time as I might use.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

SUPPORT FOR LINE-ITEM VETO

Mr. KENNEDY. Mr. President, I support the line-item veto in the form proposed in S. 43, and I hope that the Senate will invoke cloture this afternoon to permit the issue to come before the Senate.

Over the past week we have heard the eloquent views of those who feel strongly that the Senate should not approve S. 43. Respectfully, I disagree. A Federal line-item veto is an idea whose time has come, and S. 43 offers the opportunity for a carefully crafted 2-year trial.

Growing support for the line-item veto in the Senate and the House of Representatives is a reflection of the inability of Congress to extricate itself from the massive Federal budget deficit. The budget process is in shambles, the deficit is out of control, and Congress is part of the problem. Our system of checks and balances, which functions adequately, even brilliantly in most areas, is out of kilter in the area of the budget. Congress has too much power over the purse, and the President has too little. The line-item veto, while neither the miracle cure that proponents promise nor the disaster that opponents fear, is one of the few available tools to redress the balance.

Some say that President Reagan cannot be trusted to use the item veto wisely, that it will enable the current Republican administration to wield the power unfairly to abolish programs that Democrats have been fighting to save and strengthen over the past 4 years. But if the President does not use the item veto fairly, the 2-year sunset provision in S. 43 will ensure that the power is discontinued.

On the other hand, if the item veto is used reasonably, Congress will almost certainly extend it beyond the 2-year period. In this sense, President Reagan will be holding this new power in trust for future administrations. And if the item veto is used effectively, Congress might well consider extending the power to other areas—such as tax legislation which, with its proliferation of special interest loopholes and subsidies, would be a prime candidate for extension of the line-item veto.

The fundamental issue before us today, however, is fiscal responsibility, and it has little to do with the partisan politics of the moment or the passing budget wars which pit a Republican President against a Democratic House—and even against his own Republican Senate. A larger principle and a longer perspective are at stake.

When 100 Senators and 435 Representatives have primary responsibility for the budget, no one is adequately responsible. The traditional veto power of the President, which worked well until the 1970's, is still sufficient

to keep most other legislation in check. But it is too unwieldy to impose significant discipline on the appropriations process. In 1983 and 1984, the 98th Congress produced 623 bills which were sent to the White House and signed into law. Only 27 were appropriations bills; but they made up in size and scope for what they lacked in number, dispensing hundreds of billions of dollars across the entire range of myriad Federal programs.

The 1985 continuing resolution, for example, passed at the end of our session last year, contained almost $400 billion of Federal spending in one fell swoop, and consolidated 8 of the customary 13 appropriations acts. It also contained hundreds of pages of unrelated major substantive legislation. In effect, as Congress was adjourning, it gave the President a "take it or leave it" ultimatum—sign the continuing resolution or shutdown the Government.

Occasionally, Presidents have been bold enough to veto one or another of these behemoth appropriations bills because they objected to particular provisions. More often, the massive nature of the modern appropriations process overwhelms the primitive veto power, and the President acquiesces in countless individual items that by any standard are wasteful or badly flawed.

By giving the President a stronger role, the line-item veto will instill a new and needed measure of Presidential accountability in Federal spending, and reduce the excesses of a congressional budget process which too readily focuses on individual districts and special interests, not the national interest.

The line-item veto is hardly an untested idea. Forty-three States already give a similar power to their Governors, who universally regard it as an indispensable tool of budget control at the State level.

Presidents since Grant have sought the line-item veto, but until now Congress has refused to cede the power—and with considerable justification, because earlier Congresses seldom brought in budgets that were unbalanced. Today, Congress has only itself to blame for the irresistible pressure to yield the item veto power to the President. Deficits have ballooned in earlier decades, during wartime or recessions, but Congress always managed to bring them back to balance. We began to lose control of the budget in the 1970's; we gave away the Treasury in the 1980's with massive tax cuts and huge increases in military spending; and the country will continue to sink into an irreversible morass of deficits until strong corrective action is taken.

Mr. President, I ask unanimous consent that a table of Federal deficits from 1941 to the present may be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Federal deficit

Year:	*Billions*
1941	−$4.9
1942	−20.5
1943	−54.5
1944	−47.5
1945	−47.5
1946	−15.9
1947	4.0
1948	11.7
1949	.5
1950	−3.1
1951	−6.1
1952	−1.5
1953	−6.4
1954	−1.1
1955	−2.9
1956	3.9
1957	3.4
1958	−2.7
1959	−12.8
1960	.2
1961	−3.3
1962	−7.1
1963	−4.7
1964	−5.9
1965	−1.4
1966	−3.6
1967	−8.6
1968	−25.1
1969	3.2
1970	−2.8
1971	−23.0
1972	−23.3
1973	−14.9
1974	−6.1
1975	−53.2
1976	−73.7
1977	−53.6
1978	−58.9
1979	−40.1
1980	−73.8
1981	−78.9
1982	−127.9
1983	−207.7
1984	−185.3
1985 (estimate)	−222.22

Mr. KENNEDY. Mr. President, S. 43 meets the present need with an innovative and sensible approach that creates broad item veto authority, while still preserving the constitutional role of Congress in the legislative process. Under the proposed legislation, spending measures passed by the Senate and the House will be divided by sections into separate satellite bills, each of which will be presented to the President as an independent minibill for his approval or rejection.

In this sense, S. 43 is not a true line-item veto, since the President can reach only part way into appropriations bills—to sections of the parent bill, not to individual line items themselves. This is one of the key compromises that permits this measure to go forward as a statute, since a true line-item veto could only be enacted by the arduous route of amending the Constitution.

Even after the enactment of S. 43, Congress will still retain substantial control over the appropriations process, because the Senate and the House of Representatives will continue to determine how individual appropriations items will be packaged into the sections that will later be submitted satellite bills to the President. And, of course, any of these minibills vetoed by the President will be subject to a vote by Congress to override the mini-veto.

As recent history has demonstrated, Congress is not reluctant to use its power to override vetoes of spending measures. Since the Truman administration, 23 appropriations bills have been vetoed, and Congress has successfully overridden a third of these vetoes—triple the rate for all bills. And I have no doubt that Congress will not hesitate to use its override power to challenge unwarranted item vetoes by the President.

I will continue to resist insensitive cuts proposed by the administration in proven and effective programs. If the item veto is abused, I will urge the Senate to override the veto, and if necessary, to take it away. But the current crisis over the budget demands a strong and timely response by both Congress and the President; enactment of the item veto is an important procedural device to help reduce the current record deficits, and restore rationality to the budget process.

The possibility that clever drafting may be used to thwart the line-item veto is not a valid reason for opposing S. 43. It would be the height of irresponsibility for Congress to grant the power, and then undercut it by devious tactics that could not stand the light of day. If S. 43 is enacted, it deserves the fair trial period that the legislation envisions, and I am confident that Congress will see the wisdom of facilitating, not obstructing such a trial. With deficits projected near $200 billion for the foreseeable future, we face an unprecedented challenge to the ability of Congress and the executive branch to work together in the national interest. So far, we have failed to meet that challenge, and the stronger medicine of S. 43 is now appropriate.

It is also difficult to accept the position of critics that the item veto will only reach a relatively small portion of the trillion dollar Federal budget. Even if the new power has only a modest impact on the deficit, it is hardly an argument against the proposal that it does not do more. Even with the modest reach I anticipate, it can still be a worthwhile tool to help stem the tide of red ink that threatens to engulf the national economy.

I also doubt the prevailing assumption of the critics that President Reagan will confine the item veto power to domestic social programs. Obviously, he is unlikely to use the item veto against MX missiles or other weapons systems he has proposed. But he may find this new veto power a useful tool for eliminating wasteful

military spending. Certainly, it will be of interest to all of us to see the results of the 2-year trial period of S. 43—and the specific areas where the President chooses to use the power.

Finally, I doubt the fears of some that the item veto will encourage Congress to become even more irresponsible on Federal spending—on the theory that the President will be able to use the item veto to save us from ourselves. The current budget situation is so precarious that Congress is hardly likely to embark on any new binge of runaway spending. Just the opposite—to paraphrase Samuel Johnson, the prospect of the item veto may wonderfully concentrate the mind of Congress in enacting future spending bills.

In sum, everybody talks about balancing the budget, but nobody is presently doing much about it. Congress claims it is the President's fault for failing to use the veto—"stop us before we spend again." The President pleads in turn that he fervently detests the deficits, but does not have the power to fight them fully. So let us give it to him. Let us help him live up to his own rhetoric—and let us also see to it that Congress will be looking over its shoulder as it packages and passes future appropriations bills.

RECOGNITION OF SENATOR MATTINGLY

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia [Mr. MATTINGLY] is recognized for not to exceed 15 minutes.

LINE-ITEM VETO

Mr. MATTINGLY. Mr. President, I would like to thank the distinguished senior Senator from Massachusetts for his endorsement of the line-item veto. His expression of support is an indication of the broad range of attraction that the legislation has; it encompasses all ideologies and philosophies.

In an article printed today in the Los Angeles Times, Senator KENNEDY writes about the reasons for his support of the line-item veto proposal. I ask unanimous consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LINE-ITEM VETO: OUT OF THE SHAMBLES—PRESIDENT MUST HAVE MORE BUDGET POWER TO ADJUST BALANCE

(By Edward M. Kennedy)

Growing support for the line-item veto in the Senate and the House is a reflection of the Pogo Principle in contemporary politics—"We have met the enemy, and they is us."

The budget process is in shambles, the deficit is out of control, and Congress is the problem. Our system of checks and balances, which functions adequately, even brilliantly in most areas, is out of kilter in the area of the budget. Congress has too much power over the purse, and the President has too little. The line-item veto, while neither the miracle cure that proponents promise nor the disaster that opponents fear, is one of the few available tools to redress the balance.

The fundamental issue is fiscal responsibility, and it has little to do with partisan politics or the current budget wars that pit a Republican President against a Democratic House—and even against his own Republican Senate. A larger principle and a longer perspective are at stake.

When 100 senators and 435 representatives have primary responsibility for the budget, no one is adequately responsible. The traditional veto power of the President, which worked well until the 1970s, is still sufficient to keep most other legislation in check. But it is too unwieldly to impose significant discipline on the appropriations process. In 1983 and 1984 the 98th Congress produced 623 bills that were sent to the White House and signed into law. Only 27 were appropriation bills, but they made up in size and scope for what they lacked in number—dispensing hundreds of billions of dollars across the entire range of myriad federal programs.

Very occasionally Presidents have been bold enough to veto one or another of these behemoth appropriations bills because they objected to particular provisions. More often the massive nature of the modern appropriations process overwhelms the primitive veto power, and the President acquiesces in bills that by any standard are badly flawed. By giving the President a stronger role, the line-item veto would instill a new and needed measure of presidential accountability in federal spending and reduce the excesses of a congressional process that too readily focuses on individual districts and separate interests, not the national interest.

In any event the line-item veto is hardly a riverboat gamble. Forty-three states already give a similar power to their governors, who universally regard it as an indispensable tool of budget control—at least until they become U.S. senators.

Presidents since Grant have sought the line-item veto, but until now Congress has refused to cede the power—and with considerable justification, because earlier Congresses seldom brought in budgets that were unbalanced. Today Congress has only itself to blame for the irresistible pressure to yield some of its power to the President. We gave away the Treasury with the massive tax cuts and huge increases in military spending of the past four years, and the country will continue to sink into an irreversible morass of deficits unless corrective action is taken.

Everybody talks about balancing the budget, but nobody is currently doing much about it. Congress claims that it's the President's fault for failing to use the veto—"stop us before we spend again." The President pleads in turn that he fervently detests the deficits but does not have the power to fight them fully. So let's give it to him. Let's help him live up to his own rhetoric—and let's also see to it that Congress will be looking over its shoulder as it packages and passes future appropriations bills.

Mr. MATTINGLY. Mr. President, I have listened carefully to the statements in opposition to the line-item veto proposal. The speakers have been articulate, indeed, at times even eloquent in their arguments against the bill. But Mr. President, I must say that the debate has been characterized by more heat than light.

At a time when the problems that we face demand new solutions, we find our way hindered by a mentality that is more tunnel vision than it is visionary.

The arguments in opposition to the proposal appear to have as their common link a slavish devotion to the status quo; an inability to recognize that we must change the way we do things; a seeming fear of taking any action with real substance to it as opposed to the many legislative proposals that are considered and passed by this body that have little real impact but allow us to feel better for "having done something."

The debate has been characterized by the almost plaintive cry from the opponents for reassurance that the Senate will make no action whatsoever that deviates in the slightest way from the current procedures and processes that have brought us to our current budget and fiscal problems.

Well, let there be no mistake about it Mr. President, the item-veto proposal is not a sugar pill—it is a very real attempt to begin the effort of reversing the process that has led to an ever greater level of Federal expenditures at a time when congressional control and direction has diminished.

My distinguished colleague and friend, Senator EVANS, who has played such an instrumental role in developing this legislation and without whom it would not have been possible to gather such wide support for the idea, made a compelling case in his remarks last week about the inconsistencies contained in the arguments advanced by the opponents of the item veto. In their zeal to cite every alleged reason for voting against the legislation, they offer nothing more than a series of contradictory statements that, after careful analysis, make the case for the legislation not against it. We have heard arguments based on everything from unconstitutionality to fear of writers cramp.

Let me take a close look at just a few of them.

The argument is made that the proposal would not be an effective budget tool because it could not be applied against entitlement programs or interest on the national debt. Well, it is true that it would not touch those elements of the budget but the opponents continue to insist that it would never be used against items contained in the defense spending bill, I really don't believe that that has any basis in fact. Any President, no matter what his ideology, would no doubt be willing to excise those items in defense that are part of the problems that have

been so thoroughly identified and documented over the past year or so.

Opponents say item vote would not be an effective budget tool but the distinguished minority leader last week inserted into the RECORD a list of the names of 41 organizations that had contacted his office to express opposition to S. 43. What do my colleagues think is the glue that binds this common interest together? Are these organizations opposed to the bill because they fear it would be an ineffective budget tool? Are they opposed to it because they are concerned about a perceived increased workload of the House enrolling clerk? I do not think so. I think my colleagues know what the primary concern of these organizations is—it is a concern, Mr. President, a real fear that enactment of this proposal presents the very real possibility that the level of Federal spending will decrease.

What we have is an acute demonstration of the institutional forces that rally together in an effort to thwart any real effort at reform and progress. The special interests, in league with their friends in Congress and supported by the entrenched bureaucracy, zero in and portrary any effort that could lead to a reduction in Federal funding as a threat not only to their particular program and agenda but to mom, applie pie, and the flag as well.

It is that mentality, Mr. President, that makes reform so difficult. And this latest example is proof of why the national perspective that only the cheif executive has, is so important to the process.

I might add that that National perspective, held by every President as a result of his election by a majority of those who vote in the Presidential election is as valid under a Democrat Administration as it would be under one that is republican. In fact, I point out to my colleagues that I and many of the Senators who support the item veto trial, did everything we could to have the legislation enacted last year well before the Presidential election was decided.

Not an effective budget tool? To the contrary, Mr. President, to the contrary.

Item veto opponents say the proposal is structurally deficient because it would give too much authority to the enrolling clerks or that it would create thousands of smaller bills out of such legislation as last years continuing resolution and thus create an unmanageable paper flow.

We who favor the item veto trial are accused of granting vast new power to the Senate and House enrolling clerks when in fact the legislation does no such thing—it increases the authority of these clerks not one bit. In fact, contrary to what one might think after listening to such arguments, the enrolling clerks and other officers of the Senate and House already have been given a significant amount of discretionary authority by the Congress.

Most of my colleagues have used the legislative shortcut where we send an amendment to the desk that contains the direction: "At the appropriate place in the bill * * * etc." Well, who decides where the appropriate place is, Mr. President? Who now makes that judgment? That decision, Mr. President, is made initially by the legislative clerk or his staff and is subsequently agreed to or amended, in the case of an appropriation bill, by the very capable members of the Appropriations Committee staff.

In addition, at the beginning of each Congress, we grant unanimous consent to a request to bestow upon the Secretary of the Senate the authority to make technical and clerical corrections in legislation that has been passed by the Senate and which is to be transmitted to the House of Representatives. S. 43 states that no substantive revisions are to be made by the clerks; those instructions are plain; the intent clear. The distinguished chairman of the Committee on Appropriations last week asked who would determine what was substantive and what was not and the answer to him is the same judgment, the same authority, the same attention to duty and detail that guide the staffs of the Appropriations and other committees as they decide what are technical and what are not technical changes in legislation approved by this body. The language in our legislation is similar in wording and intent to that contained in the Budget Act. In my view, one must really strain to find its directive confusing or misleading.

My distinguished colleagues worry about the effect that the item veto proposal would have on legislation such as last years continuing resolution, stating that if the item veto had been in effect, the paperwork created within the CR under its provisions would have been unmanageable.

Have we actually reached the point, Mr. President, where change such as that suggested in this legislation is opposed on the grounds that it would make it difficult to continue to legislate in the manner that we did in October of last year?

The purpose of my reform proposal, Mr. President, is to attempt to begin to construct a system that will do away with such legislative hybrids, not perpetuate them, reform is undertaken in an effort to improve the system. It is not undertaken nor structured in a fashion that insures that it will conform to the current unwieldy, unworkable process.

We would find ourselves in an interesting position indeed, Mr. President, if we were to agree to adopt no new proposal, no reform, no suggestion if it were to intrude in any way or in any fashion on the way things are now done.

Confusion and contradiction abound in the arguments of the opponents, Mr. President. The fact that the chief executives of 43 States have successfully used the item veto is dismissed as having no bearing on use of such authority at the Federal level, but in the next breath we are advised of the judicial pitfalls that await us if we enact the item veto, based on the experience of the States.

My distinguished opponents assert that passage of the item veto would bring back the smoke-filled rooms and the deal making that at one time characterized politics and politicians and yet before we have a chance to absorb that argument, we are advised that the item veto is not needed because the President and his emissaries are carefully tracking legislation as it proceeds through Congress, pointing out to legislators what the President favors and what he does not and perhaps even—making some deals, Mr. President.

Arguments against the legislation based on its constitutionality deserve more serious consideration, but an honest, objective assessment of the question, seems to leave little doubt that, in fact, the proposal meets the constitutional test.

Most of my colleagues have had a chance to read the opinion of Mr. Johnny Killian as it appears in the additional views in the committee report accompanying the bill. I hope all Senators will read his opinion. I will read only the last paragraph.

Mr. Killian writes:

> Two questions are raised about S. 43 in terms of the constitution. First, would the bill in operation violate the lawmaking procedure set out in article I because the separated bills would not be passed again by both Houses. * * *

We have heard a lot of talk about the oath of office that all Senators take and I must say that I resent the implication that those of us who support this legislation are somehow in violation of that solemn oath. As if any one of us who has had the privilege of serving in this body would heed that vow more than some or all of the colleagues with which he or she serves.

None of us can bring anything less or anything more to the question than the qualities outlined so eloquently by Edmund Burke more than 200 years ago: "Our unbiased opinion, our mature judgment, our enlightened conscience."

And it is on that basis that this elemental, this critical question should be decided; not on the basis that the question of constitutionality represents an easy and a convenient way out of a difficult position or because it seems to represent a convenient way

to avoid a vote directly on the merits of the proposal that we seek to consider.

It appears to me that opponents of the line-item veto legislation, by obstructing consideration of the bill, are indicating a preference to consider the proposal as an amendment offered to another piece of legislation. Frankly, my preferred position was to have the legislation considered as a free standing bill but, believe me, I am always pleased to accommodate the wishes of my colleagues whenever possible.

By my count, Mr. President, 13 Senators have spoken against the legislation over the past week consuming the better part of 17 hours of the Senate's time. I have not spoken at length on the considerable merits of the bill because we must remember that we have not even reached the bill! Opponents of the legislation are debating and delaying the motion of the majority leader of the Senate to proceed to the consideration of the line-item veto proposal. In my mind, there can really be no serious debate about such a motion and I will not be drawn into lengthy discussion of the legislation until we, in fact, have the proposal before us.

Not only does the item veto proposal represent a first real step toward solving our budget problems, S. 43 has generated much thought and discussion on the whole range of budget and fiscal issues and it could serve as the vehicle for consideration of several of the innovative ideas and suggestions that have been mentioned during the past several weeks.

I was going to conclude with a comment about the obstructionism of the bill's opponents but it strikes me that a better description, somewhat related, is obscurantism.

My learned, distinguished colleagues will recall that the term was applied to those who opposed the enlightenment in the 18th century and is used more generally today to describe opposition to the diffusion of enlightenment.

I can only say that I remain willing to work with my friends to educate them, to do whatever I can to lead them to the proper path and hope that those efforts will be successful.

After all, those who were active 200 years ago during the "Age of Reason" were doing nothing more than what we propose—merely taking a close, critical look at previously accepted doctrines and institutions and deciding if they were still valid.

Mr. President, I urge my colleagues today to support the cloture motion.

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EVANS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. EVANS. Mr. President, I listened with interest to my distinguished colleague from Georgia [Mr. MATTINGLY], who has shown enormous leadership, consistent strong leadership, in bringing this issue of an item veto before the Senate of the United States—or at least, he has attempted to bring it before the Senate of the United States. We have watched, over the past week, strong measures by opponents to even keep us from getting at the heart of this issue and attempting to perfect it. They have used a filibuster to prevent the majority leader from conducting the affairs of the Senate, as I believe he should have the right to do, the privilege of procedurally setting priorities.

If this willingness to engage in a filibuster on the question of proceeding to a bill or resolution continues, we will soon degenerate into a squabbling series of filibusters, with all 100 Members of the Senate doing their share to attempt to set priorities and set the direction.

What will we have done to the order of the Senate? What will we have done to the tradition of the Senate?

I hope my colleagues will join with me shortly, as we have another opportunity to proceed to the bill itself, and allow us to engage in extended debate if that is necessary, and consider amendments if they appear to be appropriate. But if we are not allowed to perfect the bill, if we are not allowed to discuss the issue in front of us, then I think we have taken a long step backward in the traditions of this body.

We have so far proven ourselves incapable this year of effective budgetary action. We have missed every budget deadline so far this year by large margins, in spite of the best efforts of those who work daily in that field. No appropriations bills have come to the Senate for action as of yet, and October 1 looms closer and closer on the horizon.

Will we finally reach that ultimate state on October 1 of this year when no appropriations acts will have passed and we will be forced to wrap 100 percent of all appropriated spending into a continuing resolution? Will we quickly attach to it the barnacles and the encrustations of every special little item people would seek to get passed? And we would then face the President with the ultimate in a total veto.

Would he bring the Government of the United States to a halt? Would he veto the entire budget of the country? He would be faced with that unhappy prospect of a veto which is virtually useless because it is so draconian.

Many have suggested that there really is not a comparison between the 43 Governors who have item vetoes and the President. And of course, there are differences. But the major difference is that every State in this Nation has a unified budget which is presented to a Governor. A unified budget of all of a State's spending then ought to be subject to some distinguishing—to an item veto. Forty-three of our 50 States have given our Governors that privilege.

We are getting very close to a unified budget in this Congress. Eighty percent of all appropriated spending last year was in the continuing resolution. We may well reach 100 percent this year in the continuing resolution. And then, indeed, we will have backed into a unified budget with one major difference: we will present it all to the President, give him no item veto, and tell him, "Take it or leave it."

Mr. President, I do not call that an, appropriate balancing of power between the executive and the legislative branches of this Government. I think we have titled and continue to tilt drastically in one direction. And it is time we brought ourselves back to what is familiarly called a level playing field.

Mr. President, this morning's Washington Post had an exceptionally fine article written by the Senator from Georgia [Mr. MATTINGLY]. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LINE-ITEM VETO: AT LEAST DEBATE IT

The Senate is in the midst of a filibuster concerning the line-item veto even though the bill is not yet even before it. The opponents are not filibustering the bill itself but an attempt by Majority Leader Robert Dole to call the bill up for consideration.

Historically, opponents of legislation, no matter how ardent, would wait until legislation was before the Senate before beginning their filibuster. No matter what party controlled the Senate, the majority leader was allowed to set the agenda.

The line-item veto is an important proposal, and no one quarrels with the right of the opponents to attempt to talk it to death. But to filibuster the right of the majority leader to merely call it up for consideration is symbolic of a greater problem.

Congress is in the midst of an institutional crisis. The budget and spending procedures currently in place are a miserable failure. The Budget Act of 1974 never worked well, is not working now at all, and without some alterations will never work in the future.

There is a three-tier process that has to be completed before the federal fiscal year ends on Sept. 30. The budget resolution, the authorizing legislation and the appropriations bills all have to make it through House and Senate committees, floor action, conference committee and floor action for the second time before final congressional action is taken on spending.

There are not enough hours in the day or in the months to accomplish that by the end of the fiscal year, when the federal government runs out of money and the new budget begins on Oct. 1. We now have government by continuing resolution, a huge package containing hundreds of billions of dollars of funding. Last year's continuing resolution was for more than $400 billion. This year's version will probably be much the same or more.

We are now less than 2½ months from the end of the fiscal year, and there is no budget resolution nor are there immediate prospects for one. This logjam has backed up the entire system. Although some action has gone forward on some authorizing and appropriations bills without benefit of the money targets, few expect that many of the 13 appropriations bills will have been enacted by Sept. 30.

Congress may very well face one bill containing the funding for the vast majority of our trillion-dollar government. We will have round-the-clock sessions to pass a continuing resolution in order to keep the government from shutting down. The conferees will have to make late-night decisions on billions of dollars in spending. The final package will go to the president, and he'll have at best a few hours to decide whether to accept everything—the good, the bad and the ugly—or to veto it and tell hundreds of thousands of federal employees to close up shop and go home until something can be worked out.

This is the way to run the government? This is the way to make careful decisions on how to battle the deficit crisis?

The system is simply collapsing around us. The current process is successful in one area—self-protection. Not only is it not in danger from reform efforts, the majority leader of the Senate faces a filibuster when he attempts to call up a bill that would alter in a small way the current system.

The line-item veto in question is not even a permanent change. For two years it would allow the president to veto small sections of the larger appropriations bills, with Congress, of course, retaining the authority to override his veto. If this does not work well at the federal level—as it does in the 43 states that have the item veto—or if the president abuses his authority, the line-item veto will not be renewed by Congress and it will automatically die at the end of two years.

No claim is made that the line-item veto would immediately resolve the deficit problem. It is just a first step toward reforming the current system. Other answers must be found. But the current system is so politically comfortable in the narrow sense of personal power that a small step toward reform can't even be debated on its merits on the floor of the Senate.

To the defenders of the status quo, I say: Oppose the line-item veto if you will—but let's debate it. Come up with your own ideas for improving the budget and spending process. Let's get them out in the open, on the floor for debate. But don't be so afraid of change that you filibuster even the discussion of ideas.

Mr. EVANS. Mr. President, let me serve notice that we will vote on this issue. We ought to be allowed to vote on the issue. We must vote on this issue. If it is necessary. If it requires proposing an amendment to every Appropriations Act that comes before the Senate; to propose an amendment to the continuing resolution itself; to propose an amendment to the debt limit—someday, somehow, somewhere, we will get a vote on this issue.

I suggest that the cleanest, the best, and the most appropriate way is to allow this issue to be debated separately. The debate should be now, when we have the time and the opportunity to do so.

At this time, I would not support a constitutional amendment for a line-item veto. I suspect that I join virtually every other Member of this body in not quite knowing, not being absolutely sure, as to how it would work or how it would be used. But this proposal makes eminent good sense. It gives us a 2-year trial period. It has a sunset clause. It will allow us, without very much danger, to give it a try, and I suggest that that is what we should do.

Mr. QUAYLE. Mr. President, I am pleased to join with 46 of my Senate colleagues in sponsoring S. 43, a measure to provide the President with the authority to exercise a veto of line items in spending bills for a 2-year period. I believe that the President should be granted the line-item veto, a prerogative now accorded the Governors of 43 of our States.

History shows that the Framers of our Constitution were so chastened by their colonial experiences under British rule that delegates to the Constitutional Convention in Philadelphia in 1787 never even considered the question of giving the executive the power to veto only portions of a bill. Yet dissatisfaction with the extent of the President's veto powers under article 1, section 7, soon emerged. President Ulysses Grant supported the line-item veto because it "would protect the public against the many abuses and waste of public moneys." Over the years, some 150 proposals to institute the line-item veto have been introduced in Congress.

In his 1984 State of the Union Address, President Reagan called the line-item veto "a powerful tool against wasteful and extravagant spending," and he should know; he used the line-item veto as Governor of California. In his 1985 State of the Union Address in early February, the President repeated his request "for the authority used responsibly by 43 Governors to veto individual items in spending bills," and he specifically endorsed S. 43, Senator MATTINGLY's initiative permitting "a 2-year trial run of the line-item veto."

For some item, I, too, have supported giving the President the line-item veto, rather than requiring him to veto an entire measure because it includes one or a number of offensive expenditures. As the outgoing Director of the Office of Management and Budget, David Stockman, has noted, this proposal would "create an important tool by which the President could eliminate ill-advised and wasteful appropriations," and furthermore it "could play a measureable role in efforts to reduce unnecessary Federal spending."

In these times of megadeficits, I firmly believe the line-item veto is a tool that the President should have at his disposal.

Those who have reservations about granting the President this authority should bear in mind that S. 43 includes two provisions designed to protect the constitutional balance of power between the legislative and executive branches. The bill retains the constitutionally mandated requirement that Congress may override a President's veto if two-thirds of both Houses vote to do so. In addition, the line-item veto authority that would be granted the President under S. 43 would expire 2 years after enactment and could be extended only by an act of Congress. Given the likely benefits of providing the President with line-item veto authority and the bill's stipulation that he would be granted that authority for only 2 years, S. 43 would authorize a useful and reasonable experiment which could be curtailed or continued as its results may warrant.

To be sure, the line-item veto is not a panacea. It will not eliminate the deficit singlehandedly. However, in times when fiscal responsibility on the part of government is of paramount importance, we in Congress can advance the economic future of our Nation by implementing all available weapons to combat wasteful and irresponsible Government spending. National polls have shown there is strong support for allowing the President to exercise this authority to counter extravagant spending items.

The true advantage of this measure lies in what Alexander Hamilton described in the Federalist Papers as "anticipated" benefits. The threat of a potential veto can serve as a powerful disincentive to legislators tempted to attach extravagant, wasteful riders on to appropriations bills. In this sense, I expect S. 43 will contribute substantially to vital efforts to bring government spending under control, and I urge my colleagues to adopt this legislation.

CLOTURE MOTION

The PRESIDING OFFICER. One hour having passed since the Senate convened, the clerk will report the motion to invoke cloture.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of S. 43, to provide that each item of any general or special appropriation bill and any bill or

joint resolution making supplemental, deficiency, or continuing appropriations that is agreed to by both Houses of the Congress in the same form shall be enrolled as a separate bill or joint resolution for presentation to the President.

Bob Dole, Mitch McConnell, Al Simpson, Chuck Grassley, Jeremiah Denton, Orrin G. Hatch, Paul Laxalt, Mack Mattingly, Bob Kasten, William Proxmire, Daniel J. Evans, John Warner, Strom Thurmond, Paul Trible, Chic Hecht, John East, John H. Chafee.

CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

[Quorum No. 13 Leg.]

Byrd	Matsunaga	Sasser
Evans	Mattingly	Weicker
Harkin	Metzenbaum	
Hatfield	Murkowski	

The PRESIDING OFFICER (Mr. MURKOWSKI). A quorum is not present. The clerk will now call the names of the absent Senators.

The legislative clerk resumed the call of the roll, and the following Senators answered to their names:

Abdnor	Glenn	Mitchell
Andrews	Goldwater	Moynihan
Armstrong	Gore	Nickles
Baucus	Gorton	Nunn
Bentsen	Gramm	Packwood
Bingaman	Grassley	Pell
Boren	Hart	Pressler
Boschwitz	Hatch	Proxmire
Bradley	Hecht	Pryor
Bumpers	Heflin	Quayle
Burdick	Heinz	Riegle
Chafee	Helms	Rockefeller
Chiles	Hollings	Roth
Cochran	Humphrey	Rudman
Cohen	Inouye	Sarbanes
Cranston	Johnston	Simon
D'Amato	Kassebaum	Simpson
Danforth	Kasten	Specter
DeConcini	Kennedy	Stafford
Denton	Kerry	Stennis
Dixon	Lautenberg	Stevens
Dodd	Laxalt	Symms
Dole	Leahy	Thurmond
Domenici	Levin	Trible
Durenberger	Long	Wallop
Eagleton	Lugar	Warner
East	Mathias	Wilson
Exon	McClure	Zorinsky
Ford	McConnell	
Garn	Melcher	

The PRESIDING OFFICER. A quorum is present.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the motion to proceed to the consideration of S. 43, a bill providing for a line-item veto, shall be brought to a close. The yeas and nays are mandatory under the rule. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Florida [Mrs. HAWKINS] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] is necessarily absent.

The PRESIDING OFFICER (Mr. CHAFEE). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 41, as follows:

[Rollcall Vote No. 157 Leg.]

YEAS—57

Abdnor	Gorton	Murkowski
Armstrong	Gramm	Nickles
Boren	Grassley	Nunn
Boschwitz	Hatch	Pell
Chafee	Hecht	Pressler
Cochran	Heflin	Proxmire
Cohen	Heinz	Quayle
D'Amato	Helms	Roth
Danforth	Hollings	Rudman
DeConcini	Humphrey	Simpson
Denton	Kassebaum	Specter
Dixon	Kasten	Stevens
Dole	Kennedy	Symms
Domenici	Laxalt	Thurmond
East	Leahy	Trible
Evans	Lugar	Wallop
Exon	Mattingly	Warner
Garn	McClure	Wilson
Goldwater	McConnell	Zorinsky

NAYS—41

Andrews	Glenn	Metzenbaum
Baucus	Gore	Mitchell
Bentsen	Harkin	Moynihan
Bingaman	Hart	Packwood
Bradley	Hatfield	Pryor
Bumpers	Inouye	Riegle
Burdick	Johnston	Rockefeller
Byrd	Kerry	Sarbanes
Chiles	Lautenberg	Sasser
Cranston	Levin	Simon
Dodd	Long	Stafford
Durenberger	Mathias	Stennis
Eagleton	Matsunaga	Weicker
Ford	Melcher	

NOT VOTING—2

Biden	Hawkins

The PRESIDING OFFICER. On this vote, the yeas are 57, the nays are 41. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is not agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

(At this point, Mr. BYRD addressed the Senate on the line-item veto, and his complete remarks appear later in today's RECORD. During Mr. BYRD's remarks the following occurred:)

Mr. BYRD. Mr. President, I ask unanimous consent that I may yield to the distinguished majority leader without the RECORD showing an interruption in my reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

LINE-ITEM VETO

Mr. DOLE. Mr. President, I want to indicate to my colleagues that there will be another cloture vote on the motion to proceed tomorrow. I would also like to note that the distinguished Senator from Florida was on her way to the floor from a memorial service but was denied the right to vote on the cloture motion. That is another reason we will have another cloture vote tomorrow.

But I think I know what the outcome will be. I think it is fairly certain that we will never quite reach 60 votes on the motion to proceed. But I checked with the legislative affairs people at the White House and I indicated I thought at least we should have one additional vote. There were two absentees today who I think, had they both been here—I know one would have voted for cloture, and I think Senator BIDEN of Delaware would have voted for cloture. That would have been 59 to 41—one vote shy of letting us get on to the bill. Since there is not anything else that is pressing right at this time we are trying to find bills to bring before the Senate. I want to indicate that I have had a number of inquiries as to whether this is the last cloture vote, and whether there will be additional votes. But, as I have indicated, there will be a cloture vote tomorrow. There will be another cloture petition filed today. I am not certain whether we will have a vote on cloture on Thursday.

But, if the distinguished minority leader will permit me, I urge my colleagues to help us wrap up some of these legislative matters. There are a number of items that I understand can be cleared with the cooperation of maybe one Member on either side, or whatever. We would like to dispose of a number of those bills, and maybe some yet this evening. But we will not be in late this evening. I doubt—and I think I can say—that there will be more rollcall votes today.

Mr. BYRD. Mr. President, I yield to the distinguished Senator from Georgia under the same understanding: that there will be no interruption of the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, hopefully we can reach 60 votes on S. 43 and at least be allowed to bring up the bill.

I would like to say to the majority leader and to the minority leader also that I do not want to take the course of offering this as an amendment to the appropriation bill later on. But if that is the only course left, I intend to do that sometime this year.

Thank you.

Mr. BYRD. Mr. President, I yield again to the distinguished majority leader under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FARM BILL

Mr. DOLE. Mr. President, if I can make one other plea to my colleagues, we had hoped this afternoon to report out a farm bill. But there has been an objection to the committee meeting. I am not certain from which side. It does not really make any difference. It is a rather critical measure for many in this body, particularly those of us who come from wheat States. I see one Senator leaving the chamber from a wheat State. It is important to cotton, soybeans, rice, wheat, and feed grains.

But I hope, if there is some objection, whoever objected, will identify themselves, and if there is a problem we can work it out. We would certainly be happy to resolve that.

Mr. BYRD. Mr. President, I say to the distinguished majority leader that the request was cleared on this side for the Committee on Agriculture to meet.

Mr. THURMOND. Mr. President, will the minority leader yield?

Mr. BYRD. Mr. President, I yield to the distinguished Senator from South Carolina under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I yield the floor, if I can get consent that when I resume these good editorials, it not constitute a second speech, and if I can avoid having my reading of the editorials interrupted in the RECORD.

The PRESIDING OFFICER. That was the purpose of the unanimous-consent request. It was granted.

The Senator from South Carolina is recognized.

Mr. DOLE. Mr. President, will the Senator from South Carolina yield to the Senator from Nebraska? I think he was asking for recognition.

Mr. THURMOND. I am very pleased to yield to the distinguished Senator from Nebraska. Can I make a statement of about 1 minute?

Mr. EXON. I will take 30 seconds. Go ahead. I wanted to comment while the majority leader was on the floor.

Mr. THURMOND. Mr. President, I want to echo the request of the majority leader.

I do not know of any segment of our population in this country that is having a more difficult time today than the farmers. They are not getting as much for their produce as it costs to produce it. We certainly need this farm bill. There are foreclosures taking place all of the time now. Our farmers deserve this consideration. I certainly hope there is no objection. If they will identify themselves, so some of us can talk to them, maybe we can get together, negotiate, and get the farm bill out. The farmers are crying for help. They need help. I hope the Senate will not deny them.

Thank you very much, Senator.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, while the distinguished majority leader and my colleague from Georgia are on the floor discussing the line-item veto, I think it is only fair that I explain to them the position of the Senator from Nebraska.

I am a cosponsor of the line-item veto, have been and will continue to be. However, I feel that my patience gets worn thin somewhat on this issue, and I suspect 60 votes are not going to be mustered to proceed to consider the bill. And even if that were successful, I would anticipate that a filibuster would ensue on the bill itself. So I simply say that when you have an issue like this on which the Senate is closely divided, I do not know how long I will continue to support tying up the Senate. I would certainly agree with my friend from South Carolina that we have a very pressing matter with regard to agriculture. I hope we can get an agriculture bill out.

Having said that, I say, though, if we bring out a bill as originally envisaged by the administration, if we bring out a bill that would be bound by the budget restraints that took part in the famed close vote on the budget while this Senator was in Bethesda Hospital, I say maybe it would be better that we bring out no bill at all because, if we do bring out a bill like that, I think there are very likely to be further filibusters on that issue. So I agree with the distinguished Senator from South Carolina that agriculture is a tremendously troubled industry today. They are deserving of a thoughtful farm bill. So far as I know, no thoughtful bill is about to be passed out of the Senate Agriculture Committee.

I would certainly like to know, if possible, what is in the wind with regard to busting the budget that the U.S. Senate passed with regard to agriculture because bust that budget we must if we are going to write any kind of an acceptable farm bill under the conditions that exist today.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, I do not disagree with the distinguished Senator from Nebraska, that there are other urgent things pending. I certainly agree that perhaps we should not have an additional cloture vote. Very honestly, the calendar is not that full. The farm bill has not yet been reported. There was an unusual circumstance today when one Member was denied the vote. We would like to have the final record reflect that vote. But I would guess we have about reached the point where if we cannot get 60 votes, there are other ways to try to get a line-item veto approved.

I know that many in this body would like to change the rules so that you could proceed to legislation, and not be denied the right to take up matters. But those rules have not been changed. We have every right to play by the rules as they are. I think after tomorrow's vote we will take a hard look at the situation. I would guess the numbers will be pretty much the same.

I share the Senator's view about the so-called farm bill. There has never been a perfect one, but we have been working in our committee for a long time. We had hoped to report a bill today. We understand there was an earlier objection to our meeting, but it was lifted late in the afternoon. The distinguished chairman of the committee had to have some medical care. He has something in his right eye. That explains why after the objection was lifted we did not meet.

I assure the Senator from Nebraska we hope to report out a good bill, perhaps tomorrow instead of today.

Mr. EXON. Will the Senator yield for a question?

Mr. DOLE. Yes.

Mr. EXON. It has been a little confusing to me to understand what is going on with the numbers. I am sure the majority leader will recall the budget that passed the Senate called for roughly a $15 billion cut to the baseline for a 3-year period. The House of Representatives backed a bill for a $10 billion cut. Earlier, the administration had proposed an $18 billion cut.

Is it not true that all of the bills that supposedly are being considered by the Agriculture Committee would require far above, authorizationwise, the $15 billion cut as envisioned and passed in the U.S. Senate by our budget action?

Mr. DOLE. That is correct. I do not believe we will achieve those savings. In fact, I doubt that we will achieve the House savings. There will be some reasonable savings on agriculture, but I must say since we made all those decisions, as the Senator knows, being on the Budget Committee, the baselines have increased, reflecting an increase in the cost of all these programs. The difficulty right now, very honestly, is, in addition to some detail, trying to determine how we can reduce the cost of each of the programs on a fair basis and still not report our a budget-buster.

That is being addressed. The distinguished Senator from Arkansas, who is a member of the committee, is here now. We all have different commodities we have an interest in. I would hope we could come close to what we should do on the budget side and still have a good farm bill.

Mr. EXON. I thank the majority leader.

Mr. MATTINGLY. Mr. President, I would like to make reference to the

statements of Senator EXON about filibuster and delay. I think we have to look and see who the people are, really, who are conducting a filibuster. It is not we who are the proponents of the bill, not the Senator from Georgia nor the Senator from Nebraska, but, rather, the opposition, who do not want the bill brought up. Those of us who support the legislation are prepared to vote and yield to the judgment of the Senate.

I have been here 4½ years and have watched filibusters come and go. Sometimes tempers flare up a little bit. I hope we are not at that point yet.

As I said, I hope we will be able to get to the bill and have the majority will of the Senate prevail.

What we see now are the opponents trying to use the rules of the Senate to keep from even considering the bill. Hopefully, this will be worked out. The delay has not created a legislative backlog. Of course, sometimes maybe a backlog is not a bad idea. I suppose that depends on the legislation. Hopefully, that is not the case as pertains to the line-item veto.

When we go back home, we hear that people want something done with the deficit and the budget process. Item veto is a tool that will change the antiquated process which we now have. I think the Senator from Nebraska, myself, and many others want some changes made. This is just a starting point, the item veto, in making those changes. I appreciate the support of the Senator from Nebraska.

Mr. EXON. I thank my friend from Georgia.

This is an important issue, of course. But the point I was trying to make is that I am sure the Senator from Georgia, being a son of the great South, knows the filibuster can be used effectively when people feel as strong as they do about issues.

I know this issue is very strongly felt in Nebraska because I had experience with it while I was Governor. We were able to change the constitution in midterm, with my help, to give the Governor line-item veto. That is one of the reasons why I am in support of giving this to the President now.

I recognize there is not a direct parallel between the Presidency and a Governorship, however.

I think my colleague from Georgia might like to know that that issue evidently is not as burning an issue in Nebraska as I thought it was.

Being home this past weekend and reading the papers, I went to the Sunday section of the paper that lists the important key votes in both the House and the Senate. I was certain, because of the feeling of support generally for the line-item veto in Nebraska, that that first vote on cloture would be headlined.

I was quite surprised to see that the headline was not with regard to the line-item veto. The headline, rather, was, "House votes to eliminate funds for braille for Playboy," which I thought was an indication that Nebraskans probably had their priorities mixed up a little bit.

We are not capturing the headlines in Nebraska with regard to the line-item veto, but, rather, Playboy seems to be capturing the headlines of at least some of our press.

Mr. MATTINGLY. Let me just say that what we are trying to do may not make the headlines but it will sure make a big difference in the taxpayer's wallet if we can begin to control the Federal budget. I am certain that most people do not understand the 1974 Budget Impoundment and Control Act. This is probably a good starting point for people to focus on. It is severely, if not fatally, flawed and the process that it set up should not be immune from change and revision.

Mr. PRYOR. Mr. President, I wonder if the Senator from Nebraska or the Senator from Georgia would yield? I am not sure which one has the floor.

Mr. MATTINGLY. It is yours.

The PRESIDING OFFICER. The Senator from Arkansas has the floor.

Mr. PRYOR. Mr. President, I have enjoyed this little colloquy. I had no prior knowledge or thought of entering into this discussion, but I find it a very interesting discussion between my two friends. Both of them, I believe, share the same feeling about the need for a line-item veto. One is my friend who is the present Senator from and former Governor of Nebraska, who mentioned the need that people in his State felt to give the line-item veto to the Governor at that time. I also say to the Senator from Nebraska, when he talks about changing the Constitution, I think that is a lot different from suspending the Constitution. I think we are suspending the Constitution with the provision now proposed by the very distinguished Senator from Georgia, my friend from Georgia.

Mr. MATTINGLY. If the Senator will yield, if he would vote to allow the bill to come up before the U.S. Senate, then we would debate those constitutional questions. But the question before the Senate now is a motion to proceed to the bill, not whether the bill is constitutional or any other aspect of it. The real question is, will we allow the U.S. Senate to proceed to the bill? I would be happy to debate those other issues with the Senator and try to answer his question at the time that we have a chance to debate the legislation.

Mr. PRYOR. I know yesterday, I asked my friend from Georgia to give me maybe 10 ideas or examples of what the President might decide to line-item veto. I do not know if the Senator from Georgia responded to that. It was an informal surrounding; I did not expect him to. But I think these are elements of curiosity that this body would have about areas that the President might decide to line-item veto in any proposal that we had before us.

Mr. MATTINGLY. The Senator's curiosity would be satisfied if we could bring the bill to the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, it is so ordered.

Mr. BYRD. I thank the Chair.

Now, Mr. President, I ask unanimous consent that I may yield the floor at this time and that the resumption of my statement not count as a second speech.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

The PRESIDING OFFICER. The Senator from Tennessee.

LINE-ITEM VETO

Mr. GORE. Mr. President, I rise today in opposition to S. 43, which would, in effect, create a line-item veto. I am strongly committed to cutting the Federal budget deficit. But I believe this legislation would cause more harm than good and may actually contribute to fiscal irresponsibility.

I realize that there is considerable popular support for giving the President the power of a line-item veto. That support reflects a sincere, widespread feeling that something dramatic must be done to reduce these intolerably high deficits. But a measure such as this is relatively easy to support because it does not in and of itself require people to lose their benefits or pet projects. The fact is, cutting the deficit will require making some very hard decisions.

I am going to discuss today some of the reasons that I oppose S. 43, which would break the 13 appropriations bills into thousands of separate bills and operate in the words of the Washington Post, as a legislative "Veg-o-matic."

Let me start by quoting a few current or former Members of Congress:

Representative MICKEY EDWARDS said:

> I can't conceive of why a conservative would support a line-item veto. Conservatives think government ought to be limited and that power should not be concentrated.

If you want to make the point that Congress is at fault for excessive spending, this is the worst way to do it.

Representative WILLIS GRADISON said:

The majority of the money he could veto would be defense. Is it wise to create a system where future presidents could so easily cut defense spending?

Senator CHARLES MCC. MATHIAS said:

I suggest that clever proposals to solve straightforward problems in indirect fashion usually cause more mischief than good . . . The president has asserted that he wants this "line-item veto" power in order to reduce the deficit and balance the budget. Why, then, doesn't the president simply send to the Congress a balanced budget?

Former Representative Barbar Conable said:

I don't think Congress is going to give a significant legislative power to the president. Most of the people advocating the line-item veto would not be advocating it if Walter Mondale were president and if the defense appropriations bill were at issue.

Senator DALE BUMPERS put it most simply when he said:

The line-item veto is "a terrible idea."

Senator MARK HATFIELD who has spoken so eloquently in the last several days on this subject, said:

It baffles me that we are considering a proposal that seeks to control the only portion of the budget we have been able to control—not only control, but reduce—in recent years. This is not the path to meaningful deficit reduction.

Here are nine reasons why I oppose S. 43:

First, it is based on the false assumption that Congress is largely to blame for the deficit. In the last 4 years, the President has requested a total of $2.067 trillion for all appropriations, excluding entitlements and interest on the national debt. Congress has appropriated a total of $300 million more than President Reagan has asked for. That's a scant 0.00015 percent more than the President's request.

Historically, the national debt prior to the 1960's was built largely on the expenses of wars. Presidents have been no better than Congress in controlling spending. Recent boosts in Government spending have been mostly defense-oriented—and they've been engineered by the President.

Is Congress to blame for the deficit? Here's what Norman J. Ornstein of the American Enterprise Institute said in a recent essay:

The history I have recounted suggests that Congress, though a key participant in budget decisions, is not inherently inclined, for political reasons, to spend federal dollars at will or to pile up injudicious deficits. Still, a substantial literature in political science casts doubt on Congress's institutional abilities, given the demands and incentives of its individual members.

Although both lines of argument are credible, a wholesale acceptance of them would lead us to expect congressmen to have increased the share of pork-barrel type programs in the past few years and to have at least protected these beneficial programs for the future. The opposite is true. By indexing first social security and then other entitlement programs, congressmen consciously reduced their ability to use federal budget dollars in the interests of their reelection. In the future, as entitlements grow automatically, defense skyrockets, and the interest on the national debt accumulates, the share of the budget devoted to the rest of government—which includes most of the items we think of as special interest or parochial pork—will decline markedly.

Consider the component parts of the federal budget from 1966 to 1986. Grants to state and local governments together with other federal operations—the category that includes the programs congressmen can boast about when they run for reelection—constituted 25.3 percent of the budget at the height of the Great Society. Entitlement indexing began in 1973; by 1976 other domestic spending was only 19.7 percent of the budget; in the first Reagan year, it was down to 17 percent; by 1986 it will be less than 14 percent. The number, in other words, has regularly and significantly declined. In short, Congress has directly and greatly reduced the areas where congressmen could use spending to their individual advantage. As political scientist Douglas Arnold has noted, Congress has moved dramatically in the past two decades toward formula grant programs that remove the discretion from individual congressmen to affect or claim credit for particular benefits.[11]Economist Gardner Ackley offers additional, macroeconomic evidence that raises doubts about the thesis that our government structures inevitably swell federal programs and national debt.

The Congress of the United States is not, of course, a selfless and noble institution. Members of Congress have other ways to secure their enormous electoral advantages. Defense has become a major focal point for particularized benefit giving, a direction encouraged by actions taken by major military manufacturers in the private sector. Rockwell International, for example, explicitly ensured that subcontracts for the B-1 bomber were spread to nearly every congressional district, so that Congress would view funding for the bomber favorably and would see electoral debits in cancellation or slowdown. Moreover, many members of Congress have found that the tax code, through tax expenditures, is an efficient and little noticed way to spread benefits to important groups and to keep economic perquisites flowing to constituencies.

Nevertheless, a look at the components of the federal budget shows a decline in constant dollars through the 1980s in domestic spending other than social security and Medicare, great increases in formula programs, and reductions in growth of the so-called pork-barrel programs. These facts must give pause to those who would place all blame for federal spending increases and expanding deficits on the venal political habits of individual congressmen.

A closer look at our political institutions and relations casts doubt on the efficacy of some of the major proposals that have been advanced to clean up our deficit problems once and for all. Institutional devices can matter, and, as we have seen, Congress has repeatedly responded to budget stress through internal reform, usually to centralize its own budget processes. When public attitudes and larger events—like a demand for spending or a change in priorities or a large war effort—do not intervene, these institutional devices can be meaningful and important. But some work better than others.

For many decades the main institutional device Congress relied on to limit deficits was the requirement of periodic votes to increase the national debt limit. This device had been expected to restrain spending and force Congress to pay serious attention to growing deficits. But, driven by the demands of presidents and limited by the constraints of public and interest group pressure, Congress has viewed the votes on the debt limit largely as nuisances. When for any reason Congress has been unable to agree to increase the debt limit, a game ensues in which the government comes perilously close to being brought to a halt, until common sense prevails and the limit is finally raised. Indeed, this device has proved to be a wonderful way for many members of Congress to eat their cake and have it too: voting consistently both against increases in the debt limit, to demonstrate to their constituents their concern for fiscal responsibility, and for programs and appropriations that increase federal spending and the debt, thus requiring the votes to increase the debt limit.

Some limited reforms would help. But the history of budgeting in America suggests that constitutional change would be both unnecessary and ineffective, and perhaps even detrimental.

Second, less than 15 percent of the Federal budget would even be vulnerable to a line-item veto. It could not be used on revenue measures. It could not be used on permanently funded entitlements and other mandatory costs like interest on the Federal debt. These items amount to half of the budget and are not handled in appropriations bills.

Of the remaining half of the budget subject to appropriation, more than half goes to defense, foreign aid, and annually funded entitlements. That leaves less than 15 percent of the budget—the nondefense domestic discretionary items. And that's been the only declining portion of the Federal budget recently—from $97.3 billion in fiscal 1980 to $65 billion in fiscal 1985, stated in 1972 constant dollars.

Our colleague, the distinguished Senator from Oregon, Mr. HATFIELD, addressed this issue before the Rules and Administration Committee, on which I serve, last May 14. I quote what he said on this occasion:

At the outset, it should be made clear in any discussion of the line-item veto that it is not a mechanism to achieve meaningful reductions in the federal deficit. A look at the composition of federal spending indicates otherwise. As proposed, line-item veto authority would apply only to individual items in appropriation bills. It would not be used on revenue measures. It also would not be applied against the largest and fastest growing portions of the budget, such as permanently-funded entitlement spending and other mandatory costs such as interest on the federal debt. These items account for half the budget and are not funded in appropriation bills.

Of the remaining half of the budget subject to appropriation, more than half goes

for defense. I doubt very much that the current Administration, even though committed to spending restraint, would exercise this grant of power much on defense or foreign aid items. Nor could this veto be used to reduce entitlements funded in annual appropriation Acts—items which cannot be reduced or eliminated without changes in substantive law.

What it boils down to is less than 15 percent of the budget, the non-defense domestic discretionary appropriation items. These activities include education assistance, community and regional development, law enforcement, environmental protection, health research, energy development, Agriculture Aid, and a host of other vital Federal responsibilities.

This small fraction of the Federal budget—the target of the line-item veto—has actually been the only declining portion of the federal budget in recent years, falling from $97.3 billion in fiscal year 1980 to $65.0 billion in fiscal year 1985 in 1972 constant dollars, a 33 percent reduction.

It baffles me that we are considering a proposal that seeks to control the only portion of the budget we have been able to control—not only control, but reduce—in recent years. This is not the path to meaningful deficit reduction. Indeed, we could eliminate all nondefense domestic discretionary appropriation items and the deficit would still exceed $100 billion in fiscal year 1986.

So, Mr. President, anyone who tells you that the proposal before us would eliminate the deficit is simply not laying out the facts as they really exist.

At that same hearing before the Rules Committee, we heard testimony from Allen Schick of the American Enterprise Institute, a very thoughtful analyst, well known to those Members of the Senate who have gone to the seminars put on over the years by the Congressional Research Service. He has since moved on to the American Enterprise Institute. He testified that the bill would only apply to a small fraction of the budget and he speaks as an expert, in my opinion. He said:

Current practices offer meager support for the proposition that the item veto would enable the President to pluck high spending items from appropriation bills. The lumping together of appropriation items into a single paragraph or account has been going on for more than half a century (often at the initiative of the executive branch which welcomes the flexibility provided by broader appropriations). As a result, the bulk of federal spending is now concentrated in a small number of accounts. Although the federal budget is divided into more than 1,100 accounts, data prepared by the Senate Computer Center reveal that the 50 largest accounts add up to more than 80 percent of total outlays. These huge accounts are of two types: permanent appropriations (such as for social security and interest on the public debt) which become available without any action by Congress, and omnibus appropriations (such as for health and education programs) which combine numerous activities in a single account.

The permanent appropriations, as well as other expenditures outside the annual appropriations process, would be beyond the reach of the item veto. Significantly, therefore, many of the programs which have had the highest growth rates in recent years would not be controlled by the S. 43 mechanism. Moreover, as Norman Ornstein and others have noted, defense appropriations would be the main category of expenditure covered by the item veto. According to some computations, if defense and mandatory spending were removed, the item veto would apply to the less than 10 percent of outlays allocated to discretionary domestic programs.

An examination of nondefense discretionary programs shows that the big, controversial dollars are in omnibus accounts, each of which is comprised of multiple activities. Omnibus accounts are like appropriation bills: just as the President often is impelled to sign a sprawling appropriation bill into law even though he opposes some of its provisions, so, too, a President armed with an S. 43 veto might find it expedient to sign an entire account into law even if he disapproved of the spending levels set for some of the items in it.

The logic of the item veto is that the more discrete an appropriation, the more vulnerable it is to presidential veto. But itemized appropriations offer little opportunity to cutting federal expenditures. If the smallest 1000 accounts (out of the 1150 mentioned above) were terminated by presidential veto, the spending reduction would be less than that targetted by the Senate in the deficit reduction package recently approved by it. The plain fact is that the item veto is ill-suited to control spending in an era of lump-sum appropriations.

Mr. President, the third reason I oppose S. 43 is that it would tip the balance of power to the President in a very big way.

The Supreme Court has been reluctant to permit the expansion of one branch of government beyond that expressly provided, as evidenced in the Chadha legislative veto decision.

Let me refer to a statement given to the Rules and Administration Committee by Louis Fisher of the Congressional Research Service of the Library of Congress on this point:

What effect would the Mattingly bill have on the separation of powers? It is true that the bill contains a sunset clause limiting the item-veto authority to a two-year test period. Moreover, the form of appropriations bills and their subdivision by enrolling clerks remain within the exclusive control of Congress. Yet the shift of item-veto authority to the President would augment presidential power, at least in the short run. By how much we cannot say, but the balance will change.

Also altered will be the concept of a national budget. When Congress passed the Budget and Accounting Act of 1921, it placed upon the President the responsibility for submitting a budget. At the same time, it retained complete freedom to alter the President's budget, whether through increases or decreases. The final size and shape of the budget, then, was a legislative prerogative that Congress consciously and deliberately reserved to itself, subject to the President's general veto power. Congress rejected proposals that would have prohibited it from increasing the President's budget unless it had the approval of a department head or could secure a two-thirds majority.

The Mattingly bill changes the policy adopted by Congress in 1921. The President can be expected to exercise his item veto against congressional add-ons and congressional priorities that he opposes. The final size and shape of the budget will resemble to a much greater degree what the President submitted. As with the general veto, Congress will find it difficult to muster a two-thirds vote in each House to override a President's item veto.

The Economic Report issued in February 1985 is quite candid in explaining the use to be made of the item veto. As noted on page 96 of the report, adoption of the line-item veto "may not have a substantial effect on total Federal expenditures . . . less than one-half of the Federal budget would be subject to a line-item veto, and most of that would be for defense."

(Mr. PRESSLER assumed the chair.)

Mr. GORE. Mr. President, let me go back and read that again because I think it is very significant. This is a quote from the economic report issued in February of this year to the Congress. Here is the description on page 96 of the anticipated effect of the line-item veto so earnestly sought by the executive branch. The line-item veto:

May not have a substantial effect on total Federal expenditures. Less than one-half of the Federal budget would be subject to a line item veto and most of that would be for defense.

Continuing with the quotation from Mr. Fisher's statement:

But the item veto is available not merely to restrain spending but "to change the composition of Federal expenditures—from activities preferred by the Congress to activities preferred by the President."

What is at stake, then, is not simply the prospect of fiscal savings but a significant shift in the balance of power between Congress and the President. Whether we do this by constitutional amendment or by short-term grants of statutory power, the implications for our constitutional system must be carefully considered.

Mr. Fisher also addressed the constitutional question this legislation raises:

A question might be raised about the constitutionality of the procedures adopted in S. 43. It states that the "item" to be enrolled as a bill or joint resolution "shall conform in style and form to the applicable provisions of chapter 2 of title 1, United States Code. * * *" It shall also "bear the designation of the measure of which it was an item prior to such enrollment, together with such other designation as may be necessary to distinguish such bill or joint resolution from other bills or joint resolutions enrolled pursuant to paragraph (1) with respect to the same measure."

In other words, the enrolling clerk would take a numbered section or unnumbered paragraph and add to it an enacting or resolving clause, provide the appropriate title, and presumably affix a new Senate or House bill number (1 U.S.C. 101-105). This procedure must satisfy the constitutional procedure established in Article I, Section 7: "Every Bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a Law, be presented to the President of the United States. * * *" Such a bill, in the form as fashioned by the enrolling clerk and submitted to the President, would not appear to have passed the House of Representatives and the Senate.

Mr. President, the fourth of these nine reasons I am citing today for my opposition to S. 43 is that S. 43 would encourage both Congress and the President to be more fiscally irresponsible as they trade support for pet projects. Congress might be more prone to adopting expensive programs, hoping the President would veto them. Here is what Mr. Schick had to say about this particular point in the testimony to which I referred earlier:

In assessing the prospective budgetary impact of the item veto, it is necessary to conjecture how the President and Congress would behave if they had disparate spending positions. The usual interpretation—upon which S. 43 appears to be predicated—is that the President would item veto congressional add-ons and that, therefore, overall spending would be below the level sought by Congress. This hypothesis assumes that Congress always wants to spend more and the President always wants to spend less. Suppose, however, that the roles were reversed, and it was the White House that sought additional funds. Lest this be seen as a far-fetched possibility it is exactly the situation that has recently prevailed with respect to the procurement of MX missiles, the financing of Contra activity in Nicaragua, and overall defense spending. When the President wants to spend more, the item veto will not lead to less spending; indeed, it might lead to more: Here's why:

In a typical year, the President and Congress disagree more over the mix of expenditures than over the total amount. In recent years, for example, the President has favored more defense spending while Congress has sought more for social programs. This conflict over priorities invites a situation in which each branch satisfies its spending preferences by conceding the items wanted by the other branch. The President gets more guns and Congress gets more butter, with the result that total spending is higher than the level preferred by either branch.

This scenario was recently played out in a budgetary dispute between the Governor of Maryland and the State Legislature. The conflict has a particular relevance for S. 43 because the Maryland Constitution gives the government an advance item veto. The Legislature is barred from increasing any item in the Governor's budget; under the Constitution, its only options are to provide the funds requested by the Governor or to appropriate a lesser amount. No other state is as restrictive of legislative appropriations power. But things don't quite work out in the fashion intended by the Maryland Constitution. In exchange for getting the funds he requested, the Governor files a supplemental bill containing (among other matters) items favored by the Legislature. As a case in point, several months ago, in its zeal to cut spending, the Legislature came up with the idea of an across-the-board percentage reduction in appropriation. The Governor reportedly threatened to withhold the supplemental appropriation unless his agencies were provided with full funding.

There is no end to conjectural analysis of the potential effect of an S. 43 item veto on government spending. A balanced view is that in most years total spending might be slightly—but not significantly—lower, and that in some years it would be a bit higher.

Louis Fisher also doubted that S. 43 would inject more fiscal responsibility into the process. He said:

It is unclear what line-itemization would do for fiscal responsibility. In addition to making programs more inflexible for agency managers, it might lead to legislative irresponsibility. The political dynamics are difficult to predict. It is possible that "savings" achieved by the item veto might merely neutralize spending that was added because the President possessed item-veto authority. The net effects would be hard to determine. A study in Pennsylvania concluded: "When a legislator, even though opposed in principle to an appropriation, is reasonably certain that the governor will slice it down to more moderate size, he is tempted to bolster himself politically by voting large sums of money to a popular cause." Another writer said that the experience of Michigan supported the comment of one author who claimed that the item veto "has encouraged legislators to please their constituents by voting for appropriations far in excess of anticipated revenues thus forcing the governor to make the inevitable reductions and incur the wrath of the interests adversely affected." During hearings last year, Senator Hatfield noted: "We also know that the legislatures in States which have the line-item veto routinely 'pad' their budgets, and that was my experience, with projects which they expect, or even want their Governors to veto."

The availability of the item veto would give the White House an additional tool to influence members of Congress. Whether this tactic would restrain or encourage spending is difficult to say. One can imagine scenarios in either direction. The threat of an item veto could force legislators to scale back the size of a program. On the other hand, White House lobbyists could advise a member of Congress that certain projects in their district or state are being considered for an item veto. The member could then be asked how he or she plans to vote on the administration's bill scheduled for the following week. Perhaps a minor project would survive in return for the legislator's willingness to support a costly administration program.

Let me add parenthetically that if any Member of the Senate doubts that this would occur, please think again.

Returning to this quotation:

This is all speculative, of course, but it is fairly certain that the availability of the item veto would introduce a powerful dynamic to executive-legislative relations. Because of the informal and private communications between the branches, it would be difficult to maintain much accountability for fiscal results. Members would vote with new incentives, subjected to pressures and calculations that did not exist before.

The fifth reason I am opposing S. 43 is that I am not persuaded by the argument that Congress should adopt the line item because it has been effective in the States. The comparison is irrelevant in this case. Unlike Congress, State legislatures meet for a relatively short time and most States operate under a balanced budget requirement. In addition, the Federal Government dwarfs the State governments in size and power.

This is what Senator HATFIELD has had to say on that subject:

Much has been made of the fact that 43 States currently grant their Governors some form of line-item veto authority. The argument here is that what works for States ought to work for the Federal Government.

We should be careful to consider the differences between State governments and the Federal Government. Notable differences include the structure of State budgets, the fact that State legislatures meet only for a limited portion of the year, and that most States operate under a balanced budget requirement. The most obvious difference, however, is simply the size and power of the Federal Government. The greater the scope and reach of the power, the more critical it is that such power be held in check, balanced between the three, coequal, branches of government.

Philosophical considerations aside, the practical matter is that the line-item veto may not work in the States, either. The February 1985 Annual Report of the President's Council of Economic Advisers states: "Approval of a line-item veto may not have a substantial effect on total Federal expenditure. The experience of the States indicates that per capita spending is somewhat higher in States where the governor has the authority for line-item veto, even when corrected for the major conditions that affect the distribution of spending among States."

Let me quote Louis Fisher, who has studied this matter carefully, and has also considered the applicability of the use of the line-item veto in the States and how it operates in the States. Here is what he has written on this subject.

I begin by discussing the scope of item-veto authority because this has been a recurrent and troublesome issue at the state level. Some Governors vetoed items in the judiciary's budget. Others invoked the item veto against the legislature. At times the item veto has been used against revolving funds or special funding techniques. But the most vexing issue is the question of attaching conditions, provisos, and qualifications to an appropriation. May the Executive strike conditions, provisos, and qualifications while retaining the appropriation?

This dispute may not present a major problem under the Mattingly bill, depending upon the direction given to the enrolling clerks by the Secretary of the Senate and the Clerk of the House of Representatives. Presumably an unnumbered paragraph of an appropriation bill would include both the appropriation and the condition. The President could not keep the former and sever the latter. However, the President could retain an unnumbered paragraph and strike a numbered section that contains a condition, proviso, or qualification that applies to all appropriations in the bill.

I dwell on this point because State courts have tried to maintain a balance between two competing values: the right of the Governor to veto items, and the right of the legislature to condition an appropriation. State judges have had an extremely difficult time in devising a formula or test that can discriminate between proper and improper deletions of conditions. To protect its prerogatives, Congress might decide to rewrite appropriations bills by placing important conditions in each unnumbered paragraph rather than leaving them at the end in numbered sections.

A major difference between State governments and the Federal Government is the degree of specificity in State appropriations bills and the lump-sum nature of congressional appropriations bills. Specificity in

State bills complement the Governor's item-veto authority. The Governor is able to delete individual projects and programs. At the Federal level, however, "items" rarely appear in appropriations bills. They are placed in committee reports or supporting agency documents. Most Governors are able to reach "pork" and "logrolling" projects. Under the Mattingly bill, however, the President would be limited to a single lump sum of, say, $951 million for the general construction account of the Corps of Engineers. The individual projects contemplated by that aggregate amount are placed in non-statutory sources.

To pattern itself after the States, the Federal Government would have to do more than simply adopt the item veto. It would have to restructure appropriations bills by resorting to line-itemization. That approach, as you know, has been resisted not merely by Congress but by the executive branch. Agency officials want the latitude and flexibility associated with lump-sum funding.

The sixth reason I oppose S. 43 is that it would be extremely difficult to track the thousands of appropriations bills it would create. It would also make it harder to create the sort of compromise packages forged this year in both Houses of Congress.

Senator HATFIELD shares this concern. He says:

What would result is regular appropriation bills being enrolled as perhaps as many as a hundred or so separate bills. General appropriation measures might be converted into literally hundreds of separate bills. The President would be swamped with paper and we would have difficulty keeping track of things. In addition, it remains unclear to me what the application of this proposal would be if a bill or conference report is incorporated by reference into a general appropriation measure. We should be equally be concerned that legislative intent may be completely overridden when items intentionally linked and sequenced together are separately enrolled.

The seventh reason I oppose S. 43 is that contrary to what some of its supporters say, it would give the President very limited power to eliminate specific, localized "pork-barrel projects." He would not be able to veto a particular Army construction project in a particular State, for example. He would have to veto all Army construction projects.

Louis Fisher has written:

It is important to understand the reach of S. 43, because there appears to be some uncertainty about the scope of item-veto authority.

An editorial in the Wall Street Journal on March 8, 1985, suggested that the Mattingly bill would have made it unnecessary for President Reagan to veto the entire Farm Credit and African Famine Relief Bill (H.R. 1096). The editorial believed that the President, armed with the Mattingly bill, could have item-vetoed the farm credit provision while leaving intact African aid. But H.R. 1096 was not an appropriations bill. To reach such matters, the Mattingly bill would have to cover loan programs and other indirect forms of financial assistance, including entitlement programs usually found in authorization or tax bills.

I also noticed that OMB Director David Stockman, in his testimony before the House Government Operations Committee on March 7, 1985, pointed out that the availability of item-veto authority would have allowed President Reagan to delete GAO's bid-protest powers added to the Deficit Reduction Act. Under the Mattingly bill, however, the bid-protest provision would not have been subject to an item veto because the Deficit Reduction Act was not an appropriation bill.

Senator HATFIELD has said that:

There is a misconception that this grant of power will allow the President to veto spending for a certain project or activity in one area of the country or another; that it will allow the President to remove funding for so-called "pork-barrel" projects. This could occur only on a very limited basis. If, for example, the President opposed funding for an Army construction project located in a particular State, he could line-item vote the total appropriation for the "military Construction, Army" account. That would deny funding for all Army construction projects, but it would not simply delete the objectionable project. The same is true for a single water construction project, a particular Park Service land acquisition, and a host of other individual projects and activities. It would be necessary to veto the entire appropriation for the account to turn down one minute detail of it. And, that is only if the account fits the definition of an "item."

Allen Schick has also addressed the limitations of the line-item veto in this regard. He said:

The incapacity of the item veto might be increased if S. 43 were to spur Congress to alter it budget practices so as to deliberately shelter favored items from presidential attack. S. 43 would give Congress a strong incentive to package items favored by the President with matters that he opposes, in much the same manner as it now inserts funds not wanted by the President into "veto proof" continuing or supplemental appropriations. Moreover, Congress could protect controversial items in appropriation reports, beyond the reach of the President's veto power. While the legal status of report language mandating particular activities or expenditures is questionable, the skill with which Congress uses reports to get its way is not. Agencies generally abide by the dictates of appropriation reports. The Defense Department does not close production lines for weapons systems singled out for continued funding in appropriation reports.

The eighth reason I oppose S. 43 is that it would enable the President to exert extraordinarily greater influence than he can now wield to eliminate certain programs. The incumbent President, for instance, would have a better chance at getting rid of the Legal Services Corp. or funding for the Tennessee Valley Authority—two extremely worthwhile programs that Congress has retained over his objections.

Mr. HATFIELD has expressed this concern succinctly. He said:

To be blunt, this proposal has little to do with spending reduction. It has everything to do with the balance of power in our government. This proposal represents a significant grant of power and passing or responsibility to the Chief Executive at the expense of the Legislative Branch, and there are no sound reasons why this shift in power should occur.

Louis Fisher has also addressed this issue. He said:

A different question concerns the amount of money that might by saved by the Mattingly bill. Although most projects and programs would be outside the President's reach, some programs would be vulnerable. President Reagan, for example, could delete funding for such unnumbered paragraphs as the Legal Services Corporation, Amtrak, the Small Business Administration, and other programs that the administration would like to terminate. The aggregate total for these cuts could be substantial, assuming that Congress did not combine in a single unnumbered paragraph a threatened program with one that the President favored. State legislatures have learned how to do that.

I should point out that the Mattingly bill presents an either/or choice. Agencies or programs funded by a single unnumbered paragraph either would be terminated or, in the event of a congressional override, allowed to continue. There would be no opportunity for a choice in-between, unless the administration were given item-reduction authority. It is possible that the threat of an item veto might lead to middle-ground negotiations. Members of Congress might agree to cut back on a program in return for the President's promise not to invoke his item-veto authority.

This either/or confrontation could be avoided by adding greater detail to an appropriations bill. Instead of providing a lump-sum amount, many of the details from committee reports and agency documents could be incorporated in the public law. This would allow the President to trim programs rather than abolish them.

The ninth and final reason I oppose S. 43 is that a better alternative would be to make institutional reforms in the budget process. We could, for instance, strengthen the appropriations committees and improve the rescission and deferral process.

Allen Schick discussed such reforms in a letter to Senator MATHIAS. He said:

During the Committee's hearing on the item veto held on May 14, some interest was expressed in the rescission process as a means of controlling expenditures. One advantage of the rescission process is that it can reach below the full account and withhold funds from particular projects or activities, in contrast to an item veto which applies only to the entire account.

Another possible advantage is that unlike an item veto which would enable the President to prevail if supported by one third of the House and Senate, a rescission would require a majority vote to support the President's position.

At the hearing, I noted that under the present rescission rules, funds proposed for rescission must be released (and spent) even in the absence of a majority vote upon expiration of 45 days of "continuous session." I further noted that this problem has recently arisen with respect to noncontroversial rescissions, with the result that funds have sometimes been either unnecessarily spent or the rescission rules have been violated.

In view of my inability to attend the resumed session of the hearings, it might be

useful to provide some concrete data on this problem for the record.

The inadequacy of the current rescission process has recently been evidenced by congressional response to presidential rescissions proposed pursuant to the Deficit Reduction Act of 1984. That Act established expenditure savings targets in 6 management categories. On February 6, 1985, the President submitted 226 rescission proposals totaling $372 million to Congress. However, Congress did not act on any of these proposals—despite the fact that they were made in response to its directive in the Deficit Reduction Act—by the time the 45 day period expired.

At least two steps have been taken thus far to compensate for the failure of the rescission process to produce the intended repeal of budget authority. First, the Senate Appropriations Committee reported S. 469, the rescission bill, with an amendment that would extend the impoundment of the funds withheld pursuant to the Deficit Reduction Act until July 1, 1985. According to the Appropriations Committee Report (S. Rept. 99-7), this delay "will enable the Committee to fully review the administration's rescission proposal and to identify further reductions necessary to approach the goals . . . of the Deficit Reduction Act."

The Senate has not yet acted on S. 469, as reported. Technically, therefore, the funds withheld to accomplish the objectives of the Deficit Reduction Act should be released.

The second step, also in response to the expiration of the 45-day period, has been to notify affected agencies of the intention of the Appropriations Committees to rescind the funds later this year. Thus, in a letter to the head of an executive agency dated March 7, 1985, Senator Paul Laxalt, Chairman and Senator Ernest F. Hollings, Ranking Minority Member of the Commerce, Justice, State, and Judiciary Appropriations Subcommittee, wrote as follows:

As you are aware, last year Congress mandated OMB to recommend proposed savings from vehicle, public affairs, consultants, travel, and public relations and printing costs from a number of agencies in Section 2901 of the Reconciliation Act. Pursuant to that law, OMB has forwarded a list of proposed rescissions to Congress.

We are writing to notify you that we propose to enact all the 2901 rescissions identified for agencies under the jurisdiction of the Commerce, Justice, State Subcommittee on a general Supplemental bill later this year. We intend to enact these savings even if the time limits for rescissions or deferrals have expired. We are notifying you of our intent so you can properly budget for your activities.

If you believe that you can achieve the same level of savings in another area of your budget and you want to waive the specific reductions suggested by OMB, the Subcommittee would be willing to entertain a request to that effect. Unless notified, we will assume you will take the reductions in the functions proposed by OMB. Please contact the Subcommittee staff to work out any details of such a request. The staff is also willing to answer any other questions you may have.

This policy does not include any program rescissions, which the Committee will review on a case-by-case basis.

The deficiency that has necessitated this action occurs frequently, both because rescission is a complicated legislative process (each proposed rescission is referred, under a unanimous consent agreement entered into in 1975, to at least three Senate committees), and because the Appropriations Committee which has the lead jurisdiction often is so fully involved in the annual appropriations process that it cannot divert attention to proposed rescissions.

I would suggest that if your Committee has an interest in strengthening the rescission process as a more effective and better balanced means of curtailing expenditures and the deficit than the item veto, it might examine the rescission process or direct the proposed Select Committee on the Two-Year Budget to undertake this task.

Allen Schick, whom I quoted earlier, has considered the political implications of a line-item veto. He wrote:

If the item veto would not make much of a dent in federal spending, why has it been so avidly sought by President Reagan and many of his predecessors? The straightforward answer is that the item veto has the potential of strengthening the position of the President vis a vis Congress. For one thing, when Congress and the President disagree as to spending priorities, the President would have a better chance of imposing his preferences. The President could either wield the item veto to remove spending added by Congress or he could threaten to exercise the veto unless Congress provided the funds he wanted.

In the present circumstance, where deficits are very high and difficult to eradicate, the campaign for an item veto is one means of pointing the blame for high spending at congressional profligacy. The President can argue that if only he had the item veto, things would be much better. Of course, if he had an item veto, the President would have to more realistically face the budgetary consequences of his policies.

In my view, the item veto is a political obstacle to effective budget control. Concentrating on discrete items might have been appropriate a century ago when spending was modest and most funds were allocated for the continuing operations of government. In the present situation, however, budget control depends on reaching agreement as to total spending and on a package of program and expenditure policies consistent with that total. That recent Senate package was passed only because many Members were willing to subordinate their preferences with respect to individual items to an overall budget policy.

S. 43 is defective because it can't see the budgetary forest for the trees.

Mr. President, it is for all of these reasons and others that I am compelled to vote against S. 43. I look forward to more substantive proposals that will help us reduce the deficit.

To put the line-item discussion in further historical perspective, this is what Norman J. Ornstein had to say about institutional change and the deficit:

I have tried to debunk the conventional wisdom that lays the blame for outrageous deficits and uncontrollable spending entirely at the feet of an irresponsible Congress. A serious movement, however, is afoot to deal with this problem through institutional change that would curtail the power and the role of Congress.

One major proposal that was a dominant theme of the 1984 presidential campaign is a constitutional amendment to give the president line-item veto authority. President Reagan first framed the issue in his 1984 State of the Union message:

Some 43 of our 50 states grant their governors the right to veto individual items and appropriations bills without having to veto the entire bill . . . It works in 43 states. Let us put it to work in Washington for all the people.

Throughout the campaign President Reagan and Republican senators and congressmen made the line-item veto a major theme, they suggested that the president could deal with the deficit if only he had the tools—that the most effective, most efficient, and least onerous way of dealing with federal spending is through a constitutional amendment to give the president line-item veto authority.

As a political theme this is an understandable one. But its main drawback, as the preceding pages demonstrate, is that it starts with the basic premise that the president is better than the Congress at controlling government spending. A line-item veto would give the president more authority and take away some of the basic powers that have resided in Congress since its beginning.

There is a fundamental flaw in this premise. Over time any executive-centered political system will almost certainly spend more and enlarge the scope of government more than one with substantial legislative power; witness the fate of nearly all our European allies that rely on parliamentary systems with strong executives and weak legislatures. Compared with nearly all of them, the United States, in size of government and taxation as a proportion of GNP, is small indeed. Political scientist Michael Malbin, after a recent visit to France, made the point especially well:

The French budget system clearly favors the executive. Party discipline rules our logrolling, and voting on the budget by department cuts down on localism. But one thing the system does not do, according to figures compiled by the Organization for Economic Cooperation and Development, is to produce a lower rate of government budgetary growth in France than in the United States. For 14 of the 20 years from 1961 to 1981, under Presidents Charles deGaulle (1958-1969), Georges Pompidou (1969-1974), Valery Giscard d'Estaing (1974-1981) and Mitterand, government spending went up at a faster rate, as a percentage of gross national product, than it did in the United States in the same period.[13]

The line-item veto, of course, is more a political ploy than a comprehensive proposal for reducing or eliminating deficits. For one thing, the veto as proposed aims exclusively at appropriations bills, while most spending, as the Office of Management and Budget has pointed out, is not directly in the hands of the Appropriations Committee or funneled through individual appropriations bills. Consider, for example, the $926 billion in the 1985 fiscal budget. Some $188 billion goes for social security, handled separately through social security legislation. Another $116 billion is for net interest payments, which the president could not item-veto. Medicare and Medicaid get $90 billion, also handled through formulas; the formulas can be changed by law, but the items in the existing law are virtually immune from veto. Another $123 billion is for other mandatory programs handled through existing legislation. Commitments made in prior years for which contractual obligations exist total $97 billion for defense and $74 billion for domestic programs. We are left with $237 billion—but $175 billion of that is for defense. That

leaves, in other words, $62 billion in nondefense, discretionary spending as the main potential for line-item vetos. That includes the general operating expenses of the federal government—Central Intelligence Agency—

Will he veto that?

Federal Bureau of Investigation—

Will he veto that?

the mint, the national parks, and so on. A very small proportion of those expenses could be effectively vetoed if the president had the desire.

Most presidents, however, including Reagan, do not really have that desire. Driven by the same political considerations as members of Congress, presidents generally support, even when they have an opportunity to veto, the kinds of programs that clearly stand out as wasteful federal spending.

Mr. President, in summary, the history of freedom in human civilization has been largely the history of power flowing from a centralized executive to the hands of elected representatives of the people. By reversing that historic trend, this proposed measure would send us backward toward centralized power in the hands of one individual, power of the kind our Constitution warns us against in every line and every word. The whole logic of the American system is of checks and balances, of power dispersed, of trust placed in the hands and judgment of the American people and their elected representatives. Let us not be fooled by the arguments advanced in favor of the proposal which has been submitted to us. Let this Senate stand fast at this historic hour and prevent the enactment of S. 43 which, in my judgment, would be unwise and harmful to our Republic.

Mr. President, I am strongly committed to cutting the Federal budget deficit. But I believe this legislation would cause more harm than good and may actually contribute to fiscal irresponsibility.

I realize that there is considerable popular support for giving the President the power of a line-item veto. That support reflects a sincere, widespread feeling that something dramatic must be done to reduce these intolerably high deficits. But a measure such as this is relatively easy to support because it does not in and of itself require people to lose their benefits or pet projects. The fact is, cutting the deficit will require making some very hard decisions.

Let me note a few reasons why I am opposed to S. 43, which would break the 13 appropriations bills into more than 100 separate bills.

First, it is based on the false assumption that Congress is largely to blame for the deficit. In fact, President Reagan has requested $2 trillion for all appropriations in the last 4 years, excluding entitlements and interest on the national debt. Congress has appropriated $300 million more than he's asked for—that's a scant 0.00015 percent more.

Second, less than 15 percent of the Federal budget would even be vulnerable to a line-item veto. It could not be used on revenue measures. It could not be used on permanently funded entitlements and other mandatory costs like interest on the Federal debt. These items amount to half of the budget and are not handled in appropriations bills.

Of the remaining half of the budget subject to appropriation, more than half goes to defense, foreign aid and annually funded entitlements. That leaves less than 15 percent of the budget—the nondefense domestic discretionary items. And that's been the only declining portion of the Federal budget recently.

Third, it would tip the balance of power to the President. And the Supreme Court has been reluctant to permit the expansion of one branch of government beyond that expressly provided, as evidenced in the recent Chadha legislative veto decision.

Fourth, it would encourage both Congress and the President to be more fiscally irresponsible as they traded support for pet projects. Congress might be more prone to adopting expensive programs, hoping the President would veto them.

Fifth, comparisons with the use of the line-item veto in 43 States are irrelevant. State legislatures meet for a relatively short time, most States operate under a balanced budget requirement and the Federal Government dwarfs the State governments in size and power.

Sixth, it would be extremely difficult to track thousands of appropriations bills instead of 13. It would also make it harder to create the sort of compromise packages forged this year in both Houses of Congress.

Seventh, it would give the President very limited power to eliminate specific, localized "pork-barrel projects." He would not be able to veto a particular Army construction project in a particular State, for example. He'd have to veto all Army construction projects.

Eighth, it would enable the President to exert extraordinarily greater influence than he can now wield to eliminate certain programs. The incumbent President, for instance, would have a better chance at getting rid of the Legal Services Corp. or funding for the Tennessee Valley Authority—two extremely worthwhile programs that Congress has retained over his objections.

Ninth, a better alternative to make institutional reforms in the budget process might be to strengthen the appropriations committees and to improve the rescission and deferral process.

It is for these reasons that I feel compelled to vote against S. 43. I look forward to more substantive proposals that will help us reduce the deficit.

Mr. STENNIS. Mr. President, will the Senator yield to me briefly?

Mr. GORE. I will yield.

(Mr. GORTON assumed the chair.)

Mr. STENNIS. Mr. President, I highly commend the Senator from Tennessee for a very illuminating and, I have to say, wise presentation he made on this very important subject. I do not know of a tenderer spot in the entire Constitution of the United States than article 1, section 1. I think it and another section that I have in mind should be quoted now as a proper picture frame to put around the splendid speech of the Senator from Tennessee. I think his concluding remarks are really classic and I believe in one way or another the warning that he gave will be heard.

Everyone has good faith, I am sure, as a motive in dealing with this matter, but the framers of our Constitution summed it up in one sentence. Article 1, section 1:

> All legislative powers herein granted shall be vested in the Congress of the United States, which shall consist of a Senate and House of Representatives.

Now, that was a deliberate delegation of power. How much power? Well, it is hard to describe how much there is, but they said all legislative power. They knew what they were doing. They knew where they wanted to put the responsibility. They put it on the shoulders of the people who were the closest to the people, by and large, of the body, Members of the House, a body chosen directly by the people, and the Members of the Senate, then chosen not directly but by the people's representatives but now the Senate, too, chosen directly by the people, someone who then can meet on the street any day, anywhere, or personally call him up and discuss matters with him.

And then over here on the next page, Mr. President, set forth in firm, positive, definite, concluding language about what should be done with a bill that both Houses might pass. They were not going to leave the President out. After the power had been exercised, they gave him solely the question of a veto right on the bill, not a fragment. It says, "They shall take it"—i-t—"to the President," transmit it to him and he shall pass on it and then shall send it back, either sign it or send it back to the sending body. There is no question what those words mean. I-t, one of the shortest words in the English language, is used in connection with the bill. There is no doubt whatsoever about what these framers and givers of this power were talking about or what they meant. And now to come along after 200 years of success—and I think we can call it a success—operating under this section—

I say successful because of many reasons, but we have come a long way in time, become a powerful Nation. I am not boasting about it, but perhaps the most powerful in history—we come in in a devious way, not intending to be devious, but in an old, freakish way of spelling out what it means and say, "Well, after all, we are going to interpret this Constitution as not meaning all legislative power and not meaning just a veto, take it or leave it, and that can be then overcome by another vote."

But we are going to turn it around and interpret it to suit our wishes. I speak with all deference to anyone who may vote that way, but what we are after is the real meaning of these words in the Constitution. It is about all the average fellow has to call his own and share in this country, this great document. I just cannot go along with the idea of these words directing the Clerk of the House of Representatives and Secretary of the Senate to take this action. I just cannot believe it. At first I thought it was just a regulation. I find it is written out in the bill. It tells those two officials to take this bill and tear it up in all kinds of pieces, subject matter, and so forth, that you can construe into it or about it and send those as a separate body and each one is named it, i-t. Send it back to the President of the United States, whoever he may be, and he will act on that not as one bill as passed by the House of Representatives and the Senate but a bill to be split up, then, physically by these officers and sent to him in many fragments and say, "Well the President, after all, can take his choice."

It is just unbelievable to me that this procedure should be so seriously taken that we are willing to throw away, cast aside, disband the document as it has been used and interpreted for these 200 years, and send up here what is almost a monstrosity system, something altogether different physically. It is totally different physically. It has the same words but put into a different form and context so that they could be subject to a veto.

Mr. President, I have no reference whatsoever to anyone who might vote for the measure under a mistaken view, but I urge my colleagues to take another look.

This powerful country is carrying its load around the world, burdened with matters around the world, and we pray for time and patience and strength to meet those burdens and to carry them out. We must not abandon what we know is sound and workable and true.

So I hope we will have a reconsideration of this matter, that it be voted to be laid aside, and that we continue the search to carry out this one document that is our total guide and our authority here, and through those ways try to find a way to meet our problems. We will be increasing our problems manyfold if we try to change the Constitution in this manner.

I commend the Senator. He has analyzed the main sections. I have made notes of what he has said, and I commend him very highly. I am proud of the contribution he is making here, with his analysis and facts about the case. He pointed out that only 15 percent of the amounts would be subject to special line item veto, anyway, and then he gave a fine explanation of the separation of powers.

Mr. GORE. Mr. President, no Member of this body is held in greater esteem than is the Senator from Mississippi, and no one else's words of approval are more pleasing to me than his.

More important is the logic and incisive analytical capability he brings to this question. As the senior Member, having served longer than any other Member of the Senate, his words should be listened to very carefully, and of course they are, by every Senator.

I want to react to two things that were brought up by the distinguished Senator from Mississippi.

First, in his reference to the section in article 1 which specifies that all legislative power shall be in Congress, I note that this proposal would give the President not only the executive power but also an amount of legislative power equal to that wielded by two-thirds of both the House and the Senate. What an awesome transfer of power that would be.

Second, the Senator from Mississippi refers to the language in our Constitution specifying that when Congress passes a bill and refers to it as "it" and sends "it" to the President, the President may veto "it."

How many times have we considered appropriations bills in Congress where a majority of the Members of either body proved to be unwilling to appropriate funds unless a specified condition was attached to that appropriation and, in expressing the will of the American people, put in the bill those conditions considered appropriate before the money could be spent?

Under this proposal, that bill, as considered by Congress, would be dismembered; and the condition, if it fell in a separate item, as it often does—the condition which led a majority of Congress to support the overall measure—could be eliminated by the President's use of an item veto, and the entire meaning of the bill would be changed. Congress would not have a chance to vote on the particular "bill" sent by the enrolling clerk to the President. Instead, the President would have an opportunity to consider it, as intended in that sense.

So not only would this measure give the President an amount of legislative power equal to two-thirds of that presently wielded by two-thirds of both Houses of Congress; it would also give the President some legislative power not presently exercised by either House of Congress, insofar as it would enable the President to consider for veto so-called bills that had not been considered in their separateness, in their new meaning, as it comes within the conditions excised by the President.

So, in my opinion, it is really a dangerous provision insofar as its effect on the Constitution is concerned.

Like the Senator from Mississippi, I know that those Senators who presently support this provision do so in all sincerity and for reasons they believe are correct and good for the country.

But I join the Senator from Mississippi in asking those Senators who support this provision to consider again.

Mr. BYRD. Mr. President, the people won again today.

I have in my hands editorials from the Washington Post of Saturday, September 29, 1984; the Philadelphia Inquirer, July 23, 1985; the Cleveland Plain Dealer, July 23, 1985; the Washington Post, July 19, 1985; and the New York Times, July 17, 1985.

Mr. President, while speakers are coming to the floor, I shall read into the RECORD the editorials to which I have just referred, beginning with the Washington Post editorial of September 29, 1984, Mr. President:

"POWER PLAY

"If 51 Senators have their way, the Nation's capital would have two new centers of power. They would reside in the offices of the enrolling clerks of the House and Senate. There, final decisions would be made as to what programs, projects and legislative restrictions would be offered up for individual veto by the President.

"Enrolling clerks are not people accustomed to such discretion. Their usual concerns are with the form—punctuation, format and style—rather than the content of what becomes the law of the land. But a majority of Senators have come up with the idea that, by investing new powers in the clerks, they can give the President a line-item veto—something he says he needs so that he can finally start balancing the budget.

"The line-item veto would let a President veto individual items in an appropriation measure without having to reject the whole thing. Legislation giving the President this power outright could be immediately blocked by a Member pointing out that this power shift violated both the Constitution and the Budget Act. But, reasoned the 51 Senators, there is nothing to keep Congress from changing its own procedures. Why not pass a little measure telling the enrolling clerk to

take each appropriation measure passed by Congress and write up the individual 'items' as separate bills? Then the President could sign those he liked and veto the rest.

"You will immediately see that a great deal would ride on what the enrolling clerk decided an 'item' was. The bill instructs him that 'any numbered section and any unnumbered paragraph' should be an item. But we've seen some mighty long—and mighty short—paragraphs and numbered sections in our time. If the clerk's preferences ran to short items in all or part of an appropriation, the president would acquire formidable new powers.

"He could, for example, punish (or intimidate) recalcitrant Congressmen by eliminating (or threatening to eliminate) public works or military projects targeted for their districts. He could cut benefits for weak constituencies, such as poor families, without having to reject other parts of an appropriation earmarked for powerful lobbies such as doctors or real estate brokers. Or he could strike inconvenient prohibitations such as language preventing use of funds to upend other country's governments or undermine Federal laws.

"Of course, the line-item veto wouldn't actually do much to cut the deficit. The biggest sources of current deficits are defense, tax giveaways and entitlements—things which the President either wouldn't or couldn't restrain with a line-item veto. And you might also wonder whether the President would really want to have such fine control over discretionary spending—Mr. Reagan would now be having a much harder time courting farmers, old people, city dwellers and so on if Congress hadn't been able to do him the favor of rejecting many ill-advised program cuts he earlier proposed.

"No, the line-item/enrolling clerk law has really nothing to do with balancing the budget. It is simply a cheap election-year gimmick put forward by a group of Senators who are willing to risk upsetting the constitutional balance of powers in order to look much more serious about fiscal responsibility than they have the courage to be."

Now, Mr. President, I will continue with an editorial from the Philadelphia Inquirer of July 23, 1985. The title of this editorial is "Reject Bid For Line-Item Veto."

"The Senate is tied in more knots than usual over whether to give Presidents the power to veto 'line items' in spending bills. President Reagan wants this power, maintaining that it would better enable him to control spending and reduce budgets deficits."

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator's point is well taken. Will those Senators desiring to converse please take their discussions to the cloakroom?

Will the Senator please proceed?

Mr. BYRD. Mr. President, if any Senator on either side wishes to have the floor to speak, I will be happy to yield the floor. But, until such time as there is some such indication, I will proceed to read these editorials into the RECORD. They are excellently written editorials, and I think they succinctly and cogently make the case against the line-item veto.

The PRESIDING OFFICER. Will the Senator withhold?

Mr. BYRD. Yes; I thank the Chair.

The PRESIDING OFFICER. If we could have the complete attention of the Senate.

Will the Senator proceed, please?

Mr. BYRD. I thank the Chair.

Continuing with the reading of the Philadelphia Inquirer editorial of July 23, 1985:

"REJECT BID FOR LINE-ITEM VETO

"President Reagan wants this power, maintaining that it would better enable him to control spending and reduce budget deficits. So would the abolition of Congress. He might as well ask that, for that would be the effective result. Recognition that the stakes are that high has prompted a bipartisan filibuster. An attempt to shut it off is expected today.

"Currently the President must veto an entire spending bill, which typically provides funds for a vast collection of projects and programs. If he objects to only one, he must decide whether killing it is worth sinking all the others with it. A line-item veto would permit him to pick off specific programs.

"Obviously that would be a useful tool, yet most Federal spending still would be beyond its reach. Some 45 percent of spending goes to entitlement programs. Anyone meeting the programs' criteria is entitled to the money. Only changes in fundamental laws can reduce such spending. Another 15 percent covers interest on the Nation's debt, which must be paid. Then 27 percent of spending goes to the Pentagon, and Mr. Reagan is unlikely to veto many items there. That leaves only 13 percent of all spending realistically within reach. This veto would be little more than an ax with which Mr. Reagan finally could fell all the programs such as Amtrak upon which he has chopped so relentlessly since 1981.

"The power of the purse is Congress' primary authority, awarded by the Constitution. By bargaining among interests from all over this diverse Nation, Congress apportions spending so that everyone gets a share. Sure, some projects are little more than 'pork barrel' giveaways, there is some waste. Yet in the final analysis, this continuous process of bargaining and trading enables coalitions to be knitted, which ties the regions into the national system, enabling governance itself.

"Give the President the power to veto specific items and Congress would lose leverage forcing him to bargain. Such a surrender of authority would knock asunder the careful balance of institutional powers wrought so finely by the framers of the Constitution. It would permit a Ronald Reagan to dismantle social programs unimpeded. The same authority would permit a liberal President to run roughshod over programs conservatives treasure.

"This proposal is a distraction, a nonanswer to deficits and a serious threat to the system's checks and balances. No Senator should approve this emasculation of congressional authority. Until a solid Senate majority is persuaded of that, let the tongues of those Senators who understand this issue's importance wag on."

Now, Mr. President, the Cleveland Plain Dealer of July 23, 1985, carries the following editorial, entitled "Budget-Wise, Tom-Foolish." It reads as follows:

"Even less attractive than the shortsighted arguments in favor of a line-item veto are the idea's long-term perils. Imagine a Congress so bereft of power that it effectively is unable to challenge a president's policies. Imagine a national budget—billions and trillions of dollars—resting in the hands of one elected official and hundreds of non-elected aides.

"A presidential line-item veto is the power to make such nightmares real. With it, a president could put a heavy kibosh on any particular expenditure he doesn't like without, as he now does, having to throw out the entire bill. He could go through an appropriations bill line by line, throwing out the programs he doesn't like. More than 40 state governors exercise such veto power to help control recalcitrant legislatures. The relationship between a governor and his legislature, however, is substantially different than that between a president and Congress. So, obviously, are the responsibilities.

"More to the point, though, is that the 'power of the purse' is Congress' most potent leverage against the executive branch. It ensures the system of checks and balances. It helps maintain equality of power between the wisdom of 535 elected officers and the wisdom of just one.

"Line-item supporters argue that the idea is budget-wise. They say it will let the president slash away at wasteful, deficit-contributing pork-barrelism. They say that the threat of the line-item veto, which could be overridden by Congress, would spotlight parochial, no-value expenditures and than have a chilling effect on their inclusion.

"True, senators and representatives, of both parties, load major appropria-

tion bills with pet projects. But the president can veto the whole bill. If he has the time to go through a bill with a line-item veto, then he has the time to go through a bill without it. He could then veto the whole bill, citing the unacceptable riders. Simply because past presidents haven't often bothered to use their 'bundle' veto against legislative lampreys doesn't mean that power needs to be enhanced.

"The argument that a line-item veto would help the president achieve cuts and therefore lower the deficits is not budget-wise, it is tom-foolish. Congress is no more responsible for the deficit than is the president. President Reagan has been unable even to produce a deficit reduction plan, much less implement one. Why does he need a tool to do a job he has no intention of completing?

"And why should a senator be forced to compromise on other issues to save legitimate expenditures? A president, with his line-veto, could easily exert such pressure.

"It is difficult to figure out why Congress would put its own authority on the line for such a false deficit-remedy. It is not difficult, though, to figure out what the U.S. Senate should do. There is a vote in the Senate today on whether to begin debate. The idea should never have gotten that far. It should get no further."

"LEGISLATIVE VEG-O-MATIC

"Before Congress now is a proposal that is the legislative equivalent of the Veg-o-matic—you know, the gizmos advertised on late-night TV that chop onions and grate carrots and core apples, almost without your having to lift a finger. The legislative equivalent is being peddled now as the easy cure for the deficit, the national debt and ever-burgeoning spending. It is the line-item veto.

"Imagine, proponents say: it could enable the president to cut wasteful spending with a stroke of the pen. And if you're not sure it'll work, they add, just give it a 365-day trial. But at this point you may have a few questions.

"How is a president going to cut spending much through line-item vetoes when no recent president has proposed anything close to a balanced budget? President Reagan might like you to think Congress has been spending wildly. But Congress has authorized and appropriated only marginal increases over his own budget. If a president as economy-minded as Mr. Reagan dares not propose further cuts in his budget, why would he impose them through a line-item veto?

"Another question: How would you stop Congress from doing what it does now—putting the spending the president doesn't like in the same line with items he dare not veto? The bill introduced by Sen. Mack Mattingly would try to stop this congressional practice by commanding Senate and House clerks to enroll each individual 'item' as a separate bill. But it won't take a very skilled parliamentarian to get around this requirement. Certainly Congress has a powerful institutional reason to try. Otherwise, the line-item veto would shift vast power from Congress to the White House and the Office of Management and Budget.

"In the long run, there is no simple, fail-safe automatic device to force a president and Congress to do what this president and Congress and their predecessors have refused to do: balance the budget. The line-item veto, like the constitutional amendment purporting to require a balanced budget, is a political gimmick, certain in the short run to be mischievous and in the long run to be ineffective. The president and Congress already have the constitutional power to balance the budget. What they need is not a line-item Veg-o-matic, but political will.

"THE LINE-ITEM DIVERSION

"For more than a century, every President has wanted a veto power over individual items in appropriation bills. Congress, concerned more for its own power than for the Federal exchequer, has scotched the idea every time. The issue is once again before the Senate. It deserves the same fate.

"Line-item appropriation vetoes would relieve the President of the duty to weigh the pros and cons of bundled expenditures. Every President since Ulysses Grant has vowed to wield the veto against 'waste'—none more insistently than President Reagan. But alarming extravagance can always be resisted by vetoing an entire package, too. The bundling annoys Presidents because it has been an important element in their annual negotiations with Congress. Presidents want to tip the power balance in their favor, but make no strong case for needing extra power.

"Mr. Reagan recalls his line-item veto power as California Governor, and notes that 42 other governors enjoy it too. So why not the President?

"Because a governor is not the President, Commander in Chief, Diplomat in Chief, Economist in Chief and Communicator in Chief. Governors may need the added authority to influence their legislatures. But Presidents, especially Mr. Reagan, have made no persuasive showing that they now need to destroy Congress's last significant power, the power of the purse.

"Much as it might alter the political power balance, the line-item veto would not directly affect most appropriations. It could not reach three-fourths of the Federal budget. Social Security costs could not be vetoed without first rewriting the underlying law. The same goes for other entitlement programs, like Medicare or farm subsidies. Interest on the national debt is veto-proof, and so, by and large, is the defense budget.

"Ignoring these limitations, Presidents like to portray the item veto as a scalpel for removing the pet projects of special interests that Congress won't resist. As if the White House served no special interests.

"A further reason for opposing the item veto is that it might give Presidents excessive influence over individual members of Congress. The White House could, for example, threaten to veto perfectly legitimate expenditures of importance to individual legislators because they dare to oppose the President on other issues. Presidents loom large enough in the political careers of legislators.

"At best, this proposal would alter spending patterns at the margin. At worst it's a power grab, upsetting Federal checks and balances that have worked pretty well. This debate is a poor substitute for doing something substantial about the alarming budget deficits."

Mr. PELL. Mr. President, I have voted again today to limit debate on the question of whether the Senate should proceed to consideration of legislation to give to the President of the United States authority to veto individual line items in appropriations bills.

I wish to make it clear, however, that I do not support the line-item veto legislation. As a member of the Committee on Rules and Administration, I voted to report that legislation to the Senate with an unfavorable recommendation—a recommendation that the Senate do not pass the bill. I believe it is unwise and unconstitutional legislation that will do nothing to reduce the Federal budget deficit, but will do great deal of harm to the constitutional balance of powers between the executive and legislative branches of our Government.

However, in my 24 years of service in the Senate I have never voted in support of a filibuster, even when I have opposed the substance of the legislation involved. It is in keeping with my general view that the Senate should be permitted to work its will on legislation that I have voted to limit debate on the question of proceeding to consideration of this measure.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 6:50 p.m. tonight.

The PRESIDING OFFICER. Without objection, it is so ordered.

LAMBERT MIMS, THE MAYOR OF MOBILE, TO RETIRE

Mr. HEFLIN. Mr. President, today I wish to share with my colleagues a story of an unselfish public servant. After 20 years of dedicated service to Mobile, AL, Lambert Mims did not run for office in this year's mayoral election. This ends his long career as a public servant of Mobile, a career that has seen many improvements and changes.

Mr. Mims, currently finishing in his fifth term as mayor is ending a career long in service to the city of Mobile. Mims was first elected to the Mobile City Commission in 1965, becoming the city's youngest commissioner ever. He was responsible for all public works activities, and was reelected four times, making him only the second person in Mobile's history to serve five terms.

It has been said that his tenure in office coincided with "the greatest Public Improvements Program in our history—during these years when our city was expanding westwardly and the central city had to be revitalized." As commissioner and mayor, he initiated and directed the largest and most progressive Public Works Improvement Program in the city's history, and he enjoys an unmatched record of accomplishments in public works services.

Along with his demanding schedule of duties as mayor, Lambert Mims also is very active in the Alabama Baptist State Convention. He served as president of the 900,000-member convention, one of the few layment to be elected to this to office. He also served two terms as first vice president of the convention, deacon and chairman of the board of Riverside Baptist Church, president of the Alabama Baptist Brotherhood, and director of the Mobile Baptist Brotherhood.

Throughout his career, Mayor Mims has received many honors for his work in community and religious service. He was named Mobile's most outstanding young man of 1965. He was the principal speaker at Hon. George C. Wallace's 1971 inaugural breakfast and attended the Presidential prayer breakfasts of Presidents Johnson, Nixon, Ford, Carter, and Reagan. His writings have appeared in national and international magazines, such as Baptist Men's Journal, Contact, Moody Monthly, Grit, and Solid Waste Management.

Following his retirement from public office, Mims says he plans "multifaceted" activities, and anticipates "that the future will be bright for me personally." He intends to write, speak, and lecture in public works and governmental workshops, sharing his vast knowledge and experience with others.

Lambert Mims has truly been an asset to the city of Mobile and the State of Alabama. Under his leadership, Mobile has grown and prospered. He fought to promote the Tennessee Tombigbee Waterway, and vows to help the city as it changes from a commissioner form of government to a mayor-council form. Mims has promised to remain an ambassador for Mobile wherever he goes.

Mr. President, I ask unanimous consent that an article from the Mobile Press Register concerning Lambert Mims be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MIMS SAYS HE WON'T SEEK OFFICE JULY 9

(By Arthur Drago, Jr.)

Not "up to the battle," Mayor Lambert C. Mims will not be a candidate in the July 9 municipal election, he announced Monday.

In a seven-page, handwritten statement, Mims said, "After much prayer and consideration, I am announcing that I will not be a candidate for mayor in the upcoming election."

Mims, 55, has served on the Mobile City Commission since 1965, overseeing the public works department throughout his career. He was re-elected in 1969, 1973 and 1981.

Mims had been considered the chief challenger to Finance Commissioner Arthur R. Outlaw this summer in the city's first mayoral election since the early 1900s. Outlaw won the lead role in the play for mayor of Mobile with a landslide victory in the special election March 12 to fill the remainder of ousted Finance Commissioner Gary A. Greenough's term and the subsequent endorsement of the mayor-council government in a referendum three weeks ago.

Thus far only Outlaw and Democratic Party official Pat Edington have announced for the mayor's race.

Saying he was "always the underdog," Mims, however, added, "I just don't feel up to the battle."

The reportedly substantial contributions to Outlaw's commission campaign did not color Mims' thinking, he said.

"I'm not intimidated by all the money that's said to be in the other camp," said Mims.

Mims said he had "agonized over it * * * sincerely prayed about it," and only reached the difficult decision after neither alternative felt comfortable as the deadline drew near.

"Every other time, I knew without a shadow of a doubt that I should be in," said Mims. "But this time, I've not been able to get any peace by stepping aside; I've not been able to get peace by staying in the race."

Noting that he has devoted much of his time this year to traveling about the country to promote the Tennessee-Tombigbee Waterway and to the city's campaign to land the U.S. Navy's Surface Action Battle Group, Mims indicated he was unwilling to take on the rigors of a political campaign.

"I think I could win the race if I could put forth the effort," said Mims.

The mayor offered his "help in any way possible during this transition period" from the commission government to a mayor-council form.

Mims' statement, in which he thanked the citizens of Mobile for the "privilege and honor of serving here for 20 years," noted that only one other person in the city's history has served as long.

Mims said his tenure in office coincided with "the greatest public improvements program in our history * * * during these years when our city was expanding westwardly and the central city had to be revitalized."

The city has enjoyed social progress as well since 1965 with "minorities taking a more prominent part in community affairs," said Mims.

"From an economic standpoint we have had change," Mims' statement read. "In spite of losing 14,000 jobs with the closing of Brookley; in spite of new technology reducing the number of jobs and closing plants; and in spite of natural disasters like Hurricane Frederic and several floods, we have made progress with the opening of the Tenn-Tom, the discovery of gas and oil in the area, with the prospects of new and expanding industries and the possibilities of the Navy Surface Action Group coming to our port, Mobile has a bright future."

Mims said he planned "multi-faceted" activities, anticipating "that the future will be bright for me personally."

The mayor said his experience in administration, management and promotion "will be made available to business, industry and government."

He also intends to write, speak and lecture in public works and governmental workshops and seminars in "connection with the American Public Works Association and other such groups."

Mims said his withdrawal from political office will permit him to pursue "that which I like to do most," speaking to church groups, revivals, retreats, conferences, seminars, civic clubs and banquets.

"I plan to have press conferences wherever I speak and encourage more Christian people to become involved in governmental affairs," said Mims. "I have served the people of Mobile faithfully and have tried to represent them in a way to cause them to be proud. I shall continue to be an ambassador for Mobile wherever I go."

THE RETIREMENT OF URALEE HAYNES

Mr. HEFLIN. Mr. President, as we all know, the future of our Nation relies on the education of our children. For this reason, I am saddened to learn of the retirement of a dedicated, quality educator, Uralee Haynes, the superintendent of Lowndes County Schools of Alabama.

All of Lowndes County's children have benefited from her leadership. A gym has been built at the former Lowndes County Training School—now Central High. A special education building housing both elementary and secondary students at Central has been built. Also, a completely new facility has been built to replace the building destroyed by fire at Haynesville High School. An area vocational school offering courses in clothing production, trowel trades, business and office education, plumbing, electronics, and health occupations was established. A day care center for preschoolers was organized.

Mrs. Haynes began her training at Tuskegee Institute, where she received a B.S. degree in home economics, and later a masters degree in social studies.

She completed postgraduate courses in special education at Troy State University, and in administration and supervision at Alabama State University.

She began her career in 1939 as a home economics teacher at Summerville High School in Aliceville, AL. She later moved to Haynesville, where she taught home arts, and later Social Security, remedial reading, the learning disabled, and special education. From 1946, she served as assistant principal of Lowndes County Training School, a position she held until 1975, when she was named superintendent of Lowndes County Schools. As superintentent, she worked for 10 years to improve the Lowndes County System.

Despite the great task of maintaining a school system, Mrs. Haynes also stays involved in various community activities. She is a member of the Alabama State Chapter of Phi Delta Kappa, a teaching honorary. She is also active in the National Education Association, the Alabama Education Association, and the Lowndes County Education Association. She is also a member of the Lowndes County Political Committee and the Lowndes County Democratic Executive Committee.

As she leaves the teaching profession, we can only hope that she will be replaced by others as dedicated to teaching our children as she. With more educators like Mrs. Uralee Haynes, we can assure ourselves of a brighter future as our children reach adulthood.

MARTIN JOHNSON: 50 YEARS OF SERVICE TO SOCIAL SECURITY

Mr. HEFLIN. Mr. President, throughout this country's history, we have stressed the need to have pride in our work. The strength of our great Nation's social programs relies on the dedication and service of those who work within their framework. It is for this reason that I want to share with my colleagues the story of the remarkable contributions Martin Johnson has made to the Social Security Administration during his 50 years of dedicated service.

On Friday, May 31, 1985, Mr. Johnson celebrated his 50th anniversary as an employee of the Social Security Administration. During his tenure there, he has risen from a Civil Service Commission position to become the Nation's senior district manager. Along with his leadership within the Social Security Administration, he is also recognized as a leader throughout the Mobile community.

A native of Mobile, AL, Johnson is a graduate of St. Bernard College in Cullman and Loyola University in New Orleans. After a short time with the accounting department of the United States Steel Corp., he began his career with Social Security during the heart of the Great Depression. When asked what changes he has seen in Social Security during the last 50 years, he states: "About anything you can think of."

When Johnson began with Social Security, he says it was "purely a retirement program." In 1936, he started with the old Social Security Board. By 1947, he had been named manager of the Mobile District Office, a position he still holds. Today, due to his outstanding record of service and dedication, he serves as the Nation's most senior district manager.

The community of Mobile also is fortunate to benefit from Johnson's civic leadership. He has served as president of the Mobile Advertising Club, district governor of the Advertising Federation of America, chairman of the Muscular Dystrophy Association and president of the Mobile Arthritis Association. He currently serves as a member of the executive board of the Mobile Area Chamber of Commerce and chairman of the Member Relations Committee. Johnson also remains active in many community service projects and organizations, by serving on the advisory board for the Boy Scouts, as chairman of the executive board of the Senior Citizens Services and the Mayor's Commission on Progress. He also has a weekly television show to advise the elderly about Social Security.

Johnson has received many honors for his contributions through his work with civic organizations and the Social Security Administration. He received a citation from President Eisenhower for his work. In 1954, he was named "Mobilian of the Year." He was knighted by Pope Pius XII in the order of St. Gregory the Great, and named Knight Commander by Pope John XXIII. He has also been knighted in the Equestrian order of the Holy Sepulcher of Jerusalem by Pope Paul VI, and named a Knight of Malta. He is the only American who is a member of Queen Elizabeth's Legion of the Frontiersman. He also holds the Australian Medal of Merit.

Martin J. Johnson is a great asset to his community, his State, and the Nation. We can only hope to find many more people as loyal and dedicated as he. In fact, when asked if he will retire, due to his many years of service, he replies, "I'm going to stay as long as they don't chase me off!"

Mr. President, I ask unanimous consent that an article from the Mobile Press Register concerning Martin Johnson be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JOHNSON CELEBRATES 50 YEARS OF SERVICE

Martin J. Johnson has grown from the youngest to the senior district manager of the Social Security Administration.

On Friday Johnson celebrated his 50th anniversary of working as a federal service employee. Local dignitaries, as well as officials from the Social Security Administration in Baltimore, Md., attended a ceremony honoring Johnson's 50 years with the administration, held at the First National Bank building downtown.

"I feel great. I wouldn't swap it for anything," said Johnson, who added that he doesn't plan to retire anytime soon. "I'm going to stay as long as they don't chase me off," added Johnson.

When asked what changes he's seen in Social Security in the last 50 years, he replied, "About anything you can think of."

He said Social Security originated as "purely a retirement program."

In 1934, according to Johnson, Congress passed a law phasing in the program, based on a recommendation from the President's Committee on Economic Security. He said the committee recommended a program be established for retirement, death and disability income.

Social Security went into effect in 1937 and was intended to be "only a lump sum when a person reached the age of 65," noted Johnson. However, he added, "the 1 percent tax (levied for Social Security) built up so rapidly in the treasury that Congress said it would include a death benefit."

The death benefits and monthly retirements were included in the program in 1940, Johnson said.

In July 1955, disability benefits were included and then in 1966 Medicaid was also place under the Social Security program.

Johnson began working with Social Security in 1936. One year prior to that he worked with the old Civil Service Commission.

A native of Mobile, he has been the manager of the local Social Security office since 1947.

WILLIAM H. TRIMM

Mr. HEFLIN. Mr. President, it is with sadness and a deep sense of loss that I note the passing of William H. (Hershel) Trimm of Hoover, AL, a suburb of Birmingham. Everyone who had the good fortune of knowing Hershel will sorely miss his unfailing dedication to this profession and his fellow man.

Hershel's career typifies the opportunities available in this country to those who are willing to give of themselves. He was the smalltown boy who went out into the world and made good.

In the face of good times and bad times, Hershel continued to base his life on hard work, integrity, and professionalism. He was always willing to learn and, at the same time, never hesitated to share his knowledge and experience with others, particularly newcomers in the business.

Hershel was a doer and a giver. He was a prime mover in the development and growth of the city of Hoover; he served as chairman of the Hoover Planning and Zoning Board for more than a decade; and he was instrumental in drawing up Hoover's zoning ordinances.

In 1965, he started his own homebuilding business concentrating his efforts in south Jefferson County and north Shelby County. He helped design and build the Tall Timbers, Birchtree, and Piney Woods subdivisions which were subsequently annexed by the city of Hoover. At the time of his passing, he headed the Trimm Building Corp., Trim Construction Co., and Trimm Realty Co.

Hershel was deeply involved in local, State, and national homebuilders associations. He served as scholarship house chairman of the Greater Birmingham Association of Home Builders in 1968 and on the education trust board of trustees from 1969 to 1971. Having served in the various elected offices, he was chosen as president of the Birmingham association in 1973. He also held the position of national director for the association representing them on the National Association of Home Builders board of directors.

In 1976, he became secretary of the Home Builders Association of Alabama and in 1978 was elected president of the 3,000-plus member association. He subsequently served as national director for the State association representing the organization on the National Association of Home Builders executive committee.

Hershel was recognized by his peers for his dedication and service to the homebuilding industry when he was chosen builder of the year by the Greater Birmingham Association of Home Builders in 1971; 9 years later, he was honored as the Home Builders Association of Alabama builder of the year.

Hershel's efforts on behalf of the building industry did not end on the conclusion of his term as State president. It was his leadership and expertise which helped produce, in conjunction with the Alabama Department of Health, new and more workable guidelines for wastewater treatment as well as the approval for the use of alternative wastewater treatment systems. In addition, he served with distinction on numerous special State and national committees.

Hershel was a man of impeccable moral standards who had the greatest of love and respect for his fellowman and his church. As an active member of the Green Valley Baptist Church, where he served on the board of deacons and many committees, Hershel demonstrated the same zeal and hard work which characterized his business life.

Hershel Trimm will live on in our memories. He touched the lives of many and accomplished much in his short time on this Earth. A truly outstanding citizen who gave unselfishly of himself to his family, profession, and community, his life serves as an example for all who were fortunate enough to have come in contact with him. He will be remembered; he will be missed.

TO RECOGNIZE GINNY S. ABRAMS, PRESIDENTIAL MANAGEMENT INTERN

Mr. WARNER. Mr. President, over the past 7 months, I have been extremely fortunate to have had the services of Ms. Ginny S. Abrams who, as a Presidential Management Intern, served as a member of my staff.

Ms. Abrams' performance during the critical and highly demanding legislative process was so outstanding that I wish to take a few moments to commend her and express my appreciation for her exceptional service and dedicated efforts.

The ability she possesses to express her reliable advice and recommendations in a clear and concise manner, orally and in writing, was invaluable to me in the consideration of the many complex foreign relations issues which demanded by attention.

As an assistant in matters concerning national security policy and foreign affairs, Ginny did an outstanding job of representing me to Government agencies and constituents.

At the same time, she still handled a large share of the daily responsibility of the daily visitors, appointments, and telephone calls.

Ms. Abrams thoroughly researched and examined a number of amendments which I presented on the floor of the Senate.

I know that her advice regarding issues was always based on solid research and sound, thoroughly considered judgments.

She became an invaluable member of my staff, and her performance over seven critical and highly demanding months was truly outstanding.

Her achievements are indicative of her outstanding talents and selfless devotion to accomplish assigned tasks in a highly professional manner.

I am extremely appreciative of her efforts and accomplishments.

As she goes forward in her career as the newly appointed Special Assistant to the Assistant Under Secretary of Defense for Policy Planning, the Honorable Fred C. Ikle, I would like to once again express my sincere appreciation to her for her outstanding service and wish her the very best in all her future endeavors.

EXTENDING MEDICAID COVERAGE FOR LOW-INCOME PREGNANT WOMEN: COST-EFFECTIVE AND NEEDED

Mr. CRANSTON. Mr. President, several months ago I introduced S. 7, legislation to extend Medicaid coverage to one of the remaining groups of low-income pregnant women currently excluded from coverage in a number of States. This group consists of women who are married and living with a spouse who is employed, but whose family income and assets fall below the State's AFDC income eligibility threshold. Ironically, pregnant women with the same income and resources who are single or whose husbands are unemployed are provided Medicaid coverage in all States. Yet, in a significant number of States—almost 20 in a recent survey—if such a woman is living with her husband and he is employed, albeit at a job that provides an income that is below the State's welfare eligibility standard, she is not eligible to receive Medicaid assistance during her pregnancy. This is certainly an antiwork and antifamily policy. According to a recent CBO estimate that I will discuss in a moment, it is estimated that over 26,000 pregnant women would be extended Medicaid coverage during their pregnancy if S. 7 is enacted.

Moreover, as a result of legislation—derived in part from a bill, also denominated S. 7, I introduced last Congress—enacted in the last Congress, as soon as these children are born, they become eligible for Medicaid. Thus, Medicaid will pay for the incredibly expensive neonatal intensive care that such a newborn might need, but not for the prenatal medical assistance that could reduce the likelihood of a high-risk birth and possible lifelong need for medical care.

S. 7 in this Congress would help to ensure that all low-income pregnant women have access to the medical care which can improve the chances for the birth of a healthy child. This legislation represents a further step in efforts I have promoted in the past several Congresses to close the gap in the Medicaid Program which resulted in a number of low-income women being denied Medicaid assistance during pregnancy. We were successful in the last Congress in closing some of these gaps. The task, however, is still not completed.

My statement explaining the history behind this legislation and the progress we made during the last Congress in extending prenatal Medicaid coverage appears in the CONGRESSIONAL RECORD of January 24, at S621 (daily ed.).

NEW COST ESTIMATE FROM CBO

Mr. President, when S. 7 was introduced, I indicated that I was requesting the Congressional Budget Office to reexamine the cost estimates for extending coverage to this remaining group of pregnant women. One of the principal reasons that the 1984 legislation which extended prenatal coverage did not include low-income, married women with employed husbands was because of the high price tag—$175 million in the first full fiscal year—that had been placed on this coverage.

Several months ago, I formally requested CBO to conduct a re-examination of those previous estimates and suggested several factors that lead me to believe that the 1984 cost estimate was unreasonably high.

I am delighted to report that CBO has now provided a new cost estimate for implementation of S. 7—an estimate that is dramatically lower than the previous estimate. The current estimate indicates that this provision would entail additional federal expenditures of $20 million for fiscal year 1986, $40 million each for fiscal year 1987 and 1988, and $45 million each for fiscal year 1989 and 1990.

It is estimated that there would be 26,184 low-income pregnant women who would be covered by Medicaid as a result of enactment of this bill.

Mr. President, I ask unanimous consent that the new CBO cost estimate be printed in the RECORD at the conclusion of my remarks, following my letter to CBO.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1 and 2.)

COST-SAVINGS OFF-SET NOT INCLUDED

Mr. CRANSTON. Mr. President, the new CBO cost estimate does not include any contemplated savings to the Medicaid Program as a result of providing adequate prenatal coverage to these women. CBO declined to include such an offset in its official estimate, in part, because of what it termed was "the uncertainty in the magnitude of savings resulting from better prenatal care."

Despite CBO's reluctance to include such an offset in its official budget estimate, there is little doubt that providing better prenatal care does result in cost savings in terms of subsequent Medicaid expenditures.

EFFECTIVENESS OF PROVIDING ADEQUATE PRENATAL CARE

On January 24, I cited many of the projects around the country which have demonstrated over and over that providing adequate prenatal care works in reducing the number of high-risk births. Early prenatal care helps identify potential problems in the mother as early as possible so that steps can be taken to reduce the risk of having a low birth weight and/or premature birth.

That is why the General Accounting Office in 1980 testified at a hearing I chaired that the single most important step we could take to improve pregnancy outcome and reduce infant mortality in this country would be to ensure that every pregnant woman receives proper prenatal, delivery, and postnatal care.

That is why an identical recommendation was made in 1981 by the Select Panel for the Promotion of Child Health—the panel established by Congress to assess the status of maternal and child health and to develop a comprehensive plan to promote the health of children and pregnant women in the United States. One of the central recommendations made by that panel was to mandate Medicaid eligibility for all pregnant women whose family incomes are at or below the federally established poverty level.

NEW REPORT FROM THE NATIONAL INSTITUTE OF MEDICINE

Mr. President, since my January 24 introductory statement citing the numerous studies documenting both the need for better access to prenatal care for all low-income pregnant women and the cost-effectiveness of providing such care, an important new report has been released. This report, entitled "Preventing Low Birthweight," prepared by the Committee to Study the Prevention of Low Birthweight of the Institute of Medicine of the National Academy of Science, is a very comprehensive and thorough review of the issues.

Low birthweight is a major factor in infant mortality. There is also a well established association between low birthweight and neurodevelopmental handicaps, congenital anomalies, and a wide range of other disabling conditions. Experts uniformly agree that reducing the incidence of low birthweight is a key to reducing infant mortality and morbidity. They also agree that the availability of adequate prenatal care during a pregnancy can reduce the risk of low birthweight. The National Institute of Medicine's report concluded that "[e]fforts to reduce the Nation's incidence of low birthweight must include a commitment to enrolling all pregnant women in prenatal care and specifically recommended that Medicaid should be expanded and strengthened to reach more recipients. The report stated:

Medicaid increases participation in prenatal care by lowering financial barriers to such services. And because participation in prenatal care is associated with improved birthweight, efforts to expand and strengthen the Medicaid program should be part of a comprehensive program to reduce the nation's incidence of low birthweight. Decreasing the participation of pregnant women in the Medicaid program by such means as changing welfare or Medicaid eligibility criteria serves only to undermine the purpose of the program and, among other things, threatens appropriate use of prenatal care and increases costs for low birthweight infant care. Changes in the program should be dedicated to enrolling more, not fewer, indigent, eligible women in the program and to providing them with early and regular prenatal care of high quality.

The report specifically recommended that:

Eligibility standards should provide Medicaid coverage for pregnant, indigent women, regardless of their family composition or the employment status of the chief breadwinner in the family unit.

That is precisely what S. 7 is intended to do.

With respect to the budgetary questions, the NIM study examined the cost of providing adequate prenatal services to low-income women. According to the NIM calculations, the provision of prenatal care to this population would resulting in a reduction in total expenditures for direct medical care of low birthweight infants by $3.38 for each additional $1 spent on prenatal care. These savings are calculated on the expected direct medical costs of caring for a low-birthweight infant only in its first year. They do not include long-term costs of caring for those infants with disabling conditions—costs which can be staggering.

The savings calculated by the NIM study parallel similar estimates from other studies on the impact of providing adequate prenatal health care. I am thus absolutely convinced that the true cost of enactment of S. 7 is even less than the new CBO estimate. Indeed, there is ample reason to conclude that enactment of this measure would lead to a reduction in overall Medicaid expenditures—both State and Federal.

CONTINUED BROAD SUPPORT FOR S. 7

Mr. President, this legislation continues to enjoy support from a broad range of organizations, including child advocacy groups and health care groups, as well as organizations with sharply differing positions on the issue of abortion. Those organizations which have endorsed S. 7 include the National Right to Life Committee, Planned Parenthood Federation of America, National Conference of Catholic Charities, Children's Defense Fund, Association for Retarded Citizens, Family Service Association of America, Child Welfare League, National Association of Children's Hospitals and Related Institutions, California Association of Children's Hospitals, National Perinatal Association, and American Academy of Pediatrics.

Support for S. 7, represents support for an initiative that is pro-choice, pro-life, and pro-family in a very meaningful sense. For those who support freedom of choice, nothing could be more central to that freedom of choice than the right of a low-income woman to choose to carry a pregnancy to term free from the economic pressures arising from the inability to pay for the costs of the medical care needed. For those who believe that abortion should never be permissible, making available the medical care necessary for a low-income woman to carry a pregnancy to term is essential to alleviating economic pressures which might otherwise influence a decision to terminate a pregnancy.

Mr. President, regardless of differing views on the issue of abortion, there ought to be unanimous agreement that every pregnant woman should have access to the medical care neces-

sary during a pregnancy to enhance the likelihood of a healthy child.

As a Senator who was deeply involved in the last Congress in our successful efforts to develop the framework for a responsible and sensitive approach to dealing with the so-called Baby Doe cases, I am also acutely aware of how relevant in terms of that issue is the provision of adequate prenatal care. Although it may not be medically possible to eliminate entirely the incidence of high-risk births, there is absolutely no question that the availability of adequate care during pregnancy can be critical to reducing the likelihood that a child will be born with a serious disabling and life-threatening condition. Every Member of this body who is concerned about the treatment of Baby Doe infants ought to be equally concerned about making sure that the medical assistance which would reduce the likelihood of a child being born with these disabling and life-threatening conditions is provided during pregnancy. Just as we developed a consensus last Congress to deal with these very difficult decisions at and after birth, we should coalesce to provide the same consensus to help reduce the incidence of these tragic cases.

CONCLUSION

Mr. President, it is well past time for the Federal Government to close the gaps in the Medicaid Program which allow certain needy pregnant women to be excluded from coverage. It is foolhardy to continue this omission, particularly when Medicaid coverage is provided to the new-born infant to pay for the often extraordinarily high costs of neonatal intensive care—costs that can be averted through the provision of early prenatal services. It is my intention to push hard in this Congress to see this inequity corrected.

In the past decade, we have made great strides in increasing the number of women who received medical care during that critical first trimester of pregnancy. However, almost one-fourth of the pregnant women in this country do not and they are often those with the greatest need for early care. Repeatedly, studies of women who have not obtained adequate prenatal care have found that the major reason for the lack of such care is that the woman could not afford it. We can and must do a better job of reaching those women and increasing their chances of having a healthy child.

S. 7 has already been cosponsored by a number of my colleagues, including Senators MOYNIHAN, MATSUNAGA, INOUYE, RIEGLE, METZENBAUM, DODD, LEVIN, KENNEDY, ANDREWS, SIMON, and LEAHY. With the new, significantly lower CBO cost-estimates, I hope that others who are concerned about health care for low-income pregnant women will join in supporting this legislation.

EXHIBIT 1

U.S. SENATE,
Washington, DC, March 4, 1985.

Dr. RUDOLPH G. PENNER,
Director, Congressional Budget Office, House Annex No. 2, Washington, DC.

DEAR RUDY: I recently introduced legislation, S. 7, which would require that Medicaid coverage be extended to all pregnant women who meet the AFDC income and assets eligibility standards for the State in which they reside. During the last session of Congress, provisions were enacted in Public Law 98-369 which extended Medicaid coverage to women in this category whose husbands are unemployed. The effect of S. 7, if enacted, would be to extend Medicaid coverage to similarly-situated women whose husbands are employed. Essentially this coverage was included in the House-passed version of H.R. 4170 but was deleted during the conference.

Although CBO has not prepared a formal budget estimate for S. 7, my staff has been informally advised that the cost of enactment of this legislation would be assumed to be that of the provision which was dropped during last year's conference on H.R. 4170. That provision had been costed by CBO as producing a federal share of approximately $175 million in the first year (FY 1988 under the House-passed bill).

I have been advised that CBO's estimates have been based upon an assumption of a 100-percent participation rate of the estimated 100,000 pregnant women who would be made eligible for coverage by this provision. I am writing to request a new CBO cost-estimate and to raise with you several concerns I have about the basis for last year's cost estimates.

First, I question strongly the reliability of assuming a 100-percent participation rate for this category since the employed status of the spouse would suggest that some portion of the eligible women would have employer-sponsored health insurance coverage, thereby reducing the extent of new Medicaid costs.

Second, although there may be some justification in assuming that the eligible individuals without other sources of care would seek reimbursement for the hospital costs of delivery, it is doubtful that 100 percent of those eligible will seek prenatal medical assistance before the time of delivery. Accordingly, the assumption that each eligible woman would seek reimbursement for full prenatal as well as delivery health care seems to me to overstate the per individual cost of expanding coverage.

Third, I am concerned about the assumption of 100-percent participation in the first effective year. In the past, CBO has assumed a much more gradual participation for this type of Medicaid expansion, and I am advised that the Administration assumes a much slower expansion under the 1984 amendments than CBO estimated.

Fourth, rarely do all eligible persons participate in any program. What is estimated to be the general Medicaid participation rate among eligibles?

Fifth, and most importantly, I am deeply concerned that CBO's cost estimates do not include any off-setting savings to the Medicaid program as a result of providing prenatal services to high-risk pregnant women. Numerous studies, including a detailed one done in the State of California, have shown an immediate reduction in Medicaid expenditures for neonatal intensive care for each Medicaid dollar spent on prenatal services. A report from the National Academy of Sciences released on February 25, also documents savings. Since Public Law 98-369 mandated Medicaid eligibility for the infants whose mothers would be covered under S. 7 during their pregnancy, it is clear that additional Medicaid expenditures for the care of high-risk infants could be reduced by providing Medicaid services during the pregnancy rather than only after birth itself.

I would appreciate your response to these concerns and a new cost estimate for S. 7 at the earliest possible time since I wish to press ahead with this legislation as soon as we receive a new cost estimate from CBO. Please have your staff contact Susanne Martinez (224-3553) for any additional information or data relating to cost-savings.

Cordially,

ALAN CRANSTON.

EXHIBIT 2

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 13, 1985.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, DC.

DEAR SENATOR: As requested in your letter of March 4, 1985 we have reviewed your proposed legislation (S. 7) to amend Title XIX of the Social Security Act to provide Medicaid coverage during pregnancy for certain low-income women in intact families who would otherwise be ineligible. Based on our analysis, we estimate the following costs:

Fiscal year:	*Millions*
1986	$20
1987	40
1988	40
1989	45
1990	45

Our estimate is based on the following information on low-income women in intact families from the Current Population Survey (CPS):

Family work status	Women	Not currently covered
Full-time, full-year	108,040	108,040
Part-time, full-year	12,916	7,285
Part-year	116,078	86,826
Total	237,034	202,151

Of these eligible women, 13.0 percent are expected to be pregnant in any given year for a total of 26,184 pregnancies. Each pregnancy is expected to result in a total state and federal cost of $2,650 in 1986. Since the match rate for those states that do not currently cover the pregnancies is 60 percent, the federal share of each pregnancy would be $1,600. Costs were adjusted in the out years to reflect medical cost inflation.

This estimate differs from the CBO estimate mentioned in your letter for several reasons. First, the data are based on the March 1984 CPS. The previous CBO estimate used data from the March 1982 CPS. Second, during the past year, states with roughly 40 percent of this uncovered population have extended Medicaid coverage. Finally, we have refined our definition of Medicaid eligibles.

This estimate includes a 50 percent reduction during the first year to account for lags in implementation, a 6 percent reduction each year to account for private insurance coverage and a 10 percent reduction to account for other nonparticipation. Although roughly 22 percent of eligibles appear to

have some private health insurance, much of it will require extensive copayments by Medicaid. Furthermore, GAO recently reported (GAO/HRD-85-10) that states collect only a small proportion of third party liability. Our 90 percent participation rate for those without private coverage reflects the fact that a majority of the costs are incurred in the hospital where incentives to locate possible sources of payment are very strong. Even in the event that a woman does not seek prenatal medical assistance before the time of delivery, the costs to the government are reduced by less than a third.

The costs reflected in this estimate are not offset by savings resulting from better prenatal care. This reflects the uncertainty in the magnitude of savings from better prenatal care as well as the fact that many women will not seek medical advice early in their pregnancy. Under S. 7, states would be required to cover services for pregnant women but not to institute an aggressive program to educate women in the need for early medical attention during pregnancy.

The proposed legislation would result in additional state costs to state Medicaid programs as shown below:

Fiscal year:	*Millions*
1986	$15
1987	30
1988	35
1989	35
1990	40

We would be pleased to respond to any questions you might have on this estimate. Your staff may contact Jack Rodgers (226-2820) with detailed questions.

With best wishes,

Sincerely,

JAMES BLUM,
(For Rudolph G. Penner,
Director).

ADDRESS BY ADM. JAMES D. WATKINS AT THE RESERVE OFFICERS ASSOCIATION CONVENTION

Mr. THURMOND. Mr. President, it is a pleasure to commend the Chief of Naval Operations, Adm. James D. Watkins, for the fine speech he delivered last month at the National Convention of the Reserve Officers Association of the United States in Portland, OR. Admiral Watkins' remarks eloquently address the current challenge to America and the readiness of our Armed Forces to deter aggression and to maintain peace through strength.

Mr. President, nearly 5 years ago, President Reagan called upon the Congress and the American people to support a program to restore our military readiness and increase our defense capabilities. We have made great progress in this effort; however, as Admiral Watkins succinctly points out, we have not yet reached our goal and we must never allow our capabilities to deteriorate again.

The Chief of Naval Operations is to be commended for his timely and stimulating address on our national security. I strongly recommend that my distinguished colleagues read Admiral Watkins' speech entitled, "America, Steady as She Goes."

Mr. President, I ask unanimous consent that Admiral Watkins' address on June 29, 1985 at the Reserve Officers Association convention be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

"AMERICA, STEADY AS SHE GOES!"

(By Adm. James D. Watkins)

Thank you for that kind introduction Colonel Eileen Bonner.

I am most honored to be inducted into ROA's Minuteman Hall of Fame. Yet the real winners are the many Regular and Reserve members of our armed forces, serving around the world . . . they are the minutemen of the 1980's, ever ready to respond to our Nation's call. But, because of the exposure too often given to wailing and gnashing of teeth by tiresome national negativists, one could be left with the impression that the military is weathering particularly stormy seas right now as defense budget debates reach an uncommon crescendo. In my opinion, the sea state is normal for this time of year. As a matter of fact, I thought it might be amusing to take a quick look back in Americana to see if the current situation were unique, or simply par for the course . . . I was not surprised to find that latter to be the case. In this regard, a look at the last century is revealing.

In 1846, there was a great military industrial complex debate about weapons that didn't work. General U.S. Grant remarked about short-ranged muskets used in the Mexican-American War that "a man might fire at you all day without your finding out."

Then, there was a problem of retention of sailors in both Navy and merchant marine. In San Francisco in July of 1850, 500 ships were left deserted by sailors going to seek their fortunes during the gold rush.

You ask, "what about military critics of those days?" Well, during the early 1800's, Congressman Davy Crockett made repeated attempts to abolish West Point because he said it was producing aristocrats.

How about pay and benefits in those days? While we went with little or no pay increases, in 1873 Congress gave itself a salary raise of 50 percent, and made it retroactive for two years.

"OK, but what about reasonable congressional debate and discussion," you ask. Well, recall it was during the early 1800's that Senator Henry Clay blocked other discussions on the floor in Congress with an extensive speech about his dead bull, Orozimbo . . . nothing changes . . . par for the course.

So, as in those days, we will survive despite the doomsday nature of so much of the rhetoric. The Chicken Little-ists who always believe we are teetering on an abyss of national failure will be proven wrong again. I agree with Ernest Hemingway who wrote in A Farewell to Arms, "The world breaks everyone, and afterwards many are strong at the broken places." America has been welded back together many times—we know how to do it.

Sure, the problems which face us today are complex. This is an incredibly difficult time when differences between war or peace and friend or foe can blur to an almost indistinguishable point . . . like Clausewitz's description of the "fog of war." and, nations as well as shadowy groups who fly no national colors continue to strike out at us, just because we are Americans. Examples of this are freshly etched on our national memory.

Like the hostage situation aboard the TWA airliner. And, the young sailor, Petty Officer Robert Stethem, who was brutally murdered just because, as Vice President George Bush said, he was an American serviceman.

Like the murder of four young marines in a restaurant in El Salvador, killed just because they were Americans.

Or the criminal act of murdering Major Arthur Nicholson, shot by a Soviet sniper just because he was an American.

So, what is the truth which rises out of the muddle of current turbulent world affairs? One truth, certainly, is that we should never allow our national conscience, psyche and will to be slashed and cut by the shards of world events flying dangerously close aboard . . . No, it is not an impossible time filled with despair. We have faced and met tough challenges before. We'll do it again, and be stronger for it.

Let's remember it was only five years ago when we reached a similar point on our voyage to preserve cherished, but threatened, freedoms. At that time, we were at the nadir of spirit and strength and the zenith of despair and guilt. Vietnam was a haunting ghost, with its attendant self-flagellation and pity. There was a marrow-deep national crisis of faith, exemplified by drug abuse, economic paralysis and spiritual and moral degradation. We were drifting toward the rocks and shoals of self-destruction.

But, as in Hemingway's observation, we mended where broken, found new hope, and restored self esteem. The renaissance in military strength today, improvements in our overall economic climate and renewed interest in world leadership, all resulted from positive actions taken earlier this decade.

But, now for the tough questions we need to ask ourselves—"America, are we going to do what we must ahead of time to stave off crises which continue to threaten basic and cherished freedoms? or will we find it too convenient to test fate and wait to be jolted once again by outside stimulus? Are we willing to hear and see what is going on around us? Or are we going to turn a deaf ear and a blind eye toward the challenge of today?"

I pray we will continue on track, steering a course of spirit and strength befitting our role as free world leader. I know we can do this if we hold our course, well-plotted earlier this decade; if we can see the world as it is and remember that the title of peacemaker is not meritoriously bestowed—but is an honor earned in the hard-knocks world of dangerous reality. As Thomas Paine said at a particularly difficult moment of the American Revolution, "those who expect to reap the blessings of freedom must undergo the fatigue of supporting it."

Typical of the challenges we face is what is happening in Central America today. To see clearly, let's look at analogous events which happened in Eastern and central Europe between the end of World War II and the early 1950's.

When we do, clearly a pattern is evident, and the hand of Soviet-inspired actions apparent. As Jeane Kirkpatrick recently pointed out to me, if there were one thing she learned in four years at the United Nations, it was that she could accurately predict Soviet behavior because it so rigidly adheres to a standard Soviet check-off list.

This check-off list starts when Marxist-Leninists come into a nation and claim humanistic ideals and sweeping moralistic en-

deavors. While they say they want to raise the plight of the common man, behind the smoke they start to wrap tentacles around all instruments of power . . . the army, the police, the media, and reformers and revolutionaries of all stripes.

As the embracing grip tightens, universities, labor unions and even churches are brought under calculated control. Soon, the curtain is raised, and, voila—Marxist-Leninist control is complete. We saw this in Poland, in Czechoslovakia, in Cuba and almost in Grenada. The curtain is half-raised and going up today in Nicaragua.

But, maybe we have finally recognized this pattern and will accept the tough task of doing something about it. Passage earlier this month of a bill in the House and Senate clearing the way for humanitarian funds for Contra democratic revolutionaries in Nicaragua was an historic, watershed event. Unfortunately it took Mr. Ortega's trip to Moscow to provide the external stimulus necessary to shock prior non-believers into a sensible turn-around.

So, this is the pattern we should always follow—place our bet on liberty. After all, if those supporting democratic revolutionaries are wrong, the people of the affected nation can freely reject them as an alternative. But, if those who support Marxist-Leninist revolutionaries are wrong, return to liberty is tenuous at best and will always be costly and paid for in lives lost . . . witness Grenada.

Today, to support such worthy global endeavors, we must keep our military muscle strong and our intellect keen. This is what worries me about a potentially dangerous situation I see developing, that we may be getting side-tracked by discussions about the price of toilet seats and ashtrays, when we should be talking about how to steer a steady course of defense for the free world.

This is not to say we shouldn't be rooting out management inefficiencies at the same time . . . in fact, we are the ones who continue to root them out. But, the danger that we will be blown off course by the sensationalists and perhaps revert back to last decade's tragedy—that is, see-saw defense budgets and resultant toothless rhetoric caused by neglected and inadequate military strength—is always lurking over the horizon.

In the early 1900's, after listening to a Senate debate about budgetary and fiscal needs of the country, then Vice President Thomas Marshall coined the memorable expression: "What this country needs is a really good five-cent cigar."

Well, today there are people who, after listening to much of the great defense debate, are mistakenly asking and wishing for a good five-cent defense.

But, a proper defense cannot come "on the cheap." Our service people are too precious to put out to sea, or in the air, or on the ground with bargain-basement ersatz tools of national defense.

And, we don't buy expensive trinkets to fulfill a demanding ego of a brass hat. We need what we ask for. We know the Soviets respect a show of credible strength to offset their raw power to intimidate. Don't ever kid yourself about that diplomatic smile and pseudo-westernized approach. It was a show of new strength that brought the Soviets back to the table in Geneva, and it is credible strength which will keep the peace. It is also not too much, in my opinion, to ask this country to pay, at a fair but steady rate, a fixed, albeit small, fraction of our Gross National Product each year to do this.

Luckily, at this, another potentially critical juncture in American history, our greatest hope is still shining through proudly—and that is our fantastic soldiers, sailors, airmen and marines, regular and reserve. They are the best—the finest I've seen in 36 years of commissioned service, and their performance is proof positive of this high rating.

One mechanism I find useful in assessing validity of such an upbeat diagnosis of our military is to sample the readiness or our Reserves. Because Reserve forces are an integral element of our national defense strength, their pulse taken at critical times can reveal military readiness of the Nation.

Since the beginning of this decade, we have witnessed a remarkable rejuvenation in the capabilities and readiness of our Reserves. All here tonight are well aware of the Navy's positive revolution in this connection in only a few years.

And, as Winston Churchill pointed out so eloquently, Reservists are twice the citizen—because of their military as well as civilian contributions. While I cannot speak highly enough of your commitment to this country, unfortunately, being twice the citizen today is no longer good enough!

Now, you must serve as three times the citizen: through your service in the military, your civilian community, and through effective voice-of-freedom associations like the ROA. Through ROA, for example, you gain needed support in Congress, and you help raise the consciousness of the American people on the importance of assuring the national security so as to avoid the predictably distasteful world events which will otherwise occur. These contributions are more necessary than ever before.

ROA was chartered by the Congress to work on behalf of adequate national security—I congratulate you for doing this so effectively for more than 60 years. But, your biggest test now comes with helping us continue forward. You must not let others snatch defeat from the jaws of victory, a victory just coming within national grasp.

We are one team of national defense—with our Reserve forces being bellwether ingredients for measuring team capability and readiness. When called upon by our Nation, we must all be ready—Regular and Reserve—to move on the very first day of challenge.

All Americans know these challenges today have never been greater, and uncommon sacrifice is still called for—and routinely provided—by our people in uniform. For while we are technically at peace, it is a violent peace, a sign of tense and turbulent times. Recent events have shown once again that our proud young people in uniform are frequently the target of those who want to strike out at this Nation.

While we will always sorrow when American blood is shed for peace and freedom, we will ever be proud of courage and patriotism in the hearts and souls of young Americans. I suppose this is why the torrential downpour of criticism about the military retirement system is so unsettling. I have a hard time listening to the shrill resonant frequency of criticism that calls this pay-back, for service well-rendered, just another case of military excess and largess.

So, I say to these critics: if you think the retirement system is so excessive, come on in and get some of it! Join up! Volunteer to give up some of your civil rights and the middle twenty-plus years of your life, replace them with frequent family moves, and even more frequent family separation and 18-hour days at sea without overtime. On the other hand, if you want to share in the so-called retirement largess of these young people, you'll have to earn it the same way they do, the hard way!

There is an old seafarers saying—"It is not the going out of port, but the coming in, that determines the success of a voyage." Well, at the start of this decade we all left port together. We knew the voyage would be long and arduous. We knew we would encounter uncharted reefs and shoal water, tremendous storms and a sky that would sometimes be so inky black we would have difficulty navigating by the stars.

Now, we are almost to the shore, our voyage almost over. We have well laid the foundations of renewed military strength over the past five years. Yet, a difficult passage into port during the next five years still worries and challenges us. What a tragedy it would be to let down now. For, to maintain peace, we simply cannot allow the recently-restored strength and spirit to wane, as we did during the last decade.

So, on this crucial leg of our journey, in order to make landfall together safely, what this country needs, like the famous 5-cent cigar, is a good steady hand on the tiller. And this Nation happens to be blessed with a commander-in-chief who has such a steady hand. We have come too far to go aground now . . . therefore, my plea to all ROA members tonight is to sound the cry, "America, steady as she goes!"

Thank you and God bless all who serve in uniform.

THE TEXTILE INDUSTRY'S GOLD SEAL PROGRAM

Mr. THURMOND. Mr. President, I would like to call to the attention of my colleagues two editorials, one printed in the June 5, 1985, issue of the Pickens Sentinel, and the other printed in the June 10, 1985, issue of the Union Daily Times entitled "Save Jobs—Buy American." These editorials represent an affirmative response to the Textile and Apparel Trade Enforcement Act of 1985 (S-680).

Mr. President, the textile industry is not waiting for a Government "bail-out." Both of these editorials discuss the South Carolina Textile Manufacturers Association Certified Gold Seal "Crafted with Pride in USA" Merchant Program. The program calls for merchants to stock at least 75 percent American-made merchandise. If a merchant agrees, the store receives the Gold Seal designation. SCTMA provides merchandising aids for in-store promotion as well as advertising and other promotional activities. The textile industry is directing its approach to the retailer, who in effect controls import orders into the market. In this time when consumers are looking more for items labeled "Made in USA," the textile industry has offered a timely campaign to attract both merchants and consumers.

Mr. President, this innovative program designed by the textile manufacturers is a very positive step in promoting American-made goods on the

market. It is a pointed reminder that the purchase of American-made goods keeps American businesses in operation. Employed textile workers contribute income and support to their communities.

Mr. President, I urge that all my colleagues read these two editorials, and I ask unanimous consent that copies be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From Pickens Sentinel, June 5, 1985]

EDITORIAL

The South Carolina Textile Manufacturers Association (SCTMA), an industry group of 75 major corporations, has taken the problem of textile imports directly to the marketplace—to the people who can do the most about it—the state's retailers who sell apparel and home furnishings. What these retailers buy to stock their stores determines how much imports will grow or not grow during the coming months.

Although the textile industry has legislation pending in Congress that would provide orderly import growth and prevent the disruptive surges like we've had during the past two years, the nation's retailers, by means of their orders to manufacturers, are the ones who control the amount of clothing and home furnishings imported into the United States. It is far more preferable for imports to be regulated by the normal market forces of supply and demand than by complicated and difficult to enforce government laws and regulations.

Retailers in Greenville and Pickens counties recently learned about SCTMA's Certified Gold-Seal "Crafted With Pride in USA" Merchant Program.

It calls for merchants to stock at least 75 percent American-made merchandise. If a merchant agrees, the store receives the Gold-Seal designation. SCTMA agrees to provide merchandising aids for in-store promotion as well as advertising and other promotional activities.

There are approximately 170,000 South Carolinians who are directly employed in the manufacture of cloth and apparel and whose jobs and incomes depend on the sale of American-made products. Since our region has so many families whose incomes depend indirectly on textiles, it is just plain commonsense for the retailers to support the textile people. Textile people are consumers, too. They, along with others, patronize the retailers, and it is no secret that when textile people go shopping these days, they are more "country-of-origin" conscious than ever before. They are looking for clothes labeled "Made in USA" because their jobs depend on it.

Let's also not forget that employed textile people pay income taxes and social security taxes, as well as property taxes, and school taxes plus provide funds to United Ways, hospitals, colleges, civic club projects and an almost endless list of worthwhile human service organizations. And healthy South Carolina textile companies also pay taxes and make substantial contributions to educational, charitable, cultural and recreational organizations that make life better for all of us.

We hope this new merchandising program with both groups working together for stronger retail sales as well as healthy textile industry will stabilize the growing decline of well-paying textile jobs in South Carolina.

[From the Union Daily Times, June 10, 1985]

SAVE JOBS—BUY AMERICAN

The latest news from Washington concerning the textile industry is gloomy—nearly 2 million American jobs will be lost in the next five years unless textile and apparel imports are curbed.

A study released by the Fiber, Fabric and Apparel Coalition for Trade projects that 947,000 in the textile and apparel industry and another 943,000 in related industries.

Congress is attempting to solve the import crisis with the Textile and Apparel Trade Enforcement Act of 1985. The bill would limit major exporting countries such as Taiwan, Hong Kong, China and Japan, while allowing smaller exporting countries to increase their share of the U.S. market.

On the local level, we can help fight imports by purchasing textile products made in the United States. American-made products are easily-distinguished by the "Made in USA" or "Crafted with Pride in USA" labels.

The South Carolina Textile Manufacturers' Association, through its Gold-Seal "Crafted with Pride in USA" program, has joined the battle to help curb imports and save jobs. It calls for merchants to stock at least 75 percent American-made merchandise. If the merchant agrees, he receives a Gold-Seal designation. In addition, SCTMA agrees to provide merchandising aids for in-store production as well as advertising and other promotional activities.

The reasoning behind this program is the nation's retailers, by means of their orders to manufacturers, are the ones who control the amount of imported clothing and home furnishings. Textile manufacturers believe it's far more preferable for imports to be regulated by the normal market forces of supply and demand than by complicated and difficult to enforce government laws and regulations.

Textile unemployment creates a domino effect; the loss of one textile job results in the loss of another job. According to the textile industry, if 1,000 jobs are lost, another 1,000 people can expect to be out of work.

On the other side of the coin, when 1,000 textile and apparel jobs are created, an additional 3,000 jobs spring up.

That's why supporting American textiles and apparel is vital to everyone.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on July 22, 1985, he had approved and signed the following joint resolution:

S. 1455. An act to extend the authority to establish and administer flexible and compressed work schedules for Federal Government employees.

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 2:09 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 106. Joint resolution designating August 1985 as "Polish American Heritage Month."

The enrolled joint resolution was subsequently signed by the President pro tempore [Mr. THURMOND].

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1522. A communication from the Deputy Associate Director for Royalty Management, Department of the Interior, transmitting, pursuant to law, a report on 41 refunds of offshore oil and gas lease revenue refunds; to the Committee on Energy and Natural Resources.

EC-1523. A communication from the Deputy Associate Director for Royalty Management, Department of the Interior, transmitting, pursuant to law, a report on 9 refunds of excess oil and gas offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1524. A communication from the Associate Director for Royalty Management, Department of the Interior, transmitting, pursuant to law, a report on a refund of excess royalty payment of offshore oil and gas lease revenues; to the Committee on Energy and Natural Resources.

EC-1525. A communication from the Secretary of Commerce, transmitting, pursuant to law, a study of the issue of foreign trade targeting practices; to the Committee on Finance.

EC-1526. A communication from the Director for Legislative Affairs, AID, transmitting, pursuant to law, a report on the necessity for an increase in funding for Swaziland; to the Committee on Foreign Relations.

EC-1527. A communication from the Director of Legislative Affairs, AID, transmitting, pursuant to law, a report on the need for increased funding for Senegal; to the Committee on Foreign Relations.

EC-1528. A communication from the Administrator of the Veterans' Administration, transmitting, pursuant to law, a report on a computer matching program on VA professional licensure and registration records; to the Committee on Governmental Affairs.

EC-1529. A communication from the Retirement Flan Administrator, Department

of the Air Force transmitting, pursuant to law, the annual report on the non-appropriated retirement plan for civilian employees of the Air Force; to the Committee on Governmental Affairs.

EC-1530. A communication from the Secretary of Agriculture transmitting, pursuant to law, a report on a revision of a Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1531. A communication from the Secretary of Labor transmitting, pursuant to law, notice of intention to extend a current contract without full and open competition; to the Committee on Governmental Affairs.

EC-1532. A communication from the Acting Assistant Attorney General transmitting a draft of proposed legislation to provide for payment to the clerk of court of fines imposed by a U.S. Magistrate; to the Committee on the Judiciary.

EC-1533. A communication from the Secretary of Education transmitting, pursuant to law, a report on final regulations for the Adult Education State-administered Program and the National Adult Discretionary Program; to the Committee on Labor and Human Resources.

EC-1534. A communication from the Secretary of Education transmitting, pursuant to law, a report on final regulations for removal of architectural barriers to the handicapped; to the Committee on Labor and Human Resources.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STEVENS (by request):

S. 1481. A bill to amend the Merchant Marine Act, 1936; to authorize the foreign acquisition of subsidized United States-flag vessels; to the Committee on Commerce, Science, and Transportation.

S. 1482. A bill to amend section 901(b) of the Merchant Marine Act, 1936, to the Committee on Commerce, Science, and Transportation.

By Mr. BURDICK:

S. 1483. A bill to authorize additional study and purchase of flood control storage in two Canadian dams; to the Committee on Environment and Public Works.

S. 1484. A bill to authorize the establishment of the Fort Totten National Historic Site; to the Committee on Energy and Natural Resources.

By Mr. BENTSEN:

S. 1485. A bill for the relief of River Publishers, Inc. of Wharton, Texas; to the Committee on Governmental Affairs.

By Mr. DOLE (for himself, Mr. BYRD, Mr. DURENBERGER, Mr. HART, Mr. HATFIELD, Mr. CRANSTON, Mr. PACKWOOD, Mr. KENNEDY, Mr. EVANS, Mr. MOYNIHAN, Mr. GORTON, Mr. RIEGLE, Mr. SPECTER, Mr. BURDICK, Mr. D'AMATO, Mr. MATSUNAGA, Mr. BOSCHWITZ, Mr. MELCHER, Mr. KERRY, and Mr. HEINZ):

S. 1486. A bill to amend the Equal Credit Opportunity Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. TRIBLE (for himself, Mr. DENTON, Mr. DOLE, Mr. THURMOND, Mr. LAXALT, Mr. BIDEN, Mr. CHILES, Mr. HUMPHREY, Mr. STEVENS, Mr. CHAFEE, Mr. EXON, Mr. PRYOR, Mr. MCCLURE, Mr. HOLLINGS, Mr. STENNIS, Mr. ABDNOR, Mr. SYMMS, Mr. D'AMATO, Mr. ZORINSKY, Mr. NUNN, Mr. SPECTER, Mr. QUAYLE, Mr. MATTINGLY, Mr. BOREN, Mr. DURENBERGER, Mr. LAUTENBERG, Mr. JOHNSTON, Mr. BENTSEN, Mr. BURDICK, Mr. MATSUNAGA, Mrs. KASSEBAUM, Mr. WARNER, and Mr. HEINZ):

S.J. Res. 168. Joint resolution designating August 13, 1985, as "National Neighborhood Crime Watch Day"; to the Committee on the Judiciary.

By Mr. MATHIAS (for himself, Mr. THURMOND, Mr. DOLE, Mr. LAXALT, Mr. DENTON, Mr. SPECTER, Mr. DECONCINI, Mr. GOLDWATER, Mr. CHAFEE, Mr. STAFFORD, Mr. ZORINSKY, and Mr. LEAHY):

S.J. Res. 169. Joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws; to the Committee on the Judiciary.

By Mr. SIMON:

S.J. Res. 170. Joint resolution to designate the month of March 1986 as "Music In Our Schools Month"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STEVENS (by request):

S. 1481. A bill to amend the Merchant Marine Act, 1936, to authorize the foreign acquisition of subsidized U.S.-flag vessels; to the Committee on Commerce, Science, and Transportation.

S. 1482. A bill to amend section 901(b) of the Merchant Marine Act, 1936; to the Committee on Commerce, Science, and Transportation.

MARITIME LEGISLATION

● Mr. STEVENS. Mr. President, today I am introducing two maritime bills by request of the administration. The first bill would provide authority for subsidized U.S.-flag ship operators to construct or acquire vessels outside the United States and still be eligible to receive operating differential subsidy [ODS]. The second bill would eliminate the requirement that foreign-built or rebuilt vessels must be documented under U.S. law for 3 years before they are eligible to carry cargoes reserved under the Cargo Preference Act of 1954. These bills are similar to legislation which was introduced in the 98th Congress but was not enacted.

It is incumbent that we move forward and attempt to resolve the difficult issues confronting Congress in its efforts to revitalize the U.S. merchant marine. The administration believes these bills should provide a starting point in those efforts. Undoubtedly, there will be those in the industry who will support these bills and those who will favor a modified or different approach. I am hopeful that we can initiate a dialog from which a consensus approach will emerge.

With that goal in mind, I am inviting and encouraging the maritime industry to submit comments on these bills prior to scheduling hearings on them. These comments should be received by the Commerce Committee no later than September 9, 1985.

Mr. President, I ask unanimous consent that the administration's statement of purpose and need explaining these bills and the text of the bills be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1481

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 615 of the Merchant Marine Act, 1936, as amended (46 App. U.S.C. 1185), is amended to read as follows:

"SEC. 615. The Secretary of Transportation may authorize an operator receiving or applying for operating-differential subsidy under this title to construct or reconstruct its vessels in a foreign shipyard, or acquire such vessels outside the United States. No such authorization shall be given unless the Secretary determines that (1) the vessel is over five thousand deadweight tons; and (2) the vessel is suitable for use by the United States for national defense or otherwise useful purposes in time of war or national emergency. Vessels constructed, reconstructed, or acquired pursuant to this section or section 1610 of Public Law 97-35 and documented under the laws of the United States shall be deemed to have been United States built for the purposes of this title, section 901(b) of this Act, and section 3704 of title 46, United States Code: *Provided,* That the provisions of section 607 of this Act shall not apply to vessels constructed, reconstructed, modified, or acquired pursuant to this section.".

STATEMENT OF PURPOSE AND NEED

The draft bill would amend the Merchant Marine Act, 1936, to provide authority for subsidized U.S.-flag ship operators to construct or acquire vessels outside the United States and still receive operating-differential subsidies [ODS]. Since the enactment of the Merchant Marine Act in 1936, ODS vessels have been required to be constructed in the United States. Such vessels were generally built with the aid of construction-differential subsidy [CDS]. In order to assist subsidized operators in meeting their contractual obligations to replace overaged ships, section 1610 of Public Law 97-35 (approved August 13, 1981) added a section 615 to the Merchant Marine Act that generally authorized the acquisition of foreign-built vessels for subsidized U.S.-flag service in the absence of available CDS until the end of fiscal year 1983. However, restrictions placed on this authority for fiscal year 1983 mean that, for all practical purposes, the authority provided by section 615 was available only in fiscal year 1982. Thereafter, section 134 of Public Law 98-151 (approved November 14, 1983) authorized the Secretary to permit two subsidized U.S.-flag operators to acquire a total of six existing foreign-built vessels.

Rather than continue such an *ad hoc* approach, the draft bill would amend section 615 to continue to authorize U.S.-flag operators to construct or acquire vessels outside the United States and still receive ODS. It would also clarify current authority under section 615 to acquire existing vessels outside the United States to be reflagged and

made eligible to receive ODS. However, funds from the capital construction fund provided by section 607 of the Merchant Marine Act, 1936, could not be used for this purpose.

Section 615 authority would be effective upon a determination by the Secretary that the foreign-built vessel is over 5,000 DWT and would be suitable for use by the Federal Government for national defense or military purposes in time of war or national emergency. This provision would allow replacement of overaged vessels to continue on schedule and thus avert a decline in the size of the U.S.-flag liner fleet, which is the primary U.S. source of military sealift capability.

When documented under U.S. registry, subsidized vessels constructed or acquired under proposed section 615, or previous build-foreign legislation enacted as section 610 of Public Law 97-35, would be eligible to transport reserved cargoes subject to the Cargo Preference Act of 1954. This is one element of the administration's proposal to amend the current 3 year waiting period of the Cargo Preference Act of 1954, for foreign-built vessels, whether subsidized or not, so that modern, foreign-built vessels with national security utility would be immediately eligible to transport such cargoes.

Finally, section 3704 of title 46 generally requires U.S. construction of certain specified antipollution fixtures on a vessel for coastwise operation. The draft bill would continue to waive this requirement for previously U.S.-built vessels installing such features in a foreign yard under proposed section 615 or Public Law 97-35.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 901(b)(1) of the Merchant Marine Act, 1936, as amended (46 App. U.S.C. 1241(b)(1)), is amended by substituting the following for the last sentence: "For purposes of this section, the term 'privately owned United States-flag commercial vessels' shall not be deemed to include any vessel constructed outside the United States that is registered under the United States flag subsequent to the date of enactment of this Act, (1) unless the Secretary of Transportation finds such vessel to be not more than five years of age on the date of registry under the United States flag, or (2) unless the Secretary of Transportation finds such vessel to be more than five years of age but less than ten years of age on the date of registry under the United States flag, and upon consultation with the Secretary of Defense, determines that the particular vessel is suitable for national defense or security purposes, or (3) if otherwise more than five years of age on the date of registry under the United States flag, until such vessel shall have been documented under the laws of the United States for a period of three years.".

STATEMENT OF PURPOSE AND NEED

The draft bill would amend the Merchant Marine Act, 1936, to provide immediate eligibility of reflagged vessels for the carriage of Government-impelled cargoes under section 901(b)(1) of that Act, commonly referred to as the Cargo Preference Act of 1954. Cargoes covered by the Cargo Preference Act of 1954 are a major source of revenue for virtually all U.S. liner operators and many U.S. bulk operators. However, the Cargo Preference Act of 1954 now requires that foreign-built or rebuilt vessels must be documented under U.S. laws for three years before they can carry such cargoes. This requirement is at variance with the Administration's proposal to eliminate barriers to the acquisition of modern vessels constructed outside the United States. Therefore, the draft bill would amend the Cargo Preference Act of 1954 to provide immediate eligibility for certain reflagged vessels for the carriage of Government-impelled cargoes. In order to promote a strong, modern and efficient merchant marine, the Secretary of Transportation would have to find any such vessel to be not older than five years on the date of registry under the U.S.-flag. If more than five, but less than ten years old, the Secretary would be required to find that the particular vessel is suitable for national defense or security purposes. Vessels currently authorized to carry Government-impelled cargoes would not be required to meet this proposed eligibility criteria.●

By Mr. BURDICK:

S. 1483. A bill to authorize additional study and purchase of flood control storage in two Canadian dams; to the Committee on Environment and Public Works.

STUDY AND PURCHASE OF FLOOD CONTROL STORAGE IN TWO CANADIAN DAMS

● Mr. BURDICK. Mr. President, the U.S. Government and the State of North Dakota have been working since 1957 to provide flood protection planning for the Souris River Valley. The potential for flooding is alarming. Since 1969, the Federal Government has spent more than $25 million for emergency flood response in Minot and the surrounding area.

In 1970, Congress authorized the Burlington Dam Project to protect the Souris River basin. However, the selected plan was not acceptable to all valley residents and was modified in 1981 to meet those concerns. The modified project is located on the Souris River in northwestern North Dakota. It consists of raising the Lake Darling design pool; levee improvements at Velva, Sawyer, and at six subdivisions between Burlington and Minot; flood proofing of rural residences; modifications to refuge areas and dams; road and railroad relocations; mitigation measures; compensation to Canada; and flood protection measures for flooding from Gassman Coulee.

The project was authorized in the 1982 Energy and Water Development Appropriations Act—Public Law 97-88.

The U.S. Army Corps of Engineers did not fully support the compromise plan. The corps felt even greater protection should be afforded to the city of Minot, where more than 11,000 people live and work in the flood plain. However, all parties agreed to move ahead with the alternative project, with the understanding that ultimately additional flood protection could be required.

The Senate Environment and Public Works Committee adopted a resolution on August 2, 1984, authorizing a Souris River basin study. The corps was requested to review reports and investigations and surveys, in consultation with Canada, to determine the feasibility of providing improvements in the Souris River basin for flood control and other water resource needs. Initial findings indicate that the U.S. interest in purchasing flood control storage in two proposed Canadian dams would be $14 million. The Rafferty Dam would provide the Souris basin with flood protection over a 63-year circle; the second dam, Alameda, over a 100-year cycle. This will improve upon the 35-year protection provided by Lake Darling.

Today the Senate Energy and Water Development Appropriations Subcommittee approved $300,000 in the corps' budget for continued study of the Souris basin. The bill I introduce today will direct the Federal Government to continue necessary studies, negotiate an agreement with Canada, and authorize the purchase of flood control storage. After so many years, I am optimistic that a final solution to Souris River basin flooding can be worked out in the overall best interest of the United States and Canada. I urge my colleagues to support this bill. It is my hope that both Lake Darling and Rafferty Dam can be completed by 1991, resulting in a successful international flood control project.●

By Mr. BURDICK:

S. 1484. A bill to authorize the establishment of the Fort Totten National Historic Site; to the Committee on Energy and National Resources.

FORT TOTTEN NATIONAL HISTORIC SITE

● Mr. BURDICK. Mr. President, today I am introducing legislation which merits the attention of the U.S. Congress. The Fort Totten National Historic Site Act will transfer Fort Totten from the State Historic Society of North Dakota to the National Park System, and authorizes the Park System to provide for the restoration and preservation of the site.

Fort Totten, established on the southern shore of Devils Lake, Dakota Territory, in 1867, has been a focal point of Indian-white interaction during its 118 year history. Originally established to defend against hostile Sioux, the fort soon became a defender and protector of these same people. When its military function was no longer required, the post became a Federal industrial boarding school (1890) and housed in excess of 250 Indian students. In 1935, it became a tuberculosis sanitarium for afflicted Indians; while its function had again changed, its underlying purpose had not. When no longer needed as a sanitarium, the fort became a public school that served the reservation community until 1960. With the transfer of Fort Totten to the State Historical Society of North Dakota in that year, its function changed once

again—from protector and defender of the Indian to that of a tangible history lesson about cultural interaction during a 100-year period.

The fort's history is not one of war and siege, but one of westward expansion and cultural and social integration. The site chronicles the development of the frontier through the military and settlement periods and into the 1960's. From original isolation as a frontier post to the social integration of Indians with another culture the fort saw the spectrum of western development. In its current role, Fort Totten continues to symbolize western history and to pass that heritage to present and succeeding generations. I believe the site is representative of an important phase in the history of the United States and is indeed of national significance.●

By Mr. DOLE (for himself, Mr. BYRD, Mr. DURENBERGER, Mr. HART, Mr. HATFIELD, Mr. CRANSTON, Mr. PACKWOOD, Mr. KENNEDY, Mr. EVANS, Mr. MOYNIHAN, Mr. GORTON, Mr. RIEGLE, Mr. SPECTER, Mr. BURDICK, Mr. D'AMATO, Mr. MATSUNAGA, Mr. BOSCHWITZ, Mr. MELCHER, Mr. KERRY, and Mr. HEINZ):

S. 1486. A bill to amend the Equal Credit Opportunity Act; to the Committee on Banking, Housing, and Urban Affairs.

PROHIBITIONS AGAINST DISCRIMINATION IN BUSINESS CREDIT

Mr. DOLE. Mr. President, I rise to introduce legislation strengthening current Federal prohibitions against discrimination in business credit.

The Equal Credit Opportunity Act prohibits discrimination in credit transactions on the basis of race, sex, marital status and age. It also authorizes the Federal Reserve Board to exempt nonconsumer transactions where application of the law to those transactions would not contribute substantially to carrying out the purposes of the act. Based on this authority, the FRB issued regulations exempting all commercial credit transactions from certain key requirements of ECOA, including the ban on inquiries about a credit applicant's marital status, the requirement of a written explanation where adverse action is taken on a credit application, as well as certain recordkeeping requirements.

These exemptions for commercial credit transactions have remained a point of contention since the regulations were promulgated in 1977. Women and minority business groups have pointed to ECOA's legislative history in arguing that Congress never intended such carte blanche exemptions for business credit transactions. They have also cited surveys and significant anecdotal evidence indicating that discrimination continues to be a substantial barrier to women and minority entrepreneurs obtaining the capital they need to start and operate a business.

The bill I am introducing today would amend ECOA to require that any exemption from that act's requirements be narrowly defined and promulgated only after public hearings have been held and express findings made that application of ECOA to the particular transaction in question would not further the goals and purposes of the act. Exemptions would be limited to 5 years unless it was shown, again through public hearings, that continuation of the exemption was justified. In other words, this bill does not eliminate all ECOA exemptions but, it does require that they be more narrowly drawn and carefully documented.

Mr. President, I have heard of situations where highly talented women entrepreneurs have been denied commercial credit solely on account of their marital status. I have heard of still other situations where established businesswomen have been forced to have their husband cosign a note before a creditor will give them a loan. I have also heard that many women and minority entrepreneurs have felt powerless to combat suspected discriminatory credit application denials because of loopholes in documentation and recordkeeping requirements. Clearly, this is fundamentally unfair and deserves to be closely examined and addressed by the Congress.

The principle that all who seek to start their own business should have an equal opportunity to go as far as their individual talents and hard work will take them lies at the very foundation of our system of free enterprise. Guaranteeing that all people have this opportunity makes plain, good economic sense, as well, insofar as young, thriving companies are an important source of jobs and can contribute significantly to the development and revitalization of depressed areas. Nothing in this bill is intended to give anyone a special preference, or require any creditor to grant loans to women and minorities in a particular ratio or proportion. This bill is targeted solely at ensuring that all Americans have equal access to the commercial credit market.

In concluding, Mr. President, I would like to pay credit to Senator DURENBERGER for first introducing this proposal as part of the Economic Equity Act. Mention should also be made of Representatives PARREN MITCHELL and LINDY BOGGS for introducing the legislation in the House. I also want to thank the distinguished minority leader for joining me in introducing this bill today. Such strong bipartisan support for the bill will, I hope, provide the impetus for prompt congressional consideration of this important issue.

Mr. President, I ask unanimous consent that the bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1486

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 703 of Public Law 93-495 is amended to read as follows:

"(a)(1) Subject to the provisions of paragraph (2) the Board shall prescribe regulations to carry out the purposes of this title. These regulations may contain but are not limited to such classifications, differentiation, or other provision, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumstances or evasion thereof, or to facilitate or substantive compliance therewith.

"(2) In no event shall any regulation promulgated pursuant to paragraph (1) of this subsection exempt from the provisions of this title any class of transactions that are primarily for—

"(A) personal, family, or household purposes; or

"(B) business or commercial purposes except that a particular type of class of business or commercial transaction may be exempted if the Board determines, after a hearing conducted on the record pursuant to chapter 5 of title 5, United States Code, that the application of this title or of any provision of this title to such transaction would not contribute substantially to effecting the purposes of this title.

"(3) An exemption granted pursuant to paragraph (2)(B) shall be for no longer than five years and shall be extended only if the Board makes a subsequent determination, in the manner prescribed by such paragraph, that such exemption remains appropriate.".

By Mr. TRIBLE (for himself, Mr. DENTON, Mr. DOLE, Mr. THURMOND, Mr. LAXALT, Mr. BIDEN, Mr. CHILES, Mr. HUMPHREY, Mr. STEVENS, Mr. CHAFEE, Mr. EXON, Mr. PRYOR, Mr. MCCLURE, Mr. HOLLINGS, Mr. STENNIS, Mr. ABDNOR, Mr. SYMMS, Mr. D'AMATO, Mr. ZORINSKY, Mr. NUNN, Mr. SPECTER, Mr. QUAYLE, Mr. MATTINGLY, Mr. BOREN, Mr. DURENBERGER, Mr. LAUTENBERG, Mr. JOHNSTON, Mr. BENTSEN, Mr. BURDICK, Mr. MATSUNAGA, Mrs. KASSEBAUM, and Mr. WARNER):

S.J. Res. 168. Joint resolution designating August 13, 1985, as "National Neighborhood Crime Watch Day"; to the Committee on the Judiciary.

NATIONAL NEIGHBORHOOD CRIME WATCH DAY

Mr. TRIBLE. Mr. President, I am introducing a joint resolution today, together with 31 of my colleagues, which commends the efforts of the Nation's neighborhood crime watch groups and declares August 13, 1985, as "National Neighborhood Crime Watch Day."

During the last several years, the ranks of neighborhood crime watch organizations have grown tremendously. Citizens throughout America, who have been justifiably concerned about the Nation's crime rate, have joined together in voluntary efforts to prevent and deter criminal activity.

One grassroots organization alone, the National Association of Town Watch, has 1,500 chapters from 32 different States. The National Sheriffs Association is actively involved in neighborhood watch efforts. And in my own State of Virginia, roughly 200,000 households participate in some form of Neighborhood Crime Watch Program, all of which are operated in close cooperation with local police and sheriffs.

On August 13 of this year, many of these organizations will participate in a National Night Out being sponsored, in part, by the National Association of Town Watch. In large cities and small towns across America, participating neighborhood watch members will spend the hour between 8 p.m. and 9 p.m. local time patrolling their neighborhoods or watching from the lawns of their homes. At least a dozen jurisdictions in Virginia are expected to take part.

This annual event is designed to increase cooperation between community-based watch programs and their local law enforcement authorities. It is also aimed at generating local support for the crime watch groups and increasing their membership.

Last year, an estimated 2 million people in 23 different States took part in the National Night Out. A number of law enforcement organizations in Virginia have endorsed this activity, and have told me how highly they value the contribution of neighborhood watch groups. I fully agree, and I am hopeful that an even larger turnout will occur in Virginia and across the Nation on August 13 of this year.

The joint resolution I am introducing today commends the efforts of America's neighborhood crime watch organizations. It also declares August 13, 1985, as National Neighborhood Crime Watch Day, to coincide with the National Night Out being held on that same day.

Mr. President, I am greatly encouraged by the widespread participation in neighborhood crime watch groups. I believe it refelcts a growing unwillingness on the part of law-abiding Americans to simply buckle under to the threat of crime. It is also a valuable example of the voluntary, community-based efforts that contribute so much to society in general.

I urge my colleagues to join me in supporting this joint resolution, and I ask unanimous consent that a copy be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 168

Whereas neighborhood crime is of continuing concern to the American people;

Whereas the fight against neighborhood crime requires people to work together in cooperation with law enforcement officials;

Whereas neighborhood crime watch organizations are effective at promoting awareness about, and the participation of volunteers in, crime prevention activities at the local level; and

Whereas citizens across America will soon take part in a "National Night Out", a unique crime prevention event which will demonstrate the importance and effectiveness of community participation in crime prevention efforts by having people spend the period from 8 to 9 o'clock postmeridian on August 13, 1985, with their neighbors in front of their homes: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assemebled, That August 13, 1985, is designated as "National Neighborhood Crime Watch Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate programs, ceremonies, and activities.

By Mr. MATHIAS (for himself, Mr. THURMOND, Mr. DOLE, Mr. LAXALT, Mr. DENTON, Mr. SPECTER, Mr. DECONCINI, Mr. GOLDWATER, Mr. CHAFEE, Mr. STAFFORD, Mr. ZORINSKY, and Mr. LEAHY):

S.J. Res. 169. Joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws; to the Committee on the Judiciary.

BICENTENNIAL ANNIVERSARY OF THE FIRST PATENT AND COPYRIGHT LAWS

● Mr. MATHIAS. Mr. President, today I introduce a joint resolution to provide for the commemoration in 1990 of the bicentennial anniversary of the first Patent Act and the first Copyright Act, which were enacted on April 10 and May 31, 1790, respectively.

Such a celebration will help remind us that the guarantee of rights to intellectual property for limited times contributes to economic progress and cultural vitality.

The Founding Fathers recognized that such a protection would help to develop a new nation. Aware of this principle, they included a provision in the Constitution that empowers Congress "* * * to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries."

The commemoration that the resolution contemplates will follow a tradition set in 1890, when we marked the centennial of the patent and copyright laws with lectures and galas, winding up with a parade down Pennsylvania Avenue. A host of famous authors and inventors, including Thomas Alva Edison, Alexander Graham Bell and Mark Twain, marched in that parade.

During the 98th Congress, I introduced a similar proposal to commemorate the constitutional foundation of the patent and copyright laws. It received broad support among the scientific, business, academic and creative communities. Although 29 Senators joined me as cosponsors and the Senate passed the joint resolution without amendment, the House failed to act before we adjourned sine die in October.

During the present session, I hope that we will act quickly. As Mark Twain wrote in "A Connecticut Yankee in King Arthur's Court," "A country without a patent office and good patent laws is just a crab and can't travel any way but sideways and backways." Celebrating the bicentennial of the first patent and the first copyright laws will emphasize the importance of these laws to our economic health and our cultural diversity.

I ask unanimous consent that a copy of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 169

Whereas the Constitution empowers Congress "To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries";

Whereas the enforcement of this constitutional principle through specific patent and copyright laws merits special recognition;

Whereas the first patent bill was signed to law on April 10, 1790, and the first copyright bill was signed into law on May 31, 1790, and we will recognize the bicentennial anniversary of these laws in 1990: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That special recognition be given during 1990, the bicentennial year of the first patent and the first copyright laws, and the President is authorized and requested to isssue a proclamation upon the enactment of this joint resolution calling upon the people of the United States to foster such recognition through appropriate educational and cultural programs and activities.●

By Mr. SIMON:

S.J. Res. 170. Joint resolution to designate the month of March 1986 as "Music in Our Schools Month"; to the Committee on the Judiciary.

MUSIC IN OUR SCHOOLS MONTH

● Mr. SIMON. Mr. President, music in our schools is not a luxury; it is our shared heritage, our cultural vibrancy, and the fertile grounds from which both performers and audiences grow. I'm pleased to introduce a resolution designating March 1986 as "Music in Our Schools Month" to recognize the importance of music education and

those who teach music and music appreciation to our children.

This spring under the sponsorship of the Music Educators National Conference, the world's largest concert was performed, with over 1,000 schools and 342,000 participants playing the same 30-minute program across the United States. Participants from elementary and secondary schools gave their concerts in various locations including hospitals, nursing homes, and their school auditoriums. Local radio and television stations covered the event, drawing the community into the school program. The 342,000 participants included talented orchestra musicians, a chorus of hearing impaired students, and individuals like sixth-grader Sherie Wynn who said, "Every class practiced hard to be good. * * * I think it was a smashing success." I don't doubt that Sherie spoke for hundreds of thousands of her fellow students who were part of this musical experience.

According to a 1984 survey, more students participate in band and chorus programs than in honorary clubs, the school newspaper, or student government. All of these activities are important to a full educational experience. The following resolution honors just one, but one which can add to our understanding and pleasure throughout our lives—music.

Along with my introduction of this resolution today in the Senate, my colleague in the House of Representatives, DAN AKAKA, is introducing a companion resolution. I ask unanimous consent that the resolution be included at the end of my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 170

Whereas music is a basic influence in the lives of millions of Americans who participate in performing, listening, and creative activities as a result of the music programs in the Nation's schools;

Whereas music is a powerful aesthetic force on the human spirit, transforming the human experience, and enhancing the quality of life;

Whereas music represents a key to our cultural heritage, and should be transmitted to succeeding generations;

Whereas music embodies one of the major symbolic systems that make mankind uniquely human;

Whereas music provides a source of enjoyment and an outlet for creativity and self-expression for all Americans;

Whereas music is an essential element in the learning process and affects directly the innermost feelings and responses of every child;

Whereas the study of music contributes uniquely to young people's intellectual, emotional, and physical development;

Whereas music provides a useful means for learning about other cultures, both within the United States and abroad;

Whereas the study of music and the other arts significantly enhances education;

Whereas national recognition and support will assist music educators in enriching the lives of all Americans, regardless of background, age, or musical talent; and

Whereas Music In Our Schools Month provides a special opportunity for citizens to learn about and to support the music programs in the Nation's schools: Now, thereof, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of March 1986 is designated as "Music In Our Schools Month" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate programs, ceremonies, and activities.●

ADDITIONAL COSPONSORS

S. 274

At the request of Mr. DENTON, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from Arizona [Mr. GOLDWATER], the Senator from Vermont [Mr. LEAHY], the Senator from Arizona [Mr. DECONCINI]. the Senator from Georgia [Mr. NUNN], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 274, a bill to provide for the national security by allowing access to certain Federal criminal history records.

S. 450

At the request of Mr. BINGAMAN, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 450, a bill to establish a commission to study and make recommendations concerning the international trade and export policies and practices of the United States.

S. 750

At the request of Mr. D'AMATO, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 750, a bill to redesignate the National Institute on Aging as the National Institute on Aging and Alzheimer's Disease, to require the Secretary of Health and Human Services to coordinate and support research concerning Alzheimer's disease and related disorders, and for other purposes.

S. 751

At the request of Mr. D'AMATO, the name of the Senator from Massachusetts [Mr. KERRY] was added as a cosponsor of S. 751, a bill to provide for medicare demonstration projects for alternative medicare benefits for individuals with Alzheimer's disease or a related memory disorder.

S. 869

At the request of Mr. MITCHELL, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 869, a bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act.

S. 881

At the request of Mr. KENNEDY, the name of the Senator from West Virginia [Mr. ROCKEFELLER]. and the Senator from Missouri [Mr. EAGLETON] were added as cosponsors of S. 881, a bill to extend title X of the Public Health Service Act for 3 years.

S. 987

At the request of Mr. EXON, the name of the Senator from Virginia [Mr. TRIBLE] was withdrawn as a cosponsor of S. 987, a bill to recognize the organization known as the Daughters of Union Veterans of the Civil War 1861–1865.

S. 1133

At the request of Mr. RIEGLE, the name of the Senator from Florida [Mr. CHILES] was added as a cosponsor of S. 1133, a bill to amend section 119(d) of the Housing and Community Development Act of 1974.

S. 1153

At the request of Mr. D'AMATO, the name of the Senator from Missouri [Mr. EAGLETON] was added as a cosponsor of S. 1153, a bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Hal David: Expressing a Feeling".

S. 1154

At the request of Mr. MATSUNAGA, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1154, a bill to amend title XVIII of the Social Security Act to provide direct Medicare reimbursement for services performed by registered nurse anesthetists.

S. 1325

At the request of Mr. GLENN, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1325, a bill to amend titles XVIII and XIX of the Social Security Act to require second opinions with respect to certain surgical procedures as a condition of payment under the Medicare and Medicaid Programs.

S. 1373

At the request of Mr. SPECTER, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 1373, a bill to amend title 18, United States Code, to authorize prosecution of terrorists and others who attack U.S. Government employees abroad, and for other purposes.

S. 1414

At the request of Mr. BENTSEN, the name of the Senator from Pennsylvania [Mr. SPECTER] was added as a cosponsor of S. 1414, a bill to provide additional funding and authority for the Federal Bureau of Investigation in order to improve the counterterrorist capabilities of the Bureau.

S. 1434

At the request of Mr. WILSON, the names of the Senator from New Mexico [Mr. DOMENICI], and the Senator from South Dakota [Mr. ABDNOR] were added as cosponsors of S. 1434, a bill to amend the Fair Labor Stand-

ards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours.

S. 1436

At the request of Mrs. KASSEBAUM, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1436, a bill to improve safety and security of persons who travel in foreign air transportation, and for other purposes.

S. 1451

At the request of Mr. CHAFEE, the names of the Senator from Vermont [Mr. STAFFORD], and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 1451, a bill to allocate funds appropriated to carry out section 103 of the Foreign Assistance Act of 1961 for nutrition programs which reduce vitamin A deficiency.

SENATE JOINT RESOLUTION 73

At the request of Mr. GRASSLEY, the names of the Senator from Michigan [Mr. LEVIN], the Senator from South Dakota [Mr. PRESSLER], and the Senator from Delaware [Mr. ROTH] were added as cosponsors of Senate Joint Resolution 73, a joint resolution to designate the week of September 15, 1985, through September 21, 1985, as "National Independent Free Papers Week".

SENATE JOINT RESOLUTION 114

At the request of Mr. HEINZ, the names of the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Kansas [Mr. DOLE], the Senator from Nebraska [Mr. EXON], the Senator from Florida [Mrs. HAWKINS], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Indiana [Mr. LUGAR], the Senator from New York [Mr. MOYNIHAN], the Senator from Arkansas [Mr. PRYOR], and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of Senate Joint Resolution 114, a joint resolution designating August 29 as "Railroad Retirement Day".

SENATE CONCURRENT RESOLUTION 41

At the request of Mr. RIEGLE, his name was added as a cosponsor of Senate Concurrent Resolution 41, a concurrent resolution expressing the sense of the Congress that corporate income tax rates should remain graduated.

AMENDMENTS SUBMITTED

IMPROVEMENT OF CERTAIN VETERANS' HEALTH PROGARMS

PROXMIRE AMENDMENT NO. 537

(Ordered to lie on the table.)

Mr. PROXMIRE submitted an amendment intended to be proposed by him to the bill (S. 876) to amend title 38, United States Code, to establish, extend, and improve certain Veterans' Administration health-care programs; as follows:

On page 66, after line 24, insert the following new section:

SERVICEMEN'S GROUP LIFE INSURANCE AND VETERANS' GROUP LIFE INSURANCE

SEC. 505. (a)(1) Subsection (a) of section 767 of title 38, United States Code, is amended—

(A) by striking out "35,000" and inserting in lieu thereof "$50,000"; and

(B) by striking out "the amount of $30,000, $25,000, $20,000, $15,000, $10,000 or $5,000" and inserting in lieu therof "an amount less than $50,000 that is evenly divisible by $10,000".

(2) Subsection (c) of such section is amended by striking out "the amount of" the first place it appears and all that follows through "as the case may be," and inserting in lieu thereof "any amount less than $50,000, he may thereafter be insured under this subchapter in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(3) Subsection (d) of such section is amended—

(A) by striking out "the effective date of this subsection" each place it appears and inserting in lieu thereof "January 1, 1986"; and

(B) by striking out "up to a maximum of $35,000 (in any amount divisible by $5,000)" and inserting in lieu thereof "in the amount of $50,000 or any lesser amount evenly divisible by $10,000".

(b)(1) Subsetion (a) of section 777 of title 38, United States Code, is amended—

(A) by striking out the first sentence and inserting in lieu thereof the following: "Veterans' Group Life Insurance shall be issued in the amounts specified in section 767(a) of this title. In the case of any individual, the amount of Veterans' Group Life Insurance may not exceed the amount of Servicemen's Group Life Insurance coverage continued in force after the expiration of the period of duty or travel under section 767(b) or 768(a) of the title."; and

(B) by striking out "$35,000" in the second sentence and both places it appears in the last sentence and inserting in lieu thereof "$50,000".

(2) Such section is further amended by adding at the end the following new subsection:

"(h)(1) Notwithstanding any other provision of the law, members of the Individual Ready Reserve and the Inactive National Guard are eligible to be insured under Veterans' Group Life Insurance. Any such member shall be so insured upon submission of an application in the manner prescribed by the Administrator and the payment of premiums as required under this section.

"(2) Notwithstanding subsection (b)(2) of the section, Veterans' Group Life Insurance coverage under this subsection shall be issued on a renewable five-year term basis, but the person insured must remain a member of the Individual Ready Reserve of the Inactive National Guard through the period of the insurance in order for the insurance of such person to be renewed.

"(3) For the purposes of this subsection, the terms 'Individual Ready Reserve' and 'Inactive National Guard' have the meaning presribed by the Administrator in consultation with the Secretary of Defense.".

(c) The amendments made by subsections (a) and (b) shall take effect on January 1, 1986.

HOMELESS HOUSING ASSISTANCE ACT

GORTON AMENDMENT NO. 538

(Ordered to be referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. GORTON submitted an amendment intended to be proposed by him to the bill (S. 394) to amend the Housing and Community Development Act of 1974 to provide housing assistance to the homeless through renovation and conversion of facilities for use as temporary housing, provision of emergency housing and food, and provisions of residential housing assistance in the transition to independent living; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

TITLE I—GENERAL PROVISIONS

SHORT TITLE

SEC. 101. This Act may be cited as the "Homeless Housing Assistance Act of 1985".

DEFINITIONS

SEC. 102. For the purpose of this Act—

(1) the term "emergency shelter", as used in section 208(b) of this Act, means an entire facility, or that part of a facility, which is used or designed to be used to provide temporary housing to not fewer than twenty individuals;

(2) the term "homeless" means individuals who are poor and who have no access to either traditional or permanent housing;

(3) the term "local government" means a unit of general purpose local government;

(4) the term "locality" means the geographical area within the jurisdiction of a local government;

(5) the term "operating costs" means expenses incurred by State, local governments, and private nonprofit organizations operating transitional housing for the homeless under title III of this Act with respect to—

(A) the administration, maintenance, minor repairs, and security of such housing;

(B) utilities, fuel, furnishings, and equipment for such housing;

(C) the conducting of the assessment required in section 305(a)(1) of this Act; and

(D) the provision of supportive services to the residents of such housing;

(6) the term "private nonprofit organization" means a secular or religious organization described in section 501(c) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code, and which has an accounting system and a voluntary board, and practices nondiscrimination in the provision of assistance;

(7) the term "Secretary" means the Secretary of Housing and Urban Development;

(8) the term "shelter", as used in title II of this Act, means broadly the provision of protection from the elements for homeless individuals;

(9) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, or any territory or possession of the United States;

(10) the term "supportive services" means assistance to the residents of transitional housing in obtaining permanent housing, medical and psychological counseling and

supervision, employment counseling, referral to job training, nutritional counseling, and such other services essential for establishing independent living as the Secretary determines to be appropriate. Such term includes the provision of assistance to the residents of transitional housing in obtaining other Federal, State, and local government assistance available for such persons, including mental health benefits, employment counseling, referral to job training programs, and medical assistance; and

(11) the term "transitional housing" means a single- or multi-family structure suitable for the provision of housing and supportive services for not more than 15 homeless persons, who cannot presently live independently without supportive services in a supervised residential setting but who are believed capable of transition to independent living with 6 months of assistance in a stable environment.

TITLE II—EMERGENCY FOOD AND SHELTER PROGRAM

EMERGENCY FOOD AND SHELTER PROGRAM NATIONAL BOARD

SEC. 201. (a) The Director of the Federal Emergency Management Agency shall, as soon as practicable after September 30, 1985, constitute a national board for the purpose of carrying out an emergency food and shelter program.

(b) The national board shall consist of seven members. The United Way of America, the Salvation Army, the National Council of Churches of Christ in the United States of America, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross, and the Federal Emergency Management Agency shall each designate a representative to sit on the national board.

(c) The representative of the Federal Emergency Management Agency shall chair the national board.

NATIONAL BOARD TRANSITION

SEC. 202. (a) The national board constituted by the Director of the Federal Emergency Management Agency, pursuant to section 201, shall continue to be authorized until March 30, 1986, and on such date, the personnel, property, records, and undistributed program funds of such national board shall be transferred to the national board constituted under subsection (b).

(b) On or before March 30, 1986, the Secretary of Housing and Urban Development shall constitute a national board for the purpose of carrying out an emergency food and shelter program. This national board shall consist of the same representatives, or their successors, of the same organizations as the national board constituted pursuant to section 201(b), except that the Secretary of Housing and Urban Development shall designate a representative to replace the Federal Emergency Management Agency representative. Such national board shall assume authority on March 30, 1986.

(c) The representative designated by the Secretary of Housing and Urban Development shall chair the national board constituted pursuant to subsection (b).

DISTRIBUTION OF PROGRAM FUNDS

SEC. 203. The national boards constituted pursuant to sections 201 and 202(b) shall determine how program funds are to be distributed to individual localities. The national boards shall identify localities having the highest need for emergency food and shelter assistance, based on unemployment and poverty rates and such other need-related data as the national boards deem appropriate, determine the amount and distribution of funds to these localities, and ensure that funds are properly accounted for.

AGENCY RESPONSIBILITIES

SEC. 204. (a) The Director of the Federal Emergency Management Agency shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 201 within 30 days after the beginning of fiscal year 1986, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(b) The Director of the Federal Emergency Management Agency, or his representative, shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and cooperation and coordination with the Secretary of Housing and Urban Development in the conducting of an audit of program funds awarded to the national board constituted pursuant to section 201 or transferred to the national board constituted pursuant to section 202(b). The responsibilities of the Director of the Federal Emergency Management Agency with respect to this program shall end with the completion of the audit for program funds distributed during fiscal year 1986.

(c) The Secretary of Housing and Urban Development shall award a grant for such amount as Congress appropriates for this program to the national board constituted pursuant to section 202(b) within 30 days after the beginning of fiscal years 1987 and 1988, for the purpose of providing emergency food and shelter to needy individuals through private nonprofit organizations and through units of local government.

(d) The Secretary of Housing and Urban Development shall have the following responsibilities: provision of guidance, coordination, and staff assistance to the national board in carrying out the program; and the conducting of an audit of program funds awarded to and transferred to the national boards constituted pursuant to sections 201 and 202(b).

(e)(1) In carrying out the responsibilities under subsection (d), the Secretary shall coordinate activities with the Federal Interagency Task Force on Food and Shelter, chaired by the Secretary of Health and Human Services, to identify vacant and surplus Federal facilities which could be renovated or converted for use as emergency shelter facilities for the homeless.

(2) Not later than 3 months after the end of fiscal year 1986, the Secretary shall submit to the Congress a report on obstacles, if any, including agency rules or procedures, to the availability of vacant and surplus Federal facilities for renovation or conversion to use as emergency shelter facilities for the homeless, with recommendations for legislative or administrative changes to overcome such obstacles.

LOCAL BOARDS

SEC. 205. (a) Each locality designated by the national boards constituted pursuant to sections 201 and 202(b) shall constitute a local board for the purpose of determing how program funds allotted to the locality will be distributed. The local board shall consist, to the extent practicable, of representatives of the same organizations as the national boards, except that the mayor or other appropriate heads of government will replace the Federal Emergency Management Agency or Department of Housing and Urban Development member. The chair of the local board shall be elected by a majority of the members of the local board. Local boards are encouraged to expand participation of other private nonprofit organizations on the local board.

(b) Local boards shall have the following responsibilities: determining which private nonprofit organizations or public organizations of the local government in the individual locality shall receive grants to act as service providers; monitoring recipient service providers for program compliance; reallocation of funds among service providers; ensuring proper reporting; and coordinating with other Federal, State, and local government assistance programs available in the locality.

(c) Prior to March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to section 201. On and after March 30, 1986, local boards constituted pursuant to subsection (a) shall be accountable to the national board constituted pursuant to section 202(b).

LOCAL HOMELESS ASSISTANCE PLAN

SEC. 206. (a) At the end of each fiscal year, each local board shall submit to the national board constituted pursuant to section 202(b), a plan describing programs, goals, and objectives for providing assistance to the homeless in that locality. The plan shall be developed in cooperation with the local government head represented on the local board.

(b) The local plan shall address the following subjects: description of existing shelter, mass feeding, and food bank activities in that locality, including activities not receiving assistance under this title;

use and availability of all public and private resources in the locality to assist the homeless; coordination of all public and private services and resources in that locality to assist the homeless; coordination among all shelter providers in the locality to use all available shelter space for the homeless; and preservation of low-income housing in the locality.

(c) The local plan shall be placed on file in the office of the local government head represented on the local board and shall be made available to the public. The local plan shall be forwarded to that individual locality's representatives in Congress. The national board shall maintain files of local plans and make them available upon request to other localities.

(d) The preparation and submission of the local plan shall be regarded as the legal duty of the local board, but failure to do so shall not be grounds for the withholding of funds appropriated under this title from that locality. Any citizen residing in the locality in which such local board is constituted shall have standing in the Federal district court of jurisdiction to seek an order compelling the preparation and submission of the local plan as required by this section. The substance and contents of the local plan shall be within the sole discretion of the local board and shall not be subject to administrative or judicial review.

SERVICE PROVIDERS

SEC. 207. Designation by the local board of a service provider to receive program funds should be based upon a private nonprofit organization's or unit of local government's ability to deliver emergency food and shelter to needy individuals and such other fac-

tors as are deemed appropriate to program objectives by the local board.

USE OF FUNDS

SEC. 208. (a) The national boards constituted by sections 201 and 202(b) may authorize the following use of funds to address the emergency food and shelter needs of needy individuals:

(1) Expenditures necessary to purchase emergency food and shelter for needy individuals, to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services; and

(2) Expenditures necessary to conduct minimum rehabilitation of existing mass shelter or mass feeding facilities to make facilities safe, sanitary, and bring them into compliance with local building codes.

(b)(1) Local boards are authorized to expend up to 25 percent of the funds allotted to that locality for substantial renovation or conversion, but not acquisition or new construction, of buildings for use as emergency shelter facilities to provide additional shelter space. Such expenditures shall be made in the form of noninterest bearing advances, repayment of which shall be waived if—

(A) the applicant utilizes the building as an emergency shelter facility for not less than the 10-year period following the completion of such renovation or conversion, or

(B) the Secretary determines that such facility is no longer needed to provide shelter to the homeless and approves use of the building for another charitable purpose for the remainder of such 10-year period. If the recipient of such advance fails to comply with the conditions for such a waiver, the recipient shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require. It shall be the responsibility of the local board to obtain documentation, signed by the responsible official, showing that the recipient of such advance is aware of and agrees to the conditions of its receipt.

(2) Local boards are encouraged to provide, to the neighborhood in which a new emergency shelter facility is to be located, adequate notice and an opportunity to comment. Local boards are also encouraged to achieve the widest possible distribution of emergency shelters throughout the locality to avoid a disproportionate burden on any one section or neighborhood of the locality.

LIMITATION ON CERTAIN COSTS

SEC. 209. Not more than 3 percent of the total appropriation for this program each year may be expended for the costs of administration.

PROGRAM GUIDELINES

SEC. 210. (a) The national boards constituted pursuant to sections 201 and 202(b) shall establish written guidelines for carrying out this program, including methods for identifying localities with the highest need for emergency food and shelter assistance; methods for determining amount and distribution to these localities; eligible program costs, with the aim of providing emergency essential services based on currently existing needs; and responsibilities and reporting requirements of the national boards, local boards, and service providers.

(b) These guidelines shall be published annually, and whenever modified, in the Federal Register. The national boards shall not be subject to the procedural rulemaking requirements of subchapter II of chapter 5 of title 5, United States Code.

(c) Guidelines established by the national board constituted pursuant to section 201 shall continue in effect until modified or revoked by that board or by the national board constituted pursuant to section 202(b).

PROGRAM AUTHORIZED

SEC. 211. (a) To carry out this title, there are authorized to be appropriated $85,000,000 in fiscal year 1986, $88,000,000 in fiscal year 1987, and $91,000,000 in fiscal year 1988.

(b) Any appropriated funds not obligated in a fiscal year shall remain available for obligation during the following fiscal year.

SURPLUS FOOD DISTRIBUTION

SEC. 212. The Commodity Credit Corporation shall process and distribute surplus commodities acquired by the Corporation for the purpose of carrying out the food distribution and emergency shelter program in cooperation with the national boards constituted pursuant to sections 201 and 202(b).

TITLE III—TRANSITION TO INDEPENDENCE DEMONSTRATION PROJECT

AUTHORITY TO MAKE GRANTS

SEC. 301. (a) The Secretary of Housing and Urban Development shall make grants to States, local governments, or private nonprofit organizations for the operation of demonstration projects to develop and apply innovative approaches in providing transitional housing and supportive services to the homeless to assist them in the transition to independent living.

(b) Grants under subsection (a) may be made in the form of:

(1) annual payments for operating expenses of transitional housing, not to exceed 75 percent of the annual operating expenses of such housing;

(2) technical assistance in establishing and operating transitional housing and providing supportive services to the residents of such housing to assist them in the transition to independent living; and

(3) a one-time only non-interest bearing advance, not to exceed $100,000, for the purposes of acquiring, rehabilitating, or acquiring and rehabilitating an existing structure for use in providing transitional housing, if the applicant agrees to utilize such structure as transitional housing for not less than 5 years. Repayment of such advance shall be waived if the applicant utilizes the structure as transitional housing for not less than the 10-year period following the initiation of operation of such transitional housing facility, or if the Secretary determines that such structure is no longer needed for use as transitional housing and approves the use of such structure for another charitable purpose for the remainder of such 10-year period. If the applicant fails to comply with the conditions for waiver of repayment, the applicant shall repay to the Secretary in cash the full amount of the advance received on such terms as the Secretary shall require.

(c) Grants made under this section are to be used to supplement and extend currently available resources and not to substitute or reimburse ongoing programs and services.

APPLICATIONS FOR GRANTS

SEC. 302. Each application for a grant submitted by a State, local government, or private nonprofit organization shall contain—

(1) documentary material demonstrating that such applicant has the ability and resources necessary to operate transitional housing;

(2) documentary material describing the program and supportive services intended to be provided in such transitional housing, including the innovative quality of the proposed program;

(3) documentary material demonstrating that the State, local government, or private nonprofit organization involved has provided the emergency food and shelter program local board, constituted pursuant to section 205 of this Act, if such local board has been constituted in the locality where the proposed transitional housing will be located, an opportunity to comment with respect to this application, and a statement as to whether the local board approves or disapproves of such application and its reasons for any disapproval; and

(4) such other information or material as the Secretary shall establish.

ALLOCATION OF GRANTS

SEC. 303. In selecting States, local governments, or private nonprofit organizations for assistance in providing transitional housing under this title, the Secretary shall consider—

(1) the innovative quality of the proposal to provide transitional housing and supportive services to the homeless to assist them in the transition to independent living;

(2) the ability of the State, local government, or private nonprofit organization to develop and operate transitional housing for homeless persons and to provide supportive services to the residents of such housing;

(3) the need for such transitional housing and supportive services in the locality to be served; and

(4) such other factors as the Secretary determines to be appropriate for purposes of carrying out the demonstration project established in this Act in an effective and efficient manner.

DISTRIBUTION OF GRANTS

SEC. 304. (a)(1) Not later than 120 days after the beginning of each fiscal year for which Congress makes appropriation to carry out this title, the Secretary shall make grants under section 301.

(2) If the aggregate amount of funds requested in applications submitted and approved, during the 120-day period referred to in paragraph (1), is less than the amount of such appropriation available to make such grants, then the Secretary shall publish in the Federal Register a notice that additional funds are available for distribution under this title.

(b) The aggregate amount of all appropriations made to carry out this title shall be used to make grants under section 301 unless the sum of the administrative costs incurred by the Secretary to carry out this title and the aggregate amount of funds requested in applications approved under this title is less than the aggregate amount of such appropriation.

PROGRAM REQUIREMENTS

SEC. 305. (a) Each State, local government, or private nonprofit organization receiving assistance under this title shall agree—

(1) to operate transitional housing assisting residents in the transition to independent living and limiting the stay of individual residents to not more than 6 months;

(2) to conduct an assessment of the supportive services required by the residents of such transitional housing to assist them in the transition to independent living;

(3) to employ a full-time residential supervisor with sufficient expertise to provide, or supervise the provision of, supportive services to the residents of such housing;

(4) to keep and make available to the Secretary such records of the expenditure of

funds as the Secretary may require by rule; and

(5) to comply with such other terms and conditions as the Secretary may establish for purposes of carrying out the demonstation project established by this title in an effective and efficient manner.

(b) Each homeless individual residing in transitional housing assisted under this title shall pay as rent an amount determined in accordance with the provisions of section 3(a) of the United States Housing Act of 1937.

REGULATIONS

SEC. 306. Not later than 120 days following the date of enactment of this Act, the Secretary shall issue such regulations as may be necessary to carry out the provisions of this title.

REPORTS TO CONGRESS

SEC. 307. (a) The Secretary shall submit to Congress—

(1) not later than 3 months after the end of each of the fiscal years 1986 and 1987, an interim report summarizing the activities carried out under this title during such fiscal year and setting forth any preliminary findings, conclusions, or recommendations of the Secretary as a result of such activities; and

(2) not later than 6 months after the end of fiscal year 1988, a final report summarizing all activities carried out under this title and setting forth any findings, conclusions, or recommendations of the Secretary as a result of such activities.

(b) Such interim and final reports shall address—

(1) the cost of operating transitional housing and providing supportive services to the homeless to assist them in the transition to independent living;

(2) the various types of transitional housing assisted under this title, including innovative approaches to assisting the homeless in the transition to independent living;

(3) the social, financial, and other advantages and disadvantages of transitional housing and supportive services as a means of assisting the homeless;

(4) the success of transitional housing programs assisted under this title, as measured in terms of placement of homeless individuals in permanent housing, placement in employment, and reductions in welfare dependency; and

(5) such other findings, conclusions, and recommendations as the Secretary deems appropriate with regard to assisting the homeless in the transition to independent living.

PROGRAM AUTHORIZED

SEC. 308. To carry out this title, there are authorized to be appropriated $15,000,000 in each of the fiscal years 1986, 1987, and 1988.

Amend the title so as to read "A bill to provide housing assistance to the homeless through emergency food and shelter, renovation and conversion of facilities for use as shelters, and provision of housing and services in the transition to independent living.".

● Mr. GORTON. Mr. President, today I am submitting a substitute amendment to S. 394. I ask that the amendment be referred to the Committee on Banking, Housing and Urban Affairs, and that the amendment be printed in the RECORD.●

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will be holding a hearing on July 31, 1985, in Senate Russell 485, beginning at 10 a.m., on S. 1396, to settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation, to remove clouds from the titles to certain lands, and for other purposes.

Those wishing additional information should contact Peter Taylor of the committee at 224-2251.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Tuesday, July 23, to hold an oversight hearing on fundamental problems facing our Nation's electric utility industry.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENT AFFAIRS

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Government Affairs be authorized to meet during the session of the Senate on Tuesday, July 23, 1985, in order to conduct a hearing on the nomination of Curtis E. von Kann, to be associate judge of the Superior Court of the District of Columbia.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Tuesday, July 23, 1985, in order to conduct a meeting on the Magnuson Fisheries Conservation and Management Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

VETERANS ATTORNEY'S FEE LIMITATION MUST BE RAISED

● Mr. SASSER. Mr. President, during the past several Congresses, the Senate has passed legislation that would have allowed for the judicial review of the final decisions of the Administrator of the Veterans Administration on claims filed by veterans. In the 98th Congress, the Senate passed S. 636, which I cosponsored, only to see the House fail to act on it. In the 99th Congress, the Senate again has an opportunity to act on legislation, S. 367, to allow for judicial review.

As an original cosponsor of this measure introduced by my colleague from Colorado [Mr. HART] I am pleased that this matter has been placed on the Senate Calendar. Besides allowing for judicial review, this legislation would also revise the century-old limitation on lawyers fees that may be paid by veterans. The current fee is $10. The recent Supreme Court decision that upheld the $10 fee demonstrates how important it is that the Congress act on S. 367. The injustice of this fee limitation is clearly summed up in an editorial that appeared in the July 22 Chattanooga Times, which is entitled, "the court to veterans: drop dead." As this editorial states, the current fee has caused many veterans to lose their rights as citizens.

Mr. President, I urge my colleagues to support S. 367 and again let the veterans of this Nation know that we support their rights with regard to judicial review on their benefit claims.

Mr. President, I ask that the editorial on this subject from the Chattanooga Times be printed in the RECORD.

The editorial follows:

[From the Chattanooga Times, July 22, 1985]

THE COURT TO VETERANS: DROP DEAD

In 1862, Congress passed a law prohibiting lawyers from charging veterans more than $10 in fees for helping them receive death and disability benefits. The intent was good, Congress didn't want veterans to be victimized by paying fees that would be disproportionate to the amount of benefits they received. During its recently ended term, however, the Supreme Court turned equity on its head by upholding the 1862 law, even though the limitation is ridiculously low in terms of today's economy.

Whereas the $10 limitation was probably fair in 1862—it was roughly equal to $600 in 1985 dollars—the likely result of the court's ruling is that many veterans won't be able to retain lawyers to obtain benefits rightfully theirs.

This is especially unfortunate when you consider that claims made by veterans today are inherently complex. Many involve problems unknown in 1862, such as disability claims involving radiation or Agent Orange poisoning, and others that weren't fully understood then, such as war-related psychic trauma.

Justice William Rehnquist argued for the 6-3 majority that the $10 fee limitation was intended to "help" veterans by making it unnecessary to share with a lawyer any claims awarded them. Eliminating the ceiling, he said, would "complicate a proceeding which Congress wished to keep as simple as possible." But as any veteran can testify, the benefits claims procedure is extremely complicated. Given the government's natural tendency to resist such claims, and to impose on veterans exhaustive rules aimed at forcing them to justify their claims, it's obvious a lawyer's services would be invaluable.

In opposing efforts to lift the limitation, the Reagan administration argued that it is far better to settle such claims in non-adver-

sarial bargaining sessions. In other words, veterans should accept whatever the government offers and if they don't like it, tough.

The claims process for veterans is bogged down with more than 30,000 disputes each year, an indication that veterans are unhappy with it. In fairness, Congress either should put more money into the claims, or raise the fee limitation, either in absolute dollars or as a percentage of benefits awarded.●

TWENTY YEARS OF THE ELEMENTARY AND SECONDARY EDUCATION ACT

● Mr. MOYNIHAN. Mr. President, this year marks the 20th anniversary of a landmark piece of education legislation in our history—the Elementary and Secondary Education Act of 1965. Since its enactment, ESEA has helped millions of disadvantaged children receive better educations and greater opportunities, and it has come to symbolize the national commitment to excellence in education.

I would like to share with my colleagues some comments by Mr. Samuel Halperin, offered at a banquet celebrating ESEA's 20th anniversary. Mr. Halperin was Assistant U.S. Commissioner of Education at the time ESEA was enacted, and eloquently describes the history of this legislation and its great achievements. We celebrate what Mr. Halperin hailed as "the enduring nature of ESEA." ESEA endures because it continues to symbolize our commitment to excellence and full opportunity in education. Let us maintain that commitment to ESEA for another 20 years, and beyond.

I ask that the text of Mr. Halperin's remarks be printed in the RECORD.

The text follows:

THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965—20 YEARS LATER: A POLITICAL RETROSPECTIVE

Everyone who works in the field of legislation soon learns the profound truth of the old adage: "Victory has a thousand parents. Defeat is an orphan."

My assignment this evening is to recall the historical and political context in which the ESEA was created in what surely seems a long time ago. In carrying out this assignment, I shall be mentioning only some of the many parents of ESEA and, no doubt, overlooking the contributions of still worthy others.

In my perspective, ESEA was first and foremost a political event, signifying the end of over 100 years of frustrated efforts to establish a clear-cut federal responsibility for the improvement of elementary and secondary education. The exact dimensions of that responsibility and the degree of educational effectiveness of that mandate are, of course, questions which have been continuously debated and explored in numerous ways during the past 20 years.

Everyone who worked for or against the passage of ESEA in 1965 was keenly aware that this was not just another bill, but a measure truly deserving the description "historic." Ever since the Civil War, Congress had periodically debated the extent of its financial responsibility for the nation's schools. School aid bills had been actively considered during World War I, again during the New Deal, and virtually every year since 1943. The House Committee on Education and Labor, for example, held hearings on aid to elementary and secondary schools seven times from 1943-55 but never could produce a majority to report a bill. This despite the fact that as early as 1948 both major political parties were pledged to support federal aid to education. From 1955-1961, bills were finally reported but just as regularly were buried in the graveyard of the House Rules Committee. In 1960, school aid bills for the first time passed both the House and Senate but were prevented by the Rules Committee from going to conference committee. Despite advocacy by Presidents Truman and Eisenhower and vigorous lobbying by President Kennedy early in his first year in office, school aid bills were going nowhere.

The obstacles to passage of an elementary and secondary school bill were known collectively at that time as "The Three R's"—Race, Religion, and (at least in the House of Representatives) Republicans. Let us recall each briefly.

Race.—Southerners had been among the earliest and most consistent proponents of federal aid, largely to elevate their economically impoverished schools to the level of their more affluent northern neighbors. After 1954 and the landmark Supreme Court decision in *Brown* v. *Board of Education* of Topeka, however, most Southerners became opponents of any legislation which might be used to force school integration. Northern liberals and civil rights activists notably Representative Adam Clayton Powell, insisting that public funds must not be used to subsidize segregation, only succeeded in destroying whatever consensus there might have been among Democrats. Without the Southerners, even a solid front of northern Democrats would be insufficient to pass a school aid bill.

Religion.—The long-smoldering church-state controversy erupted in full force after World War II as non-public school enrollments, particularly in Catholic schools, mushroomed. Private school parents and their Congressional representatives became increasingly militant against proposals in the Congress which raised money from all taxpayers but which would deny benefits to 15 percent of the nation's students. The controversy became most explosive in 1950 when Eleanor Roosevelt used her popular syndicated newspaper column, My Day, to oppose federal funds for private schools and when Cardinal Spellman responded by publicly accusing her of anti-Catholicism. A decade later, presidential candidate John Fitzgerald Kennedy felt constrained to pledge his unalterable opposition to federal assistance to any church or church school. Subsequently, his two school aid bills were killed in 1961 and 1963. As in the case of Race, so Religion seemed an impassable barrier to the passage of major aid bills in the early Sixties.

Republicans.—In the Senate, Robert A. Taft had declared as far back as 1946:

"Education is primarily a state function, but in the field of education . . . eg. the federal government has a secondary obligation to see that there is a basic floor under these essential services for all adults and children in the United States."

A majority of Senate Republicans were supportive of federal aid, notably Jacob Javits of New York and Winston Prouty of Vermont. On the House side, however, most Republicans were united in opposing all but selected categorical aids for the schools. Fearing federal control of education and excessive government spending, House Republicans—plus their functional allies on issues of Race and Religion—formed an effective obstacle to any broad-scale or general aid bill.

Such was the overall picture in 1963 when President Kennedy was assassinated and it seemed as if his ambitious agenda of domestic social legislation was still-born. However, important social, economic and political changes were already becoming evident which would blossom in less than a year and a half into ESEA and a myriad of other Great Society programs.

First, interfaith relations had greatly improved since the 1940s and 50s. The election of our first Catholic president and particularly the ecumenical spirit fostered by the Vatican Council of 1960 and the brief reign of Pope John the XXIII (Roncali) lowered political temperatures all around, permitting a heightened level of interfaith dialogue. There was, for example, renewed interest in tapping all of the nation's human resources through concepts we heard much about at that time—"shoulder-rubbing"—through shared time, released time, dual enrollment and similar public-private educational ventures.

Second, educators pushing for federal aid were not discouraged but instead redoubled their efforts to master the political process. Once despised for being politically ineffective, educators learned how to become so consequential that their substantial manpower and political action funds were thereafter wooed by most officeholders and candidates.

Organized labor, and particularly the AFL-CIO, were especially powerful and consistent supporters of virtually every major education proposal. Many an education group, not merely the rising AFT, learned their political crafts with the help of Big Labor's able lobbyists.

Third, America's prosperity seemed boundless. Tax levels were reduced twice in JFK's brief term and then massively once again in 1964. Consequently, economists began to worry about the concept of "fiscal drag": the U.S. Treasury was simply collecting too much money for the long-range health of the economy. In no small part, the War on Poverty, ESEA and other Great Society spending programs were formulated with the active participation of the Council of Economic Advisers as a beneficial way to eliminate that "fiscal drag."

I recall vividly one meeting in December 1964 when we at HEW were defending our draft proposal for ESEA before the normally frugal examiners of the old Bureau of the Budget. We explained the proposed initial distribution formula for Title I only to discover that BOB was worried that our poverty-based formula and other formula components would dispense only an annual $8 billion by FY 1969. Not enough, BOB told HEW, and we were instructed to think about formula revisions in later years which would be capable of vastly greater disbursements than a mere $8 billion a year!

All of this seems, of course, unless we recall that oil was then selling at one-tenth of its later price levels and that there were then fewer than 25,000 U.S. soldiers of Viet Nam, rather than the 538,000 troops of 1968.

Parenthetically, I would add, ESEA's cornucopia of riches really lasted less than a year. Already by 1966, people like myself

were sent up to Capitol Hill to tell the Congress that it was authorizing too much money!

Fourth, was the rise to the presidency of Lyndon Baines Johnson with his driving passion for enacting far-reaching domestic social legislation. Of LBJ's remarkable legislative skills no elaboration is needed here. Yet, we should remember our own surprise as President Johnson proceeded to make education not merely part of the Great Society but, indeed, its very cornerstone. Education, he repeatedly told the nation, is "the first work of our times." A man whose entire Congressional career was marked by introduction of only one education measure (to establish a guaranteed student loan program), a man who was never particularly identified with education legislative causes, soon earned and delighted in his popular designation as "The Education President."

President Johnson demonstrated his legislative genius in a most dramatic fashion when he spearheaded passage in 1964 of the Economic Opportunity Act—the War on Poverty—and the even more far-reaching Civil Rights Act. With two mighty blows he and the Congress established major principles that, less than a year later, were to result in ESEA: First, the clearly enunciated canon that federal funds must not be used for the institution or perpetuation of segregation and discrimination. No longer would a Powell anti-discrimination amendment need to be fought over on each and every education bill. Henceforth, a generic civil rights law of the land (Title VI) made it possible for long-time southern supporters of federal aid to education to return to the fold. Racism, of course, was far from dead in our national life, but no longer would it pose such an overwhelming stumbling block to passage of school aid legislation.

Likewise, the War on Poverty signaled a renewed determination to develop more of our nation's neglected human resources and, in particular, to give the children of the poor a chance to enter schooling on the same level of readiness as their more affluent neighbors. Headstart, which we now take so very much for granted, was a truly revolutionary concept in 1964 for it meant that thereafter all children would not be treated the same; additional investments would be made in the children of the poor. Moreover, various kinds of institutions, not just public schools, would be mobilized to sponsor Headstart and related educational and child development services. A role had been found for the nation's private schools and institutions. Could this kind of private participation signal a way over the shoals of the church-state controversy long bedeviling the school-aid issue?

Time does not permit discussion of other educationally significant aspects of the War on Poverty, but we may remind ourselves that college work-study, adult basic education and migrant education all were first authorized in the Economic Opportunity Act.

A fifth, and perhaps the most decisive, change that made it possible for ESEA to become law in 1965 emerged from the congressional elections of 1964. Even more far-reaching than President Johnson's stunning electoral victory over Barry Goldwater was the dramatic political shift in the House of Representatives. Sixty-nine freshman Democrats swept (or squeaked) into office, 60 on LBJ's "coat tails" with electoral margins smaller than the President's. Thirty-eight incumbent Republicans were defeated. Instead of a bare working majority in the House, President Johnson now had a 68 percent nominal majority—295 Democrats to 140 Republicans. The new House was clearly the most urban, the most northern, and the most liberal in American history.[1] More important for our purposes here, a large majority of the new Representatives had campaigned for and were committed to large-scale federal aid for education.

The stage had now been set for the long-awaited breakthrough on federal aid to education. LBJ and the Democrats probably had the necessary votes to push through a traditional public-schools-only bill, but that was neither JBJ's desire nor his operating style. A deal-maker, pacifier, unifier, and consensus-builder, the President instructed HEW to prepare a bill that would not reopen "the holy wars over religion", nor pit North against South, black against white. A new type of legislative vehicle was needed, a bill which would restore the old New Deal alliance of urban and rural Americans, which capitalized on the nation's rediscovery of poverty in our midst, which did not totally exclude Catholics or other private school interests, which eased the pains of racial integration in the South, and which held out the promise of school reform and innovation generally. Overall, equality of opportunity at the starting gate (not, as its critics later charged, "guaranteed equality of results") was the hallmark of the Administration's new proposal.

And LBJ also made sure that the ESEA bill was large enough to be taken seriously. At his Texas ranch during Christmas 1964, he asked HEW Secretary Anthony Celebrezze, Assistant Secretary for Legislation Wilbur Cohen and Commissioner of Education Francis Keppel, how much money would be authorized by the largest school aid bill then pending in the Congress. Informed that the NEA's proposed general aid bill called for $666 million annually, the President refused to be out-done and directed his budget chief to find an unprecedented $1 billion for Title I, with much larger sums in subsequent years. And to HEW and his chief White House lobbyist, Larry O'Brien,[2] he commanded that ESEA become the very first priority bill of the new 89th Congress convening in January.

To be sure, HEW and the Office of Education had been working on the bill for well over a year. Indeed, Commissioner Keppel and White House Special Assistant Douglass Cater had been trying to fashion a broad consensus and general understandings on legislation that would be at least minimally acceptable to all major interests, particularly on the church-state question. While their private meetings with public and private school leaders did not deal with legislative draftsmanship or details, they did produce a degree of harmony remarkable by contrast with the political climate of the 1950s. Without having the vocabulary or terminology to express themselves precisely, Commissioner Keppel and his colleagues forged a consensus behind what have come to be called the "child benefit" or "public trustee" theories. ESEA would not be general aid, yet it would provide the broadest type of categorical assistance imaginable. (See especially the House and Senate Committee reports on the vast range of permissible uses of federal funds.) While all of its funds would flow only to public authorities, they, in turn, would have to behave as accountable trustees on behalf of all the eligible children in the community. Not only in Title I but in the other four titles as well, services would be provided to children regardless of the type of school they attended; nonpublic school students would be afforded, as of right, the opportunity to share in the benefits, if not the control, of public funding. ESEA would become what Arthur Flemming of the National Council of Churches (and former HEW Secretary under President Eisenhower) called "an instrument of reconciliation," instead of division.

Portions of ESEA had their origins in various quarters beyond HEW and the private meetings convened by Commissioner Keppel. The anti-poverty orientation of Title I, but not the distribution formula, was perhaps first suggested by HEW Secretary (later Senator) Abraham Ribicoff and by Senator Wayne Morse. They had learned from the painful defeat of President's Kennedy's general aid bills in 1961 and 1963. They had learned that, politically, private school leaders could not easily oppose humanitarian anti-poverty measures that were compensatory, supplementary or special in nature, while they would vigorously resist any blanket efforts to improve the public schools that did not simultaneously aid their own. It was Senator Morse who first introduced legislation amending P.L. 874, the once politically invulnerable impacted areas program, to establish poverty and educational deprivation as conditions calling for federal financial assistance. (Indeed, it is often forgotten that Title I was originally passed as an amendment to P.L. 874, largely in the hope that the potent impact aid lobby would rally to support of the new poverty formula and that Members of Congress would prefer to amend a familiar and popular law like P.L. 874 rather than to enact a radically different and novel measure.)

Title II also had Congressional roots. Championed first by Representative (later New York Governor) Hugh Carey, the library and textbook title provided a classic illustration of the "public trustee" theory in which public libraries and schools (e.g. as in Louisiana's textbook lending law) could provide services to the entire community.

Title III and its provisions for supplementary centers and services reflected the input of educational reformers and others who wished to transfer the achievements of the nation's "lighthouse" school districts to the country at large. These notions were powerfully endorsed by a 1964 task force headed by John W. Gardner, the prestigious head of the even more prestigious Carnegie Corporation of New York, soon to replace Secretary Celebrezze at the helm of HEW.

Title IV built upon the Cooperative Research Act recommended by President Eisenhower in 1955 and promised a golden future for educational research and development.

---

[1] Only three of the freshman Democrats (out of 69) subsequently voted against ESEA. Overall, 98 percent of the northern and 43 percent of the southern Democrats voted for ESEA.

The House Democratic Study Group, committed to enactment of liberal social programs, now enrolled 180 Representatives. In the 89th Congress, DSG members supported Great Society measures 96 percent of the time contrasted with 48 percent for non-DSG Democrats and a Republican opposition rate of 85 percent. In 1965, LBJ's Congressional support level was 93 percent compared with 65 percent during President Eisenhower's last year in office, 1960.

[2] O'Brien viewed ESEA as "the cornerstone to the entire Administration legislative program for the Eighty-ninth Congress. It contains so many different fundamental issues . . . that it could easily fall apart. If we can hold the troops together on this one it will surely make things that much easier during the remainder of the session."

Title V, to strengthen state departments of education, was as much as anyone's a contribution of Commissioner Francis Keppel who recognized that only effective state educational authorities could shoulder the heavy burdens of ESEA. In the light of so much later criticism of an alleged "federal takeover" of education, it is instructive to recall that not only Title V but numerous provisions of other ESEA titles were intended to build up state administrative capacity as never before and to charge them with primary responsibility for decision-making under the new act. (Would it have made any difference, we may ponder, if Title V had been placed symbolically at the head of ESEA, as Commissioner Keppel recommended, instead of at the rear? Would media and public focus have been shifted in any way to state leadership and state responsibility and away from the billion dollar federal price tag of Title I?)

As the formulation of ESEA proceeded around the clock at HEW, the Hill was continuously briefed, HEW and the White House taking considerable pains to inform the Congressional leadership of the nature and magnitude of the emerging school aid breakthrough. On December 16, 1964, the National Education Association announced its support of the principle of "special types" of assistance to students in private and parochial schools, as distinct from aid to the schools themselves. The dawn of a new era in church-state relations was obviously at hand. For the first time in American history, major public and private educational groups—neither totally satisfied with the compromise—were arrayed on the same side of the federal aid to education controversy.

Delighted by word that the decades-old public-private school impasse had apparently been bridged, Congress went into high gear in a most unaccustomed manner. On January 12, President Johnson sent the Congress his education message accompanied by HEW's draft bills which were immediately introduced by Senator Morse and Representative Carl Perkins. Ten days later, indefatigable subcommittee chairman Perkins opened hearings which lasted late into most evenings. Subcommittee markups were completed only two weeks later, the Republicans having boycotted the markups. And so it went to the final passage in the Senate on April 9 and to President Johnson's signature on the bill a remarkable one day less than three months after its submission. No wonder that some Republicans called ESEA "The Railroad Act of 1965!"

Along its hasty path to law, a number of noteworthy things happened to ESEA. Public and private school educators held together despite skilled efforts to split them asunder. The House subcommittee fine-tuned the church-state compromise with additional provisions strengthening the "public control of public services" features of the Act. A whole new cadre of Representatives (e.g. Brademas, Thompson, Hawkins, Ford, O'Hara, Meeds, Mink, etc.) rose to prominence in the House by championing an education bill, formerly considered a legislative field fit only for pariahs. The White House, the Democratic leadership and such legislative champions as Morse, Powell and Perkins honed their legislative skills so as to make of the ensuing 89th Congress the greatest outpouring of domestic legislation in the nation's history. And the Senate, which prides itself on the title "the greatest deliberative body in the world," took the almost unheard-of step of accepting the House-passed bill, H.R. 2362, lock, stock and barrel. The House Rules Committee, a conference committee, votes on recommital and other potential hazards to final enactment of ESEA were thus bypassed by the Senate's unusual magnanimity.[3]

To end where we began, everyone associated with ESEA knew this was not just another bill but a "window of opportunity" which, once passed, might never reappear. ESEA was far from a perfect act. LBJ himself likened it before its passage to a Model-T Ford destined for amendment many times over the years—as it was, in fact, in 1966, 1967, 1970, 1974, 1978, 1981, 1983. "Opportunity doesn't knock twice," believed the Act's sponsors. Did they foresee that less than two years later LBJ's popularity would decline sharply and that in the elections of 1967 House Republicans would increase their strength by 47 seats, from 140 to 187? In any case, ESEA's backers were taking no chances; 1965 was the year to establish, once and for all, a major measure of federal financial responsibility for improving elementary and secondary education, particularly for the children of the poor.

Now, 20 years later, we can still encounter the occasional minority view that "The proper role of the federal government in education is no role. It was never intended that the federal government become involved in this domain." (Eileen Marie Gardner, Heritage Foundation). However, tonight's convocation—bicameral, bipartisan, Executive and Legislative, federal, state and local in charter—is an impressive testimonial to the enduring nature of ESEA. May we not, therefore, congratulate ourselves on having been privileged to reach this evening of celebration of great times past and even better days to come in the service of America's children.●

BUDGET STATUS REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate a status report on the budget for fiscal year 1985 pursuant to section 311 of the Congressional Budget Act.

Since my last report, the Congress has cleared the Statue of Liberty-Ellis Island Commemorative Coin Act, H.R. 47, and the Department of Agriculture urgent supplemental appropriation, House Joint Resolution 342, for the President's signature.

The report follows:

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET, STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 280—REFLECTING COMPLETED ACTION AS OF JULY 19, 1985

[In millions of dollars]

	Budget authority	Outlays	Revenues
Budget resolution level	1,021,350	932,050	750,900
Current level	1,016,991	933,380	750,589

[3] The final votes on the bill, when passage appeared all but certain, masked the degree of opposition to the measure at the outset and, especially, when the coalition supporting ESEA threatened to become unraveled on the floor of the House: House of Representatives 263-153; Senate 73-18 (a majority of Republicans, 18, voted for the bill, while 14 voted against, along with only 4 Democrats).

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET, STATUS OF THE FISCAL YEAR 1985 CONGRESSIONAL BUDGET ADOPTED IN HOUSE CONCURRENT RESOLUTION 280—REFLECTING COMPLETED ACTION AS OF JULY 19, 1985—Continued

[In millions of dollars]

	Budget authority	Outlays	Revenues
Amount remaining	4,359	0	0

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds $4,359 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 280 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 280 to be exceeded.

REVENUES

Any measure that would result in revenue loss exceeding $0 million for fiscal year 1985, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 280.●

PUBLIC ASSERTIVE ON HEALTH

● Mr. STEVENS. Mr. President, it is not news to announce that this Nation is undergoing a revolution in our awareness of the importance of fitness and health. This new consciousness is not limited to those who have decided to make lifestyle changes like taking up jogging and giving up cigarettes. According to an article which appeared last spring in the New York Times concerning the results of a survey conducted by the American Board of Family Practice, a random sample of American adults reveals that most hold strong opinions on questions relating to health care issues.

Of particular interest to me, having just introduced a bill to protect the rights of nonsmokers in Federal buildings, is the finding that almost 70 percent of those interviewed believe that smoking areas should be segregated in all public places to protect nonsmokers. As stated by the doctor conducting this survey, the depth of feeling expressed on this issue was most unexpected. I ask that this article from the May 2, 1985, New York Times be printed in the RECORD in its entirety.

The article follows:

[From the New York Times, May 2, 1985]

POLL FINDS PUBLIC ASSERTIVE ON HEALTH

(By Marion Burros)

Americans are assuming more responsibility for decisions regarding their life, health

and even death, according to a survey released yesterday by the American Board of Family Practice, the certifying organization for family doctors.

"Americans are asserting their rights in health care issues," said Dr. Kathy Bloomgarden, president of the opinion research company that conducted the survey. "They are beginning to understand the responsibilities that accompany those rights."

The national survey of health care opinions, conducted by Research and Forecast, a subsidiary of the public relations firm Ruder Finn & Rotman, asked the same questions of two groups: the general public and family physicians. On matters relating to the terminally ill, sex education and the rights of nonsmokers, both groups were substantially in agreement.

Despite widespread controversy surrounding the right of the terminally ill to die, the survey found that well over half the general public respondents felt that they unquestionably had such a right and that it was the responsibility of the family and patient to carry it out. Approximately the same number believed that a person has the right to receive an animal organ to extend life.

"These are major changes," said Dr. Bloomgarden, a sociologist. "People are no longer turning to the medical profession or the clergy to guide them in making these important medical decisions."

About 90 percent of the physicians and the general public surveyed agreed that the government—Federal or local—should help care for aged parents when no one else can. At the same time well over half of both groups felt that children should be financially responsible for their parents if the parents can no longer take care of themselves. Dr. Nicholas J. Pisacano, executive director of the American Board of Family Practice, said, "The sensitivity to care of the elderly is exciting."

Yet Americans over 65 are least likely to think children should be responsible for aged parents, the survey showed. "We tend to think of older people as helpless," said Dr. Bloomgarden, "but they like to think of themselves as independent and healthy."

Though the spiraling cost of health care has received a lot of press coverage, it does not rank high as a major health concern, the survey found. Asked to choose three of the most important health issues, those surveyed ranked costs seventh out of eight; drug abuse, the homeless and hungry and pollution topped the list. Physicians ranked alcohol, smoking, pollution and drug abuse as top concerns.

But the public does blame hospital charges and doctors' office fees for the high cost of health care and believes such costs could be reduced by: teaching people how to stay healthy; setting limits on doctors' fees and hospital and drug charges; setting up more health-maintenance organizations; having employers pay more of the insurance costs and establishing national health care insurance.

Physicians blamed hospital costs and diagnostic tests for medical costs, but a majority of them agreed only with the first suggestion on ways to reduce such costs.

A majority of both groups of respondents said they thought Americans should educate themselves about health maintenance and disease prevention by asking their doctors more questions, through articles and broadcasts on health issues and by taking courses.

Sex information was an important component of such education according to most of the public (85 percent) and the physicians (88 percent). An equally impressive number believed sex education should be taught by parents, while two-thirds thought it should be taught in school.

Both the public and doctors were generally in agreement that sex education would help to reduce sexually transmitted disease and result in better family planning, but they parted company on the role sex education plays in improving sexual relations. Only 43 percent of the general public thought that sex education was valid for that reason, while three quarters of the doctors did.

Both groups believed that education would also be an effective tool to discourage smoking. Over 75 percent believed that nonsmokers were harmed by the fumes of smokers in the same room. And only slightly fewer—68 percent—thought that smoking areas should be segregated in all public places to protect nonsmokers. Dr. Bloomgarden said the depth of feeling expressed on this issue was "most unexpected."

The study, a natonwide telephone survey of 1,007 men and women over the age of 18 and 303 family physicians, was conducted between Dec. 20, 1984 and Jan. 31, 1985. The margin of sampling error was plus or minus 3 percent for the public and plus or minus 6 percent for the physicians.●

FOSTER CARE

● Mr. MOYNIHAN. Mr. President, two articles published last week in the New York Times, written by Sara Rimer, have helped to expose a serious failing in our foster care program. We have failed to provide older foster care children, those age 16–18 who are about to age-out of the system, with any special assistance to them to make the difficult transition from foster care to independent living.

The first article describe a July 17 ruling by State Supreme Court Justice Elliott J. Wilk. Justice Wilk found that 18-year-olds discharged from foster care often are forced into public shelters, vacant buildings, public terminals, or city streets. Under his ruling, therefore, no young person may be discharged from New York's foster care system, unless he or she has received adequate preparation and a place to live.

The second article provides case histories of three foster care children. These case histories illustrate graphically where our foster care system is breaking down. Reggie Brown, a victim of child abuse—beaten often and once thrown out of a second-story window—was brought into the foster care system at age 13. Reggie was shunted from one group home to another, and finally discharged—at age 19—to a men's shelter in downtown Manhattan. Reggie, a diabetic, eventually became one of the thousands of homeless persons in the city. In May, Reggie was arrested for burglary; he pleaded guilty and now lives in the city jail on Riker's Island. He is a tragic failure of our foster care.

In a 1984 study of runaway and homeless youth in New York City, funded by the Ittleson Foundation, found that as many as 50 percent of the youth seeking shelter in the city had been in the foster care system. A 1983 report on homeless youth in New York City found that 29 percent of all these seeking crisis services reported a foster care history.

A 1981 research note, "Foster Care and Welfare Dependency," published by the Human Resources Administration of New York City, revealed that the rate of welfare dependency among those recently discharged from foster care was twice that of the city's general population of similar age and ethnic composition.

In 1984, the Citizens' Committee for Children of New York, Inc. studied older children, age 14–21, who were in the New York City foster care system being prepared for discharge. The study, "The Foster Care Exit—Ready or Not," found that:

That 10 percent of these children were reported to have been involved in major acts of vandalism, theft, or assaults; 7 percent were involved in hard drugs; 5 percent had alcohol or soft drug-related problems; and 7 percent were females who had given birth or were pregnant at the time of the study.

We can and must do better for our foster children. On June 19, 1985, I introduced legislation—S. 1329—that would reform the foster care and adoption assistance programs. One important provision of my legislation would authorize Federal support for States to establish individual independent living plans for foster children age 16 and older. By fiscal year 1988, States would be required to provide transitional independent living programs for these older adolescents. These programs would include training in daily living skills, such as budgeting and how to locate housing, as well as vocational and career counseling. I urge my colleagues to support this legislation, which I believe would begin to fill some of the gaps in our foster care program, described so vividly by Ms. Rimer. I ask that the two articles by Ms. Rimer be printed in the RECORD.

The articles follow:

NEW YORK JUDGE CURBS DISCHARGE OF FOSTER YOUTHS WITH NO HOMES

(By Sara Rimer)

A State Supreme Court justice in Manhattan ruled yesterday that young people may no longer be discharged from New York City's foster-care system until they have been given supervision and a place to live.

The justice, Elliott J. Wilk, wrote that young people between the ages of 18 and 21 who were discharged from foster care and subsequently became homeless must be allowed to return to such care.

Under state law, New York City and other municipalities are obligated to provide supervision under the foster-care program for young people through age 21. In the case before him yesterday, the judge found that

the city had violated the law by discharging children from the program before they were 21 and able to care for themselves.

Justice Wilk found that 18-year-olds discharged from foster care were often forced either into the city's public shelters or into vacant buildings, public terminals and the city's streets.

"It is well documented and recognized even within the city agency itself that the men's shelter and its satellites are overcrowded, often dangerous and 'an inappropriate setting' for young adults," he wrote.

There are 10,000 such youths statewide, three-quarters of them in New York City, according to the Coalition for the Homeless, which along with Sullivan & Cromwell and Douglas H. Lasdon, the director of the Legal Action Center for the Homeless, filed the class-action lawsuit last January on behalf of a group of present and former foster-care children.

Robert M. Hayes, the attorney for the Coalition for the Homeless, said: "It's a tremendous victory for the children who have been dependent on government for their upbringing. Now the foster-care system will be required to start acting like real mothers and fathers for these kids."

Mr. Hayes estimated that it would cost the state and city at least $70 million to begin putting the judge's order into effect. Foster care in New York City costs $335 million a year in city, state and Federal funds.

A spokesman for Mayor Koch, Leland T. Jones, said yesterday, "Until we've had an opportunity to review and analyze the decision, we won't have any comment on it."

Brian Jackson, a spokesman for Governor Cuomo, said: "We have not had an opportunity to review in full the court's decision and to assess its impact upon the state. The Department of Social Services and the Governor's program staff will be looking at it in the next few days to determine what the actual impact of the ruling is and what action might be necessary."

The justice noted that the city did not deny the need for improvement in the provision of foster-care services. "They claim," he wrote, "that H.R.A. has recently taken steps to rectify the system's current deficiencies, including the institution of a progress review mechanism within the agency and a pilot program designed to ease the transition from foster care to independent living." The H.R.A. is the Human Resources Administration, which is the city's social services agency.

The defendants also argued that providing additional services to children who have been discharged from foster care would "burden the agency financially, jeopardizing its ability to properly care for the children presently in foster care."

The State argued that the city should assume primary responsibility for foster-care children.

Justice Wilk found that by law local agencies charged with foster care "must prepare the child for independent living by providing training in skills such as apartment finding, budgeting, shopping and cooking; finally, the child must receive career counseling and training in a marketable skill or trade."

The city's synopsis of agency records, according to the judge, "does not reveal that foster children are training in apartment finding or housing skills, as required by the regulations."

Each year, the city's foster-care system includes 17,000 children, 87 percent of whom are members of minority groups, according to city reports. They spend an average of four years in foster care, having entered the system as the result of abuse or neglect at home or because their parents—most of whom live in poverty—became overwhelmed and could no longer care for them. Foster care includes placements in families or in group homes.

About 9,500 of them are discharged each year. Of those, 2,000 are discharged to what is known as "independent living," according to Mr. Hayes. But the lawsuit charged—and the judge yesterday supported—the contention that independent living often means the city's shelters or the streets.

"I hope a system is set up to assess the impact of this victory on the kids," one child-welfare expert, David Tobis, said yesterday. "There is precious little evidence that any of the foster care reforms over the past five years have improved their lives."

Mr. Tobis is the former staff director of the Foster Care Monitoring Committee, which issued a 1984 report on the implementation of recommendations of the Mayor's Task Force on Foster Care.

NUMEROUS REPORTS

Mr. Hayes said that the failings of New York's foster-care system—which have been documented in numerous reports, conducted by city agencies as well as private organizations—are repeated throughout the country. "This is an example of backing into the causes of homelessness," Mr. Hayes said. "The foster-care system, by failing the children, creates a whole new category of homeless people. Fix the foster-care system, and you have fewer homeless people."

Mr. Hayes filed the lawsuit in 1979 that resulted in the State Supreme Court order requiring providing shelter for homeless men. A subsequent lawsuit filed in 1982 extended the order to include homeless women. The preliminary injunction handed down yesterday says that homeless youth who have been discharged from foster care are entitled, not just to shelter, but to housing and care.

In 1984 a Foster Care Monitoring Committee—with the cooperation of Human Resources Administration and Special Services for Children—undertook a study of the implementation of the recommendations of the Mayor's 1980 Task Force on Foster Care Services.

NEED FOR IMPROVEMENT

While acknowledging progress in many areas, the report concluded that vast improvement was still needed. The report found that 45,000 children were discharged from foster care between 1979 and 1984.

"Many of these children are not provided with the assistance they need to live with their biological families or the training they need to live independently," according to the report. "Fewer than two thirds of foster-care programs were rated satisfactory in meeting even the modest standards or postdischarge services."

A city report found last year that 27 percent of the homeless youth appearing in city shelters were once in foster care.

FROM FOSTER HOMES TO LIFE ON NEW YORK STREETS: 3 CASE STUDIES IN FAILURE

(By Sara Rimer)

After a childhood he remembers as a series of beatings by a mother who drank a lot, Reggie Brown entered the foster-care system at age 13. Within a week of his 18th birthday, he was discharged from the last of a series of group homes. All he was given, he said, was cab fare and directions to the men's shelter.

Harold Fredericks entered the foster-care system at age 12, when his mother—alone and trying to raise four children on public assistance—could no longer cope with his stealing, fighting and setting fires. Six years later, he was discharged from a group home to a Job Corps training program. It was not long before he, too, ended up at the men's shelter.

Joseph Morgan, who was put up for adoption when he was 3 weeks old but never adopted, was raised by foster-care parents until age 15, when he was sent to a group home. Three years later, he was given $500 and discharged to "independent living," which meant, in his case, the men's shelter.

After they were discharged from the foster-care system, Reggie Brown, Joseph Morgan and Harold Fredericks all ended up in the same unofficial neighborhood for wayward youths—Times Square. They described their weeks there as days spent in the video arcades and as nights trying to sleep on the subways or in all-night pornographic movie theaters or in the Port Authority Bus Terminal. They became experts in survival, sucking tokens out of turnstiles, charming strangers for free meals, panhandling and occasionally earning money as messengers. For emergency shelter, they joined hundreds of other homeless youths at Father Bruce Ritter's Covenant House.

Mr. Morgan and Mr. Fredericks, who met in the Job Corps and became friends, negotiated the streets together. On one of many aimless nights, Mr. Fredericks says he was hungry and needed money and tried to snatch a young woman's purse on West 57th Street. He says be got caught but the woman declined to press charges.

Reggie Brown, Joseph Morgan and Harold Fredericks are three of thousands of failures of New York City's foster-care system, according to a class-action lawsuit filed last January by the Coalition for the Homeless, the Sullivan & Cromwell law firm and Douglas H. Lasdon, the director of the Legal Action Center for the Homeless.

These young men are among the six plaintiffs who, the lawsuit asserts, were discharged from foster care at age 18—all of them before they were ready, four of them against their will—and ended up living on the streets, six more members of a growing homeless population.

They ended up homeless because they were given little or no training or supervision in how to live on their own, according to the lawsuit. The court earlier this week held that the city had violated state regulations by failing to provide supervision to foster-care children discharged to so-called independent living.

"These three young men are no different from thousands of children abandoned by the state's foster-care system," the attorney for the Coalition for the Homeless, Robert M. Hayes, said yesterday. "The government, as substitute parents for these kids, failed to teach them how to live as productive adults in this city."

REGGIE BROWN

"I ain't had nothing in my life," Reggie Brown, a 19-year-old with a winning smile, said recently. "Ain't nothing in my life ever gone right."

He was born in Brooklyn and raised in the Corona section of Queens, one of four children. "I didn't see my father for years," he said. "I can't even remember what he looked like." His father, he said, died four years ago in Florida.

He said his mother punished him for a variety of offenses—both real and imagined—by beating him with the heel of her shoe or with her belt. The scar on his forehead, he says, is from one of those beatings. When he was 13, he says, his mother's boyfriend became enraged and threw him out the second-story window of their apartment. Reggie ended up in the hospital with spinal injuries and a broken wrist. While in the hospital, he was judged to be a neglected child and placed in the foster-care system. He remembers that two social workers visited him in the hospital.

"They explained about being child abused," he said. "They said they could take me to a place on Bleecker Street. I was sad but happy I wasn't going to go home and get beat again."

He began his odyssey through the foster-care system in a group home in Brooklyn, one of many run by the 60 different private and religious agencies which provide care for 95 percent of the city's 17,000 foster-care children. Poor, black and in the system as a result of abuse at home, Reggie's background was that of a typical foster/care child.

Although foster care is intended as a temporary placement until his family gets the necessary counseling, financial aid and other social services so that the child can return homc, the average length of stay is now four years. Part of the problem, advocates for foster-care children say, is that families are not receiving the necessary assistance from social-service agencies. Reggie never returned to his mother's home.

While he describes one or two of the group homes as "nice," Reggie was unhappy at others and seemed to have problems following the rules. When he was 14, he got lucky—for the one and only time in his 19 years, he says. He was sent to live with a foster-care mother named Carrie Moultrie, who shared her apartment in a Bronx housing project with several foster-care children. "Miss Carrie," Reggie said, smiling for the first time during his recitation. "Now, there's a mother!"

He stayed with Miss Moultrie—"sweet, adorable and loving, like a mother should be," in Reggie's worshipful words—for three years. He began attending school regularly and completed from the ninth grade—all the education he has. But then Miss Moultrie left on an extended vacation in the South, and Reggie was sent to another foster-care home and then to several more group homes. At the last home, he got into trouble for violating the curfew. One night he was discharged.

"They gave the cab driver a piece of paper with the address of the shelter on it," he said. When he got to the city's men's shelter in downtown Manhattan, he said, he was told he was too young to stay there. He was referred to Covenant House in Times Square, a crisis intervention center for about 250 boys and girls, where the average stay is six days. Reggie, however, was allowed to spend seven months at Covenant House. He found a $100-a-week construction job.

Last fall, with no place else to go, Reggie started living on the streets. In the parking garage at the Port Authority Bus Terminal, he found a dry, reasonably secure spot on which to lay down his coat and sleep.

On many nights, he slept on the subways. He preferred the A train, or the No. 2. What makes Reggie's story of survival on the city's streets even more compelling than most—and what amazed Mr. Lasdon, the director for the Legal Action Center for the Homeless, when he first met him—is that he is a diabetic who has been injecting himself with insulin daily for five years. Insulin has to be refrigerated. Reggie made do.

"I walked into hospitals and asked for cups of ice," he said.

Fortunately for Reggie, his guardian angel—Miss Moultrie—returned to the Bronx. While there was no room in her apartment last fall for Reggie to stay, he says she did make him welcome during the days. "I'd ask her, 'Can I come in?' " he said. "I'd take my insulin there. Then I'd just be sitting in the chair, dozing off or look at my cartoons on the T.V."

When he wasn't eating at Miss Moultrie's he said, he lived on hot dogs, slices of pizza, Spam and baloney sandwiches. Several months ago, Mr. Lasdon arranged for Reggie to stay at Emmaus House, a privately run shelter for the homeless in a Harlem brownstone. Even at Emmaus House, a refuge for those men and women who have been turned away by other places, Reggie had difficulty getting along. "All my life I been with too many people," he said at the time. "I just want to know how it feels to live in a house by myself."

Reggie eventually moved out of Emmaus House and with assistance from the Coalition for the Homeless began renting a room in Harlem. On May 17, he was arrested on burglary charges. He pleaded guilty and is now in the city jail on Riker's Island.

Emmaus House is run by the Rev. David Kirk, an Eastern Rite Catholic priest who has reflected long and hard on the troubled life of Reggie Brown. He expresses no surprise at the events of recent months.

"What did you expect?" he said recently shrugging. "He is what he's been through."

HAROLD FREDERICKS

From the time he entered elementary school, Harold Fredericks was labeled a problem child. "He was always moving," his mother, Janice Fredericks, said recently. "The teachers couldn't deal with him. He kept walking out of the classroom."

She began taking him to a series of psychiatrists and fought to have a special-education class set up in her neighborhood school so that Harold could be enrolled. Over the years, as Harold's behavior worsened, he became the painful focus of his mother's life. "I sat in the hospital with him sometimes every day of the week," she said. "He would set fires in the house. I was always downstairs looking for him, crying. He didn't get along with the other children. They wouldn't play with him. He just wouldn't listen to me. I was getting worn down."

Mrs. Fredericks had three other small children to worry about and no help, she says, from her former husband. "Finally, I went to the psychiatrist and said, 'I'm just too tired, I can't deal with Harold anymore.' "

She took him to Bellevue Psychiatric Center, where he was immediately admitted. Mrs. Fredericks asked that her son, at age 12, be placed in the foster-care system "I cried for days," she said.

His first placement was at Green Chimneys Residential Treatment Center in Brewster, N.Y. "It was beautiful," Harold said. "We had our own pool, our own gym."

When he was 14, Harold broke into a car near the center and stole jewelry, Mrs. Fredericks said. "He was a terrific swimmer," she said. "He's a great auto mechanic. But then there's this other side—Someone will say, 'Let's go rob a bank,' and he'll do it. He's a follower."

He was 17 last July when he was discharged from the foster-care system and sent to a Job Corps training program in upstate New York. "He got in with the Muslims," Mrs. Fredericks said. "He wouldn't go to classes. They sent me a letter. They put him out. They sent him to men's shelter."

He stayed briefly at Covenant House lived on the streets for several weeks with Joseph Morgan and then entered a different Job Corps program in Buffalo. He has intermittently returned home to his mother's apartment in the Bronx. "It's still scary," she said. "He'll take something if I don't have the money to give him. Harold is my son, and I love him. But I feel like there's nothing I can do for him. He's killing me."

Mrs. Fredericks has a steady job now, as a housekeeper. For the first time in her life, she says, she is close to coming off public assistance. But Harold's prospects seem to grow dimmer all the time.

"They (social workers) told me they were going to help," she said. "All those institutions and he has no high school diploma. Harold was going to see a psychiatrist. He was committed to Bellevue. He went from Green Chimneys to Lakeside to Job Corps. What in all that time have they done? What's he going to do? How is he going to take care of himself?"

JOSEPH MORGAN

Joseph Morgan was more fortunate than many foster-care children. From infancy until age 15, he had a stable home in a housing project in the East Bronx with Edward and Grace Davis and their two children.

"I treated him just like my own son," said Mr. Davis, who is 69 and a retired nursing assistant.

Mr. Davis said he and his wife planned several times to adopt Joe. But because of his wife's poor health and Joe's increasing problems, he said, their plans always fell through.

He says that when Joe turned 15 he began causing problems at home. "He was stealing from me," he said. "He wouldn't listen to me. I had to put him out."

His foster son was sent to a private institution on Long Island, where, according to both Joe and his Mr. Davis, he earned money selling marijuana and had an affair with one of his counselors. A year later he was transferred to an institution in Rockaway, where he stayed until he was 18 years old and discharged to so-called independent living.

He entered a Job Corps training program for several months and then returned to the city, where he spent several months on the street with his friend Harold Fredericks. When they had money, they spent it. With his earnings as a messenger, Harold had bought a 10-speed bicycle for $100.

They slept where they could, in Times Square movie theaters, on subways, in the Port Authority Bus Terminal, in the stairwell of the Davis family's housing project. "You can't get much sleep because you have to be constantly alert," Joe said. "Street life isn't no joke. It's day-to-day survival."

Last winter, Mr. Lasdon arranged for Harold and Joe to move into a private group home run by the Community Service Council of Greater Harlem. Joe found a job as a security guard and began talking about going to college and becoming a social worker.

"I've been helped all my life," he said. "I want to help people."

But he and Harold both left the group home, Weston House, after three months. Joe returned home for awhile and then enrolled in a Job Corps program in the Bronx. He received his high school equivalency certificate. Mr. Lasdon said Joe shows signs of becoming a success story.

He said Joe will be attending Marist College in Poughkeepsie in the fall. Joe does not tell many people that he has a 2-year-old son named Kevin, who lives with his teen-age welfare mother on the Upper West Side.

He said he tries to visit his son as often as possible and is all too aware of what might become of him. "He could be like me," he said.●

ELEVENTH ANNIVERSARY OF THE INVASION OF CYPRUS

● Mr. PELL. Mr. President, for the last 10 years, we in Congress have marked July 20 and August 8 as sad days for the cause of world freedom. Eleven years ago, the world witnessed a tragedy as Turkish Armed Forces invaded the sovereign Republic of Cyprus. When the dust had settled after two military actions, Turkish troops occupied 40 percent of that island country, and a full one-third of the Cypriot population—200,000 people—had become refugees.

Today, more than a decade later, we have seen little progress toward bringing justice to that young nation. While Turkish leaders in Ankara and their Turkish Cypriot protege, Mr. Denktash, purport to desire peace, their actions tell a story quite different. Since January, when summit talks between Mr. Denktash and Cypriot President Kyprianou broke down, Mr. Denktash has held both Parliamentary and Presidential elections in his illegal and universally-condemned Turkish Cypriot political entity. Meanwhile, leaders in Ankara have indicated that, even if a settlement is reached, they intend to maintain Turkish forces on Cyprus. Not only counterproductive to the peace process, these actions are clearly designed to promote a permanent bifurcation of Cyprus.

On the Greek Cypriot side, one positive development should be noted. On June 11, Secretary-General Perez de Cuellar reported to the U.N. Security Council that he had received an affirmative reply from the Government of Cyprus concerning a "consolidated draft agreement" which he believes could result in a formula for a lasting solution on Cyprus. Greek Cypriots have apparently accepted this document in good faith notwithstanding that it lacks certain requirements for what they conceive as an equitable settlement.

Unfortunately, Turkey and Mr. Denktash have yet to exhibit a similar spirit of conciliation. Mr. Denktash has shown no willingness to accept the Secretary-General's invitation to resume the summit process, and instead—in a move that directly contravenes the spirit of the peace talks—acted last month to allocate for Turkish settlement thousands of acres of occupied land belonging to displaced Greek Cypriots.

In the report accompanying the International Security and Development Cooperation Act of 1985 (S. 960), the Foreign Relations Committee pledged to monitor the Cyprus situation closely and stated that, in the absence of good-faith discussions and a return to the summit, the committee would be prepared to take appropriate actions to signal its concern. I believe that recent actions by Mr. Denktash and the Government in Ankara raise serious doubts as to whether our hopeful expectations have been trampled by Turkish intransigence. I urge my colleagues and the administration to do everything possible to ensure that there will be no 12th year of tragic division on Cyprus.●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that once the Senate completes its business today, it stand in recess until the hour of 11 a.m. on Wednesday, July 24, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. SIMPSON. I further ask unanimous consent that following the recognition of the two leaders, under the standing order, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PROXMIRE, DIXON, HATFIELD, MATTINGLY, and EVANS.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. SIMPSON. Then I ask unanimous consent that, following the special orders just identified, there be a period for the transaction of routine morning business, if time permits, not to extend beyond the hour of 12 noon with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, at 12 noon there will be a live quorum to begin under the provisions of rule XXII of the Standing Rules of the Senate, to be followed by a cloture vote on the motion to proceed to S. 43, with regard to the line-item veto.

Also, the Senate could turn to any other legislative or executive calendar items which have been cleared for action. Therefore, rollcall votes can be expected throughout the day.

Mr. President, we await final word on any other possible business. I, therefore, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 11 A.M. TOMORROW

Mr. SIMPSON. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 11 a.m. tomorrow.

Thereupon, at 6:46 p.m., the Senate recessed until tommorrow, Wednesday, July 24, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate July 23, 1985:

DEPARTMENT OF STATE

Winston Lord, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of China.

THE JUDICIARY

Ralph B. Guy, Jr., of Michigan, to be U.S. circuit judge for the sixth circuit vice a new position created by Public Law 98-353, approved July 10, 1984.

Stephen H. Anderson, of Utah, to be U.S. circuit judge for the tenth circuit vice a new position created by Public Law 98-353, approved July 10, 1984.

Glen H. Davidson, of Mississippi, to be U.S. district judge for the northern district of Mississippi vice a new position created by Public Law 98-353, approved July 10, 1984.

Robert B. Maloney, of Texas, to be U.S. district judge for the northern district of Texas vice a new position created by Public Law 98-353, approved July 10, 1984.

FEDERAL ELECTION COMMISSION

Thomas John Josefiak, of Virginia, to be a member of the Federal Election Commission for a term expiring April 30, 1991, vice Frank P. Reiche, term expired.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Bill D. Colvin, of Virginia, to be Inspector General, National Aeronautics and Space Administration, vice June Gibbs Brown, resigned.

IN THE AIR FORCE

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370.

To be lieutenant general

Lt. Gen. Bruce K. Brown, [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Harley A. Hughes, [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. David L. Nichols, [redacted]FR, U.S. Air Force.

HOUSE OF REPRESENTATIVES—*Tuesday, July 23, 1985*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We recognize, gracious God, the diversity of our religious expression, and we celebrate the traditions of faith that have given such strength to our national life. Help each of us to live our faith with commitment and enable us to see another tradition with respect. Give us the vision to see the glory of Your Kingdom and may that vision of love and justice bring us together in closer bonds among those with whom we live. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2410. An act to amend the Public Health Service Act to revise and extend the programs under title VII of that Act.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 1282. An act to revise and extend provisions of the Public Health Service Act relating to primary care;

S. 1285. An act to amend provisions of the Public Health Service Act relating to the National Health Service Corps;

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week";

S.J. Res. 145. Joint resolution designating November 1985 as "National Diabetes Month";

S.J. Res. 147. Joint resolution to designate a calendar week in 1985 as "National Infection Control Week"; and

S.J. Res. 160. Joint resolution designating the week beginning November 10, 1985, as "National Disabled Veterans Week."

DEATH OF FORMER CONGRESSMAN ED HUTCHINSON

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, it is my sad duty to inform the House of the death of my good friend and our former colleague, Congressman Ed Hutchinson of Michigan, who passed away last night in Florida. He was 70.

Funeral arrangements will be handled by the Chapel Funeral Home in his hometown of Fennville, MI. The funeral will be at 2 p.m., Saturday.

I first met Ed when we served together in the Michigan Legislature in the late 1940's where he earned the reputation as an expert in constitutional law. He served as a delegate and vice president of the Michigan Constitutional Convention in 1961 and 1962 and helped draft the State's present constitution.

His reputation as a constitutional scholar followed him to Congress when he was elected to his first term in 1964. He rose to be the ranking member of the Judiciary Committee at the time of his retirement in 1976.

Ed was a quiet and unassuming Member who took great pride in knowing the people of the Fourth District of Michigan and representing them in Congress. Although he moved to Florida following his retirement, he continued to maintain a home in Michigan and visited there frequently.

I know Ed's many friends in this body and in the Washington area will join me and my wife, Jane, in mourning his passing and in sending our sincere condolences to his wife, Janice.

PUT ME IN, COACH, I'M READY TO PLAY

(Mr. RUSSO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUSSO. Mr. Speaker, I heard a song when I was home this weekend—it's the kind of stuff my kids listen to—and the lyrics reminded me of our game tonight—the annual struggle between the Republicans and Democrats on the diamond. This is considered to be the most accurate assessment of athletic supremacy between the two parties. Anyway, the song goes "Put me in coach, I'm ready to play," and it reminded me of our worthy opponents, especially since it referred to the team as the Mudville Nine.

I know that the Republicans are ready to play, Coach CHAPPIE, because my scouts have watched them practice from our reconnaissance post near Four Mile Run. They report that DAN SCHAEFER has added a new pitch to his repertoire of slow, slower, and slowest. It is called in defiance of gravity and it moves at approximately the same speed as CARL PURSELL going around the bases. You remember CARL, I'm sure. He plays first base, which works out well for him since he can lobby our troops to support his next budget as they are passing through. JOHN KASICH is back again—living proof that you can construct a complete ball player out of splints, tape, and ace bandages. He is the Republicans' bionic man. In addition, we've heard that they have brought up some new pitching talent from their farm system in the New Jersey Legislature in the person of DEAN GALLO. We aren't sure what kind of moves he has, since the coach keeps him under wraps like the Australians' winged keel.

Little reconnaissance is needed to figure out many of the familiar Republican moves, however. Take MIKE OXLEY—please. They don't call him the Ox for nothing. Watch his moves in the field and on the bases. Hulk Hogan would be proud. JACK FIELDS plays like his name—he fields alright, but shoots offline, or is it throws off target? His best move, though, is bending over the belly to pick up a grounder.

Now some of our distinguished opponents are doubly talented, and this works greatly to our advantage. If DAN COATS plays baseball like he plays golf, the fans in the right field stands may be in serious jeopardy from a sliced ball, and the Democrats are considering a protective screen for them. BILL SCHUETTE, on the other hand, will give his teammates a break. If he plays baseball like he does basketball, the rest of the team can stay at the Capitol while he covers all the positions.

The good news is that, back by popular demand from all sorts of fans, JOCK MCKERNAN is returning to center field. We're delighted JOCK is ready to play. Not only is JOCK good for their game, he helps at the box office as well since he bears a remarkable resemblance to another southpaw they called the natural. Frankly, I wouldn't have noticed but my secretary pointed it out to me. All I know is that our draw at the turnstiles has increased considerably since the Maine man came to town.

So, "Put me in coach, I'm ready to play" could be the rallying cry for these rare baseballers to sing to their coach—none other than the Republican answer to P.T. Barnum. This coach possesses the tact of Billy Martin, the savior faire of Earl Weaver, the modesty of Ted Turner, and the judgment of George Steinbrenner. The only porker around who

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

gets fan letters from Miss Piggy, the ancient manager himself, SIL CONTE. Like the Earl of Baltimore, he has already been brought back from retirement once because the game just ain't the same without him. Both sides hope he'll be around for many years to come.

And both sides know it will be another record-setting athletic encounter tonight. We're looking forward to the game, coach. We're ready to play.

The SPEAKER. The Chair appreciates the fact that the gentleman had a long 1 minute and we will give to the "Ancient Mariner," the gentleman from Massachusetts [Mr. CONTE], the same courtesy.

FARM CREDIT SYSTEM

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, it is very tough to follow an act like that.

Mr. Speaker, wild fires are sweeping across the parched prairies. Hordes of hungry grasshoppers are devouring crops and rangeland. Depressed commodity prices continue to fall. Farm liquidations abound, and the 1985 farm bill crawls through Congress. Yet the No. 1 topic across much of rural America is the financial plight of the Farm Credit System.

The Farm Credit System is the largest source of agricultural credit in the United States. Hundreds of thousands of farmers and ranchers from all areas of the country are borrower-owners of this nearly $80 billion system.

The Farm Credit System was created by Congress with the objective of farmer- and rancher-borrower participation in the management, control, and ownership of a permanent system of credit for agriculture. Any restriction of such local control, by means of eliminating local borrower associations, requires the explicit approval of the associations' owners—the farmers and ranchers themselves.

As you may know, the current plight of some credit institutions within the Farm Credit System has prompted loss-sharing arrangements among farm credit districts. Unfortunately, this serious situation has been exploited by those who wish to remove local control from farmers and ranchers and create a huge multibillion dollar central entity or national farm credit bank. As a condition to receiving assistance, troubled districts are being told they must engage in large-scale mergers and consolidations of local farm credit associations.

I believe such action is both coercive and an unnecessary requirement, as well as being inconsistent with the intent of Congress. I hope you will join me in voicing your support for maintaining local farmer and rancher control of the Farm Credit System by becoming a cosponsor of my House Concurrent Resolution 177.

□ 1210

INTRODUCTION OF A BILL COMMEMORATING THE 75TH ANNIVERSARY OF NAVAL AVIATION

(Mr. HUTTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUTTO. Mr. Speaker, I am introducing today a bill which would direct the Postmaster General to issue a commemorative stamp honoring the 75th anniversary of naval aviation. Naval aviation has played a critical role in the history of our Nation. Its contribution to the military might of America has been great, with Navy airmen participating in World Wars I and II, the Korean conflict, and the Vietnam war. In times of peace, the naval aviation program has added considerably to our knowledge of aviation technology and, in recent years, space exploration. Just weeks ago we saw again how crucial these forces are to our country in the Beirut hostage crisis: One of the immediate actions of the United States was to direct the U.S.S. *Nimitz* aircraft carrier toward the troubled area.

The highest standards of conduct and performance have continually been demanded and demonstrated by the officers and enlisted personnel involved in naval aviation. Since the founding of the aviation program by the U.S. Navy in 1911, over 136,000 pilots have completed flight training programs—many of them, I am proud to note, at the Naval Air Station in Pensacola, FL, home of naval aviation. I believe that it is fitting and proper to honor these persons on this significant event, the 75th anniversary of their chosen vocation, a vocation which enriches the defense, technological, and human resources of our country. By issuing a U.S. postage stamp, we can share their achievement with aviation enthusiasts and patriots nationwide.

I am sure that my 54 colleagues in the House and the 20 Members of the Senate who at one time served in the U.S. Navy will join me in attesting to the central role these men play in our Armed Forces. I cannot think of a more deserving tribute for this outstanding program and its skilled and diligent men than the issuance of a stamp proclaiming the excellent and colorful history of naval aviation. I urge you to join me in my efforts to pass this important legislation on the eve of this meaningful occasion.

STATE DEPARTMENT POLICIES OF APPEASEMENT

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, in a recent interview former Deputy Ambassador to the United Nations, the Honorable Charles M. Lichenstein, hit the nail on the head in describing the State Department bureaucracy as the source of "flaccid and ineffectual policies" developed in the face of growing Soviet support of international terrorism.

The Ambassador pointed out how many in the career Foreign Service will compromise and negotiate at every turn simply to reach an agreement regardless of the effect on U.S. interests; that there is no ongoing focus at the State Department to anticipate foreign policy problems and put effective measures in place to head them off before they develop; and that the failure of the Department to take any substantive action in response to incidents like the downing of Korean Air Lines flight 007, the shooting of Maj. Arthur Nicholson, and the TWA hijacking have diminished the effectiveness of the United States in foreign affairs.

We need a major overhaul at the State Department to correct for these flaccid and ineffective policies of appeasement, and put those who would harm Americans and their interests on notice that such deeds will be dealt with swiftly, surely and effectively.

MUSIC IN OUR SCHOOLS MONTH

(Mr. AKAKA asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I would like to call my colleagues attention to a resolution that I hope many of my colleagues will cosponsor, a resolution that will designate March 1986 as "Music in Our Schools Month."

Music is a powerful esthetic force that exalts the human spirit, transforms human experience, and improves the quality of life. It is one of the most glorious manifestations of our cultural heritage that must be transmitted to succeeding generations.

As a former music educator, I have worked with numerous students and have seen firsthand that the study of music directly contributes to the intellectual, emotional, physical and spiritual development of our young people. Music directly affects the innermost feelings and responses of every child and plays an essential role in the education of this Nation's children. It enhances student morale and improves the quality of school environment. I ask my colleagues to join me in observing "Music in Our Schools Month" as

a special opportunity for Americans to learn, appreciate and support the music programs in our Nation's schools.

GREETINGS TO 12TH WORLD FESTIVAL OF YOUTH AND STUDENTS

(Mr. CROCKETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CROCKETT. Mr. Speaker, I rise to invite my colleagues to join me in sending a cable of greetings to the 12th World Festival of Youth and Students, which begins this Friday in Moscow. This festival will highlight the United Nations' designation of 1985 as International Youth Year.

More than 300 U.S. delegates and 150 additional "special participants" from our country will join with their counterparts to meet and exchange ideas in a free and open manner. This event will be a unique opportunity for the young Americans and thousands of others from around the world to meet future leaders, and to establish lines of communication free from the barriers of political and geographical distance.

It is our hope that, through the World Festival of Youth and Students and similar gatherings, delegates will come away with renewed understanding of the world's problems, and a new commitment to peace and justice throughout the world.

I urge my colleagues to join me in sending greetings to the festival.

CONGRATULATIONS CHRISTA McAULIFFE, FIRST TEACHER IN SPACE

(Mr. GREGG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, last Friday, Vice President GEORGE BUSH announced the selection of New Hampshire's Christa McAuliffe as the first teacher in space.

Christa was one of thousands of teachers across the Nation who responded to the President's request for applicants to NASA's Teacher in Space Program.

As the Member who represents Concord, NH, where Christa teaches social studies at Concord High School, I know that both the Granite State, and the Nation as well, stands behind her.

In the coming months, as Christa prepares for the most exciting field trip of all time, she will have our prayers and support for a successful flight.

Having met Christa, I have no doubt that her enthusiasm for learning and her ability to communicate will motivate our Nations youth. She serves as a model for our young by demonstrating once again that in America one's possibilities are only limited by one's imagination.

New Hampshire is proud of you Christa. Just as New Hampshire's Alan Shepherd made history by becoming the first American astronaut, you will make your mark by becoming America's first teacher in space.

LEGISLATION TO OUTLAW EMPLOYMENT-BASED DISCRIMINATION AGAINST PERSONS WITH A CANCER HISTORY

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, a nation is gratified and relieved. Our President is back at work at the White House. He has made a remarkable recovery from his cancer surgery conducted only 11 days ago.

President Reagan has become one of the estimated 800,000 Americans who are diagnosed as having cancer each year. Based on medical prognoses, the President has also joined the estimated 5 million Americans with a cancer history.

Yet, President Reagan has not had to endure a problem which faces an estimated 1 million Americans who are cancer survivors—employment discrimination. The Nation's Chief Executive has been genuinely welcomed back to his job without reservation by his employers—the American people.

Earlier this year, I authored legislation, H.R. 1294, to amend title VII of the Civil Rights Act to outlaw employment-based discrimination against persons with a cancer history. I believe its enactment is warranted and should be considerably aided by President Reagan's success in removing the stigma that is too ofter associated with those who have a cancer history. Those who conquer cancer should not be forced to succumb to the evils of discrimination in the workplace. Join me in making this victory complete for the millions of Americans who have survived cancer by joining as a cosponsor of H.R. 1294.

□ 1220

"COMPARABLE WORTH" LEGISLATION BASED UPON FICTION

(Mr. BLILEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, the House will soon consider one of the greatest misnomers in the history of legislation, the so-called comparable worth bill, H.R. 3008. Its supporters have consistently portrayed this as merely an extension of equal pay for equal work. Nothing could be further from the truth. This legislation is based upon fiction, not fact. It ignores the incredible success of the free enterprise system in setting wages. It stretched the bounds of reason by finding that any differences in pay between jobs held by men and women amount to discrimination. It undermines the values of equal opportunity we all hold so dear. Comparable worth supplants prevailing market forces with bureaucratically determined wage scales.

Supporters of H.R. 3008 tell you that it is only a study, and that appears true. But they do not tell us how many States have already rejected their concept. Nor do they tell us how comparable worth would undermine equal opportunity. Nor do they tell us of the immense economic costs we would all have to bear for their experiment in bureaucratic control of the economy.

Mr. Speaker, this idea is based on the flimsiest of assumptions: That differences in pay scales amount to sexual and racial discrimination. If the House needs more information as to how discredited an idea comparable worth is, we need only look to Arizona, Arkansas, Colorado, Delaware, Illinois, Indiana, New Mexico, North Carolina, North Dakota, South Dakota, and Texas, which have come to this conclusion already. The House has more pressing issues to work on, like reducing the Federal budget deficits which threaten our economy and all our citizens. Let's help our people that way.

"CONSTRUCTIVE ENGAGEMENT"—PLAYING FOOTSY WITH THE MOST EVIL AND DASTARD GOVERNMENT KNOWN TO MANKIND

(Mr. STOKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STOKES. Mr. Speaker, this morning's Washington Post advises us that the reaction of the Reagan administration to the deteriorating situation in South Africa is that it is "very disturbing." We are also told that the administration regards South Africa's system of apartheid as being "repugnant and largely responsible for the current violence." In spite of this, we are told that in its latest admonition to Pretoria that our Government has not chosen to repudiate its policy of "constructive engagement" with the repugnant and reprehensible Government of South Africa.

A State Department spokesman is quoted as saying:

> We are not reviewing the policy and there is no intention of reviewing the policy.

Mr. Speaker, as long as we maintain this policy of "constructive engagement," meaning playing footsy with the most evil and dastard government

known to mankind, we will have no moral force anywhere in the world. We are dealing with a government in South Africa that is totally devoid of any respect for law or human rights. Our policy of "constructive engagement" is not only inconsistent and incongruous with human decency but it also gives a hollow ring to our pious condemnation of the repugnancy of apartheid.

UNFAIR PROCEDURE FOR COMPARABLE WORTH LEGISLATION

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, before the House adjourns for the August recess, we will be asked to vote on legislation that will grant congressional approval of the comparable worth theory without the benefit of changing the existing bill. The comparable worth bill will be brought to the floor under suspension of the rules which allows no opportunity to amend or offer a substitute to this legislation.

I have spoken on the House floor recently about my personal views on this issue, but today I would like to address the procedural problems of bringing this bill to the floor under suspension. It is my understanding that my colleague from Ohio. Congresswoman OAKAR, author of the current bill, has drafted a substitute to H.R. 27, and my Republican colleagues have also drafted an alternative to the comparable worth bill. But no hearings have been held on either of these substitutes and the Post Office and Civil Service Committee plans to mark up H.R. 27 next week. A hearing is scheduled on Ms. OAKAR's substitute the day before the subcommittee and full committee markup the bill. And if H.R. 27 comes to the floor under suspension no one will have the opportunity to change this legislation. This is not how legislation should be pushed through this body.

Once again on this House floor, we are denied the opportunity to an open debate on a very controversial issue. I believe the Members of this House should have the opportunity to fully discuss alternatives to this bill through the hearing process and then bring this bill to the floor under an open rule.

PAY EQUITY: A REALITY, NOT A MYTH

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, my colleagues who have spoken out so passionately against pay equity obviously have not been reading the newspaper lately. There have been numerous accounts of not only State and local successes in implementing pay equity, but also recent action taken at the international level.

I applaud the U.S. delegation to the United Nation's Decade for Women Conference in Nairobi, Kenya, for its support of "equal pay for work of equal value." Representative OLYMPIA SNOWE, my cochair at the Congressional Caucus for Women's Issues, and I have sent a telegram to each of the delegates praising their stand on this issue.

Here in Washington, we must make certain our own Government workers are free from job bias. One way in which to do this is through Representative MARY ROSE OAKAR's legislation to study the Federal wage and classification systems for evidence of sex-based, race, and ethnic discrimination.

As legislators, we have a responsibility to correct discrimination in employment, but we have not carried through. While precious time has been spent on arguing about pay equity myths here in Washington, 45 States have actually implemented some type of pay equity action, through job evaluations, legislation, or collective bargaining. Activity has begun in the private sector, as well, to close the wage gap through pay equity initiatives.

This issue is no longer a theoretical topic of discussion, it is a reality. Look at what has taken place in Colorado Springs, San Jose, Los Angeles, Minnesota, and New York. These cities and States have gone ahead and taken the lead in implementing pay equity policies.

These States and local governments have set the stage for us. It is now Congress' turn to pass legislation that ensures fair employment practices for Federal employees.

THE DEMOCRATIC TEAM IS SO LOUSY—IT IS UNFAIR

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, today, I want to address a major concern that we Republicans have with you Democrats: The unfairness issue. It is unfair that the Republicans—who have an outstanding baseball team—have to play tonight with the lousy Democratic team at Four Mile Run Park in Alexandria.

It is unfair, Mr. Speaker, that Mr. CHAPPELL has to be helped, with a winch, into his crouch behind home plate.

It is unfair, Mr. Speaker, that MARTY RUSSO is playing third base—since he can't throw the ball further than the pitcher, and any play to first base involves more than two players.

It is unfair, Mr. Speaker, that DAVE MCCURDY is in the outfield; my 14-year-old, arthritic dog, PRIMO, can fetch better than Mr. MCCURDY.

It is unfair, Mr. Speaker, that MIKE SNYAR is in center field. When you see MIKE play, you'll know why they're not shouting "Baseball in 1987" out in Oklahoma.

Look at their lineup, Mr. Speaker. WALTER FAUNTROY at first base. While it is true that WALTER is the fastest member of the Democratic team, it is also true that being the fastest runner on that team is a little like being the tallest of the seven dwarfs.

We Republicans want to play ball, Mr. Speaker—not run around with these gaggling goof-offs.

Mr. Speaker, It's unfair.

I hope you will be out there, Mr. Speaker, to throw out the first ball; I have developed a new slingshot you can use.

□ 1230

WILL SILVIO WATCH THE GAME IN SILENCE?

(Mr. CHAPPELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHAPPELL. Mr. Speaker, I rise today to encourage my colleagues, both Republican and Democrat, to join us at Four Mile Park for the 24th annual congressional baseball game played for the benefit of Washington's Children's Hospital.

As the Democratic coach, I encourage all Members to witness this year's game which is the fifth in the most recent best of five series. Glen Brenner, channel 9 TV's sportscaster will be doing the play by play which should prove to be interesting.

On a more serious note, I should mention that the distinguished Republican coach, and I use the term loosely, SILVIO CONTE has made several statements on the House floor about the game. Rather than rebutting his very rebuttable remarks, I would like to dedicate this poem:

We all know our friend from Massachusetts.
He doesn't smoke a cigar he just "chews it."
When it comes to baseball, he's no Weaver.
His organization and strategy remind one of Bitburg and Deaver.
But thats OK, the Republicans need some guidance.
I just wish SILVIO would watch the game in silence.
Or better yet, my wish for the day,
Is that the Republicans will let CONTE play!

DON'T FORGET THE SEVEN AMERICANS STILL HELD HOSTAGE IN LEBANON

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, the seven Americans still held hostage in Lebanon seem to be slipping from public view again.

The U.S. TV networks haven't mentioned the seven Americans for almost a week. The national newspapers have barely mentioned the seven Americans for a week. The Christian Science Monitor has been a notable exception.

With respect to some of the presumed preconditions for the release of the seven Americans, we seem to be making progress. Israel is set to release 100 more of the Shiite prisoners they have been holding. The Syrian-sponsored pacification of West Beirut seems to be lowering the level of violence in the Lebanese capital.

Mr. Speaker, today is the 494th day of captivity in Lebanon for William Buckley of Medford, MA.

Rev. Benjamin Weir has been held hostage for 441 days.

Today is the 196th day of captivity for my personal friend, Father Lawrence Martin Jenco of Joliet, IL.

Today is the 129th day of captivity for Terry Anderson of Batavia, NY.

Today is the 56th day of captivity for David Jacobsen of Huntington Beach, CA.

Today is the 43d day of captivity for Thomas Sutherland.

Today marks the 231st day since the disappearance of Peter Kilburn of San Francisco, CA.

Mr. Speaker, America must not forget its citizens held hostage in Lebanon. The hostage crisis is not over.

COMPARABLE WORTH—THE CLOSER YOU LOOK, THE WORSE IT GETS

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, we may be on the verge of a multibillion-dollar mistake.

Several years ago, the State of Washington sponsored a study of comparable worth. The results were used against them in a $1 billion lawsuit. Now we are on the edge of a similar study. The Federal Government has 30 times as many employees as the State of Washington.

Equal pay for equal work is now the law of the land, and should be.

No one supports equal rights for women more than I do.

This new idea of comparable worth is a misguided attempt to take wage decisions out of the free market. Wages should be set by employers and employees, not judges. The OAKAR comparable worth bill is one more step away from free enterprise.

Let's not go from the fairness of equal pay for equal work, to a standard of equal pay for unequal work. This could radically change our economic system. I ask the Members to look closely at comparable worth. The closer you look—the worse it gets.

END THE CONSTRUCTIVE ENGAGEMENT POLICY NOW

(Mr. LELAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. LELAND. Mr. Speaker, I find it totally unconscionable that while the White House can publicly state that apartheid is repugnant and largely responsible for the violence in South Africa, it refuses to admit that its own policy of constructive engagement is nearly as repugnant. Constructive engagement merely prolongs the system the administration claims to abhor. We have a moral obligation to work toward the dismantling of apartheid and we will never be able to do so under the administration's morally bankrupt policy of constructive engagement.

Our passive policy has proven time and time again to be ineffective in persuading South Africa to end apartheid. The state of emergency imposed this past weekend conclusively demonstrates that the South African Government is simply not interested in recognizing blacks as human beings. According to South African authorities—the press is now censored—at least eight blacks have been killed and 441 activists have been arrested since Sunday's state of emergency. One of those arrested, Molly Blackburn, the leading white antiapartheid activist and member of the Cape Province Council, was arrested 1 hour before she was to meet with former U.S. Cabinet members.

If the South African Government is sincerely interested in ending the violence in South Africa, it can do so with talks and negotiation, not with guns and repression.

We, the United States, cannot morally afford to continue our silent approval of this violent and blatant oppression of a people. We must end constructive engagement now if apartheid if ever to be dismantled.

OPPOSE THE COMPARABLE WORTH STUDY

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, comparable worth legislation proposed by Congresswoman OAKAR, now numbered H.R. 3008, is being billed as only a study to determine discriminatory wagesetting policies. In fact, H.R. 3008 would be much more than that. It would put in place a vehicle for enacting comparable worth doctrines judicially rather than legislatively.

That is where the danger lies. The comparable worth study, whose conclusions would be foregone due to the biased makeup of the board, could set legal precedents for implementing this disastrous system of wagesetting within the Federal Government; and eventually extending this practice to private businesses.

That is exactly what happened in Washington State. U.S. District Judge Jack Tanner ruled that the State of Washington, by commissioning and accepting a study showing that the female-dominated jobs paid less than the male dominated jobs, actually accepted both the concept of comparable worth and the method by which it should be implemented.

That decision forced on the State of Washington by the district judge, in response to their ill-advised willingness to pass legislation that authorized only a study, will cost that State billions of dollars, and threatens to cost them billions more.

We cannot afford to make such an ugly mistake in this House.

□ 1240

TALK TOUGH, AND CARRY A LITTLE TWIG

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, yesterday the White House announced that it will apply the Reagan doctrine of American foreign policy to yet another country; that is, the White House issued a statement carefully denouncing the racial violence of South Africa without criticizing the state of emergency which has been imposed, which suspends basic constitutional rights and permits the arrest of over 200 churchmen and hundreds of other freedom fighters.

The President now, Mr. Speaker, has the opportunity to put action with his words. Both Houses of Congress have passed legislation imposing sanctions against the white minority government in South Africa. This House has appointed conferees. The other body has not. If the President is serious about his actions, about his words, he should call the Members of the other body and ask that conferees be appointed. But, Mr. Speaker, the administration does not take the Reagan doctrine very seriously, for if it does it would put action with its words. And if it does not, it deserves to be described as the "Twiggy doctrine"; that is, talk tough and carry a little twig.

THE FEDERAL DEFICIT

(Mr. PURSELL asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. PURSELL. Mr. Speaker, the people of Michigan's Second District continue to demand that something be done about the Federal deficit.

It's such a high priority for Howard and Phyllis Eddy of Adrian, MI—as it should be for all of us—that they sent me a telegram, in which they say: "Deficit reduction is urgent. Everyone should sacrifice including those of us over 65." John and Virginia Dawson of Adrian write: "Balancing our national budget transcends party lines. It must be balanced if any of us has a future. Please don't play politics. Our time is running out. Balance that budget. As senior citizens, we'll take our share of cuts."

They're willing to do what they have to; it's time that the conferees do the same.

And to the budget conferees: You need sharing of sacrifice and you need real savings. The 92 Group budget proposal gives you both. Take a look at it. Use it as the basis for a budget resolution and real deficit reduction.

PERMISSION TO INSERT LETTERS IN THE RECORD PERTAINING TO COMMITTEE ON SCIENCE AND TECHNOLOGY DURING CONSIDERATION OF H.R. 8, WATER QUALITY RENEWAL ACT OF 1985

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that during consideration of H.R. 8 in the Committee of the Whole House, I be permitted to insert two letters pertaining to the Committee on Science and Technology.

The SPEAKER (Mr. MURTHA). Is there objection to the request of the gentleman from Florida?

There was no objection.

THE LATE J. EDWARD HUTCHINSON

(Mr. SILJANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SILJANDER. Mr. Speaker, all of us in the Michigan delegation and many, many others in Congress stand in deep sorrow at the loss of a good friend and my former Congressman, Ed Hutchinson.

Congressman Hutchinson, who was born October 12, 1914, died last night in Florida. He was 70 years old. He had been living in the Naples, FL, area.

Mr. Hutchinson graduated from Fennville High School in 1932, the University of Michigan in 1936, University of Michigan Law School in 1938. He practiced law in Allegan, MI.

Mr. Hutchinson was elected to the Michigan State House in 1946, the Michigan State Senate in 1951, and he served in the U.S. Congress, from the 88th Congress through most of the 94th Congress.

As the Members might remember, he was the ranking Republican on the Judiciary Committee.

I remember Ed Hutchinson very well because as a young 17- and 18-year-old Republican, I would stand on street corners in Three Rivers, MI, handing leaflets out for Ed Hutchinson during many of his reelection campaigns. He was a very close personal friend of mine and a personal friend of so many thousands and thousands of people all throughout the State of Michigan and, frankly, Mr. Speaker, throughout the country.

It is with deep sense of loss that I make the announcement of the passing of a great, great American, J. Edward Hutchinson, former Congressman of the Fourth District of Michigan.

THE TRAGEDY IN ETHIOPIA

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.

Mr. ROTH. Mr. Speaker, last night, Bill Moyers and ABC brought to the attention of the American people the horrendous logistical problems that are hampering the famine relief effort in Ethiopia. In Ethiopia, Kurt Jansson, the special representative of the United Nations, has ordered the suspension of all food-aid shipments because the Megistu regime has failed to clear the backlog in its three ports.

As this week's "Economist" points out, rotting food is bad enough, but it is only part of a wider failure. Those who give food aid and who organize its distribution are not paying enough attention to how it is being used.

Today, I will be raising my concerns with Bob Geldof, the organizer of the Live Aid Concert, and this afternoon, I am sponsoring a special order on the tragedy in Ethiopia. This is not a tragedy brought on only by natural disaster, but a tragedy born of political failures.

THE ANTI-APARTHEID ACT

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, I rise to express my total disgust of the deplorable situation which exists in South Africa today. The political, social, and economic conditions of black people of South Africa have deteriorated to a point where we must again express our opposition. This situation has become more critical since the Reagan administration has declared and engaged in their policy of "constructive engagement".

The oppression and repression which black people of South Africa are experiencing are repugnant to freedom-loving people of this great Nation of ours.

I urge the President of these United States to call on the other House to assign conferees to the conference and sign the Anti-Apartheid Act. The President must take strong and courageous executive measures to let the South African Government know that Americans are opposed to the emergency actions which are now being imposed in South Africa.

The time has come for justice and freedom to prevail over oppression and the denial of human rights.

SHARON CHRISTA McAULIFFE, THE FIRST TEACHER SELECTED TO GO INTO SPACE

(Mr. SMITH of New Hampshire asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Hampshire. Mr. Speaker, as a Representative from the State of New Hampshire, I would like to take this opportunity to honor our native daughter, Sharon Christa McAuliffe, the first teacher selected to go into space. When I met her last week, her enthusiasm for the teacher in space program convinced me that she would be a great choice.

Christa was chosen from a competitive field of more than 11,000 teachers nationwide. Her experience as a social studies teacher at Concord High School and as the first teacher in space will be instrumental in educating future generations for space activity. In her own words, "that's what this program is all about. We're going to have some really excited kids this fall." Christa begins 4 months of training in September for her mission.

This week, Congressman GREGG and I intend to introduce a resolution honoring and commending Christa McAuliffe. I welcome my colleagues' cosponsorship of this resolution.

NASA and America, you have made a great choice in Christa McAuliffe. What an outstanding ambassador for the space program. Congratulations and good luck, Christa.

□ 1250

DONALD REGAN SUFFERING FROM TIME WARP

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, in yesterday's paper there is an article that says that Mr. Donald Regan visited with some Members from the other body, and here is what he said:

The farmers' problems stem from Jimmy Carter's 1979 Soviet grain embargo and other farm programs fashioned by the Democrats. We are trying to rescue them from it.

This fellow must be suffering from time warp. This is not the first time, of course, those of us from rural America have been given advice from eastern financiers with silk suits telling us what is wrong with farmers. But the fact is, the commodity prices in this country have fallen a whole lot since this administration took office. Carter's grain embargo was wrong; no question about that. But there is a lot that has been happening around here in the last 4 years that have been wrong for farmers as well.

Deficits proposed by this Treasury Secretary and the administration have overpriced the dollar and dried up exports. The Secretary of Agriculture came to the House Agriculture Committee in 1981, sat 10 feet from me, and said, "I will tell you what we ought to do. Here is my program. You farmers raise all you want and we will sell it across the world."

So farmers raised as much as they could and, of course, we had a tremendous surplus. The fact is, this administration is in large part to blame for the current farm problems. So are the Democrats. I understand that. But those auction sale notices on the cafes in small towns across this country that describe the loss of a family farm by a young man and woman who have been trying to make a go of it and have failed, they are not marked "Democrat" or "Republican"; it is marked "Failure." Donald Regan does no service to suggest that the problems in agriculture today ought to be laid at the doorstep of the Democratic Party. That is absolute nonsense. In agriculture they would say, "This fellow does not plow a straight furrow." Let me be a little more polite and simply say that he would be better off, for this country and on behalf of family farmers, if he would seriously work with us to craft a good farm program for family farmers in this country who need it.

WE WILL NEVER FORGET OUR SEVEN AMERICAN HOSTAGES IN LEBANON

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I honor one of our colleagues, the gentleman from Illinois [Mr. O'BRIEN] for remembering again and again in this Chamber our seven hostages in Lebanon. I would hope that each day from this day forward one of us, hopefully from both sides of the aisle, will rise at the beginning of the day to remind all Americans and the world that we are never going to forget these seven suffering fellow Americans or their loved ones.

Please also reflect that overall there are 14 hostages now held, 7 Americans, 1 from Saudi Arabia, 1 from Kuwait, 1 from England, and 4 hostages from France. The longest held of our seven was taken in March of last year. That means that for 1 year and 4 months Mr. William Buckley, a political officer assigned to our Beirut Embassy, has been locked up like an animal in a state of constant fear for his life, not knowing if he is ever going to see his loved ones again or how they are holding up under their psychological torture.

If we compare Mr. Buckley's hostage status to the taking of 52 U.S. Embassy personnel in Teheran as far as time held is concerned, then we must all recognize that President Reagan has on his watch a hostage crisis equal to the nightmare in Iran that destroyed Jimmy Carter's Presidency. If each single American life is as valuable as any other's life and 1 life is as valuable as 52, and we've been taught all our lives that's the way our country operates, then this hostage crisis is every bit as serious as the crisis that so severely hurt President Carter. Our priest Father Jenco, our minister Reverend Wier, the three who worked so hard at American University, and Terry Anderson, the AP journalist are all held prisoner in the name of Allah? What a blasphemy. I still don't comprehend why Tom Brokaw and the other members of American media, did not take a powerful stand and bring to a boiling point while in Syria July 1 and 2 the Terry Anderson kidnaping. Why didn't they cry out for their fellow journalist when they were in that ballroom at the Sheraton Hotel in Damascus interviewing the about-to-be-released 39 final hostages from TWA flight 847. Mr. Assad, the head of state in Syria, knows where those seven American kidnap victims are held, and where the other seven hostages are. Turn up the heat on him, world free press. It is about time we recognize that this is a top priority crisis for the United States and truly for the whole free world. Free Terry Anderson, Mr. Assad, or get burned.

POPULATION CONCERNS SHOULD BE RAISED BY PRESIDENT WITH VISITING CHINESE PRESIDENT

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, this week this country is privileged to receive an important visitor, the President of the People's Republic of China.

Two weeks ago, during our consideration of the foreign aid bill, the House expressed its deep concern over elements of coercion in the Chinese population program. There are differences of opinion in the House over the degree to which the United States should provide population assistance, and whether debates over domestic abortion policies should prevent U.S. assistance to groups who do not provide abortion-related services themselves but may have relationships with organizations whose own revenues support abortion-related activities.

We voted to ask the President to raise critical human rights issues with representatives of the Chinese Government and to provide him discretion to withhold funds contingent upon a resolution of these questions. We took these measures because of our concern for human rights. Those of us in the House deeply concerned about the impact of population growth rates in developing countries also did so because unless human rights issues are resolved, critical population funds for developing countries will be terminated.

Hopefully, Mr. Speaker, when Mr. Li meets today with the Secretary of State and with the President, the President and the Secretary will raise with Mr. Li our concerns.

WATER QUALITY RENEWAL ACT OF 1985

The SPEAKER pro tempore (Mr. MURTHA). Pursuant to House Resolution 222 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8.

□ 1255

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 8) to amend the Federal Water Pollution Control Act to provide for the renewal of the quality of the Nation's waters, and for other purposes, with Mr. REID in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Monday, July 22, 1985, all time for general debate had expired.

Pursuant to the rule, the substitute committee amendment recommended by the Committee on Public Works and Transportation now printed in the reported bill shall be considered as an original bill for the purpose of amendment under the 5-minute rule.

Pursuant to House Resolution 222 and the order of the House of July 22, 1985, immediately after the enacting clause is read, it shall be in order to consider the amendments to the committee substitute printed in the CON-

GRESSIONAL RECORD of July 16, 1985, and additional amendments by, and if offered by, Representative HOWARD which shall be considered en bloc and shall be in order although amending portions of the substitute not yet read for amendment.

The Clerk will read the enacting clause.

The Clerk read as follows: *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

AMENDMENTS OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Chairman, I offer a series of amendments en bloc in accordance with the unanimous-consent request granted yesterday.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: Page 35, after line 4, insert the following:

(e) AVAILABILITY OF CERTAIN FUNDS FOR NON-FEDERAL SHARE.—Notwithstanding any other provision of law, Federal assistance made available by the Farmers Home Administration to any political subdivision of a State may be used to provide the non-federal share of the cost of any construction project carried out under section 201 of the Federal Water Pollution Control Act.

Page 44, strike out lines 6 through 17 and insert in lieu thereof the following:

"(3) On October 1 of each fiscal year beginning after September 30, 1985, the States of New York, New Jersey, and Connecticut shall pay to the Interstate Sanitation Commission established by such States by interstate compact, or shall enter into a legally binding agreement with such Commission to pay to such Commission, $900,000 (in the case of New York and New Jersey) and $200,000 (in the case of Connecticut) to carry out the functions of such Commission under this Act. If any such State does not make a payment, or enter into a legally binding agreement with respect to a payment, in the amount required under the preceding sentence for a fiscal year, the Administrator shall reserve, from the sums available to such State under this subsection for such fiscal year, an amount equal to the difference between the amount required to be paid or committed by such sentence for such fiscal year and the amount paid or committed by such State for such fiscal year. Sums so reserved shall be used by the Administrator to make a grant for such fiscal year to such Commission to carry out such functions.

Page 45, line 21, strike out "substantially" and insert in lieu thereof the following: "Significantly assist in encouraging participation by such organizations in the development of wastewater treatment programs and significantly".

Page 51, after line 13, insert the following:

"(8) CONSISTENCY WITH PLANNING REQUIREMENTS.—The State may provide financial assistance from such revolving fund only with respect to a project which is consistent with plans, if any, developed under sections 205(j), 208, and 303(e) of this Act.

Page 53, after line 11, insert the following:

"(3) RESERVATION OF FUNDS FOR PLANNING.—Each State shall reserve each fiscal year one percent of the sums allotted to such State under this section for such fiscal year, or $100,000, whichever amount is greater, to carry out planning under sections 205(j), 208, and 303(e) of this Act.

Page 53, line 12, strike out "(3)" and insert in lieu thereof "(4)".

Page 54, after line 7, insert the following new section:

SEC. 17. MODIFICATION FOR NONCONVENTIONAL POLLUTANTS.

(a) IN GENERAL.—Section 301(g) is amended by redesignating paragraph (2) (and any references thereto) as paragraph (3) and by striking out all that precedes subparagraph (A) of paragraph (1) and inserting in lieu thereof the following:

"(g)(1) The Administrator, with the concurrence of the State, may modify the requirements of subsection (b)(2)(A) of this section with respect to the discharge from any point source of ammonia, chlorine, color, iron, and total phenols (4AAP) (when determined by the Administrator to be a pollutant covered by subsection (b)(2)(F)). The Administrator may—

"(A) add any pollutant to the list of pollutants for which modification under this section is authorized (except for pollutants identified pursuant to section 304(a)(4) of this Act, toxic pollutants subject to section 307(a) of this Act, and the thermal component of discharges), if the Administrator determines that there are; or

"(B) remove any pollutant from such list if the Administrator determines that there are no longer;

satisfactory test methods and data available to make the determination required by paragraph (2).

"(2) A modification under this subsection shall be granted only upon a showing by the owner or operator of such point source satisfactory to the Administrator that—".

(b) APPLICATION; LIMITATION ON EFFECT.—The amendment made by subsection (a) shall apply to all requests for modifications under section 301(g) of the Federal Water Pollution Control Act pending on the date of the enactment of the Water Quality Renewal Act of 1985, and shall not have the effect of extending the deadline established in section 301(j)(1)(B) of such Act.

Page 54, after line 7, insert the following:

SEC. 18. DISCHARGES INTO MARINE WATERS.

(a) CONSIDERATION OF OTHER SOURCES OF POLLUTANTS.—Section 301(h)(2) is amended by striking out "such modified requirements will not interfere" and inserting in lieu thereof the following: "the discharge of pollutants in accordance with such modified requirements will not interfere, alone or in combination with pollutants from other sources,".

(b) LIMITATION ON SCOPE OF MONITORING.—Section 301(h)(3) is amended by inserting before the semicolon at the end thereof the following: "and the scope of such monitoring is limited to include ony those scientific investigations which are necessary to study the effects of the proposed discharge".

(c) URBAN AREA PRETREATMENT PROGRAM.—Section 301(h) is amended by redesignating paragraphs (6) and (7), and any references thereto, as paragraphs (7) and (8), respectively, and by inserting after paragraph (5) the following new paragraph:

"(6) in the case of any treatment works serving a population of 50,000 or more, with respect to any toxic pollutant introduced into such works by an industrial discharger for which pollutant there is not applicable pretreatment requirement in effect, the applicant has in effect a pretreatment program which, in combination with the treatment of discharges from such works, removes the same amount of such pollutant as would be removed if such works were to apply secondary treatment to discharges and if such works had no pretreatment program with respect to such pollutant;".

(d) PRIMARY TREATMENT FOR EFFLUENT.—Section 301(h) is amended by striking out the period at the end of paragraph (8) (as redesignated by subsection (c) of this section) and inserting in lieu thereof a semicolon and by inserting after such paragraph (8) the following new paragraph:

"(9) no effluent will be discharged from such works which does not receive primary treatment by screening, sedimentation, and skimming, and treatment for disinfection where necessary, and which does not meet the criteria established under section 304(a)(1) after initial mixing in the waters surrounding or adjacent to the point at which such effluent is discharged; and".

(e) URBAN AREA REMOVAL CREDITS.—Section 307(b)(1) is amended by adding at the end thereof the following: "In any case described in the preceding sentence in which the treatment works serves a population of 50,000 or more, such pretreatment standards shall be revised as provided in the preceding sentence if—

"(i) there exists an effluent limitation on such treatment works for the pollutant and the revised requirement will not result in the effluent violating such effluent limitations;

"(ii) the revised requirement will not result in interference with the method of disposal or reuse of sludge from the treatment works; and

"(iii) the revised requirement will not result in a pollutant interfering with the operation of such treatment works.".

(f) DISCHARGE OF POLLUTANT INTO MARINE WATERS DEFINED.—Section 301(h) is amended by striking out the second sentence and inserting in lieu thereof the following: "For the purposes of this subsection, the phrase 'the discharge of any pollutant into marine waters' refers to a discharge into deep waters of the territorial sea or the waters of the contiguous zone.".

(g) GRANDFATHER OF CERTAIN APPLICANTS.—The amendments made by subsections (a), (c), (d), and (f) of this section shall not apply to any person whose application for a permit under section 301(h) of the Federal Water Pollution Control Act has been tentatively or finally approved by the Administrator on or before the date of the enactment of this Act.

Page 54, after line 7, insert the following:

SEC. 19. FILING DEADLINE FOR TREATMENT WORKS MODIFICATION.

(a) ELIMINATION.—Section 301(i)(1) is amended by striking out the second sentence.

(b) APPLICABILITY.—The amendment made by subsection (a) shall not apply to those treatment works which are subject to a compliance schedule established before the date of the enactment of this Act by a court order or a final agency order.

Page 54, after line 7, insert the following:

SEC. 20. APPLICATION FOR OCEAN DISCHARGE MODIFICATIONS.

Section 301(j)(1)(A) is amended by inserting before the semicolon at the end thereof the following: ", except that a publicly owned treatment works which before December 31, 1982, had a contractual arrangement to use a portion of the capacity of an ocean outfall operated by another publicly owned treatment works which has applied for or received a modification under subsection (h) of this section, may apply for a modification of subsection (h) in its own right not later than 30 days after the date of the enactment of the Water Quality Renewal Act of 1985".

Page 54, line 10, insert "(a) EXTENSION OF DEADLINE.—" before "Section".

Page 54, after line 13, insert the following:

(b) EXTENSION TO CONVENTIONAL POLLUTANTS.—Section 301(k) is amended by inserting "or (b)(2)(E)" after "9b)(2)(A)" each place it appears.

Page 54, line 15, before the period insert "AND PRETREATMENT STANDARDS".

Page 54, line 24, before the comma insert the following: "or any national categorical pretreatment standard under section 307(b)".

Page 55, line 2, before "if" insert the following: "or such standard with respect to the introduction of any pollutant by such person".

Page 55, line 3, after "person" insert the following: "or, in the case of such standard, factors relating to the facilities, equipment, and processes of the treatment works".

Page 55, line 5, after the period insert the following: "An effluent limitation or pretreatment standard established under such variance may not be less stringent than is justified by the factors that are fundamentally different. A variance may not be granted under this subsection if it would produce a significantly adverse effect on the environment (other than on water quality).".

Page 55, line 8, after "limitation" insert "or pretreatment standard".

Page 55, line 10, after "limitation" insert "or standard".

Page 55, line 13, strike out ", to the maximum extent practicable,".

Page 55, lines 18 and 19, after "limitations" insert "and pretreatment standards".

Page 55, line 23, after "limitation" insert "or pretreatment standard".

Page 56, line 1, before "as established" insert "or standard".

Page 56, strike out line 3 and insert in lieu thereof the following:

(b) SAVINGS CLAUSE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by sub-

Page 56, line 2, strike out the quotation marks and the final period.

Page 56, after line 2, insert the following:

"(6) APPLICATION FEE.—The Administrator shall establish and collect a fee from each applicant for a variance under this subsection. Such fee shall be in an amount not more than an amount that reflects the reasonable administrative costs directly incurred in reviewing and processing applications for such variance. All amounts collected by the Administrator under this paragraph shall be deposited in the general fund of the Treasury.

"(7) REPORTS.—Every six months after the date of the enactment of this subsection, the Administrator shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives a report on the status of applications for variances from effluent limitations under section 301 or 304 of this Act or any national categorical pretreatment standard under section 307(b) of this Act filed before, on, or after such date of enactment.".

Page 56, line 7, before "established" insert "and pretreatment standards".

Page 56, after line 8, insert the following:

(2) EXCEPTIONS.—

(A) FACTOR TO BE CONSIDERED.—In deciding whether to deny or approve an application filed before the date of the enactment of this Act for a variance from an effluent limitation under section 301 or 304 of the Federal Water Pollution Control Act or any national categorical pretreatment standard under section 307(b) of such Act which has not been denied or approved on or before such date of enactment, the Administrator shall consider any requirements contained in effluent guidelines issued after the date of such filing.

(B) TIME LIMIT FOR DECISION.—The Administrator shall approve or deny any application referred to in subparagraph (A) within 180 days after such date of enactment; except that if the applicant amends such application to take into account any new effluent guidelines issued after the date of filing of such application, the Administrator shall deny or approve such amended application within 180 days after the date of such amendment.

Page 56, after line 8, insert the following:

SEC. 19. COAL REMINING OPERATIONS.

Section 301 is amended by adding at the end thereof the following:

"(n) "(o) MODIFIED PERMIT FOR COAL REMINING OPERATIONS.—

"(1) IN GENERAL.—Subject to paragraphs (2) through (4) of this subsection, the Administrator, or the State in any case which the State has an approved permit program under section 402(b), may issue a permit under section 402 which modifies the requirements of subsection (b)(2)(A) of this section with respect to the pH level of any pre-existing discharge, and with respect to pre-existing discharges of iron and manganese from the remined area of any coal remining operation or with respect to the pH level or level of iron or manganese in any pre-existing discharge affected by the remining operation. Such modified requirements shall apply the best available technology economically achieveable on a case-by-case basis, using best professional judgment, to set specific numerical effluent limitations in each permit.

"(2) LIMITATIONS.—The Administrator or the State may only issue a permit pursuant to paragraph (1) if the applicant demonstrates to the satisfaction of the Administrator or the State, as the case may be, that the coal remining operation will result in the potential for improved water quality from the remining operation but in no event shall such a permit allow the pH level of any discharge, and in no event shall such a permit allow the discharges of iron and manganese, to exceed the levels being discharged from the remined area before the coal remining operation begins. No discharge from, or affected by the remining operation shall exceed state water quality standards established under section 303 of this Act.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) the term 'coal remining operation' means a coal mining operation which begins after the date of enactment of this subsection at a site on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977;

"(B) the term 'remined area' means only that area of any coal remining operation on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977; and

"(C) the term 'pre-existing discharge' means any discharge at the time of permit application under this subsection.

"(4) APPLICABILITY OF STRIP MINING LAWS.—Nothing in this subsection shall affect the application of the Surface Mining Control and Reclamation Act of 1977 to any coal remining operation, including the application of such Act to suspended solids.".

Page 58, after line 17, insert the following:

SEC. 22. INSPECTION AND ENTRY.

(a) IN GENERAL.—Section 308(b) is amended by striking out all that follows "Code" and inserting in lieu thereof a period and the following: "Any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) who knowingly or willfully publishes, divulges, discloses, or makes known in any manner or to any extent not authorized by law any information which is required to be considered confidential under this subsection shall be fined not more than $1,000 or imprisoned not more than one year, or both. Nothing in this subsection shall prohibit the Administrator or an authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports, or information to other officers, employees, or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.".

(b) CONFORMING AMENDMENT.—Section 308(a)(B) is amended by inserting "(including an authorized contractor acting as a representative of the Administrator)" after "or his authorized representative".

Page 58, line 19, insert "(a) IN GENERAL.—" before "Section".

Page 62, after line 24, insert the following:

(b) CONFORMING AMENDMENT.—Section 404(s)(4) is repealed. Paragraph (5) of section 404(s) (and any references thereto) is redesignated as paragraph (4).

Page 61, after line 2, insert the following:

"(3) KNOWING ENDANGERMENT.—(A) Any person who knowingly violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, and who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment of not more than fifteen years, or both. A defendant that is an organization shall, upon conviction of violating this subparagraph, be subject to a fine of not more than $1,000,000.

"(B) For the purpose of subparagraph (A) of this paragraph—

"(i) in determining whether a defendant who is an individual knew that his conduct placed another person in imminent danger of death or serious bodily injury—

"(I) the person is responsible only for actual awareness or actual belief that he possessed; and

"(II) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant;

except that in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information;

"(ii) it is an affirmative defense to prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—

"(I) an occupation, a business, or a profession; or

"(II) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent;

and such defense must be established by a preponderance of the evidence;

"(iii) the term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons; and

"(iv) the term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss of impairment of the function of a bodily member, organ, or mental faculty.

Redesignate succeeding paragraphs on pages 61 and 62 accordingly.

Page 64, line 2, after "violation" insert the following: "of section 301 of this Act (as it relates to section 404 of this Act) or is in violation".

Page 64, line 10, insert after the period the following: "The Administrator or the Secretary may not assess a civil penalty under this subsection against any person with respect to a violation if the Administrator or Secretary, as the case may be, has assessed a civil penalty under this subsection against such person with respect to the same violation or a violation having substantially the same cause or arising out of substantially the same conditions."

Page 66, strike out line 19 and all that follows through line 2 on page 67.

Page 67, line 3, strike out "(F)" and insert in lieu thereof "(E)".

On page 68, line 14, after the period insert the following: Any person who fails to pay on a timely basis the amount of an assessment of a civil penalty as described in the first sentence of this paragraph shall be required to pay, in addition to such amount and interest, attorneys fees and costs for collection proceedings and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 percent of the aggregate amount of such person's penalties and nonpayment penalties which are unpaid as of the beginning of such quarter".

Page 69, line 4, strike out "is imposed"and insert in lieu thereof "has been paid".

Page 70, line 3, after "penalty" insert "for the alleged violation".

Page 70, line 4, after "Act" insert the following: "or under a comparable State law, as the case may be".

Page 70, after line 4, insert the following:

SEC. 25. RELATIONSHIP TO OTHER LAWS.

Section 311(r) is amended by adding at the end thereof the following: "Discharges from a deepwater port or from a vessel within a deepwater port safety zone which are subject to section 18 of the Deepwater Port Act of 1974 (33 U.S.C. 1517) shall not be subject to the liability and penalty provisions of this section.".

Page 70, after line 4, insert the following:

SEC. 25. MARINE SANITATION DEVICES.

Section 312(f)(1) of the Federal Water Pollution Control Act is amended by striking out "After" and inserting in lieu thereof "(A) Except as provided in subparagraph (B), after" and by adding at the end thereof the following:

"(B) A State may adopt or enforce a statute or regulation with respect to the design, manufacture, or installation or use of any marine sanitation device on a houseboat, if such statute or regulation is more stringent than the standards and regulations promulgated under this section. For purposes of this paragraph, the term 'houseboat' means a vessel which, for a period of time determined by the State in which the vessel is located, is used primarily as a residence and is not used primarily as a means of transportation.".

Page 78, line 19, strike out "guidelines" and insert in lieu thereof "regulations".

Page 78, line 23, after "(F)" insert the following: "(except for any pollutant for which a modification is authorized under section 301(g) of this Act)".

Page 79, line 9, strike out "(E)" and insert in lieu thereof "(F)".

Page 79, line 19, strike out all that follows the semicolon.

Page 79, after line 19, insert the following:

"(E) in the case of any permit issued for a fixed term exceeding 5 years, can be modified to ensure compliance with—

"(i) any new or revised effluent limitation under section 301, 302, or 304 of this Act,

"(ii) any new or revised pretreatment standard under section 307(b) of this Act,

"(iii) any new or revised guideline under section 403 of this Act, or

"(iv) any new or revised regulation governing the disposal of sewage sludge under section 405 of this Act,

which limitation, standard, guideline, or regulation is more stringent than the existing effluent limitation, pretreatment standard, guideline, or regulation in the permit or which controls a pollutant not controlled in the permit; and".

Page 79, strike out lines 20 through 23 and insert in lieu thereof the following:

(b) EXEMPTION FROM PERMIT OF CERTAIN STORMWATER RUNOFF.—

(1) IN GENERAL.—Section 402(l) is amended by inserting "(1)" after "(l)" and by adding at the end thereof the following:

Page 80, line 14, strike out the quotation marks and the final period.

Page 80, after line 14, insert the following:

"(3)(A) The Administrator shall not require a permit under this section, nor shall the Administrator directly or indirectly require any State to require such a permit, for discharges composed entirely of stormwater runoff unless the Administrator determines, in the case of a class or category of such discharges, that such class or category may be a significant contributor of pollutants to the navigable waters or, in the case of a particular discharge, that such discharge violates a water quality standard or is a significant contributor of pollutants to the navigable waters.

"(B) This paragraph shall not apply to discharges referred to in paragraph (2) of this subsection, agricultural stormwater discharges, or to discharges from municipal separate storm sewers.

"(C) Not later than one year after the date of the enactment of this paragraph, the Administrator shall promulgate interim final regulations identifying the classes and categories of industrial discharges for which permits are required in accordance with subparagraph (A). As soon as possible, but not later than six months, after completion of the study required by section 26(b)(2) of the Water Quality Renewal Act of 1985 (relating to NPDES permits), the Administrator shall issue such final regulations as necessary to take into account the results of such study.

"(D) Nothing is this paragraph shall affect any permit for a stormwater discharge in effect on the date of the enactment of this paragraph.

"(E) This paragraph shall apply during the period beginning on the date of the enactment of this paragraph and ending on December 31, 1989.".

(2) STUDY.—The Administrator shall study methods of regulating stormwater discharges. Such study shall include, but need not be limited to—

(A) an identification of the classes and categories of dischargers which have not been required to obtain permits under section 402(l)(3) of the Federal Water Pollution Control Act;

(B) a determination of the nature and extent of pollutants in the discharge of such dischargers; and

(C) a determination of procedures and methods to control such pollutants.

Not later than December 31, 1987, the Administrator shall submit to Congress a report on the results of such study along with recommendations on the most effective methods of regulating stormwater discharges.

Page 80, line 3, after "operations" insert the following: or transmission facilities.

Page 83, after line 25, insert the following:

(f) LOG TRANSFER FACILITIES.—Section 402 is amended by adding at the end thereof the following new subsection:

"(o) LOG TRANSFER FACILITIES.—

"(1) GENERAL RULE.—A log transfer facility which is required (but for this subsection) to have a permit under both this section and section 404 and with respect to which a permit under section 404 has been issued shall not be required to submit a new application for a permit under section 402.

"(2) DETERMINATION OF COMPLIANCE WITH 402 REQUIREMENTS.—The Administrator shall determine, after notice and an opportunity for a public hearing, whether a permit under section 404 with respect to a log transfer facility satisfies the applicable requirements of sections 301, 302, 306, 307, 308, and 403 of this Act. If the Administrator determines that the terms of such permit satisfy such requirements, a separate application for a permit under this section shall not be required. If the Administrator determines that such terms fail to satisfy such requirements, the Administrator may propose to the Secretary of the Army modifications to such permit to incorporate such requirements. If such permit is not modified or issued to incorporate such requirements, the Administrator shall require issuance of a permit under this section for such facility.

"(3) DEFINITION.—For purposes of this subsection, the term 'log transfer facility' means a facility which is constructed, in whole or part, in waters of the United States and which is utilized for the purpose of transferring commercially harvested logs to or from a vessel or log raft.".

Page 83, after line 25, insert the following:

(f) ANTI-BACKSLIDING.—

(1) IN GENERAL.—Section 402 is amended by adding at the end thereof the following new subsection:

"(p) ANTI-BACKSLIDING.—

"(1) GENERAL PROHIBITION FOR BPJ AND WATER QUALITY BASED PERMITS.—Except as provided in paragraph (2)—

"(A) a permit issued under subsection (a)(1)(B) of this section which contains an effluent limitation applicable to a pollutant, and

"(B) a permit issued under this section which contains an effluent limitation appli-

cable to a pollutant and established on the basis of section 301(b)(1)(C) or 303(d).

may not be renewed, reissued, or modified to contain a less stringent effluent limitation applicable to such pollutant.

"(2) EXCEPTION.—A permit described in paragraph (1) may be renewed, reissued, or modified to contain a less stringent effluent limitation applicable to a pollutant if—

"(A) material and substantial alterations or additions to the permitted facility or activity occurred after permit issuance which justify the application of a less stringent effluent limitation;

"(B) information is available which was not available at the time of permit issuance (other than revised regulations, guidance, or test methods) and which would have justified the application of a less stringent effluent application at the time of permit issuance;

"(C) good cause exists for a less stringent effluent limitation, such as an act of God, strike, flood, or materials shortage or other events over which the permittee has little or no control and for which there is no reasonably available remedy;

"(D) the permittee has filed a request for a variance under section 301(c), 301(g), 301(h), 301(i), 301(k), 301(n), or 316(a);

"(E) the permittee demonstrates that operation and maintenance costs of the permitted facility are totally disproportionate to the operation and maintenance costs considered in the development of effluent limitations promulgated after the issuance of the permit;

"(F) the Administrator determines that technical mistakes or mistaken interpretations of law were made in issuing the permit under subsection (a)(1)(B); or

"(G) the permittee has installed the equipment and facilities required to meet such effluent limitation and has properly operated and maintained such equipment and facilities and has not been able to achieve the effluent limitation.

"(3) LIMITATIONS.—In no event may a permit described in paragraph (1) be renewed, reissued, or modified to contain an effluent limitation which is less stringent than required by effluent guidelines in effect at the time the permit is renewed, reissued, or modified. In no event may a permit described in paragraph (1)(B) to discharge into waters be renewed, reissued, or modified to contain a less stringent effluent limitation if the implementation of such limitation would result in a violation of a water quality standard under section 303 applicable to such waters.

"(4) EFFECTIVE PERIOD.—This subsection shall be in effect during the period of two years and six months beginning on the date of the enactment of this subsection.".

(2) REPORT.—The Administrator shall study the extent to which States have reviewed, revised, and adopted water quality standards in accordance with section 24 of the Municipal Wastewater Treatment Construction Grant Amendments of 1981 and the extent to which modifications of permits issued under section 402(a)(1)(B) of the Federal Water Pollution Control Act to permit less stringent effluent limitations should be allowed. The Administrator shall submit a report of such study, together with recommendations to Congress not later than two years after the date of the enactment of this Act.

(3) CONFORMING AMENDMENT.—Section 402(a)(1) is amended by inserting "(A)" after "either" and by inserting "(B)" after "this Act, or".

Page 84, after line 22, insert the following:

SEC. 30. CITIZEN SUITS.

Section 505(c) is amended by adding at the end thereof the following new paragraph:

"(3) Whenever any action is brought under this section in a court of the United States, the plaintiff shall serve a copy of the complaint on the Attorney General and the Administrator. No consent judgment shall be entered in an action in which the United States is not a party prior to forty-five days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator. No judgment in any action to which the United States is not a party shall have any binding effect upon the United States.".

Page 86, after line 25, insert the following:

SEC. 31. INDIAN TRIBES.

Title V is amended by redesignating section 518, and any references thereto, as section 519 and by inserting after section 517 the following:

"SEC. 518. INDIAN TRIBES.

"(a) ASSESSMENT OF SEWAGE TREATMENT NEEDS; REPORT.—The Administrator, in cooperation with the Director of the Indian Health Service, shall assess the need for sewage treatment works to serve Indian tribes, the degree to which such needs will be met through funds allotted to States under section 205 of this Act and priority lists under section 216 of this Act, and any obstacles which prevent such needs from being met. Not later than one year after the date of the enactment of this section, the Administrator shall submit a report to Congress on the assessment under this subsection, along with recommendations specifying (1) how the Administrator intends to provide assistance to Indian tribes to develop waste treatment management plans and to construct treatment works under this Act, and (2) methods by which the participation in and administration of programs under this Act by Indian tribes can be maximized.

"(b) RESERVATION OF FUNDS.—The Administrator shall reserve each fiscal year beginning after September 30, 1986, before allotments to the States under section 205(e), such amount as the Administrator determines appropriate based on the determination of unmet needs reported under subsection (a), but not less than one-half of one percent of the sums appropriated under section 207. Sums reserved under this subsection shall be available only for grants for the development of waste treatment management plans and for the construction of sewage treatment works to serve Indian tribes.

"(c) COOPERATIVE AGREEMENTS.—In order to ensure the consistent implementation of the requirements of this Act, an Indian Tribe and the State or States in which the lands of such tribe are located may enter into a cooperative agreement, subject to the review and approval of the Administrator, to jointly plan and administer the requirements of this Act.

"(d) TREATMENT AS STATE.—The Administrator is authorized to treat an Indian tribe as a State for purposes of title II and sections 104, 106, 303, 305, 308, 309, 314, 319, 402, and 404 of this Act to the degree necessary to carry out the objectives of this section, but only if—

"(1) the Indian tribe has a governing body carrying out substantial governmental duties and powers;

"(2) the functions to be exercised by the Indian tribe pertain to the management and protection of water resources which are held by an Indian tribe, held by the United States in trust for Indians, held by a member of an Indian tribe if such property interest is subject to a trust restriction on alienation, or otherwise within the borders of an Indian reservation; and

"(3) the Indian tribe is reasonably expected to be capable, in the Administrator's judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this Act and of all applicable regulations.

Such treatment as a State may include the direct provision of funds reserved under subsection (b) to the governing bodies of Indian tribes, and the determination of priorities by Indian tribes, where not determined by the Administrator in cooperation with the Director of the Indian Health Service. The Administrator, in cooperation with the Director of the Indian Health Service, is authorized to make grants under title II of this Act in an amount not to exceed 100 percent of the cost of a project. Not later than 18 months after the date of the enactment of this section, the Administrator shall, in consultation with Indian tribes, promulgate final regulations which specify how Indian tribes shall be treated as States for purposes of this Act.

The Administrator shall, in promulgating such regulations, provide a mechanism for the resolution of any unreasonable consequences that may arise as a result of differing water quality standards that may be set by States and Indian Tribes (located on common bodies of water). Such mechanism should provide for the avoidance of such unreasonable consequences in a manner consistent with the objective of the Act.

"(e) GRANTS FOR NONPOINT SOURCE PROGRAMS.—The Administrator shall make grants to an Indian tribe under section 319 of this Act as though such tribe were a State. Not more than one-third of one percent of the amount appropriated for any fiscal year under section 319 may be used to make grants under this subsection. In addition to the requirements of section 319, an Indian tribe shall be required to meet the requirements of paragraphs (1), (2), and (3) of subsection (d) of this section in order to receive such a grant.

"(f) DEFINITIONS.—For purposes of this section, the term—

"(1) 'Federal Indian reservation' means all land within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation; and

"(2) 'Indian tribe' means any Indian tribe, band, group, or community recognized by the Secretary of the Interior and exercising governmental authority over a Federal Indian reservation.".

Page 86, after line 25, insert the following:

SEC. 32. DEFINITION OF POINT SOURCE.

For purposes of the Federal Water Pollution Control Act, the term "point source" includes a leachate collection system, other than a leachate collection system used for agricultural purposes.

Page 86 after line 25, insert the following:

SEC. 33. CHESAPEAKE AND NARRAGANSETT BAYS.

(a) CHESAPEAKE BAY PROGRAM.—

(1) OFFICE.—The Administrator shall continue the Chesapeake Bay program and shall establish and maintain in the Environmental Protection Agency an office, divi-

sion, or branch of Chesapeake Bay Programs to—

(A) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the Chesapeake Bay (hereinafter in this subsection referred to as the "Bay");

(B) coordinate Federal and State efforts to improve the water quality of the Bay;

(C) determine the impact of sediment deposition in the Bay and identify the sources, rates, routes, and distribution patterns of such sediment deposition; and

(D) determine the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings of nutrients, chlorine, acid precipitation, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals, and with special attention given to the impact of such changes on striped bass.

(2) INTERSTATE DEVELOPMENT PLAN GRANTS.—The Administrator shall, at the request of the Governor of a State affected by the interstate management plan developed pursuant to the Chesapeake Bay program (hereinafter in this subsection referred to as the "plan"), make a grant for the purpose of implementing the management mechanisms contained in the plan if such State has, within one year after the date of the enactment of this section, approved and committed to implement all or substantially all aspects of the plan. Such grants shall be made subject to such terms and conditions as the Administrator considers appropriate.

(3) SUBMISSION OF PROPOSAL.—A state or combination of States may elect to avail itself of the benefits of paragraph (2) by submitting to the Administrator a proposal including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal.

(4) FEDERAL SHARE.—Grants under paragraph (2) shall not exceed 50 percent of the costs of implementing the proposed plan in any fiscal year and shall be made on condition that non-federal sources provide the remainder of the cost of implementing the proposed during such fiscal year.

(5) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or projects supported by funds made available under paragraph (2) shall not exceed in any one fiscal year 10 percent of the annual grant made to a State under such paragraph.

(6) REPORTS.—Any State or combination of States that receives a grant under paragraph (2) shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the interstate management plan developed pursuant to the Chesapeake Bay program. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(b) NARRAGANSETT BAY PROGAM.—

(1) GRANTS.—The Administrator shall, at the request of the Governor of an affected State and after consultation with the Administrator of the National Oceanic and Atmospheric Administration and other appropriate Federal and State agencies and interested persons, make a grant for purposes of assessing the principal factors having an adverse effect on the environmental quality of the Narragansett Bay (hereinafter in this subsection referred to as the "Bay"), as perceived by both scientists and users, in conjunction with developing and implementing a management program to improve the Bay's water quality. Payments for such purposes may be made to the States as hereinafter provided, subject to such terms and conditions as the Administrator considers appropriate.

(2) FEDERAL SHARE.—Grants under this paragraph shall not exceed 50 percent of the costs of implementing the plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the plan during such fiscal year.

(3) APPROVAL OF APPLICATIONS.—A State may elect to avail itself of the benefits of this subsection by submitting to the Administrator a full and complete description of the program it proposes to establish and administer under State law. The Administrator shall approve each such submitted program, within three months of receipt of such program, if the applicant demonstrates to the satisfaction of the Administrator that the applicant will—

(A) establish a committee of representatives from various units of Federal, State, and local governments, research and educational institutions, and groups and individuals concerned with problems of water quality in the Bay to provide advice on the design and implementation of a management program and to coordinate communication on issues affecting the Bay's water quality;

(B) review and coordinate Federal and State water pollution abatement efforts that will most efficiently address those principal factors having an adverse effect on the Bay's water quality;

(C) undertake, subsequent to an analysis of all environmental sampling data presently being collected on the Bay, methods for improving such data collection, particularly with respect to toxic pollutants;

(D) establish a continuing capacity for collecting, storing, analyzing, and disseminating such data;

(E) institute a sampling program where deficiencies are found to exist in present sampling programs; and

(F) develop and, as soon as practicable but not later than three years after the date of the enactment of this section, implement management practices and measures (including land use requirements) to reduce to the greatest extent feasible pollutant loadings in the Bay and to improve the Bay's water quality.

(4) STATE REPORTS.—Any State that avails itself of the benefits of this subsection shall, not later than two years after receipt of a Federal grant under this subsection and annually thereafter, report to the Administrator on progress made in implementing a management program to improve the water quality of the Bay.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated the following sums, to remain available until expended, to carry out the purposes of this section:

(1) $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989 to carry out subsection (a)(1);

(2) $10,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, for grants to States under subsection (a)(2); and

(3) $1,500,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, to carry out subsection (b).

Page 86, after line 25, insert the following:

SEC. 34. NEW YORK AND NEW JERSEY HARBOR AREA.

(a) CLEARINGHOUSE, COORDINATION, AND STUDY FUNCTIONS.—The Administrator shall—

(1) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the New York and New Jersey Harbor area (hereinafter in this subsection referred to as the "Harbor");

(2) coordinate Federal and State efforts to improve the water quality of the Harbor; and

(3) determine the impact of natural and man-induced environmental changes on the living resources of the Harbor and on adjacent coastal areas and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings of sewage, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals.

(b) GRANTS FOR IMPLEMENTATION OF INTERSTATE MANAGEMENT PLAN.—The Administrator shall, at the request of the Governor of a State affected by any interstate management plan relating to the Harbor developed pursuant to section 33 of this Act (hereinafter in this subsection referred to as the "plan"), make a grant for the purpose of implementing the management mechanisms contained in the plan in accordance with such section.

(c) SUBMISSION OF PROPOSAL.—An affected State or combination of States may, in addition, submit to the Administrator a proposal including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal.

(d) FEDERAL SHARE OF GRANTS.—Grants under this section shall not exceed 50 percent of the costs of implementing the proposal in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the proposal during such fiscal year.

(e) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or projects supported by funds made available under this section shall not exceed in any one fiscal year 10 percent of the annual grant made to a State under this section.

(f) REPORTS.—Any State or combination of States that receives a grant under section 36 (relating to maintenance of water quality in estuaries) or this section shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to

the Administrator on the progress made in implementing the plan developed pursuant to such section 36 or this section. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, to carry out this section.

Page 86, after line 25, insert the following:

SEC. 35. SAN FRANCISCO BAY.

(a) INITIATION OF PROGRAM.—The Administrator shall initiate a San Francisco Bay program to—

(1) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the San Francisco Bay (hereinafter in this section referred to as the "Bay");

(2) coordinate Federal, State and local efforts to improve the water quality of the Bay;

(3) establish a committee of representatives from various units of Federal, State, and local governments, research and education institutions, and groups and individuals concerned with problems of water quality in the Bay to provide advice on the development and implementation of such management program and to coordinate communication on issues affecting the Bay's water quality;

(4) determine the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings and toxic pollutants, including organic chemicals and heavy metals, and with special attention given to the impact of such changes on water quality and natural resources such as striped bass.

(5) develop a management plan that shall contain management practices and measures to reduce to the greatest extent feasible pollutant loadings in the Bay and to improve the Bay's water quality.

(b) GRANTS.—The Administrator shall, make a grant to the State of California for the purpose of implementing the management mechanisms contained in the management plan developed under subsection (a)(5), if such State has, within one year after the date of the enactment of this section, approved and committed to implement all or substantially all aspects of the plan. Such grants shall be made subject to such terms and conditions as the Administrator considers appropriate.

(c) SUBMISSION OF PROPOSAL.—The State of California may elect to avail itself of the benefits of this section by submitting to the Administrator a proposed plan including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal; except that Federal grants under this section shall not exceed 50 percent of the cost of implementing the proposed plan in any fiscal year and shall be made on condition that non-Federal sources provide the reminder of the cost of implementing the plan during such fiscal year.

(d) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or projects supported by funds made available under this section shall not exceed in any one fiscal year 10 percent of the annual Federal grant made under this section.

(e) REPORTS.—The State of California shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the interstate management plan developed pursuant to the San Francisco Bay program. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, to remain available until expended, $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

Page 86, after line 25, insert the following:

SEC. 36. MAINTENANCE OF WATER QUALITY IN ESTUARIES.

(a) MANAGEMENT CONFERENCE.—

(1) IN GENERAL.—In any case where the Administrator determines, on his own initiative or upon request of one or more States any portion of which is located within the estuarine zone of an estuary, that the attainment or maintenance of that water quality in such estuary which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water, requires the control of point and nonpoint sources of pollution in more than one State, the Administrator shall convene a management conference. The Administrator shall give priority consideration under this section to Long Island Sound; Buzzards Bay, Massachusetts; Delaware Bay, Delaware and New Jersey; and Albemarle Sound, North Carolina.

(2) BOUNDARY DISPUTE EXCEPTION.—In any case in which a boundary between two States passes through an estuary and such boundary is disputed and is the subject of an action in any court, the Administrator shall not convene a management conference with respect to such estuary before a final adjudication has been made of such dispute.

(3) EXISTING MANAGEMENT PROGRAM EXCEPTION.—Notwithstanding any other provision of this section, the Administrator shall not convene a management conference with respect to an estuary if he determines that there exists a management program for the estuarine zone of such estuary with sufficient authority to achieve the purposes of this section.

(b) MEMBERS OF CONFERENCE; LEAD AGENCY.—The members of a conference under this section shall include the Administrator, the Administrator of the National Oceanic and Atmospheric Administration, a representative of each of those States which are located, in whole or in part, within the estuarine zone of the estuary for which the conference is convened, a representative of each interested Federal agency as determined appropriate by the Administrator, a representative of any interstate agency having jurisdiction over all or a significant part of the estuary, and representatives of local governments within the estuarine zone as deemed appropriate by the Administrator. In any case in which an interstate agency has jurisdiction over all or a significant part of the estuary, such agency shall be the lead agency for purposes of carrying out this section.

(c) PURPOSES OF CONFERENCE.—The purposes of any management conference convened with respect to an estuary under this subsection shall be—

(1) to develop a comprehensive master plan for such estuary;

(2) to coordinate the implementation of the master plan by the States participating in the conference;

(3) to recommend priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems; and

(4) to monitor the estuary to determine the effectiveness of actions taken pursuant to the master plan.

(d) MASTER PLAN.—

(1) CONTENTS.—The master plan developed pursuant to paragraph (1) of subsection (c) may include, but need not be limited to any of the following standards and practices which are necessary for the attainment or maintenance of the water quality which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water:

(A) development of water quality standards for waters within the estuarine zone;

(B) development of toxicity-based standards for toxic pollutants;

(c) development of water quality based effluent standards for significant point sources of pollution; and

(D) development of best management practices to control nonpoint sources of pollution.

(2) UTILIZATION OF EXISTING DATA.—In developing a master plan under this section, the management conference shall survey and utilize existing reports, data, and studies relating to the estuary that have been developed by or made available to Federal, interstate, State, or local agencies.

(e) PERIOD OF CONFERENCE.—A management conference convened under this section shall be convened for at least five years. Such conference may be extended by the Administrator, and if terminated after the initial five-year period, may be reconvened by the Administrator at any time thereafter, as may be necessary to meet the requirements of this section.

(f) GRANTS FOR IMPLEMENTATION OF MASTER PLAN.—The Administrator is authorized to make grants to States and interstate agencies participating in a management conference which has adopted a comprehensive master plan pursuant to this section for the estuary which is the subject of such conference. The amount of the grants to any State or interstate agency for a fiscal year shall, subject to such amounts as are provided in appropriation Acts, be equal to 50 percent of that State's or agency's cost of implementing the master plan for such fiscal year.

(g) DEFINITIONS.—For purposes of this section, the terms "estuary" and "estuarine zone" have the meanings such terms have in section 104(n)(4) of the Federal Water Pollution Control Act, except that the term "estuarine zone" shall also include those portions of tributaries draining into the estuary up to the historic height of migration of anadromous fish or the historic head of tidal influence, whichever is higher. For purposes of this section, the term "State" has the meaning such term has in section 502(3) of such Act.

(h) AUTHORIZATION OF APPROPRIATIONS.—

(1) GRANTS.—There is authorized to be appropriated to carry out this section not to exceed $13,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Amounts appropriated under this paragraph shall remain available until expended.

(2) OTHER EXPENSES.—There is authorized to be appropriated to the Administrator not to exceed $2,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, for—

(A) expenses related to the administration of management conferences under this section;

(B) grants to State water pollution control agencies, State coastal zone management agencies, interstate agencies, other public or nonprofit private agencies, institutions, organizations, and individuals for research, surveys, studies, and modeling and other technical work necessary for the development of a comprehensive master plan under this section; and

(C) monitoring the implementation of a comprehensive master plan by the management conference or by the Administrator in any case in which the conference has been terminated.

Page 86, after line 25, insert the following:

SEC. 37. RESEARCH ON EFFECTS OF POLLUTANTS.

(a) MATTERS INCLUDED.—In carrying out the provisions of section 104(a) of the Federal Water Pollution Control Act, the Administrator shall conduct research on the harmful effects on the health and welfare of persons caused by pollutants in water, in conjuction with the United States Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, and other Federal, State, and interstate agencies carrying on such research. Such research shall include, and shall place special emphasis on, the effect that bioaccumulation of these pollutants in aquatic species has upon reducing the value of aquatic commercial and sport industries. Such research shall further study methods to reduce and remove these pollutants from the relevant affected aquatic species so as to restore and enhance these valuable resources.

(b) AUTHORIZATON OF APPROPRIATIONS.—There is authorized to be appropriated to carry out subsection (a) of this section not to exceed $2,500,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

Page 86, after line 25, insert the folowing:

SEC. 38. SEWAGE SLUDGE.

(a) IDENTIFICATION OF TOXIC POLLUTANTS.—

(1) SIX MONTHS.—Not later than six months after the date of the enactment of this Act, the Aministrator shall identify those toxic pollutants which, on the basis of available information on their toxicity, persistence, concentraton, mobility, or potential for exposure, may be present in sewage sludge in concentrations which may adversely affect human health or the environment.

(2) EIGHTEEN MONTHS.—Not later than 18 months after the date of the enactment of this Act, the Administrator shall identify those toxic polutants not identified under paragraph (1) which may be present in sewage sludge in concentrations which may adversely affect public health or the environment.

(b) REGULATIONS.—

(1) FOR SIX-MONTH POLLUTANTS.—Not later than 18 months after the date of the enactment of this Act, the Administrator shall publish regulations specifying acceptable management practices for sewage sludge containing each toxic pollutant identified under subsection (a)(1) and establishing numerical limitations for each such pollutant for each use of or disposal technique for sludge identified by the Administrator. Such regulations shall require compliance no later than six months after their publication.

(2) FOR EIGHTEEN-MONTH POLLUTANTS.—Not later than 30 months after the date of the enactment of this Act, the Administrator shall publish regulations specifying acceptable management practices for sewage sludge containing each toxic pollutant identified under subsection (a)(2) and establishing numerical limitations for each such pollutant for each use of or disposal technique for sludge identified by the Administrator. Such management practices and numerical limitations shall be adequate to protect the public health and the environment from any reasonably anticipated adverse effects of such pollutant. Such regulations shall require compliance no later than six months after their publication.

(3) ALTERNATIVE STANDARDS.—For purposes of this subsection, if, in the judgment of the Administrator, it is not feasible to prescribe or enforce a numerical limitation for a pollutant identified under subsection (a), he may instead promulgate a design, equipment, management practice, or operational standard, or combination thereof, which in his judgment is adequate to protect public health and the environment from any reasonably anticipated adverse effects of such pollutant. In the event the Administrator promulgates a design or equipment standard under this subsection, he shall include as part of such standard such requirements as will assure the proper operation and maintenance of any such element of design or equipment.

(4) TREATMENT OF REGULATIONS.—Any regulation issued under this subsection shall be considered an "effluent standard or limitation" for purposes of section 308 or section 505 of the Federal Water Pollution Control Act.

(c) STUDIES AND PROJECTS.—The Administrator is authorized to conduct or initiate scientific studies, demonstration projects, and public information and education projects which are designed to promote the safe and beneficial use of sewage sludge for such purposes as aiding the restoration of abandoned mine sites, conditioning soil for parks and recreation areas, agricultural and horticultural uses, and other beneficial purposes. For the purposes of carrying out this subsection, the Administrator may make grants to State water pollution control agencies, other public or nonprofit agencies, institutions, organizations, and individuals. In cooperation with other Federal departments and agencies, other public and private agencies, institutions, and organizations, the Administrator is authorized to collect and disseminate information pertaining to the safe and beneficial use of sewage sludge.

(d) AUTHORIZATION OF APPROPRIATIONS.—For the purposes of carrying out the scientific studies, demonstration projects, and public information and education projects authorized in this section, there is authorized to be appropriated for fiscal years beginning after September 30, 1985, not to exceed $15,000,000.

Page 86, after line 25, insert the following:

SEC. 39. PUGET SOUND.

(a) MASTER PLAN; PRIORITY LIST; MONITORING PROGRAM.—The Administrator, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, a representative of any other interested Federal agency as determined appropriate by the Administrator, representatives of the State of Washington, and representatives of interested local governments as determined appropriate by the Administrator, shall—

(1) develop a comprehensive master plan for Puget Sound, Washington;

(2) recommend priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems to the water quality of such Sound; and

(3) monitor such sound to determine the effectiveness of actions taken pursuant to the master plan.

(b) CONTENTS OF MASTER PLAN.—The master plan developed pursuant to paragraph (1) of subsection (a) may include, but need not be limited to, any of the following standards and practices which are necessary for the attainment or maintenance of that water quality which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife and allows recreational activities in and on the water:

(1) development of water quality standards for waters within the estuarine zone of Puget Sound;

(2) development of toxicity-based standards for toxic pollutants;

(3) development of water quality based effluent standards for significant point sources of pollution; and

(4) development of best management practices to control nonpoint sources of pollution.

(c) USE OF EXISTING DATA.—In developing a master plan under this section, the Administrator shall survey and utilize existing reports, data, and studies relating to Puget Sound that have been developed by or made available to Federal, State, or local agencies.

(d) GRANTS.—The Administrator is authorized to make grants to the State of Washington if such State adopts a comprehensive master plan pursuant to this section for the Puget Sound. The amount of such grant for a fiscal year, shall, subject to such amounts as are provided in appropriation Acts, be equal to 50 percent of such State's cost of implementing the master plan for such fiscal year.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Administrator to carry out this section not to exceed $4,900,000 for the fiscal year ending September 30, 1986, $4,450,000 for the fiscal year ending September 30, 1987, and $2,400,000 for the fiscal year ending September 30, 1988. Amounts appropriated under this subsection shall remain available until expended.

Page 86, after line 25, insert the following section:

SEC. 41. OCEAN DISCHARGE RESEARCH PROJECTS.

(a) IN GENERAL.—Notwithstanding any other provision of law, the Administrator is authorized to issue a research permit to the Orange County, California, Sanitation District for the discharge of preconditioned municipal sewage sludge into the ocean for the purpose of enabling research to be conducted in assessing and analyzing the ef-

fects of disposing of sewage sludge by pipeline into ocean waters, if the Administrator is satisfied that such local governmental agency is actively pursuing long-term land-based options for the handling of its sludge with special emphasis on remote disposal alternatives set forth in the 1980 LA/OMA sludge management project and on reuse of sludge or use of recycled sludge and if the Administrator determines there is no likelihood of an unacceptable adverse effect on the environment as a result of issuance of such permit.

(b) PERMIT TERMS.—

(1) PERIOD.—Such permit for the discharge of sludge shall be for a period of five years.

(2) MONITORING.—Such permit shall provide for monitoring of permitted discharges and other discharges into the ocean in the same area and the effects of such discharges (including cumulative effects) in conformance with requirements established by the Administrator, after consultation with appropriate Federal and State agencies, and for the reporting of such monitoring to Congress and the Administrator every six months.

(3) VOLUME OF DISCHARGE.—Such permit shall provide that the volume of such local agency's sludge disposed of by such experimental pipeline shall be no more than one and one-half times that being disposed of by such remote disposal and alternatives for the reuse of sludge and the use of recycled sludge. In no event shall the agency dispose of more than 50 percent of its sludge by the pipeline.

(4) TERMINATION.—The permit shall provide for termination of the permit if the Administrator determines that the disposal of sewage sludge is resulting in an unacceptable adverse impact on fish, shellfish, and wildlife.

(c) REPORT.—Such districts shall report the results of the program and an analysis of such program to Congress under this section not later than four and one-half years after issuance of the permit.

Page 86, after line 25, insert the following:

SEC. 42. GRANTS FOR REPLACEMENT OF CONTAMINATED GROUNDWATER.

(a) GRANT RECIPIENTS.—The Administrator is authorized to make grants to—

(1) any person who owns or operates a public water system which, because of groundwater contamination, is unable to supply water which is fit for human consumption to some or all of the users of such system, and

(2) any unit of local government on behalf of individuals residing within the boundaries of such unit whose water is supplied from a source other than a public water system and is unfit for human consumption because of groundwater contamination.

(b) GRANT PURPOSE.—Grants under this section shall be for the purpose of providing alternative water supplies to such users and individuals on a temporary basis and providing permanent remedies for water supply problems resulting from groundwater contamination, including but not limited to the drilling of new wells and the installation of new pipes.

(c) APPLICATION.—An application for a grant under this section shall be in such form and shall contain such information as the Administrator may require. Each such application shall include—

(1) a description of the source and extent of groundwater contamination;

(2) information on the number of people who do not have water available to them because of such contamination; and

(3) a description of the measures the applicant proposes to undertake with the assistance to be provided under this section.

(d) FEDERAL SHARE.—The Federal share of the cost of measures undertaken with assistance under this section shall not exceed 50 percent.

(e) LIMITATIONS ON AMOUNT.—The maximum amount of a grant under this section to any applicant with respect to a particular source of groundwater contamination shall be $2,000,000 for each fiscal year. The maximum amount of grants under this section to applicants within one State shall be $10,000,000 for each fiscal year.

(f) ANNUAL REPORTS.—The Administrator shall report annually to Congress on grants made under this section. Each such report shall include—

(1) information on applicants for such grants, including the number of such applicants;

(2) information on the sources and extent of groundwater contamination with respect to which applications are made under this section, including the average number of people affected by each source of groundwater contamination; and

(3) the average amount of such grants and the types of measures undertaken with such grants.

(g) DEFINITIONS.—For purposes of this section—

(1) the term "person" includes a State, a political subdivision of a State, and an agency or instrumentality of a State or political subdivision of a State;

(2) the term "public water system" means a system for the provision to the public of piped water for human consumption, if such system has at least 15 service connections or regularly serves at least 25 individuals; and

(3) the term "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Island, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas.

(h) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $150,000,000 per fiscal year for each of the fiscal years 1986, 1987, and 1988.

Page 86, after line 25 insert the following:

SEC. 43. UNCONSOLIDATED QUATERNARY AQUIFER.

Notwithstanding any other provision of law, no person may—

(1) locate or authorize the location of a landfill, surface impoundment, waste pile, injection well, or land treatment facility over the Unconsolidated Quaternary Aquifer, or the recharge zone or streamflow source zone of such aquifer, in the Rockaway River Basin, New Jersey (as such aquifer and zones are described in the Federal Register, January 24, 1984, pages 2946-2948)/ or

(2) place or authorize the placement of solid waste in a landfill, surface impoundment, waste pile, injection well, or land treatment facility over such aquifer or zone.

This section may be enforced under sections 309(a) and (b) of the Federal Water Pollution Control Act. For purposes of section 309(c) of such Act, a violation of this section shall be considered a violation of section 301 of the Federal Water Pollution Control Act.

Page 86, after line 25, insert the following:

SEC. 44. GRANTS FOR PROTECTING GROUNDWATER QUALITY.

(a) ELIGIBLE APPLICANTS AND ACTIVITIES.—Upon application of a State for which a report submitted under subsection (a) of section 319 of the Federal Water Pollution Control Act, as added by section 7 of this Act, and a plan submitted under subsection (b) of such section is approved under such section, the Administrator shall make grants under this section to such State for the purpose of assisting such State in carrying out ground-water quality protection activities which the Administrator determines will advance the State toward implementation of a comprehensive nonpoint source pollution control program. Such activities shall include, but not be limited to, research, planning, ground-water assessments, demonstration programs, enforcement, technical assistance, education and training to protect the quality of ground water and to prevent contamination of ground water from nonpoint sources of pollution.

(b) APPLICATIONS.—An application for a grant under this section shall be in such form and shall contain such information as the Administrator may require.

(c) FEDERAL SHARE: MAXIMUM AMOUNT.—The Federal share of the cost of assisting a State in carrying out groundwater protection activities in any fiscal year under this section shall be 50 percent of the costs incurred by the State in carrying out such activities, except that the maximum amount of Federal assistance which any State may receive under this section in any fiscal year shall not exceed $150,000.

(d) REPORT.—The Administrator shall include in each report transmitted under subsection (j) of section 319 of the Federal Water Pollution Control Act, as added by section 7 of this Act, a report on the activities and programs implemented under this section during the preceding fiscal year.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $7,500,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990.

Page 100, after line 16, insert the following:

SEC. 36. GREAT LAKES INTERNATIONAL COORDINATION OFFICE.

(a) FINDINGS AND PURPOSE.—

(1) FINDINGS.—The Congress finds that—

(A) the Great Lakes are a valuable national resource, continuously serving the people of the United States and other nations as an important source of food, fresh water, recreation, beauty, and enjoyment;

(B) the United States should seek to attain the goals embodied in the Great Lakes Water Quality Agreement of 1978 with particular emphasis on goals related to toxic pollutants; and

(C) the Environmental Protection Agency (hereinafter in this section referred to as the "Agency") should take the lead in the effort to meet those goals, working with other Federal agencies and State and local authorities.

(2) PURPOSE.—It is the purpose of this section to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978 through improved organization and definition of mission on the part of the Agency, funding of State grants for pollution control in the Great Lakes area, and improved accountability for implementation of such agreement.

(b) ESTABLISHMENT.—The Great Lakes National Program Office of the Agency is hereby designated as the Great Lakes International Coordination Office (hereinafter in this section referred to as the "Office").

The head of the Office shall also serve as principal liaison person on Great Lakes matters to the International Joint Commission, United States and Canada (hereinafter in this section referred to as the "Commission").

(c) FUNCTIONS.—The Office shall—

(1) develop and implement specific action plans to carry out the responsibility of the United States under the Great Lakes Water Quality Agreement of 1978;

(2) carry out toxic pollutant control demonstration projects at Saginaw Bay, Michigan; Sheboygan Harbor, Wisconsin; Grand Calumet River, Indiana; Ashtabula River, Ohio; and Buffalo River, New York; and at other sites in the Great Lakes at which the Commission determines that sediments are heavily contaminated with toxic materials;

(3) coordinate actions of the Agency (including actions by headquarters and regional offices thereof) aimed at improving Great Lakes water quality;

(4) coordinate actions of the Agency with the actions of other Federal agencies and State and local authorities, so as to ensure the input of those agencies and authorities in developing water quality strategies and obtain the support of those agencies and authorities in achieving the objective of such agreement;

(5) establish a Great Lakes system-wide surveillance network to monitor the water quality of the Great Lakes, with specific emphasis on the monitoring of toxic pollutants; and

(6) serve as the liaison with, and provide information to, the Canadian members of the Commission and the Canadian counterpart to the Agency.

(d) ADMINISTRATOR'S RESPONSIBILITY.—The Administrator shall ensure that the Office should enter into agreements with the various organizational elements of the Agency involved in Great Lakes activities and the appropriate State agencies specifically delineating—

(1) the duties and responsibilities of each such element and the Agency with respect to the Great Lakes;

(2) the time periods for carrying out such duties and responsibilities; and

(3) the resources to be committed to such duties and responsibilities.

(e) BUDGET ITEM.—The Administrator shall, in the Agency's annual budget submission to Congress, include a funding request for the Office as a separate budget line item.

(f) REPORTS.—

(1) COMPREHENSIVE ASSESSMENT.—Within 120 days after the date of the enactment of this Act, and at the beginning of each fiscal year thereafter, the Administrator shall submit to Congress a comprehensive assessment of the planned efforts to be pursued in the succeeding fiscal year for implementing the Great Lakes Water Quality Agreement of 1978. The assessment shall show by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amounts anticipated to be expended on Great Lakes water quality initiatives in the fiscal year to which the assessment relates. The assessment shall also include a report of current programs administered by other Federal agencies which make available resources to Great Lakes water quality efforts.

(2) COMPREHENSIVE REPORT.—Within 150 days after the end of each fiscal year, the Administrator shall submit to Congress a comprehensive report which—

(A) describes the achievements in the preceding fiscal year in implementing such agreement and shows by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amounts expended on Great Lakes water quality initiatives in such preceding fiscal year;

(B) describes the progress made in such preceding fiscal year in implementing the system of surveillance of the water quality of the Great Lakes, with particular reference to toxic pollutants; and

(C) describes the long-term prospects for improving the water quality of the Great Lakes.

(g) AUTHORIZATIONS OF APPROPRIATIONS.—

(1) FOR THE OFFICE.—There are authorized to be appropriated for the purposes of carrying out subsections (b), (c), and (d) and for the purpose of carrying out the functions, powers, and duties of the Office not to exceed—

(A) $8,000,000 for fiscal year 1986, of which $1,500,000 shall be available only to carry out subsection (c)(2);

(B) $9,000,000 for fiscal year 1987, of which $2,500,000 shall be available only to carry out subsection (c)(2);

(C) $10,000,000 for fiscal year 1988, of which $3,500,000 shall be available only to carry out subsection (c)(2);

(D) $12,000,000 for fiscal year 1989, of which $5,000,000 shall be available only to carry out subsection (c)(2); and

(E) $13,000,000 for fiscal year 1990, of which $5,000,000 shall be available only to carry out subsection (c)(2).

(2) FOR GREAT LAKES STUDIES.—For the purpose of carrying out section 104(f) of the Federal Water Pollution Control Act there is authorized to be appropriated $10,000,000 for fiscal year 1986. Such funds shall be in addition to and not in lieu of any funds authorized to be appropriated under section 104(u) of such Act.

Page 105, after line 12, insert the following:

(e) NEVADA COUNTY, CALIFORNIA.—The Administrator is authorized to make a grant from funds allotted to the State of California for fiscal years beginning after September 30, 1985, for the construction of a collection system serving the Glenshire/Devonshire area of Nevada County, California, to deliver waste to the Tahoe-Truckee Sanitary District's regional wastewater treatment facility.

Page 105, after line 12, insert the following:

(e) TREATMENT WORKS FOR WANAQUE, NEW JERSEY.—The Administrator shall make grants to the Wanaque Valley Regional Sewerage Authority, New Jersey, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of New Jersey, for fiscal years beginning after September 30, 1985, for the construction of treatment works with a total treatment capacity of 1,050,000 gallons per day (including a treatment module with a treatment capacity of 350,000 gallons per day), Notwithstanding section 202 of the Federal Water Pollution Control Act, the Federal share of the cost of construction of such treatment works shall be 75 percent.

Page 105, after line 12, insert the following:

(f) TREATMENT WORKS FOR LENA, ILLINOIS.—The Administrator shall make grants to the village of Lena, Illinois, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Illinois, for fiscal years beginning after September 30, 1985, for the construction of a replacement moving bed filter press for the treatment works of such village. Not withstanding section 202 of the Federal Water Pollution Control Act, the Federal share of the cost of construction of such project shall be 75 percent.

Page 110, after line 2, insert the following:

SEC. 48. STUDIES OF WATER POLLUTION PROBLEMS IN AQUIFERS.

(a) STUDIES.—The Administrator, in conjunction with State and local agencies and after providing an opportunity for full public participation, shall conduct studies for the purpose of identifying existing and potential point and nonpoint sources of pollution, and of identifying measures and practices necessary to control such sources of pollution, in the following groundwater systems and aquifers:

(1) the groundwater system of the Upper Santa Cruz Basin and the Avra-Altar Basin of Pima, Pinal, and Santa Cruz Counties, Arizona;

(2) the Spokane-Rathdrum Valley Aquifer, Washington and Idaho;

(3) the Nassau and Suffolk Counties Aquifer, New York;

(4) the Whidbey Island Aquifer, Washington;

(5) the Unconsolidated Quaternary Aquifer, Rockaway River area, New Jersey; and

(6) the Sparta Aquifer, Arkansas.

(b) PROPOSED MANAGEMENT PLANS.—After completion of each study under subsection (a), the Administrator, in conjunction with State and local agencies and after providing an opportunity for full public participation, shall prepare a proposed management plan describing methods of implementing the measures and practices identified for each groundwater system and aquifer under subsection (a).

(c) REPORTS.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress an interim report of the studies and proposed management plans under this section. Not later than two years after such date of enactment, the Administrator shall complete such studies and plans and submit to Congress a final report of such studies and plans.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 for fiscal years beginning after September 30, 1985, to carry out this section.

Page 110, after line 2, insert the following:

SEC. 49. GREAT LAKES CONSUMPTIVE USES STUDY.

(a) STUDY OF CONTROL MEASURES.—In recognition of the serious impacts that are expected to occur to the Great Lakes environment as a result of a projected fivefold increase in consumption of Great Lakes water, including loss of wetlands and reduction of fish spawning and habitat areas, as well as serious economic losses to vital Great Lakes industries, and in recognition of the national goal to provide environmental protection and preservation of our natural resources while allowing for continued economic growth, the Administrator, in cooperation with other interested departments, agencies, and instrumentalities of the United States and the eight Great Lakes States and their political subdivisions, is authorized to conduct a study of control measures which can be implemented to reduce the quantity of Great Lakes water consumed without adversely affecting projected economic growth of the Great Lakes region.

(b) MATTERS INCLUDED.—The study authorized by this section shall include an analysis of both existing and new technology which

is likely to be feasible in the foreseeable future and shall at a minimum include the following:

(1) a review of the methodologies used to forecast Great Lakes consumptive uses, including an analysis of the sensitivity of key variables affecting such uses;

(2) an analysis of the effect that enforcement of provisions of the Federal Water Pollution Control Act relating to thermal discharges has had on consumption of Great Lakes water;

(3) an analysis of the effect of laws, regulations, and national policy objectives on consumptive uses of Great Lakes water used in manufacturing;

(4) an analysis of the economic effects on a consuming industry and other Great Lakes interests associated with a particular consumptive use control strategy;

(5) an analysis of associated environmental impacts, both singularly and in combination with other consumptive use control strategies; and

(6) a summary discussion containing recommendations for methods of controlling consumptive uses which methods maximize benefits to the Great Lakes ecosystem and also provide for continued full economic growth for consuming industries as well as other industries which depend on the use of Great Lakes water.

(c) GREAT LAKES STATES DEFINED.—For purposes of this section, the term "Great Lakes States" means Minnesota, Wisconsin, Illinois, Ohio, Michigan, Indiana, Pennsylvania, and New York.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $4,500,000 to carry out this section. Sums appropriated under this section shall remain available until expended.

Page 111, line 17, after the period insert the following: "As part of such study, the Administrator shall study appropriate methods of regulating rainfall induced infiltration into the sewer system of the East Bay Municipal Utility District, California.".

Redesignate sections, cross references, and items in the table of contents to conform to the preceding amendments.

Mr. HOWARD (during the reading). Mr. Chairman, I ask unanimous-consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Chairman, the rule on H.R. 8 provided that amendments printed in the July 16 CONGRESSIONAL RECORD could be offered en bloc and that the bill as so amended would be considered the original bill for purposes of floor action. The unanimous consent request provided that it is in order for me to offer further amendments as part of the amendments specifically made in order by the rule. The amendments I am offering include amendments printed in the July 16 CONGRESSIONAL RECORD, perfecting changes to some of those amendments based on information which developed subsequent to their publication, and five items not printed in the July 16 RECORD. Three of these five amendments are technical in nature, and the other two are minor in nature, providing for funding for treatment works in Nevada County, CA, and Wanaque, NJ.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the ranking member of our Subcommittee on Water Resources, the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of the package of en bloc amendments being offered by the gentleman from New Jersey, the chairman of the Committee on Public Works and Transportation, Mr. HOWARD.

By and large, these amendments merely update and provide minor modifications to the package of amendments that was printed in the CONGRESSIONAL RECORD of July 16, 1985. Among other things, the amendments address perfections to H.R. 8's provisions relating to fundamentally different factor variances, coal remining, administrative penalties, marine sanitation devices, 10-year permits, stormwater discharges, log transfer facilities, antibacksliding, citizen suits, and treatment of Indians under the Clean Water Act.

I believe, with respect to all of these provisions, a very careful balance has been struck that will walk the fine line between the positions of the various competing interests affected by the provisions and, at the same time, move our Clean Water Act and our National Clean Water Program in the direction that we all expect. The package of amendments is an improvement on the language that was previously printed in the CONGRESSIONAL RECORD and I urge my colleagues to join me in adding it here to the bill.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the chairman of the Subcommittee on Water Resources, the gentleman from New Jersey.

Mr. ROE. I thank my chairman for yielding to me on this most important piece of legislation.

Mr. Chairman, I rise in strong support of the amendments offered by Chairman HOWARD and echo the sentiments and the splendid explanation that our good friend, the gentleman from Minnesota, has presented to the House. I strongly support the action that we are undertaking at this point, Mr. Chairman.

The first amendment provides that Federal assistance made available by the Farmers Home Administration to a political subdivision of a State may be used to provide the non-Federal share of a sewage treatment project.

The second amendment requires the States of New York and New Jersey to pay $900,000 and the State of Connecticut to pay $200,000 each year to the Interstate Sanitary Commission. If payments in these amounts are not made, the Administrator is to make grants to the Commission out of program administration funds in the amount of the difference between the amount required to be paid and the amount actually paid.

The third amendment modifies section 15(g) of the reported bill which requires that a State must allocate at least 50 percent of State planning grant funds to regional and interstate planning organizations unless the Administrator after consultation with the Governor determines that such an allocation will not substantially assist in achieving the goals of the act. The modification would require a determination that the allocation did not significantly assist in encouraging participation by the planning organizations as well as assist in achieving the goals of the act.

The fourth amendment modifies the grant program for State revolving funds to require that assistance provided by a State with the revolving fund may be made only for a project consistent with plans developed under sections 204(j) (water quality management plans), section 208 (areawide waste treatment management plans) and section 303(e) (continuing planning process). Also, each State must reserve 1 percent of the revolving fund grants each year for the purposes of carrying out these three sections.

The fifth amendment amends section 301(g) of the act which provides for variances from effluent limitations for conventional pollutants. The amendment provides that variances may be sought only for ammonia, chlorine, color, iron and phenols. The administrator may add pollutants to this list of those for which variances may be sought and may also remove pollutants from this list.

The sixth amendment amends section 301(h) of the act with respect to discharges into marine waters. The amendment provides that in order to obtain a permit for less than secondary treatment where the effluent will be discharged into the ocean the applicant must have in effect a pretreatment program and must provide at least primary treatment. Also, section 307(b)(1) relating to pretreatment removal credits is amended to provide that these credits must be given where effluent limitations will not be violated, and will be no interference with the method of disposal of the sludge and the revised pretreatment standards will not interfer with the operations of a treatment works. The other provisions of section 307(b)(1) relating to effluent limitation and determination of removal by the treatment works remain in effect.

This amendment also prohibits the discharge of sewage treatment effluent into estuaries.

The seventh amendment removes the filing deadline for applications for extensions of the date by which secondary treatment must be achieved and provides that the extension of a filing date does not apply to treatment works which are subject to an administrative or judicial compliance schedule.

The eighth amendment relating to applications for ocean discharge modifications provides that a publicly-owned treatment works which has a contractual arrangement to use a portion of the capacity of an ocean outfall operated by another treatment works which has applied for a modification may also apply for a modification in its own right.

Amendment 9 amends section 301(k) of the act, which permits an extension of the best available technology deadline for toxic pollutants where an innovative process is being developed which will result in the discharge of less pollutant and will have industry-wide application, to permit the same extension for conventional pollutants.

Amendment 10 amends section 16 of the reported bill which permits variances from effluent limitations where fundamentally different factors exist in the facilities and processes of the discharger. The amendment makes the same provision for pretreatment. The amendment also sets dates by which applications must be acted on and requires reports to Congress every 6 months.

Amendment 11 adds a provision to the reported bill which allows the issuance of a permit modifying effluent limitations with respect to the pH level of preexisting discharges and preexisting discharges of iron and manganese from the remined area of a coal remining operation.

Amendment 12 imposes a penalty on any authorized representative of the Administrator who discloses confidential information obtained in the inspection and monitoring of a discharger.

Amendment 13 consists of technical amendments to the penalty provisions of the bill.

Amendment 14 provides for a fine or imprisonment of any person who knowingly violates provisions of the act or permit conditions knowing that he thereby places another person in imminent danger of death or serious bodily injury.

Amendment 15 is a technical amendment to the administrative penalty provision of the bill.

Amendment 16 modifies the civil penalty provision of the bill and provides that a civil penalty may not be assessed with respect to a violation if a penalty has been assessed with respect to the same violation or a violation having substantially the same cause.

Amendment 17 deletes from the administrative penalty provision the authority to compromise, modify or remit a civil penalty.

Amendment 18 modifies the administrative penalty provision by assessing a penalty for late payment of a fine.

Amendment 19 provides that penalties under other provisions of the law shall not apply where a person has paid an administrative penalty for the same violation.

Amendment 20 is a clarifying amendment to the administrative penalties section and provides that where an administrative penalty is being pursued, a citizen suit may not be filed for the same violation.

Amendment 21 clarifies the administrative penalties section by providing that a citizen suit is barred not only by an EPA administrative action but also by a State proceeding under a comparable State law.

Amendment 22 provides that discharges from a deepwater port or a vessel within a deepwater port safety zone which are subject to the Deepwater Port Act are not also subject to the liability and penalty provisions of the Water Pollution Control Act.

Amendment 23 modifies the requirement for marine sanitation devices to provide that a State may impose a more stringent standard for vessels which are used primarily as residences.

Amendment 25 modifies section 26 of the reported bill to provide that a permit with a term not exceeding 10 years issued by a State must be done so in accordance with regulations established by the Administrator.

Amendment 26 modifies the provision in section 26 which provides that a permit with a term of not to exceed 10 years may not be granted if toxic and nonconventional pollutants are present in the effluent in more than trace amounts. The amendment removes this restriction with regard to the five nonconventional pollutants for which effluent limitation variances may be granted under section 301(g).

Amendment 27 modifies section 26 as it relates to permits with terms of not to exceed 10 years. Section 26 requires that a permit must be modified promptly to insure compliance with new, more stringent, effluent limitations for toxics or new water quality standards. The amendment clarifies that EPA may also modify permits to ensure compliance with other revised effluent limitations, pretreatment standard, or sewage sludge regulation.

Amendment 28 establishes procedures for the regulation of stormwater discharges. For the period ending December 31, 1989, EPA may not require a permit for discharges composed entirely of stormwater runoff unless the Administrator determines in the case of a class or category of discharges that the class or category may be a significant contribution of pollutants or, in the case of an individual discharge, that it violates a water quality standard or is a significant contributor of pollutants.

All discharges from municipal separate storm sewers must be regulated through the permit program.

With regard to discharges from industrial sites, within one year EPA must promulgate regulations identifying the classes and categories for which permits are required. Not later than 6 months after the study of regulation of stormwater runoff required to be undertaken by EPA, then regulations must be revised as necessary to take into account the results of the study. The study is to be submitted to Congress not later than December 31, 1987.

Amendment 29 adds oil and gas transmission facilities to the list of mining, oil or gas operations which do not require a permit for uncontaminated stormwater discharges.

Amendment 30 sets forth a regulatory procedure for log transfer facilities which are required to have a permit under both section 402 and section 404. Where a section 404 permit (discharge of dredged or fill material) has been obtained EPA is to determine, after opportunity for a public hearing, whether the section 404 permit satisfies other requirements of the act. If this is the case, a section 402 permit (discharges of pollutants) need not be applied for. If EPA determines that these other requirements are not satisfied, EPA proposes permit modifications to the Secretary of the Army. If the modifications are not made, then EPA requires that a section 402 permit be obtained.

Amendment 31, "antibacksliding," provides that for a period of 2½ years, a BPJ [best professional judgment] permit, or one based on water quality standards, may not be modified to contain a less stringent effluent limitation, except as provided in a few limited circumstances. Within 2 years of the date of enactment, EPA is to submit a report to Congress on the extent to which States have reviewed, revised and adopted water quality standards pursuant to the 1981 amendments to the Federal Water Pollution Control Act, and the extent to which modifications of permits should be allowed.

Amendment 32 modifies the citizen suits provision of the act to provide that EPA must be notified when such a suit is commenced. Also, no judgment in any action to which the United States is not a party may be binding on the United States.

Amendment 34 provides that "point source" includes a leachate collection system, other than a leachate collec-

tion system used for agricultural purposes.

Amendment 35 provides for the cleanup of the Chesapeake and Narragansett Bays, including studies, development of plans, and grant assistance for implementation of the plans.

Amendment 36 authorizes EPA to assist in the study of environmental problems in the New York and New Jersey harbor areas, and to make 50 percent grants for implementation of plans to improve the area.

Amendment 37 authorizes the Administrator to study and develop information on the quality of San Francisco Bay, develop a master plan to reduce pollution loadings in the bay, and to make grants for implementation of the plan.

Amendment 38 establishes a program to improve water quality in estuaries. EPA is authorized to convene management conferences on estuaries in order to develop master plans for the improvement of the environmental quality of estuaries. The participants in the conference include EPA, NOAA, and the States. Fifty percent grants are authorized for implementation of the master plans.

Amendment 39 directs EPA, when establishing national programs to reduce and eliminate pollution, to conduct research on the harmful effects on persons caused by pollutants in water. Special emphasis is to be placed on the effects of bioaccumulation of pollutants in aquatic species. The study will be carried out in conjunction with the Fish and Wildlife Service, the National Oceanic and Atmospheric Administration and other Federal and State agencies.

Amendment 40 requires the Administrator, within 6 months after enactment, to identify those toxic pollutants which may be present in sewage sludge in concentrations which may adversely affect human health or the environment.

The Administrator is also directed to publish regulations specifying acceptable management practices for sewage sludge containing toxic pollutants.

Amendment 41 provides for the development of a comprehensive master plan for Puget Sound, Washington. Fifty percent grants are authorized for implementation of the plan.

Amendment 43 authorizes EPA to issue a research permit to Orange County, CA, for the discharge of preconditioned sludge into the ocean for the purpose of enabling research to be conducted on the effects of disposing sewage sludge in ocean waters. The permit term is for a period of 5 years, and results of monitoring activities must be transmitted to Congress every 6 months. The permit is to be terminated at any time EPA determines that an unacceptable adverse impact on fish, shellfish and wildlife is occurring.

Amendment 44 authorizes EPA to make 50 percent grants to any public water supply system or local government for the provision of alternative water supplies where the water supply system is unable to supply water which is fit for human consumption because of ground water contamination.

Amendment 45 provides that no person may locate or authorize the location of a landfill, surface impoundment, waste pile injection well or land treatment facility over the unconsolidated quarternary aquifer in New Jersey.

Amendment 46 authorizes the Administrator to make 50 percent grants to States for the purpose of assisting the States in carrying out ground water quality protection activities.

Amendment 47 provides for the establishment within EPA of a Great Lakes national program office to develop and implement specific plans to carry out U.S. responsibility under the Great Lakes Water Quality Agreement of 1978, carry out toxic pollutant control demonstration projects and coordinate actions of the agency with other Federal, State and local agencies.

Amendment 48 authorizes the Administrator to make a grant from funds allotted to the State of California for construction of a collection system serving the Glenshire/Devonshire area of Nevada County, CA.

Amendment 49 directs the Administrator to make a grant from funds allotted to the State of New Jersey to the Wanaque Valley Regional Sewerage Authority for the construction of treatment works with a total capacity of 1,050,000 gallons per day.

Amendment 51 authorizes the Administrator in conjunction with State and local agencies to conduct studies of a number of acquifers for the purpose of identifying point and and nonpoint sources of pollution and identifying measures necessary to control such pollution.

Amendment 52 authorizes EPA to conduct a study of control measures which can be implemented to reduce the quantity of Great Lakes water consumption.

Amendment 53 modifies the study of rainfall induced infilitration into sewer systems contained in section 50 to provide that as part of the study EPA will study appropriate methods of regulating such infiltration into the sewage system of the East Bay Municipal Utility District, California.

Amendment 54 is a technical amendment to designate sections, cross references, and other conforming items.

Amendment 50 provides for a grant to the village of Lena, IL, from funds allotted to Illinois, for the construction of a replacement moving bed filter press for the city's treatment works.

Amendment 33 provides that for certain provisions of the Federal Water Pollution Control Act Indian tribes may be treated as States.

□ 1300

Mr. HOWARD. Mr. Chairman, I yield to a member of our Committee on Public Works and Transportation, the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. Mr. Chairman, with the most able and informed leadership of the gentleman from New Jersey, the Committee on Public Works and Transportation has developed amendments to the Clean Water Act that are reasonable and implementable. I am pleased to have been a part of the process and wish to express my appreciation to our leadership for their effective work as well as for their assuring my participation.

Two important concepts have been very evident as we studied the issues and prepared this proposed legislation: A strong commitment to continue our progress toward the goals of the Clean Water Act and the recognition of the important need to accomplish these goals with a minimum of changes and paperwork requirements. The limited resources available at all levels of government must be addressed as we proceed with the Clean Water Program.

I wish to especially commend Chairman ROE, the former head of a State agency where he administered programs related to the many issues addressed in this bill, for his unique ability to identify priorities for reauthorization. The inclusion of topics such as requiring that waters being impacted by toxic pollutants be identified and individual control strategies be developed, as well as the clarification and implementation of further steps to abate nonpoint source poilutants, are examples of establishing our environmental priorities. Examples of the willingness to recognize the importance of efficiency in Government is reflected in the language changes to allow the thousands of small dischargers with nontoxic pollutants to receive 10-year, instead of 5-year permits to allow State and Federal personnel to more effectively address the major sources of pollution.

I am most appreciative of the committee's provision to authorize State revolving loan funds. Transitioning the existing Construction Grant Program to a State revolving loan fund and from a Federal to a State-local program assures a workable continuation of an essential environmental funding mechanism. The concept in this bill will assure a perpetual program without a long-term drain on the Federal budget occurring in an orderly manner with minimal disruption. Chairman ROE's willingness to involve the numerous parties concerned and

impacted by this proposed legislation was a key factor in finalizing the bill. I have worked diligently with Mr. ROE to incorporate the views of the administering agencies, environmental leaders as well as the business community. I wish to especially thank him for his acceptance of participation by our State administrators through their Association of State and Interstate Water Pollution Control Administrators.

The final issue I wish to bring to your attention is the stormwater runoff permit matter. Changes in the Clean Water Act are essential to allow continuation of priority issues to be addressed by Federal and State personnel. Without any compromise to the environment or reduction in the commitment to clean water we can prevent unnecessary diversion of personnel and other resources to an unproductive paper shuffling exercise by not requiring permits for rainwater runoff from parking lots, and so forth. To implement a workable process I have the assurance of Chairman ROE that he will address my concerns related to adequate future review time by the Congress of this matter, once the U.S. Environmental Protection Agency report is received by this body.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. HOWARD] has expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for 1 additional minute.)

Mr. HOWARD. Mr. Chairman, I understand that after the adoption of these en bloc amendments the entire bill will be open for amendment to all Members of the House.

Mr. Chairman, I yield back the balance of my time.

Mr. MOLINARI. Mr. Chairman, I move to strike the last word and I rise in support of the amendments offered en bloc.)

Mr. Chairman, the Interstate Sanitation Commission [ISC] was formed by an interstate compact between the States of New York, New Jersey, and Connecticut in 1936. It was established to coordinate the water quality management activities of the three party States in the western half of Long Island Sound, the waters of the New York-North Jersey Harbor area, and the lower Hudson River estuarine complex. The commission provides common services to all three States and administers a unified monitoring and regulatory program for the interstate sanitation district.

Aside from the U.S. Environmental Protection Agency, the commission is the only agency which has the jurisdiction to survey and analyze water quality management in the tidal waters of the region as a whole. This has been its mission for almost 50 years. None of the other Federal, State or local agencies operating in the Greater New York-New Jersey-Connecticut region has the experience or the program continuity to depict and assess water quality conditions, discharge factors and their interplay throughout these essentially interstate waterbodies. It is the ISC data base which is at the core of the knowledge about water quality trends, current overall conditions and movement of pollutants from place to place in the estuarine system of the Hudson-Raritan Estuary and Long Island Sound. Moreover, it is the only agency with the implemented mission of using the data base for coordinated regulatory and implementation purposes in order to improve and maintain water quality.

Although it was formed in 1936, historically the responsible States have failed to provide the funding levels necessary to permit the commission to fulfill its mandate.

Yet, even with the comparatively small budget that ISC has received in recent years it has still played a leading role in many of the important matters dealing with pollution of the waters in the region and an increasing role in air pollution as well.

Last year, in 1984, a great deal of controversy took place over the amendment offered by our esteemed chairman of the Public Works and Transportation Committee dealing with the raw sewage that was dumped by New York City into the New York Harbor area. It was the ISC that had the prime responsibility of monitoring the waste discharges from the lower Hudson and New York Harbor that flows into the New Jersey waters of the Raritan Bay and the coast. This has been critical to New Jersey as it has impacted the recreational and fishing uses of its waters.

In the mid-1970's, the ISC traversed most of its district by boat on regular routes and schedules approximately 16 to 18 times per year. On those trips water samples were taken and brought to the commission's lab and analysed for the conventional parameters. Operating on a shoestring budget, the commission was forced to neglect areas even then, such as central Long Island Sound and the northern most part of its district between Yonkers and the Bear Mountain Bridge.

The commission even had to secure older remote automatic monitoring stations by lease from the EPA. These were potentially valuable but in every poor condition. ISC serviced the monitors and kept the system running with the bare minimum of resources.

Despite its substantial needs in the mid-1970's, ISC performed its functions at a reasonable level, better at that time then since then. In the mid-1970's the commission inspected over 450 publicly owned treatment works [POTW's] and performed analyses each year. This number is now down to approximately 250 today. Perhaps even more significant is that private dischargers have never been adequately sampled and inspected and the underfunded levels of ISC prohibited all but very little from being done with the industrial facilities. No private facilities have been monitored this year due to lack of resources. Private dischargers should be kept under constant surveillance and POTW's need adequate coverage. Among other things, the amount of toxics that may be discharged into the waterways cannot be discovered at the present time. The minimum objective of the commission would be to inspect every private discharger and analyze its effluents at least once per year.

Lack of funds has also affected the boat runs. Recently these have been mostly replaced by helicopter flights. These are more expensive per hour, but they can make traversals so much more rapidly that they are worth it in terms of efficiency. Nevertheless, the traversals are now down to four per year. They would undoubtedly be even fewer, except that ISC was able to borrow a federally owned helicopter from EPA. However, scheduling is contingent upon EPA's needs and runs are sometimes in jeopardy because other claims take precedence over the ISC.

ISC provides the only integrated, regionwide data base for water quality in its area. If the deterioration in its program is allowed to continue, proper knowledge of current treatment plants and in-stream effluent and water quality conditions will be lost and the historic data base for planning and regulatory purposes will become progressively outdated. Enforcement will suffer badly.

ISC operations benefit all three States signficantly. For example, the ISC has ordered sewer plant operators in the tristate region to begin year round disinfecting of waste water startng July 1986. Disinfecting waste water is presently only done during warm weather months. This program will help clean up the region's fresh and salt waters and should lead to a reopening of coastal shell fishing beds. It should additionally expand the commercial fishing industry on Long Island and in southern Connecticut and coastal New Jersey. New jobs and economic growth will be generated.

Based upon data and recommendations from the ISC, EPA denied applications from five communities for waivers to permit them to continue dumping raw sewage into the waters of the New York-New Jersey metropolitan area. The ISC opposed all those municipalities and deemed those waters to be too environmentally sensitive to accept sewage effluent treated at less than the secondary level of treatment.

While addressing the problems of water pollution occupies about 75 to 80 percent of the commission's time and resources, ISC also performs monitoring of air pollution. It has been forced to close down a number of its monitoring stations and now has no inspectors in the field between midnight and 8 a.m. The abusers are well aware of the absence of monitoring during those hours and that is the time that they choose to release their deadly booty.

I fully recognize that there has been some opposition to the increased funding levels provided by this legislation before us today by the States involved and their environmental components. That is a sad fact because those are the very agencies which should be the strongest supporters of this funding provision.

I am personally familiar with the functioning of the ISC and I have the highest regard for the job which the agency is performing with very little funding. A $2 million budget may at first blush seem like a lot of money compared to the meager sums allocated each year in the past by the various States, but when we look at what the ISC is expected to perform, this is a very modest sum indeed.

For instance, in air pollution complaints in 1984, the ISC received 1,790 complaints. These citizen complaints are from people who are frightened by the overpowering odors which persist. In my area, citizens do not call the State health department or the department of environmental conservation, or any other health-related agency. The only agency which has been perceived as responsive has been the ISC. This places tremendous burden on a commission which is already overburdened.

We only have to look at the funding levels over the past years to realize how difficult it is to plan ahead in the face of such funding uncertainty. It is especially difficult to run an agency each year if financial resources are not guaranteed to be forthcoming.

The purpose of providing annual funding for the ISC is to: First, insulate the commission from the political pressures it must confront in order to do a good job; and second, increase the levels of funding to an amount which will permit the commission to conduct the round-the-clock monitoring so desperately needed and to continue its difficult mission of cleaning up the estuaries to fishable and swimmable levels.

Finally, I will point out that the funding provision will not require any additional Federal funding. The concept provides a passthrough so that dollars allocated will come out of State grants. This funding is long overdue and I can claim with confidence that its results benefit all three States—New York, New Jersey, and Connecticut. There will be no losers, only winners.

Mr. RAHALL. Mr. Chairman, as a member of the Committee on Public Works and Transportation, I am pleased to rise in support of the committee amendments to H.R. 8.

One of these amendments would add a new section 19 regarding coal reming operations to the bill as reported by the committee and is of great interest to those with a concern for the environment in the coal mining regions of this Nation.

As the author of this provision, I am pleased to say that it is aimed at providing the coal industry with an incentive to remine and reclaim abandoned coal mine lands.

Today, there is an excess of 1 million acres of abandoned coal mine lands with the vast majority located in the Appalachian region. While the Surface Mining Control and Reclamation Act of 1977 created an abandoned mine reclamation program to address the problems created by coal mines left in an orphaned state prior to enactment of the 1977 statute, it is expected that this program—funded by a tax assessed on the coal industry—will resolve only about 20 percent of the problem areas.

As such, from a water quality perspective, many of these abandoned mine lands are currently discharging pollutants and will continue to do so into eternity unless the coal industry can be enticed into remining, and as such, reclaim these lands.

Industry, in many instances, has not been prone to remine abandoned coal mine sites because it would then become liable for treating the preexisting discharges. Treating these discharges is often technically or economically infeasible, especially for the small coal operator.

The provision on remining being offered today is intended to provide the incentive the industry needs to remine and reclaim abandoned coal mine sites.

Under the amendment which I have authored and which is being offered by the committee to H.R. 8, the Administrator, or a State which has permitting authority under section 401(b), may issue an NPDES permit which modifies section 301(b)(2)(A) requirements for the coal mining industry for the level of pH in any preexisting discharge and for preexisting discharges of iron and manganese in situations where a coal operator intends to remine an abandoned coal mine site.

The coal operator would, however, have to apply best available technology economically achievable on a case-by-case basis to these preexisting discharges, using best professional judgment, as well as practices required by the Surface Mining Control and Reclamation Act of 1977. This requirement would replace the BAT and BCT requirements contained in the national guidelines for the specified discharges, but would still lead to the inclusion of specific, albeit modified, numerical effluent limitations in the applicant's permit. This process should retain enough flexibility so that the permit would address either mass loadings or concentration levels of the pollutants, of both. It must be noted that within this context, we are not applying the national standards as defined by section 301(b)(2)(A) of the Federal Water Pollution Control Act, but, rather, a case-by-case application of the best available control technology economically achievable through the use of best professional judgment. It is intended that through the use of best professional judgment, an incentive will be provided to the applicant to remine abandoned coal mine sites.

The permit applicant would have to affirmatively demonstrate to the Administrator or the State, as the case may be, that the coal remining operation will result in the potential for improved water quality. It is expected that the applicant would indicate how the reclamation of the site after completion of the remining activity and/or treatment of the discharge would improve water quality over that existing prior to the remining activity. In addition, the provision requires that the level of pH in any preexisting discharge and preexisting discharges of iron and manganese do not exceed the levels being discharged from the site before the coal remining operation began and that in no event may discharges from the site exceed State water quality standards. There criteria would have to be satisfied during consideration of the reclamation bond release as provided under the Surface Mining Control and Reclamation Act of 1977.

The guiding consideration behind this provision is that its implementation provide an incentive to the coal industry to remine abandoned coal mine lands. Obviously, for situations not addressed by this amendment, the applicable BAT and BCT standards would continue to apply. Finally, it should be noted that new discharges created as a result of remining would not become preexisting discharges when the mine is re-permitted.

Mr. Chairman, a similar version of this provision passed the House on June 26, 1984, during the last Congress, as part of H.R. 3282 [daily ed.]. At that time, the distinguished chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona MORRIS UDALL, and myself engaged in a colloquy to establish additional legislative history concerning the remining amendment. That colloquy, printed in the CONGRESSIONAL RECORD of June 26, 1984, on page H6910 [daily ed.], is applicable to the coal remining amendment being

considered today and shoud be considered as part of the legislative history behind this amendment to H.R. 8.

I would also at this time like to provide some background on another provision of the committee amendments which would create a program to address water quality which has deteriorated as a result of high acidity that may reasonably be due to acid deposition or acid mine drainage.

The formulation of this provision as it relates to acid deposition came about during the last Congress due to the concerns of the Subcommittee on Water Resources chairman, ROBERT ROE; the gentleman from Massachusetts, BRIAN DONNELLY; and myself, over those bodies of water containing high acidity harmful to aquatic life. This year, I proposed to expand the program to include acidity resulting from acid mine drainage which is a major environmental problem in the Appalachian region.

This amendment would authorize a State grant program of $25 million per year for 5 fiscal years with the funds distributed by the EPA Administrator in consultation with the Secretary of the Interior. The funds would be used by the States to mitigate the harmful effects of acid deposition or acid mine drainage to surface waters through, but not limited to, innovative methods of neutralizing and restoring the buffering capacity of those waters and methods of removing toxic substances mobilized by high acidity in those waters.

I would like to comment on the problem of acid mine drainage which is a matter of concern to me not only as a Representative of a coal-producing region, but as chairman of the Subcommittee on Mining and Natural Resources of the Committee on Interior and Insular Affairs.

It is my intention that grants made under this program to mitigate the effects of acid mine drainage on streams, rivers, and lakes be directed at those sites where the cause of the acidity is from abandoned coal mine sites. Abandoned coal mine lands exist throughout the Appalachian region especially, from which effluents of untreated mine drainage and seepage result in the degradation of surface water quality. In this regard, it is essential that in carrying out this aspect of the program, the Bureau of Mines, the U.S. Geological Survey, and the Office of Surface Mining are consulted.

The Bureau of Mines is developing expertise in researching solutions to mitigate acid mine drainage through technological solutions which the States may find useful in their efforts. The USGS cooperative Federal/State coal hydrology program has as its objective the assessment of hydrological conditions related to coal mining and reclamation. This information also would be helpful to the States in surveying waters to be addressed by this program.

It should be noted that the amendment seeks to mitigate the harmful effects of acidity on surface waters, and, in this regard, funding may be used to address the source of the acidic discharge at the abandoned mine site, or directed at the impacted stream or lake itself. With respect to the former, it is my intention as the author of the amendment as it applies specifically to acid mine drainage, that States use this funding to complement moneys received under their State reclamation program grants through the Abandoned Mine Reclamation Fund Program administered by the Office of Surface Mining. Often, these funds are used solely to reclaim an abandoned mine site with respect to recontouring the land and insuring revegetation without addressing any remaining water quality problems.

In this regard, the work of the Acid Mine Drainage Technical Advisory Committee may be of great assistance to the States. This committee, which has received funding from OSM, works under the auspices of the West Virginia Department of Natural Resources and is tackling the problem of acid mine drainage in a highly commendable manner. Indeed, West Virginia has been a leader in efforts to mitigate the problems created by acid mine drainage, and the work of West Virginia University should also be noted.

Further, any projects dealing with acid mine drainage initiated under OSM's new AML research and development program may also be of interest to States involved in the program envisioned by this amendment. The Bureau of Mines also is working on techniques which may be applied at AML sites.

Turning to mitigating the effects of acidity on the surface waters themselves, the West Virginia Department of Natural Resources has developed a limestone drum system powered by the stream flow which serves to reduce water acidity. Continued improvements to, and applications of, this technology should be considered by the States in their programs.

Mr. Chairman, I believe the inclusion of this amendment to H.R. 8 will greatly assist efforts to mitigate surface water acidity. I would like to extend my sincere appreciation to the distinguished chairman of the Subcommittee on Water Resources, BOB ROE, for his understanding of the situation I am seeking to address through this amendment, and the amendment dealing with coal remining.

● Mr. LENT. Mr. Chairman, section 312 of the Federal Water Pollution Control Act addresses marine sanitation devices [MSD's] for all vessels. This provision provides the exclusive authority for requiring these devices on board vessels to regulate vessel sewage. As a consequence, the States are completely preempted from acting in this area. It has been brought to my attention that because of the lack of resources and funding of the Coast Guard, enforcement of MSD requirements has been neglected due to the higher priority of their other responsibilities such as search and rescue and drug law enforcement.

The States, however, have identified specific problems associated with certain vessels and have been frustrated in their inability to act. For example, on Long Island, houseboats have become very popular as an alternative means of housing. However, many of these vessels are virtually stationary barges and cause serious sewage discharge problems in those waterways. The States have been prevented from regulating these houseboats because they technically fall within the definition of vessels and, accordingly, the States have been preempted by section 312.

The change already made by the committee amends the preemption provision in subsection (f) of section 312 by removing houseboats from the definition of vessels. Thus, the States will be able to take action when a vessel's discharge poses a threat to the local environment or public health if it is used as a houseboat. All other provisions of the Federal MSD Program would remain in effect. Only those vessels that are located within a State and used as a residence but not as a means of transportation would be affected by this amendment.

Further clarification contained in the Howard amendment would permit a State to act if a vessel is not "primarily" used as a means of transportation. Occasionally, these vessels are sailed from one place to another and, thus, technically used as a means of transportation. With this clarification, mere incidental use will not provide a loophole to circumvent regulation by a State. I should point out that the normal commercial or recreational vessel would continue to be covered under the auspices of the Federal regulation and be unaffected by this provision.

I want to thank Chairman ROE and HOWARD, and ranking members Mr. STANGELAND and Mr. SNYDER, as well as their staffs, for their assistance and cooperation in developing this change to section 312 which is so important to the States. I urge my colleagues to support this amendment and give the States the ability to solve their own local problems with regard to houseboat sewage discharges.●

● Mrs. BURTON of California. Mr. Chairman, I am pleased to rise in support of the committee amendment to H.R. 8, the Water Quality Renewal Act of 1985.

Chairman HOWARD, Subcommittee Chairman ROE, Mr. MINETA and the many others who contributed to perfecting this package are to be commended for their steady attention and effort to this cause.

I particularly want to praise the work of the Committee on Public Works and Transportation for developing a national program for the maintenance of water quality in estuaries. Estuaries, together with their surrounding saltwater marshes and life-carrying tributaries, are unique ecosystems of great value to man and nature. Yet, for too long, estuaries have been regarded as limitless reservoirs for municipal and industrial wastes. More than 1 million acres of estuarine habitat have been lost nationwide since 1960 and estuaries around the country are facing serious ecological crises.

One of those estuaries is of great concern to me—San Francisco Bay, the largest inland estuary on the west coast. The bay is in serious trouble. Striped bass populations have plummeted 80 percent in the past two decades. Salmon, trout, shad, and dungeness crab populations have also seriously declined. Shellfish have been found in the bay with levels of lead that are the highest ever recorded in scientific literature. The amounts of silver, copper, and mercury found in mussels in a South Bay tidal estuary are among the highest in the Nation.

Ninety-five percent of the bay's original wetlands have been converted to nonwetlands uses, depriving the bay of their vital pollution filtration and wildlife habitat functions.

A recent report produced by the San Francisco-based Citizens for a Better Environment found that municipal sewage treatment plants and industries discharge approximately 860,000 pounds of toxic pollutants, including benzene, toluene, heavy metals, PCB's and industrial solvents, as well as 12 million pounds of oil and grease into the bay every year. A study by the Association of Bay Area Governments identified storm sewers and their loadings of bacteria, fertilizers, metals, gasoline, and oil as a serious source of bay pollution. State and Federal water projects have already dammed and diverted roughly 50 percent of the bay's vital freshwater flows, which would otherwise carry nutrients into the bay system and flush its pollutants out to sea. According to one expert, no more than 30 percent of an estuarine system can be diverted without significantly affecting its fisheries and wildlife.

The proposed committee amendment will enable the Environmental Protection Agency to work closely with State and local officials to protect one of the country's greatest natural resources, the San Francisco Bay estuary. This coordinated program is needed to develop comprehensive solutions to the numerous threats within the estuarine zone that impact the environmental quality of San Francisco Bay.

The San Francisco Bay estuary is an immensely valuable and productive resource. Its estuarine habitat, formed by the confluence of fresh and saltwaters, supports a variety of fish, shellfish, waterfowl, shore birds, and marine mammals. Several fish species of commerical and recreational importance, includng salmon, herring, striped bass, and sturgeon use the bay as nursing grounds or as a migration route for upstream spawning. Dungeness crab, and some bay mussels and clams are also harvested.

Bay wetlands and mudflats provide critical habital for wildlife, including rare and endangered species. The bay also offers tremendous recreational benefits, such as sailing, swimming, and fishing; esthetic enjoyment and opportunities for scientific study.

The physicial dimensions of the bay system are staggering. Nearly 40 percent of the land area in California, or about 40 million acres, drains through the delta, San Francisco Bay, and out the Golden Gate. In comparison, the Chesapeake Bay drainage basin consists of about 41 million acres. Two major river systems, the Sacramento and the San Joaquin, contribute about 90 percent of the estuary's fresh water flow. They drain through California's Central Valley, perhaps the most productive agricultural region in entire country. The bay itself covers about 400 square miles, with depths ranging from just a few feet in the South Bay to more than 300 feet at the Golden Gate.

The San Francisco Bay amendment to H.R. 8 would create a new central role for the Environmental Protection Agency to coordinate and expand efforts to assess the bay's problems and develop timely solutions.

Today, a complex, fragmented jurisdictional morass hinders effective protection of the bay estuary. Given the tremendous size of the bay's estuarine zone with California, the number of government entities with responsibility for bay-related issues is not surprising. Drainage from about 40 separate counties passes through the bay. In addition to three separate agencies with overlapping bay water quality authority, numerous other local, regional, State, and Federal agencies deal with fish and wildlife issues, water resource development, bay fill, pesticide use, oil spill response, and other elements of bay protection. Beyond these fragmented control programs, there is no one central authority for coordination of San Francisco Bay research and monitoring programs or data management. Information crucial to bay policymakers is scattered among various government, academic, and private institutions.

As clearly recognized by the National Estuarine Program proposed to be established under H.R. 8, estuaries need special protection programs beyond the minimum requirements of the existing Clean Water Act. There's not a better candidate for Federal attention under this program than the San Francisco Bay estuary. Although H.R. 8 addresses the needs of Chesapeake Bay, Narragansett Bay, and other estuaries, I hope this same special consideration might be applied to the San Francisco Bay estuarine zone.

It is also my hope that whatever standards, practices, or limitations are recommended in the management plan be as stringent or more stringent than the controls that are currently in effect for the bay estuarine zone under other provisions of the Clean Water Act. In other words, that the corrective actions recommended in the management plan for the bay watershed are to supplement, not contradict or weaken existing controls.

The San Francisco Bay amendment to H.R. 8 is necessary to ensure that EPA participates in a comprehensive effort to protect the sensitive environment of the San Francisco Bay estuary and improve its water quality.

I urge my colleagues to support this measure.●

Mr. GILMAN. Mr. Chairman, I rise in strong support of the committee amendments to H.R. 8, the Water Quality Renewal Act of 1985, legislation reauthorizing the Clean Water Act for fiscal years 1986 through 1994. I would like to commend the gentleman from New Jersey, the distinguished chairman of the Committee on Public Works and Transportation, Mr. HOWARD, for offering these amendments making important improvements to the bill as it was reported out of his committee. I would also like to take this opportunity to thank the gentleman from New Jersey, the chairman of the Subcommittee on Water Resources, Mr. ROE, and the gentleman from Kentucky, the committee's distinguished ranking minority member, Mr. SNYDER, for their successful efforts to achieve bipartisan agreement on this amendment package and for their part in bringing this vitally important legislation affecting both the public health and the environment before us today.

In 1972, Congress adopted the Federal Water Pollution Control Act amendments and in so doing established as its major goal, the reduction and ultimate elimination of discharges of pollutants from municipal sewage systems and industrial plants. Indeed Congress' intent at that time was to make our Nation's waters "swimmable and fishable"; by 1983. While tremendous gains have been made, and while I think we can all attest to sharing a heightened awareness and respect for

the beauty of our Nation's waterways and the importance of maintaining that beauty, we have yet to achieve our initial goal. I believe that H.R. 8, if adopted with the committee amendments, will allow us to achieve that goal.

In reviewing the committee's amendment package I am pleased to note the inclusion of language permitting citizen suits against Clean Water Act violators in certain circumstances. The bill reported out of committee gave EPA new authority to assess administrative civil penalties without going to court. While this provision effectively prohibited any citizens suits against such violators once EPA or a State has begun civil administrative action, the committee amendment permits citizens to sue in civil court to abate a violation in the case of a second or ongoing infraction of the Clean Water Act. The addition of this provision is a fair and reasoned compromise and will make those individuals and entities who continue to violate the Clean Water Act answerable in court as well as at the administrative level.

I would also like to commend the committee for strengthening their language with regard to examptions for storm water discharge permits. Under existing law, the EPA must require National Pollution Discharge Elimination System [NPDES] permits for any entity which has storm water runoff on their property. While it was certainly not the intent of Congress to require every school, grocery, and home to require a permit regardless of the environmental hazard they may or may not pose, it is important that we identify and require permits from those sources that do pose a threat to public health and the environment. The amendment being offered by the committee requires EPA to conduct a study and submit their report to Congress in a timely manner on methods for regulatory storm water discharge. It is my understanding that this language enjoys the support of environmentalists and industrialists alike. I commend the committee for successfully addressing this issue.

The committee amendment will also strengthen the provisions in H.R. 8 to prohibit the relaxation of existing pollution control requirements when a permit is reissued, except in unusual circumstances. I strongly support this antibacksliding amendment. It makes good economical and environmental sense that those who have installed control technologies and developed treatment practices be required to continue to use those facilities and practices. I would however, like to take this opportunity to express my concern to the committee members regarding the sunset provision in this antibacksliding language and encourage those members who will be participating in the House-Senate conference to closely consider eliminating this sunset so that we can continue to go forward and not backward in our efforts to control the discharge of pollutants into our waters.

The committee's amendment package also creates an Acid Mitigation Program providing money to States to reduce acidity in lakes and other surface waters; specifies the conditions under which dischargers may obtain variances from national categorical pretreatment standards; and authorizes $10 million per year over a 3-year period for EPA to conduct a study of the New York and New Jersey harbor areas and to make grants for an Interstate Management Program.

While speaking in support of the committee's package, I would also like to take a moment to outline several other major provisions contained in H.R. 8 to improve our efforts to restore and maintain the quality of our waters.

This legislation authorizes $21 billion for the construction of wastewater treatment plants with the grant money falling into two categories. H.R. 8 authorizes $12 billion for the existing Construction Grants Program, and another $9 billion for a program enabling States to establish State revolving loan funds. The Sewer Grant Construction Program has been an integral component in our plan to achieve significant reductions in pollution discharge and I am pleased to note that the committee has extended this program at its current funding level. In my own State of New York the Sewer Grant Construction Program has assisted hundreds of local governments and municipalities to construct sorely needed wastewater treatment facilities, thereby enabling New York to do our part to control and eliminate pollution of our Nation's waters. Indeed, the continuation of this program will allow those municipalities who have not yet taken advantage of the Grant Program or who need additional assistance, to do so within the next 9 years. The revolving loan fund in turn, will provide moneys for the States to make loans, loan guarantees, payments to reduce interest on loans, bond interest subsidies, and bond guarantees to municipalities and agencies after the Federal Grant Program ends. The creation of a revolving loan fund will insure the continued viability of the Sewer Construction Program while replacing the Grant Program with a loan program; concomitant with our pledge to cut Government spending.

H.R. 8 also authorizes $30 million for the Clean Lakes Program. In that respect I am pleased to note that the committee has chosen Greenwood Lake, which I am privileged to represent, as a site for one of two demonstration projects under this program. H.R. 8 authorizes $10 million for the removal of silt, stumps, and other obstructions from these two projects and directs EPA to submit a report to the relevant House and Senate committees, along with further recommendations for measures to improve the water quality of Greenwood Lake. I earnestly thank my colleagues for selecting Greenwood Lake for participation in this project for both my constituents and all the residents of the tristate area who will once again be able to fully utilize this beautiful lake.

The Water Quality Renewal Act of 1985 also authorizes $150 million annually through 1990 for a new program to control nonpoint sources of pollution and directs each State Governor to prepare and submit to EPA a report that identifies areas within the State that: First, will not be able to meet clean water requirements in part due to nonpoint pollution; second, describes the pollutants within these areas; and third, identifies the best management practices and measures to control nonpoint sources of pollution. I am especially pleased with the establishment of this new program as nonpoint source pollution is believed to be responsbile for half of all water pollution. I am hopeful that this program will aid us significantly in our ongoing efforts to address and abate nonpoint source pollution.

Last year this House adopted similar legislation, H.R. 3232 by a sizable margin. Unfortunately the other body was unable to act on this legislation prior to adjournment and another year passed without Congress reauthorizing the Clean Water Act. H.R. 8 is, I believe, an even better bill and deserves our strong support. Accordingly, I urge my colleagues to support this measure inclusive of the committee amendments, so that we can continue our efforts to make our Nation's waters "swimmable and fishable" within the next 10 years.

The CHAIRMAN. The question is on the amendments offered by the gentleman from New Jersey [Mr. HOWARD].

The amendments were agreed to.

The CHAIRMAN. Pursuant to the rule, the substitute committee amendment recommended by the Committee on Public Works and Transportation now printed in the reported bill as modified by the amendments offered by the gentleman from New Jersey [Mr. HOWARD] shall be considered as an original bill for the purpose of amendment under the 5-minute rule by sections, and each section shall be considered as having been read. It shall also be in order to consider an amendment printed in the CONGRESSIONAL RECORD of July 16, 1985, by and if offered by Representative JONES of North Carolina, which shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS; AMENDMENTS TO FEDERAL WATER POLLUTION CONTROL ACT; DEFINITION OF ADMINISTRATOR.

(a) SHORT TITLE.—This Act may be cited as the "Water Quality Renewal Act of 1985".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents; amendments to Federal Water Pollution Control Act; definition of Administrator.
Sec. 2. Authorizations of appropriations.
Sec. 3. Authorizations for construction grants.
Sec. 4. Compliance deadlines.
Sec. 5. Individual control strategies for toxic pollutants.
Sec. 6. Policy for control of nonpoint sources of pollution.
Sec. 7. Control of nonpoint sources of pollution.
Sec. 8. Lake restoration guidance manual.
Sec. 9. Small flows clearinghouse.
Sec. 10. Eligible categories of projects.
Sec. 11. Time limit on resolving certain disputes.
Sec. 12. Federal share.
Sec. 13. Agreement on eligible costs; grantee certification of treatment process; turnkey contracts.
Sec. 14. Grant conditions; user charges on low-income residential users.
Sec. 15. Allotment of construction grant funds.
Sec. 16. Grants to States for establishment of water pollution control revolving funds.
Sec. 17. Innovative technology compliance deadlines for direct dischargers.
Sec. 18. Variances from the application of effluent limitations.
Sec. 19. Water quality criteria.
Sec. 20. Test procedures.
Sec. 21. Pretreatment standards.
Sec. 22. Criminal penalties.
Sec. 23. Civil penalties.
Sec. 24. Administrative penalties.
Sec. 25. Clean lakes.
Sec. 26. NPDES permits.
Sec. 27. Audits.
Sec. 28. Commonwealth of the Northern Mariana Islands.
Sec. 29. Agricultural stormwater discharges.
Sec. 30. Reports to Congress.
Sec. 31. Newtown Creek, New York.
Sec. 32. San Diego, California.
Sec. 33. Naco, Arizona.
Sec. 34. Limitation on discharge of raw sewage by New York City.
Sec. 35. Deer Island treatment plant, Massachusetts.
Sec. 36. Oakwood Beach and Red Hook projects, New York.
Sec. 37. Chippewa Township, Pennsylvania.
Sec. 38. Des Moines, Iowa.
Sec. 39. Wastewater reclamation demonstration.
Sec. 40. Boston Harbor and adjacent waters.
Sec. 41. Treatment works in Washington State.
Sec. 42. Improvement projects.
Sec. 43. Study of regulation of de minimis discharges.
Sec. 44. Study of effectiveness of innovative and alternative processes and techniques.
Sec. 45. Water quality improvement study.
Sec. 46. Study of testing procedures.
Sec. 47. Study of pretreatment of toxic pollutants.
Sec. 48. Sulfide corrosion study.
Sec. 49. Pulp mill study.
Sec. 50. Study of rainfall induced infiltration into sewer systems.
Sec. 51. Study of pH in discharges from mining operations.
Sec. 52. Study of pollution in Lake Pend Oreille, Idaho.
Sec. 53. Limitation on payments.

(c) AMENDMENT OF FEDERAL WATER POLLUTION CONTROL ACT.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Water Pollution Control Act.

(d) DEFINITION.—For purposes of this Act, the term "Administrator" means the Administrator of the Environmental Protection Agency.

Mr. HOWARD. Mr. Chairman, I ask unanimous consent that the remainder of the committee amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The text of the remainder of the bill, beginning with section 2, is as follows:

SEC. 2. AUTHORIZATIONS OF APPROPRIATIONS.

(a) RESEARCH AND INVESTIGATIONS.—Section 104(u) is amended—

(1) in clause (1) by inserting after "September 30, 1982," the following: "and not to exceed $22,770,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,";

(2) in clause (2) by striking out "and $3,000,000 for fiscal year 1982," and inserting in lieu thereof the following: "$3,000,000 for fiscal year 1982, and $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,"; and

(3) in clause (3) by striking out "and $1,500,000 for fiscal year 1982," and inserting in lieu thereof the following: "$1,500,000 for fiscal year 1982, and $1,500,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(b) GRANTS FOR PROGRAM ADMINISTRATION.—Section 106(a)(2) is amended by inserting after "1982" a comma and the following: "and $75,000,000 per fiscal year for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, and 1990".

(c) TRAINING GRANTS AND SCHOLARSHIPS.—Section 112(c) is amended by striking out "and $7,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof the following: "$7,000,000 for the fiscal year ending September 30, 1982, and $7,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(d) AREAWIDE PLANNING.—Section 208(f)(3) is amended by striking out "and" after "1974," and after "1980," and by inserting after "1982" the following: ", not to exceed $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and not to exceed $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990".

(e) RURAL CLEAN WATER.—Section 208(j)(9) is amended by striking out "and" after "1981," and by inserting after "1982," the following: "$100,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(f) INTERAGENCY AGREEMENTS.—Section 304(k)(3) is amended by striking out "1983" and inserting in lieu thereof "1985 and $50,000,000 per fiscal year for the fiscal years 1986 through 1990".

(g) CLEAN LAKES.—Section 314(c)(2) is amended by striking out "and $30,000,000 for fiscal year 1982" and inserting in lieu thereof the following: "$30,000,000 for fiscal year 1982, and $30,000,000 per fiscal year for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, and 1990".

(h) GENERAL AUTHORIZATION.—Section 517 is amended by striking out "and $161,000,000 for the fiscal year ending September 30, 1982" and inserting in lieu thereof "$161,000,000 for the fiscal year ending September 30, 1982, $160,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and $110,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990".

SEC. 3. AUTHORIZATIONS FOR CONSTRUCTION GRANTS.

Section 207 is amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

SEC. 4. COMPLIANCE DEADLINES.

(a) PRIORITY TOXIC POLLUTANTS.—Section 301(b)(2)(C) is amended to read as follows:

"(C) for all toxic pollutants referred to in table 1 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives compliance with effluent limitations in accordance with subparagraph (A) of this paragraph as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established;".

(b) OTHER TOXIC POLLUTANTS.—Section 301(b)(2)(D) is amended by striking out "not later than three years after the date such limitations are established" and inserting in lieu thereof "as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established".

(c) CONVENTIONAL POLLUTANTS.—Section 301(b)(2)(E) is amended to read as follows:

"(E) for all pollutants identified pursuant to section 304(a)(4) of this Act compliance with effluent limitations for categories and classes of point sources, other than publicly owned treatment works, which shall require application of the best conventional pollut-

ant control technology, as determined in accordance with regulations issued by the Administrator pursuant to section 304(a)(4) of this Act, as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established;".

(d) OTHER POLLUTANTS.—Section 301(b)(2)(F) is amended to read as follows:

"(F) for all pollutants (other than those subject to subparagraph (C), (D), or (E) of this paragraph) compliance with effluent limitations in accordance with subparagraph (A) of this paragraph as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established.".

(e) DEADLINES FOR REGULATIONS FOR CERTAIN TOXIC POLLUTANTS.—The Administrator shall promulgate final regulations establishing effluent limitations in accordance with sections 301(b)(2)(A) and 307(b)(1) of the Federal Water Pollution Control Act for all toxic pollutants referred to in table 1 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives which are discharged from the categories of point sources in accordance with the following table:

Category	Date by which the final regulation shall be promulgated
Foundries	June 30, 1985.
Nonferrous metals forming.	June 30, 1985.
Organic chemicals and plastics and synthetic fibers.	March 31, 1986.
Pesticides	August 31, 1985.
Nonferrous metals (phase II).	July 31, 1985.

SEC. 5. INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.

(a) IN GENERAL.—Section 304 is amended by adding at the end thereof the following new subsection:

"(l) INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.—

"(1) STATE LIST OF NAVIGABLE WATERS.—Not later than one year after the date of the enactment of this subsection, each State shall submit to the Administrator for review, approval, and implementation under this subsection—

"(A) a list of all navigable waters in such State for which the State does not expect the applicable standard under section 303 of this Act will be achieved after the requirements of sections 301(b), 306, and 307(b) are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a);

"(B) for each segment of the navigable waters included on such list, a determination of the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source; and

"(C) for each such segment, an individual control strategy which the State determines will produce a reduction in the discharge of toxic pollutants from point sources identified by the State under this paragraph through the establishment of effluent limitations under section 302 of this Act and water quality standards under section 303(c)(4)(B) of this Act, which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of the establishment of such strategy.

"(2) APPROVAL OR DISAPPROVAL.—Not later than 120 days after the last day of the one-year period referred to in paragraph (1), the Administrator shall approve or disapprove the control strategies submitted under paragraph (1) by any State.

"(3) ADMINISTRATOR'S LIST OF NAVIGABLE WATERS.—If a State fails to submit control strategies in accordance with paragraph (1) or the Administrator does not approve the control strategies submitted by such State in accordance with paragraph (1), then, not later than one year after the last day of the period referred to in paragraph (2), the Administrator, in cooperation with such State and after notice and opportunity for public comment, shall publish in the Federal Register a list of all navigable waters in such State for which the Administrator does not expect the applicable standard under section 303 of this Act will be achieved after the requirements of sections 301(b), 306, and 307(b) are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a). For each segment of the navigable waters included on such list, the Administrator shall determine the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source. At a minimum, the Administrator shall consider for listing under this subsection any navigable waters for which any person submits a petition to the Administrator for listing not later than 120 days after such last day.

"(4) ADMINISTRATOR'S DEVELOPMENT AND PUBLICATION.—Not later than one year after the date of publication of the list required by paragraph (3) of this subsection, the Administrator, in cooperation with the States, shall issue proposed regulations setting forth, for each segment of the navigable waters listed under paragraph (3), an individual control strategy. Each individual control strategy shall produce a reduction in the discharge of toxic pollutants from point sources identified by the Administrator under paragraph (3) through the establishment of effluent limitations under section 302 of this Act and water quality standards under section 303(c)(4)(B) of this Act, which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of promulgation of the final strategy. Not later than 180 days after issuing the proposed regulations, the Administrator shall promulgate each individual control strategy as a final regulation.

"(5) IMPLEMENTATION.—The Administrator shall implement each individual control strategy established or promulgated under this subsection by modifying or requiring the modification of permits under section 402 of this Act.".

(b) JUDICIAL REVIEW.—Section 509(b)(1) is amended by striking out "and (F)" and inserting in lieu thereof "(F)" and by inserting after "any permit under section 402," the following: "and (G) in promulgating any individual control strategy under section 304(l),".

SEC. 6. POLICY FOR CONTROL OF NONPOINT SOURCES OF POLLUTION.

Section 101(a) is amended by striking out "and" at the end of paragraph (5), by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding at the end thereof the following:

"(7) it is the national policy that plans for the control of nonpoint sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this Act to be met through the control of both point and nonpoint sources of pollution.".

SEC. 7. CONTROL OF NONPOINT SOURCES OF POLLUTION.

(a) IN GENERAL.—Title III is amended by adding at the end the following new section:

"SEC. 319. NONPOINT SOURCE CONTROL PROGRAMS.

"(a) STATE ASSESSMENT REPORTS.—

"(1) CONTENTS.—The Governor of each State shall prepare and submit to the Administrator for his approval, a report which—

"(A) identifies those portions of the navigable waters within the State which, as a result (in whole or in part) of pollution from nonpoint sources, are not meeting applicable water quality standards or the goals and requirements of this Act;

"(B) identifies those categories and subcategories of nonpoint sources which add significant pollution to each portion of the navigable waters identified under subparagraph (A) in amounts which contribute to such portion not meeting such water quality standards or such goals and requirements;

"(C) identifies and describes State and local programs for controlling pollution added from nonpoint sources to, and improving the quality of, each such portion of the navigable waters, including but not limited to those programs which are receiving Federal assistance under subsection (i); and

"(D) describes the process, including intergovernmental coordination and public participation, for identifying best management practices and measures to control each category and subcategory of nonpoint sources identified under subparagraph (B) and to reduce, to the maximum extent practicable, the level of pollution resulting from such category or subcategory.

"(2) INFORMATION USED IN PREPARATION.—Each report submitted under paragraph (1) shall be based on available information including, but not limited to, information available under sections 208, 303(e), 304(f), and 305(b) of this Act, and may include all or part of any water quality management program approved under section 208 or 303 of this Act.

"(b) STATE PLANS.—

"(1) IN GENERAL.—The Governor of each State shall prepare and submit to the Administrator for his approval—

"(A) a plan which such State proposes to implement in the first four fiscal years beginning after the date of submission of such plan for controlling pollution added from nonpoint sources to the navigable waters within the State and improving the quality of such waters; and

"(B) a report which (i) identifies each department, agency, or instrumentality of the United States and each department, agency, or instrumentality of the State which is likely to be engaging in, supporting, or providing financial assistance in each of such fiscal years for any activity or program in the State which, if carried out, would be inconsistent with implementation of such plan in such fiscal years, and (ii) recommends to the Administrator methods by which such Federal department, agency, or instrumentality could modify administration of such activity or program, and describes methods by which such State department, agency, or instrumentality intends to modify administration of such activity or

program, so that such activity or program is consistent with, and assists the State in implementation of, such plan.

"(2) SPECIFIC CONTENTS.—Each plan proposed for implementation under this subsection shall specify—

"(A) from among those portions of navigable waters significantly affected by pollution added from nonpoint sources, each portion and land area contributing such pollution with respect to which the State plans to assist, encourage, or require implementation of best management practices and measures in the first four fiscal years beginning after the date of submission of such plan;

"(B) the order in which, and the schedule under which, the State plans to assist, encourage, or require implementation of such practices and measures in such fiscal years;

"(C) from among those categories and subcategories of nonpoint sources of pollution which contribute to each portion specified under subparagraph (A) not meeting applicable water quality standards or the goals and requirements of this Act, the categories and subcategories with respect to which the State plans to assist, encourage, or require implementation of such practices and measures in such fiscal years and the relative contribution of such pollution by category and subcategory of such sources;

"(D) the best management practices and measures the implementation of which the State plans to assist, encourage, or require in each of such fiscal years to reduce pollution resulting from nonpoint sources and to improve water quality;

"(E) the methods (including, but not limited to, demonstration, enforcement, technical assistance, education, training, and cost-sharing programs), by category and subcategory of such sources of pollution, which the State plans to use to encourage, assist, or require implementation of such practices and measures in such fiscal years; and

"(F) sources of Federal and other assistance (other than assistance provided under subsection (i)) which will be available in each of such fiscal years for supporting implementation of such practices and measures and the purposes for which such assistance will be used in each of such fiscal years.

"(3) CERTIFICATION OF LEGAL AUTHORITY.—Each plan submitted by a State under this subsection shall be accompanied by a certification of the attorney general of the State or the chief attorney of any State water pollution control agency which has independent legal counsel that the laws of the State provide adequate authority to implement such plan or, if there is not such adequate authority, a list of such additional authority which will be necessary to implement such plan.

"(4) IMPLEMENTATION SCHEDULE.—The schedule required by paragraph (2)(B) shall establish for each category and subcategory of nonpoint sources of pollution specified under paragraph (2)(C) an expeditious time period for implementation of best management practices and measures specified under paragraph (2)(D) and shall indicate the estimated dates for implementation of such practices and measures.

"(5) UTILIZATION OF LOCAL AND PRIVATE EXPERTS.—In developing and implementing a plan under this subsection, a State shall, to the maximum extent practicable, utilize local public and private agencies and organizations which have expertise in control of nonpoint sources of pollution.

"(6) DEVELOPMENT ON WATERSHED BASIS.—A State shall, to the maximum extent practicable, develop and implement a plan under this subsection on a watershed-by-watershed basis.

"(c) ADMINISTRATIVE PROVISIONS.—

"(1) COOPERATION REQUIREMENT.—Any report required by subsection (a) and any plan and report required by subsection (b) shall be developed in cooperation with local, regional, and interstate entities which are actively planning for the implementation of non-point source pollution controls and have either been certified by the Administrator in accordance with section 208, have worked jointly with the State on water quality management planning under section 205(j), or have been designated by the State legislative body or Governor as water quality management planning agencies for their geographic areas.

"(2) TIME PERIOD FOR SUBMISSION OF REPORTS AND PLANS.—Each report and plan shall be submitted to the Administrator during the 270-day period beginning on the date of the enactment of this section; except that upon request of the Governor, the Administrator shall extend such period for not to exceed an additional 270 days.

"(3) FAILURE OF STATE TO SUBMIT REPORT.—If a Governor of a State does not submit the report required by subsection (a) during such period, the Administrator shall prepare a report for such State which makes the identifications required by paragraphs (1)(A) and (1)(B) of subsection (a).

"(d) CONSOLIDATION OF RECOMMENDATIONS FOR UNITED STATES AGENCIES.—The Administrator shall consolidate recommendations for modifications of activities and programs submitted by the States under subsection (b)(1)(B) and submit such consolidated recommendations to the appropriate departments, agencies, and instrumentalities of the United States. Each such department, agency, or instrumentality, to the maximum extent practicable and consistent with existing law, shall accommodate such recommendations and shall carry out its own activities and programs in a manner which is consistent with, and will assist implementation of, the plan submitted by the State under subsection (b) and approved by the Administrator under this section.

"(e) APPROVAL OR DISAPPROVAL OF REPORTS AND PLANS.—

"(1) DEADLINE.—Subject to paragraph (2), not later than 180 days after the date of submission to the Administrator of any report or plan under this section (other than subsections (i) and (j)), the Administrator shall either approve or disapprove such report or plan, as the case may be. The Administrator may approve a portion of a plan under this subsection. If the Administrator does not disapprove a report, plan, or portion of a plan in such 180-day period, such report, plan, or portion shall be deemed approved for purposes of this section.

"(2) PROCEDURE FOR DISAPPROVAL.—If, after notice and opportunity for public comment and consultation with appropriate Federal and State agencies and other interested persons, the Administrator determines that a plan submitted under subsection (b) or any portion thereof is not likely to satisfy, in whole or in part, the goals and requirements of this Act, that adequate authority does not exist, or adequate resources are not available, to implement such plan or portion, that the schedule for implementing such plan or portion is not sufficiently expeditious, or that the practices and measures proposed in such plan or portion are not adequate to improve the quality of navigable waters in the State and to reduce the level of pollution in navigable waters in the State resulting from nonpoint sources, the Administrator shall disapprove the plan or portion thereof with respect to which the Administrator makes such determination. The Administrator shall notify the State of such disapproval and request specific revisions of such plan or portion necessary to obtain approval of such plan or portion. Not later than 90 days after the date of such notification, the State shall submit to the Administrator for his approval under this subsection its revisions of such plan or portion.

"(f) LOCAL PLANS; TECHNICAL ASSISTANCE.—If a State fails to submit a plan under subsection (b) or the Administrator does not approve such a plan, a local public agency or organization which has expertise in, and authority to, control water pollution resulting from nonpoint sources in any area of such State which the Administrator determines is of sufficient geographic size may, with approval of such State, request the Administrator to provide, and the Administrator shall provide, technical assistance to such agency or organization in developing for such area a plan which is described in subsection (b) and meets the requirements of subsection (e). After development of such plan, such agency or organization shall submit such plan to the Administrator for his approval. If the Administrator approves such plan, such agency or organization shall be eligible to receive financial assistance under subsection (i) for implementation of such plan as if such agency or organization were a State for which a report submitted under subsection (a) and a plan submitted under subsection (b) were approved under this section. Such financial assistance shall be subject to the same terms and conditions as assistance provided to a State under subsection (i).

"(g) TECHNICAL ASSISTANCE FOR STATES.—Upon request of a State, the Administrator may provide technical assistance to such State in developing a plan under subsection (b) for those portions of the navigable waters requested by such State.

"(h) INTERSTATE MANAGEMENT CONFERENCE.—

"(1) CONVENING OF CONFERENCE; NOTIFICATION; PURPOSE.—If any portion of the navigable waters in any State which is implementing a plan approved under this section is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or part, of pollution from nonpoint sources in another State, such State may petition the Administrator to convene, and the Administrator shall convene, a management conference of all States which contribute pollution resulting from nonpoint sources to such portion. If, on the basis of information available to him, the Administrator determines that a State is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or part, of pollution from nonpoint sources in another State, the Administrator shall notify such States. The Administrator may convene a management conference under this paragraph not later than 180 days after giving such notification, whether or not the State which is not meeting such standards requests such conference. The purpose of such conference shall be to develop an agreement among such States to reduce the level of pollution in such portion resulting from nonpoint sources and to improve the water quality of such portion.

"(2) STATE PLAN REQUIREMENT.—Each State which contributes significant pollution from nonpoint sources to the portion of nav-

igable waters in amounts which contribute to such portion not meeting applicable water quality standards or the goals and requirements of this Act shall submit to the Administrator for his approval a plan referred to in subsection (b) to reduce the level of pollution in such portion resulting from nonpoint sources in such State and to improve the quality of such portion; except that if such State has an approved plan under subsection (b), such State shall revise such plan to reduce the level of pollution in such portion resulting from nonpoint sources in such State and to improve the water quality of such portion and submit such revised plan to the Administrator for his approval under this section. Such plan or revised plan shall be consistent with existing Federal and State law. After approval, the State shall implement such plan or revised plan.

"(i) GRANT PROGRAM.—

"(1) GRANTS FOR IMPLEMENTATION OF PLANS.—Upon application of a State for which a report submitted under subsection (a) and a plan submitted under subsection (b) is approved under this section, the Administrator shall make grants under this subsection to such State for the purpose of assisting the State in implementing such plan.

"(2) APPLICATIONS.—An application for a grant under this subsection in any fiscal year shall be in such form and shall contain such other information as the Administrator may require, including an identification and description of the best management practices and measures which the State proposes to assist, encourage, or require in such year with the Federal assistance to be provided under the grant.

"(3) FEDERAL SHARE.—

"(A) IN GENERAL.—The Federal share of the cost of each plan implemented with Federal assistance under this subsection in any fiscal year shall not exceed 50 percent of the cost incurred by the State in implementing such plan.

"(B) EXCEPTION.—The Federal share of those costs of any such plan which are attributable to a watershed area with respect to which the Administrator determines that a significant number of non-Federal, non-State interests of such area are willing and able to enter into agreements to participate in such year in nonpoint source pollution control measures under such plan shall be not less than 50 percent and not more than 60 percent of such cost.

"(C) LIMITATION ON ADMINISTRATIVE COSTS.—For purposes of this paragraph, administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against activities and programs carried out with a grant under this subsection shall not exceed in any fiscal year 10 percent of the amount of the grant in such year, except that costs of implementing enforcement and regulatory activities, education, training, technical assistance, demonstration projects, and technology transfer programs shall not be subject to this limitation.

"(4) MAINTENANCE OF EFFORT.—No grant may be made to a State under this subsection in any fiscal year unless such State enters into such agreements with the Administrator as the Administrator may require to ensure that such State will maintain its aggregate expenditures from all other sources for programs for controlling pollution added to the navigable waters in such State from nonpoint sources and improving the quality of such waters at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this subsection.

"(5) REPORTING AND OTHER REQUIREMENTS.—

"(A) REPORT.—Each State which receives a grant under this subsection in any fiscal year shall submit to the Administrator a written report which describes the activities and programs carried out in the State under such grant and the progress made by such State in meeting the schedule specified under subsection (b)(2)(B).

"(B) SATISFACTORY PROGRESS.—No grant may be made under this subsection in any fiscal year to a State which in the preceding fiscal year received a grant under this subsection unless the Administrator determines that such State made satisfactory progress in such preceding fiscal year in meeting the schedule specified by such State under subsection (b)(2)(B).

"(6) LIMITATION ON GRANT AMOUNTS.—Notwithstanding any other provision of this subsection, not more than 15 percent of the amount appropriated to carry out this subsection may be used to make grants to any one State, including any grants to any local public agency or organization with authority to control pollution from nonpoint sources in any area of such State.

"(7) PRIORITY FOR EFFECTIVE REGULATORY MECHANISMS.—For each fiscal year beginning after September 30, 1987, the Administrator may give priority in making grants under this subsection, and shall give consideration in determining the Federal share of any such grant, to any State which has included effective regulatory mechanisms in an approved State plan under this section and has implemented such mechanisms in the preceding fiscal year. Such mechanisms shall include, but are not limited to, deadlines for implementation of best management practices and enforcement procedures to ensure implementation of such plan.

"(8) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection not to exceed $150,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Sums appropriated to carry out this subsection shall remain available until expended.

"(j) REPORTS OF ADMINISTRATOR.—

"(1) ANNUAL REPORTS.—Not later than January 1, 1986, and each January 1 thereafter the Administrator shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a report for the preceding fiscal year on the activities and programs implemented under this section and the progress made in reducing pollution in the navigable waters resulting from nonpoint sources and improving the quality of such waters.

"(2) FINAL REPORT.—Not later than January 1, 1989, the Administrator shall transmit to Congress a final report on the activities carried out under this section. Such report, at a minimum, shall include—

"(A) an analysis of the effectiveness of plans carried out under this section and of the best management practices and measures utilized under those plans in controlling nonpoint sources of pollution;

"(B) an analysis of the level of State participation in implementing such plans; and

"(C) recommendations of the Administrator concerning future programs (including enforcement programs) for controlling pollution from nonpoint sources.

"(k) SET ASIDE FOR ADMINISTRATIVE PERSONNEL.—Not less than 5 percent of the funds appropriated to carry out subsection (i) for any fiscal year shall be available to the Administrator to maintain personnel levels at the Environmental Protection Agency at levels which are adequate to carry out this section in such year.".

(b) CONFORMING AMENDMENT.—Section 304(k)(1) of the Federal Water Pollution Control Act is amended by inserting "and 319" after "208".

SEC. 8. LAKE RESTORATION GUIDANCE MANUAL.

Section 104(h) is amended by inserting "(1)" after "(h)" and by adding at the end thereof the following:

"(2) The Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate not later than one year after the date of the enactment of this paragraph a lake restoration guidance manual establishing procedures to guide future State and local efforts to improve water quality in lakes.".

SEC. 9. SMALL FLOWS CLEARINGHOUSE.

Section 104(q) is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding section 205(d) of this Act, from amounts that are set aside for a fiscal year under section 205(i) of this Act and are not obligated by the end of the 24-month period of availability for such amounts under section 205(d), the Administrator shall make available $1,000,000 or such unobligated amount, whichever is less, to support a national clearinghouse within the Environmental Protection Agency to collect and disseminate information on small flows of sewage and innovative or alternative wastewater treatment processes and techniques, consistent with paragraph (3). This paragraph shall apply with respect to amounts set aside under section 205(i) for which the 24-month period of availability referred to in the preceding sentence ends on or after September 30, 1985.".

SEC. 10. ELIGIBLE CATEGORIES OF PROJECTS.

(a) COLLECTOR SEWERS AND COMBINED SEWER OVERFLOWS.—The second sentence of section 201(g)(1) is amended by striking out "appurtenances, and" and inserting in lieu thereof "appurtenances," and by striking out the period at the end of such sentence and inserting in lieu thereof the following: ", and projects to address water quality problems due to impacts of discharges from combined stormwater and sanitary sewer overflows.".

(b) NONPOINT SOURCES.—The last sentence of section 201(g)(1) is amended by—

(1) striking out "sentence," the first place it appears and inserting in lieu thereof "sentences,";

(2) inserting "(A)" after "October 1, 1984, for"; and

(3) inserting before "except that" the following: "and (B) any purpose for which a grant may be made under section 319(i) of this Act (including any innovative and alternative approaches for the control of nonpoint sources of pollution),".

SEC. 11. TIME LIMIT ON RESOLVING CERTAIN DISPUTES.

Section 201 is amended by adding at the end thereof the following new subsection:

"(p) TIME LIMIT ON RESOLVING CERTAIN DISPUTES.—In any case in which a dispute arises with respect to the awarding of a contract for construction of treatment works by a grantee of funds under this title and a

party to such dispute files an appeal with the Administrator under this title for resolution of such dispute, the Administrator shall make a final decision on such appeal within 60 days of the filing of such appeal.".

SEC. 12. FEDERAL SHARE.

(a) COMBINED SEWER OVERFLOWS.—The last sentence of section 202(a)(1) is amended—

(1) by inserting after "correction" the first place it appears the following: "or a project to address water quality problems due to impacts of discharges from combined storm water and sanitary sewer overflows"; and

(2) by striking out "and" after "interceptors," and by inserting after "correction" the third place it appears the following: ", and project to address such problems".

(b) PROJECTS UNDER JUDICIAL INJUNCTION.—Section 202(a)(1) is amended by adding at the end thereof the following: "Notwithstanding the first sentence of this paragraph, in the case of a project for which an application for a grant under this title has been made to the Administrator before October 1, 1984, and which project is under judicial injunction on such date prohibiting its construction, such project shall be eligible for grants at 75 percent of the cost of construction thereof.".

(c) BIODISC EQUIPMENT.—Section 202(a)(3) is amended by inserting at the end thereof the following: "In addition, the Administrator is authorized to make a grant to fund all of the costs of the modification or replacement of biodisc equipment (rotating biological contractors) in any publicly owned treatment works if the Administrator finds that such equipment has failed to meet design performance specifications, unless such failure is attributable to negligence on the part of any person, and if such failure has significantly increased capital or operating and maintenance expenditures.".

(d) INNOVATIVE PROCESS.—The activated bio-filter feature of the project for treatment works of the city of Little Falls, Minnesota, shall be deemed to be an innovative wastewater process and technique for purposes of section 202(a)(2) of the Federal Water Pollution Control Act and the amount of any grant under such Act for such feature shall be 85 percent of the cost thereof.

SEC. 13. AGREEMENT ON ELIGIBLE COSTS; GRANTEE CERTIFICATION OF TREATMENT PROCESS; TURNKEY CONTRACTS.

(a) AGREEMENT ON ELIGIBLE COSTS; GRANTEE CERTIFICATION.—Section 203(a) is amended by inserting "(1)" after "(a)", by designating the last sentence as paragraph (4) and indenting such sentence as a paragraph, and by inserting before paragraph (4) as so designated the following:

"(2)(A) Before taking final action on any plans, specifications, and estimates submitted under this subsection, the Administrator shall enter into a written agreement with the applicant which establishes and specifies which items of the proposed project are eligible for Federal payments under this section. The Administrator may not later modify such eligibility determinations unless they are found to have been made in violation of applicable Federal statutes and regulations.

"(B) Eligibility determinations under this paragraph shall not preclude the Administrator from auditing a project pursuant to section 501 of this Act, or other authority, or from withholding or recovering Federal funds for costs which are found to be unreasonable, unsupported by adequate documentation, or otherwise unallowable under applicable Federal cost principles, or which are incurred on a project which fails to meet the design specifications or effluent limitations contained in the grant agreement and permit pursuant to section 402 of this Act for such project.

"(3) The approval of construction plans and specifications by the Administrator under this section shall not include a determination or approval of the treatment work's unit processes, or the configuration of the treatment work's unit processes, which constitute the treatment technology. The Administrator shall not approve plans, specifications, and estimates for a project under this section unless the applicant certifies that the proposed unit processes and treatment technology are capable of meeting the effluent limitations for which such process and technology are designed.".

(b) TURNKEY CONTRACTS.—Section 203 is amended by adding at the end thereof the following new subsection:

"(f) TURNKEY CONTRACTS.—

"(1) GENERAL AUTHORITY FOR LOW COST PROJECTS.—After completion of an approved facility plan for construction of a treatment works which has an estimated total cost of $8,000,000 or less (as determined by the Administrator), the applicant proposing to construct such treatment works may, in lieu of proceeding under the other provisions of this section, enter into an agreement with the Administrator under this subsection for the preparation of construction plans and specifications and the building and erection of such treatment works.

"(2) REQUIRED TERMS AND CONDITIONS.—An agreement entered into under this subsection shall—

"(A) set forth an amount agreed to by the Administrator and the applicant as the maximum Federal contribution to the project, based upon a determination of the federally eligible costs of the project at the applicable Federal share under section 202 of this Act;

"(B) set forth a date for completion of construction of the treatment works by the applicant and a schedule of payments by the Administrator of the Federal contribution to the project;

"(C) contain such assurances by the applicant as the Administrator may require that (i) the proposed treatment works will be an operable unit and will meet all the requirements of this title (except as otherwise provided in paragraph (3) of this subsection), and (ii) not later than one year after the date specified as the date for completion of construction of the treatment works, the treatment works will be operating so as to meet the requirements of any applicable permit for such treatment works under section 402 of this Act;

"(D) require the applicant and any agent or contractor of the applicant to provide a bond in an amount determined necessary by the Administrator to protect the Federal interest in the project; and

"(E) contain such other terms and conditions as the Administrator deems necessary to ensure compliance with this title (except as provided in paragraph (3) of this subsection).

"(3) NONAPPLICABILITY OF CERTAIN STATUTORY REQUIREMENTS.—Sections 201(g)(3), 203 (other than this subsection and except with respect to the development and approval of a facility plan), 204(a)(5), 204(a)(6), and 204(d)(1) shall not apply to grants made pursuant to this subsection.

"(4) INTEREST-BEARING ACCOUNTS.—

"(A) DEPOSIT OF FEDERAL CONTRIBUTION.—Upon entering into an agreement under this subsection, the Administrator shall deposit, from amounts allotted to the State for such fiscal year under section 205 of this Act, the amount of the Federal contribution to the project agreed upon by the Administrator and the applicant into an interest-bearing account. Such amount shall be available only for making payments to the grantee in accordance with the schedule contained in the agreement.

"(B) LIMITATION ON USE OF EARNED INTEREST.—Interest earned on amounts in the account under subparagraph (A) shall be available for payments to the grantee. Such payments shall be made solely for the purpose of reducing the net interest costs incurred by the grantee on obligations issued by the grantee for construction of such treatment works. The amount of such payments shall be in addition to the Federal share of the project otherwise allowable. The amount of any such interest earned which exceeds the amount of such interest costs incurred shall be deposited in the general fund of the Treasury after the final audit of the project.

"(5) ADMINISTRATIVE PROVISIONS.—

"(A) RESERVATION UNTIL FINAL AUDIT.—The Administrator shall reserve a portion of the amount in the account under paragraph (4)(A) until the final audit of the project.

"(B) REALLOTMENT OF ANY EXCESS.—If the amount deposited into the account by the Administrator under paragraph (4)(A) exceeds the cost of preparing construction plans and specifications and the building and erection of the treatment works, the Administrator shall reallot the amount of the excess to the State in which such treatment works is located for the fiscal year in which such audit is completed.

"(6) PER STATE LIMITATION.—The Administrator shall not obligate more than 20 percent of the amount allotted to a State for a fiscal year under section 205 of this Act for grants pursuant to this subsection.

"(7) LIMITATION ON FEDERAL CONTRIBUTION.—In no event shall the Federal contribution for the cost of preparing construction plans and specifications and the building and erection of treatment works pursuant to this subsection exceed the amount agreed upon under paragraph (2), plus interest paid to the grantee under paragraph (4)(B).

"(8) NONCOMPLIANCE WITH AGREEMENT.—In any case in which the recipient of a grant made pursuant to this subsection does not comply with the terms of the agreement entered into under paragraph (2), the Administrator is authorized to take such action as may be necessary to recover the amount of the Federal contribution to the project.

"(9) LIMITATION ON ELIGIBILITY OF RECIPIENTS OF TURNKEY GRANTS.—A recipient of a grant made pursuant to this subsection shall not be eligible for any other grants under this title.".

SEC. 14. GRANT CONDITIONS; USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.

(a) INCLUSION OF PROJECT IN AREAWIDE PLAN.—Section 204(a)(1) is amended to read as follows:

"(1) that any required areawide waste treatment management plan under section 208 of this Act (A) is being implemented for such area and the proposed treatment works are included in such plan, or (B) is being developed for such area and reasonable progress is being made toward its implementation and the proposed treatment works will be included in such plan;".

(b) CONTINUING PLANNING PROCESS.—Section 204(a)(2) is amended to read as follows:

"(2) that (A) the State in which the project is to be located (i) is implementing any required plan under section 303(e) of this Act and the proposed treatment works are in conformity with such plan, or (ii) is developing such a plan and the proposed treatment works will be in conformity with such plan, and (B) such State is in compliance with section 305(b) of this Act;".

(c) USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.—Section 204(b)(1) is amended by adding at the end thereof the following: "A system of user charges which imposes a lower charge for low-income residential users (as defined by the Administrator) shall be deemed to be a user charge system meeting the requirements of clause (A) of this paragraph if the Administrator determines that such system was adopted after public notice and hearing.".

(d) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act, except that the amendments made by subsections (a) and (b) shall take effect on the last day of the two-year period beginning on such date of enactment.

SEC. 15. ALLOTMENT OF CONSTRUCTION GRANT FUNDS.

(a) FORMULA.—

(1) DATE OF ALLOTMENT.—Section 205(c)(2) is amended by inserting after the first sentence the following: "Sums authorized to be appropriated pursuant to section 207 for the fiscal years 1986, 1987, 1988, 1989, and 1990 shall be allotted for each such year by the Administrator not later than the tenth day which begins after the date of the enactment of the Water Quality Renewal Act of 1985.".

(2) EXTENSION.—Section 205(c)(2) is further amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(b) MINIMUM ALLOTMENT.—

(1) EXTENSION.—Section 205(e) is amended by striking out "and 1985" each place it appears and inserting in lieu thereof "1985, 1986, 1987, 1988, 1989, and 1990".

(2) TERRITORIES.—The first sentence of section 205(e) is amended—

(A) by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,";

(B) by striking out "thirty-three one-hundredths of 1 per centum" and inserting in lieu thereof "two-thirds of one percent"; and

(C) by striking out "four" and inserting in lieu thereof "five".

(c) COSTS OF ADMINISTRATION.—Section 205(g)(1) is amended by striking out "1985" and inserting in lieu thereof "1990" and by striking out the period after "4 per centum" and inserting in lieu thereof a comma.

(d) INTERSTATE SANITARY COMMISSION.—Section 205(g) is amended by adding at the end thereof the following new paragraph:

"(3) The Administrator shall reserve each fiscal year beginning after September 30, 1985, $900,000 from the sums available to the State of New York under this subsecıion for such fiscal year, $900,000 from the sums available to the State of New Jersey under this subsection for such fiscal year, and $200,000 from the sums available to the State of Connecticut under this subsection for such fiscal year. Sums reserved under this paragraph shall be used by the Administrator to make a grant for each such fiscal year to the Interstate Sanitation Commission established by such States by interstate compact to carry out the functions of such Commission under this Act.".

(e) RURAL SET ASIDE.—

(1) INCREASE IN MANDATORY SET ASIDE FOR RURAL STATES.—The first sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "a total (as determined by the Governor of the State) of not less than four percent nor more than seven and one-half percent".

(2) INCREASE IN AUTHORIZED SET ASIDE FOR OTHER STATES.—The second sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "seven and one-half percent".

(f) SET ASIDE FOR INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES.—Section 205(i) is amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(g) ALLOCATION OF PLANNING FUNDS TO REGIONAL ORGANIZATIONS.—Section 205(j)(3) is amended by adding at the end thereof the following: "In giving such priority, the State shall allocate at least 50 percent of the amount granted to such State for a fiscal year under this subsection to regional and interstate public comprehensive planning organizations in such State, except in any fiscal year for which the Administrator, after consultation with the Governor of such State and such organizations, determines that allocation of at least 50 percent to such organizations will not substantially assist in achieving the goals of this Act.".

(h) RESERVATION OF FUNDS FOR INVESTIGATIONS AND AUDITS.—Section 205 is amended by adding at the end thereof the following new subsection:

"(l) RESERVATION FOR INVESTIGATIONS AND AUDITS.—One-quarter of one percent of any amount appropriated under section 207 of this Act for any fiscal year beginning after September 30, 1985, shall be reserved by the Administrator for carrying out investigations and audits authorized by this Act of projects for which funds are made available under this title. Such sums shall be in addition to, and not in lieu of, any sums otherwise appropriated for or allocated to the Office of the Inspector General.".

SEC. 16. GRANTS TO STATES FOR ESTABLISHMENT OF WATER POLLUTION CONTROL REVOLVING FUNDS.

(a) IN GENERAL.—Title II is amended by adding at the end thereof the following new section:

"SEC. 220. GRANTS TO STATES FOR ESTABLISHMENT OF REVOLVING FUNDS.

"(a) GENERAL AUTHORITY; AMOUNT OF GRANT.—

"(1) GENERAL AUTHORITY; CONSTRUCTION ASSISTANCE.—Subject to the provisions of this section, the Administrator shall make grants to each State for the purpose of establishing a revolving fund for providing assistance to municipalities and intermunicipal and interstate agencies for construction of treatment works (as defined in section 212 of this Act) which are publicly owned.

"(2) AMOUNT OF GRANT.—The amount of a grant to a State under this section for any fiscal year shall equal the amount allotted to such State under this section for such fiscal year.

"(b) GENERAL GRANT REQUIREMENTS.—

"(1) DEPOSITS INTO REVOLVING FUNDS.—

"(A) MANDATORY DEPOSITS.—A grant shall not be made for a fiscal year to a State under this section unless the State has first deposited in the revolving fund established by the State under this section from non-Federal sources an amount equal to 20 percent of the amount allotted to the State under this section for such fiscal year.

"(B) DISCRETIONARY DEPOSITS.—In addition to any amounts deposited in such revolving fund under subparagraph (A), the Governor of the State may deposit not to exceed 20 percent of the amount allotted to the State under section 205 of this Act for any fiscal year beginning after September 30, 1985, if the State has first deposited in such fund from non-Federal sources an amount equal to 20 percent of the amount to be deposited from such allotment.

"(2) ANNUAL CERTIFICATION.—Each State shall submit to the Administrator annually a certification—

"(A) that upon completion of any project for treatments works for which financial assistance is made available from the revolving fund established by such State under this section, discharges from such treatment works will meet all applicable requirements necessary to achieve applicable State and Federal water quality standards; and

"(B) that such State will comply with all provisions of this section.

"(c) FORMS OF REVOLVING FUND ASSISTANCE.—Assistance described in subsection (a)(1) for construction of treatment works may only be provided from a revolving fund established under subsection (d)(1) in the form of a loan, loan guarantee, payment to reduce interest on a loan, bond interest subsidy, bond guarantee, or purchase of insurance for obligations. In addition, to the extent provided by State law, the State may issue revenue or general obligation bonds to finance projects for construction of treatment works described in subsection (a)(1) and on the State's priority list under section 216 using amounts in such fund as a source of revenue or security for the payment of interest and principal on such bonds, if the proceeds of the sale of such bonds are deposited in such fund.

"(d) STATE WATER POLLUTION CONTROL REVOLVING FUNDS.—

"(1) ESTABLISHMENT.—

"(A) PURPOSES.—Each State shall establish a Water Pollution Control Revolving Fund to provide assistance described in subsection (a)(1) for construction of treatment works.

"(B) STATE DEPOSITS.—The State shall deposit in such revolving fund any Federal funds allotted to the State under this section, any amounts received by the State for repayment of loans made by the State with amounts in such fund, any amounts required or authorized to be deposited in such fund under subsection (b)(1), and any additional funds (except for funds received under any other section of this title) which the State wishes to deposit in such fund.

"(2) ADMINISTRATIVE EXPENSES.—The State may use amounts in such revolving fund for the payment of expenses of administration of such fund; except that, in any fiscal year in which the State receives a grant under this section, the State may not use more than four percent of the amount of such grant for the payment of such expenses in such fiscal year.

"(3) INVESTMENTS.—The State may invest any portion of the funds in such revolving fund which is not currently needed for providing assistance described in subsection (a)(1) and for payment of administrative expenses under paragraph (2).

"(4) LIMITATION TO PREVENT DOUBLE BENEFITS.—If the State makes, from such revolving fund, a loan which will finance the cost of facility planning and the preparation of plans, specifications, and estimates for construction of publicly owned treatment works, the State shall ensure that if the re-

cipient of such loan receives a grant under section 201(g) of this Act for construction of such treatment works and an allowance under section 201(l)(1) for non-Federal funds expended for such planning and preparation, such recipient will promptly repay such loan to the extent of such allowance.

"(5) ELIGIBILITY OF NON-FEDERAL PORTION OF CONSTRUCTION GRANT PROJECTS.—The State may provide assistance from such revolving fund to a municipality or intermunicipal or interstate agency with respect to the non-Federal share of the costs of a project for which such municipality or agency is receiving assistance from the Administrator under any other section of this title.

"(6) DEDICATED SOURCE OF REVENUE FOR LOAN REPAYMENT.—The State may only make a loan from such revolving fund to a municipality or intermunicipal or interstate agency if such municipality or agency first establishes a dedicated source of revenue for the repayment of such loan.

"(7) PRIORITY LIST REQUIREMENT.—The State may provide financial assistance from such revolving fund only with respect to a project for construction of a treatment works described in subsection (a)(1) if such project is on the State's priority list under section 216 of this Act. Such assistance may be provided regardless of the rank of such project on such list.

"(e) ADMINISTRATIVE PROVISIONS.—

"(1) STATE REPORTS.—Each State shall annually make a full and complete report to the Administrator concerning the use of funds deposited in the revolving fund established by such State under this section in such manner as the Administrator shall prescribe.

"(2) ANNUAL AUDITS.—The Administrator shall, at least on an annual basis, conduct or require each State to have independently conducted reviews and audits as may be deemed necessary or appropriate by the Administrator to carry out the objectives of this section. Audits of the use of funds deposited in the revolving fund established by such State shall be conducted in accordance with the auditing procedures of the General Accounting Office.

"(f) APPLICABILITY OF OTHER PROVISIONS.—Except to the extent provided in this section, the other provisions of this title shall not apply to grants under this section.

"(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $600,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1991, not to exceed $1,800,000,000 for the fiscal year ending September 30, 1992, not to exceed $1,200,000,000 for the fiscal year ending September 30, 1993, and not to exceed $600,000,000 for the fiscal year ending September 30, 1994.

"(h) ALLOTMENT OF FUNDS.—

"(1) SAME FORMULA AS CONSTRUCTION GRANT ALLOTMENT.—Sums authorized to be appropriated to carry out this section for any fiscal year shall be allotted by the Administrator in the same manner and in accordance with the same table as the funds which are authorized to be appropriated under section 207 of this Act are allotted for such fiscal year.

"(2) EXCEPTION.—For any fiscal year for which sums are authorized to be appropriated to carry out this section and for which sums are not authorized to be appropriated to carry out section 207, the sums authorized to be appropriated to carry out this section shall be allotted by the Administrator in the same manner and in accordance with the same table as the funds which were authorized to be appropriated under section 207 were allotted for the most recent fiscal year for which there was such an authorization under section 207.

"(3) REALLOTMENT.—

"(A) EXPIRATION OF PERIOD OF AVAILABILITY.—Sums allotted to a State under this subsection for a fiscal year shall remain available for a grant to such State for the fiscal year for which authorized and for the following two fiscal years. Any funds remaining after the last day of such third fiscal year shall be reallotted among the other States.

"(B) UNUTILIZED FUNDS.—Any funds granted to a State for a fiscal year under this section which are not utilized by such State for providing assistance described in subsection (a)(1) for construction of treatment works during such fiscal year and the following two fiscal years shall be repaid to the Administrator for reallotment among the other States.".

(b) CONFORMING AMENDMENT.—Section 207 is amended by striking out "and 209," and inserting in lieu thereof the following: "209, and 220 (except as provided in section 220(b)(1)(B)),".

SEC. 17. INNOVATIVE TECHNOLOGY COMPLIANCE DEADLINES FOR DIRECT DISCHARGERS.

Section 301(k) is amended by striking out "July 1, 1987," and inserting in lieu thereof "two years after the date for compliance with such effluent limitation which would otherwise be applicable under such subsection,".

SEC. 18. VARIANCES FROM THE APPLICATION OF EFFLUENT LIMITATIONS.

(a) IN GENERAL.—Section 301 is amended by adding at the end thereof the following new subsection:

"(n) VARIANCES.—

"(1) FUNDAMENTALLY DIFFERENT FACTORS.—Upon application of any person who provides (or does not have a reasonable opportunity to provide) information to the Administrator in the rulemaking to establish or revise any effluent limitation under this section or section 304 of this Act, the Administrator may grant a variance from the application of such limitation with respect to the discharge of any pollutant by such person if the Administrator determines that factors relating to the facilities, equipment, and processes of such person are fundamentally different than the factors considered in such rulemaking.

"(2) TIME LIMIT FOR APPLICATIONS.—An application for a variance from the application of an effluent limitation under this subsection must be filed with the Administrator within 180 days after the date on which such limitation is established or revised, as the case may be.

"(3) TIME LIMIT FOR DECISION.—The Administrator, to the maximum extent practicable, shall approve or deny any application filed under this subsection within 180 days after the date such application is filed with the Administrator.

"(4) LIMITATION ON APPLICABILITY.—This subsection shall only apply with respect to effluent limitations established or revised after the date of the enactment of this subsection.

"(5) EFFECT OF DENIAL OF APPLICATION.—If an application for a variance from the application of an effluent limitation under this subsection is denied by the Administrator, the applicant must comply with such limitation as established or revised, as the case may be.".

(b) SAVINGS CLAUSE.—The amendment made by subsection (a) shall not affect any procedures or requirements in effect before the date of the enactment of this Act with respect to the granting of variances from the application of effluent limitations established or revised on or before such date of enactment.

SEC. 19. WATER QUALITY CRITERIA.

Section 304(a)(1) is amended by adding at the end thereof the following: "In developing, publishing, and revising criteria under this paragraph after the date of the enactment of this sentence, the Administrator shall consider, among other things, the effects on the ecosystem of (i) water hardness, (ii) pH, (iii) chemical and physical interactions, (iv) persistence of pollutants and the long-term effects of pollutants, (v) sedimentation from chemical reaction of pollutants, (vi) the absorptive properties of sediments, (vii) resuspension, and (viii) bio-uptake. New or revised criteria under this paragraph should be established so as to provide an ample margin of safety to protect human health and fish and wildlife resources. Whenever, in developing new or revised criteria under this paragraph with respect to a pollutant, the Administrator determines that a well-founded and significant difference of opinion exists as to the latest scientific and research knowledge on the matters referred to in the preceding sentence, the Administrator shall publish a description of such difference of opinion along with the publication of such criteria.".

SEC. 20. TEST PROCEDURES.

Section 304(h) is amended by striking out ", within one hundred and eighty days from the date of enactment of this title," and inserting in lieu thereof ", within ninety days from the date of the enactment of the Water Quality Renewal Act of 1985,".

SEC. 21. PRETREATMENT STANDARDS.

(a) EXTENSION OF STANDARDS BY POTW APPLYING INNOVATIVE SYSTEM.—Section 307 is amended by adding at the end the following:

"(e) COMPLIANCE DATE EXTENSION FOR INNOVATIVE PRETREATMENT SYSTEMS.—In the case of any new or existing facility that proposes to comply with the pretreatment standards of subsection (b) of this section by applying an innovative system that meets the requirements of section 301(k) of this Act, the owner or operator of the publicly owned treatment works receiving the treated effluent from such facility may extend the date for compliance with the applicable pretreatment standard established under this section for a period not to exceed two years—

"(1) if the Administrator determines that the innovative system has the potential for industrywide application, and

"(2) if the Administrator (or the State, in any case in which the State has a pretreatment program approved by the Administrator)—

"(A) determines that the proposed extension will not cause the publicly owned treatment works to be in violation of its permit under section 402, and

"(B) concurs with the proposed extension.".

(b) INCREASE IN EPA EMPLOYEES.—The Administrator shall take such actions as may be necessary to increase the number of employees of the Environmental Protection Agency in order to effectively implement pretreatment requirements under section

307 of the Federal Water Pollution Control Act.

SEC. 22. CRIMINAL PENALTIES.

Section 309(c) is amended to read as follows:

"(c) CRIMINAL PENALTIES.—

"(1) NEGLIGENT VIOLATIONS.—Any person who—

"(A) negligently violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army, acting through the Chief of Engineers, or by a State; or

"(B) negligently introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which causes or may reasonably be anticipated to cause personal injury or property damage or which causes such treatment works to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than one year, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment of not more than two years, or by both.

"(2) KNOWING VIOLATIONS.—Any person who—

"(A) knowingly violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army, acting through the Chief of Engineers, or by a State; or

"(B) knowingly introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which causes or may reasonably be anticipated to cause personal injury or property damage or which causes such treatment works to violate any effluent limitation or condition in a permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than two years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $100,000 per day of violation, or by imprisonment of not more than four years, or by both.

"(3) COMPLIANCE AS AFFIRMATIVE DEFENSE.—It shall be an affirmative defense under paragraphs (1)(B) and (2)(B) of this subsection that the introduction of any pollutant or hazardous substance into a sewer system or a publicly owned treatment works was in compliance with all applicable Federal, State, and local requirements which govern the introduction of a pollutant or hazardous substance into a sewer or publicly owned treatment works.

"(4) FALSE STATEMENTS.—Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this Act or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this Act, shall upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than four years, or by both.

"(5) RESPONSIBLE CORPORATE OFFICER AS 'PERSON'.—For the purpose of this subsection, the term 'person' means, in addition to the definition contained in section 502(5) of this Act, any responsible corporate officer.

"(6) HAZARDOUS SUBSTANCE DEFINED.—For the purpose of this subsection, the term 'hazardous substance' means (A) any substance designated pursuant to section 311(b)(2)(A) of this Act, (B) any element, compound, mixture, solution, or substance designated pursuant to section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act has been suspended by Act of Congress), (D) any toxic pollutant listed under section 307(a) of this Act, and (E) any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act.".

SEC. 23. CIVIL PENALTIES.

(a) INCREASE IN PENALTY.—Section 309(d) is amended by striking out "$10,000" and inserting in lieu thereof "$25,000".

(b) INCREASED PENALTIES NOT REQUIRED UNDER STATES PROGRAMS.—The Federal Water Pollution Control Act shall not be construed as requiring a State to have a civil penalty for violations described in such section 309(d) which has the same monetary amount as the civil penalty established by such section, as amended by subsection (a) of this section.

SEC. 24. ADMINISTRATIVE PENALTIES.

(a) IN GENERAL.—Section 309 is amended by adding at the end thereof the following:

"(g) ADMINISTRATIVE PENALTIES.—

"(1) IN GENERAL.—Whenever on the basis of any information available to him or her—

"(A) the Administrator finds that any person is in violation of section 301 (except as it relates to section 404 of this Act), 302, 306, 307, 318, or 405 of this Act, or is in violation of any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or

"(B) the Secretary of the Army, acting through the Chief of Engineers (hereinafter in this subsection referred to as the 'Secretary') finds that any person is in violation of any permit condition or limitation implementing any of such sections in a permit issued under section 404 of this Act by the Secretary or by a State,

the Administrator or Secretary, as the case may be, may, after consultation with the State in which the violation occurs, assess a civil penalty of not more than $10,000 per day of violation, except that such penalty shall not exceed a total of $125,000.

"(2) ADMINISTRATIVE REQUIREMENTS.—

"(A) NOTICE AND OPPORTUNITY FOR HEARING.—A civil penalty shall be assessed under this subsection by the Administrator or Secretary, as the case may be, by an order made on the record after opportunity (provided in accordance with this subparagraph) for a hearing in accordance with section 554 of title 5, United States Code. Before issuing such an order, the Administrator or Secretary, as the case may be, shall—

"(i) give written notice to the person to be assessed a civil penalty under such order of the Administrator's or Secretary's proposal to issue such order and provide such person an opportunity to request, within 15 days of the date the notice is received by such person, such a hearing on the order; and

"(ii) provide public notice of and reasonable opportunity to comment on any proposed assessment.

"(B) NOTICE TO INTERESTED PERSONS.—Any person who comments on a proposed assessment shall be given notice of any hearing held under subparagraph (A) and any order assessing a penalty under this subsection. In any such hearing, such person shall have a reasonable opportunity to present evidence.

"(C) RIGHTS OF INTERESTED PERSONS TO A HEARING.—If no hearing is held before the issuance of an order assessing a penalty under this subsection, any person who commented on the proposed assessment may petition the Administrator or Secretary, as the case may be, to set aside such order and to provide a hearing on the penalty. The Administrator or Secretary shall set aside such order and provide such hearing in accordance with subparagraph (A) if the Administrator or Secretary determines that the evidence presented by the petitioner in support of the petition is material and was not considered in the issuance of the order. If the Administrator or Secretary denies a hearing under this subparagraph, the Administrator or Secretary shall provide to the petitioner, and publish in the Federal Register, notice of the reasons for such denial.

"(D) FACTORS TO CONSIDER IN DETERMINING AMOUNT OF PENALTY.—In determining the amount of a civil penalty, the Administrator or Secretary, as the case may be, shall take into account the nature, circumstances, extent, and gravity of the violation or violations and, with respect to the violator, ability to pay, effect on ability to continue to do business, any history of prior such violations, the degree of culpability, economic savings (if any) resulting from the violation, and such other matters as justice may require.

"(E) COMPROMISE OF AMOUNT.—The Administrator or Secretary, as the case may be, may compromise, modify, or remit, with or without conditions, any civil penalty which may be imposed under this subsection. The amount of such penalty, when finally determined, or the amount agreed upon in compromise, may be deducted from any sums owing by the United States to the person charged.

"(F) FINALITY OF ORDER.—An order issued under this subsection shall become final 30 days after its issuance unless a petition for judicial review is filed under paragraph (3) or a hearing is requested under subparagraph (C). If such a hearing is denied, such order shall become final 30 days after such denial.

"(3) RIGHT OF INTERESTED PERSON TO APPEAL.—Any person who requested in accordance with paragraph (2)(A) or (2)(C) a

hearing respecting the assessment of a civil penalty and who is aggrieved by an order assessing a civil penalty may file a petition for judicial review of such order with the United States Court of Appeals for the District of Columbia Circuit or for any other circuit in which such person resides or transacts business. Such a petition may only be filed within the 30-day period beginning on the date the order making such assessment was issued.

"(4) RECOVERY OF UNPAID PENALTIES BY ATTORNEY GENERAL.—If any person fails to pay an assessment of a civil penalty—

"(A) after the order making the assessment has become a final order and if such person does not file a petition for judicial review of the order in accordance with paragraph (3), or

"(B) after a court in an action brought under paragraph (3) has entered a final judgment in favor of the Administrator or Secretary, as the case may be,

the Attorney General shall recover the amount assessed (plus interest at currently prevailing rates from the date of the expiration of the 30-day period referred to in paragraph (3) or the date of such final judgment, as the case may be) in an action brought in any appropriate district court of the United States. In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review.

"(5) SUBPOENAS.—The Administrator or Secretary, as the case may be, shall have the authority to issue subpoenas in connection with hearings under paragraph (2) of this subsection and may request the Attorney General to bring an action to enforce any subpoena under this subsection. The district courts shall have jurisdiction to enforce such subpoenas and impose sanctions.

"(6) EFFECT ON AUTHORITY OF ADMINISTRATOR.—Action taken by the Administrator or Secretary, as the case may be, pursuant to this subsection shall not affect or limit the Administrator's or Secretary's authority to enforce any provision of this Act, except that any violation with respect to which a civil penalty is imposed under this subsection shall not be subject to a civil penalty under section 309(d) or section 311(b) of this Act.

"(7) EFFECT OF STATE ENFORCEMENT ACTION.—When a State has proceeded with an enforcement action relating to a violation with respect to which the Administrator or Secretary is authorized to assess a civil penalty under this subsection, the Administrator or Secretary, as the case may be, are not authorized to take any action under this subsection if the State demonstrates that the State imposed penalty is appropriate.

"(8) EFFECT OF ADMINISTRATOR'S ACTION ON COMPLIANCE.—No action by the Administrator under this subsection shall affect any person's obligation to comply with any section of this Act or with the terms and conditions of any permit issued pursuant to section 402 or 404 of this Act.".

(b) CITIZEN SUITS.—Section 505(b)(1) is amended by striking out the period at the end of subparagraph (B) and inserting ", or" and by adding at the end the following:

"(C) if the Administrator or State has commenced and is diligently pursuing the assessment of a civil penalty under section 309(g) of this Act.".

SEC. 25. CLEAN LAKES.

(a) APPLICATION OF PROGRAM TO SALINE LAKES.—Section 314(a)(1) is amended by striking out "fresh water".

(b) NONPOINT SOURCE GRANT PROGRAM; ANNUAL REPORT.—Section 314 is amended by adding at the end thereof the following new subsections:

"(d) PRIORITY PROJECTS FOR CONTROL OF NONPOINT SOURCES.—

"(1) GRANT PROGRAM.—The Administrator shall make grants to States for priority projects for control of nonpoint sources of pollution which are contributing to the degradation of water quality in lakes. The Administrator shall provide an equitable distribution of such sums to the States.

"(2) FEDERAL SHARE.—The amount granted to a State for a project under this subsection shall not exceed 70 per centum of the cost of such project.

"(3) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection not to exceed $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Sums appropriated shall remain available until expended.

"(e) ANNUAL WATER QUALITY REPORT.—The Administrator shall submit annually to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the status and trend of water quality in lakes in the United States, including but not limited to, the nature and extent of pollution loading from point and nonpoint sources and the extent to which the use of lakes is impaired as a result of such pollution, particularly with respect to toxic pollution.".

(c) CONFORMING AMENDMENTS.—Section 314 is amended—

(1) in subsection (b), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (a) of this section";

(2) in subsection (c)(1), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section"; and

(3) in subsection (c)(2), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section".

(d) CLEAN LAKES PROJECTS.—

(1) LAKE HOUSTON, TEXAS.—

(A) STUDY; CONTROL MEASURES.—The Administrator shall, in cooperation with the State of Texas, study water quality problems in Lake Houston, Houston, Texas, and undertake such control measures as the Administrator and State determine are necessary to improve water quality. Such study shall include, but not be limited to, the evaluation of the feasibility of regional or consolidated waste treatment facilities and the development of recommendations for the cost-effective control of pollutants entering the Lake Houston watershed.

(B) REPORT.—The Administrator shall submit a report on the results of such study and identify such structural or nonstructural controls which were undertaken or are proposed, along with recommendations for further measures, to improve the water quality of Lake Houston, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate not later than one year after the date of the enactment of this Act.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $10,000,000 to carry out this paragraph, to remain available until expended.

(2) BEAVER LAKE, ARKANSAS.—

(A) STUDY.—The Administrator, in cooperation with the Secretary of the Army, acting through the Chief of Engineers, and in consultation with appropriate State and local agencies, shall conduct a one-year comprehensive study of the Beaver Lake, Arkansas, to identify measures which will optimize achievement of the purposes for which Beaver Dam was constructed while preserving and enhancing the quality of the reservoir's water.

(B) DEMONSTRATION PROJECT.—Upon completion of the study, the Administrator shall undertake a demonstration project at Beaver Lake to determine the effectiveness of measures identified in such study for preserving and enhancing the quality of the reservoir's water for current and future users.

(C) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report of such study and project, along with recommendations for further measures to improve the water quality of Beaver Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(D) AVAILABILITY OF FUNDS.—Funds appropriated under subsections (c) and (d) of section 314 of the Federal Water Pollution Control Act shall be available to carry out this paragraph.

(3) GREENWOOD LAKE AND BELCHER CREEK, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt, stumps, and other obstructions from Greenwood Lake and Belcher Creek, New Jersey.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations for further measures to improve the water quality of Greenwood Lake and Belcher Creek, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 to carry out this paragraph.

(4) DEAL LAKE, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt and stumps from, and the control of pollution from nonpoint sources in, Deal Lake, Monmouth County, New Jersey.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations for further measures to improve the water quality of Deal Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $8,000,000 to carry out this paragraph.

(5) ALCYON LAKE, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the restoration of Alcyon Lake, New Jersey, including removal and disposal of contaminated sediments in the lake.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Alcyon Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $3,500,000 to carry out this paragraph.

(6) SAUK LAKE, MINNESOTA.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt and aquatic growth from Sauk Lake and its tributary streams in the vicinity of Sauk Centre, Stearns County, Minnesota.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Sauk Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 to carry out this paragraph.

(7) LAKE WORTH, TEXAS.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project to remove silt and aquatic growth from Lake Worth, Tarrant County, Texas, including constructing silt traps and providing other devices or equipment to prevent and abate the further deposit of sediment in Lake Worth. Such project shall also provide for the use of dredged material in the reclamation of despoiled land. The Administrator may take such other actions as may be necessary to carry out such project.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Lake Worth, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $1,750,000 to carry out this paragraph.

SEC. 26. NPDES PERMITS.

(a) PERMIT REQUIREMENTS.—

(1) TERMS.—Section 402(b)(1)(B) is amended to read as follows:

"(B) are for fixed terms not exceeding five years, or for a fixed term not exceeding ten years in any case in which the State determines (in accordance with guidelines established by the Administrator) that the applicant has consistently complied with any permit held by such applicant under this section and that—

"(i) pollutants described in subparagraphs (C), (D), and (F) of section 301(b)(2) are not detectable in the effluent to which the permit will apply; or

"(ii) such pollutants are present in such effluent only in trace amounts and are neither causing nor are likely to cause toxic effects, alone or in combination with pollutants from other sources;".

(2) COMPLIANCE WITH NEW TOXIC LIMITATIONS AND WATER QUALITY STANDARDS.—Section 402(b)(1) is amended by redesignating subparagraph (D) as subparagraph (E) and by inserting after subparagraph (C) the following:

"(D) in the case of any permit issued for a fixed term exceeding five years, must be modified promptly to ensure compliance with any new or revised effluent limitation under section 307(a) of this Act or any new or revised requirement pursuant to a standard under section 303 of this Act which limitation or requirement is more stringent than the existing effluent limitation or requirement in the permit or which controls a pollutant not controlled in the permit; and".

(b) EXEMPTION FROM PERMIT OF CERTAIN STORMWATER RUNOFF.—Section 402(l) is amended by inserting "(1)" after "(l)" and by adding at the end thereof the following new paragraph:

"(2) The Administrator shall not require a permit under this section, nor shall the Administrator directly or indirectly require any State to require such a permit, for discharges of stormwater runoff from mining operations or oil or gas exploration, production, processing, or treatment operations, composed entirely of flows which are from conveyances or systems of conveyances (including but not limited to pipes, conduits, ditches, and channels) used for collecting and conveying precipitation runoff and which are not contaminated with process wastes, overburden, raw materials, toxic pollutants above natural background levels, spilled product, hazardous substances, or oil or grease. Any person discharging stormwater runoff described in the preceding sentence shall monitor the quality of water in such flows and shall report not less often than annually to the Administrator on the results of such monitoring.".

(c) ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.—Section 402 is amended by adding at the end thereof the following new subsection:

"(m) ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.—To the extent a treatment works (as defined in section 212 of this Act) which is publicly owned is not meeting the requirements of a permit issued under this section for such treatment works as a result of inadequate design or operation of such treatment works, the Administrator, in issuing a permit under this section, shall not require pretreatment by a person introducing conventional pollutants identified pursuant to section 304(a)(4) of this Act into such treatment works other than pretreatment required to assure compliance with pretreatment standards under subsection (b)(8) of this section and section 307(b)(1) of this Act. Nothing in this subsection shall affect the Administrator's authority under sections 307 and 309 of this Act, affect State and local authority under sections 307(b)(4) and 510 of this Act, relieve such treatment works of its obligations to meet requirements established under this Act, or otherwise preclude such works from pursuing whatever feasible options are available to meet its responsibility to comply with its permit under this section.".

(d) PARTIAL PERMIT PROGRAM.—Section 402 is amended by adding at the end the following:

"(n) PARTIAL PERMIT PROGRAM.—

"(1) STATE SUBMISSION.—The Governor of a State may submit under subsection (b) of this section a permit program for a portion of the discharges into the navigable waters in such State.

"(2) MINIMUM COVERAGE.—A partial permit program under this subsection shall cover at a minimum administration of a major category of the discharges into the navigable waters of the State or a major component of the permit program required by subsection (b).

"(3) APPROVAL OF PARTIAL PERMIT PROGRAM.—The Administrator may approve a partial permit program covering administration of a major category of discharges under this subsection if—

"(A) such program represents a complete permit program and covers all of the discharges under the jurisdiction of a department or agency of the State; and

"(B) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b).

"(4) APPROVAL OF PARTIAL AND PHASED PERMIT PROGRAM.—The Administrator may approve under this subsection a partial and phased permit program covering administration of a major component (including discharge categories) of a State permit program required by subsection (b) if—

"(A) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b); and

"(B) the State submits, and the Administrator approves, a plan for the State to assume administration by phases of the remainder of the State program required by subsection (b) by a specified date not more than five years after submission of the partial program under this subsection and agrees to make all reasonable efforts to assume such administration by such date.".

(e) RETURN OF STATE PERMIT PROGRAM TO ADMINISTRATOR.—

(1) IN GENERAL.—Section 402(c) is amended by adding at the end thereof the following new paragraph:

"(4) A State may return administration of its permit program to the Administrator, and the Administrator may withdraw approval of a State permit program under paragraph (3) of this subsection—

"(A) in the case of any approval under subsection (n)(3), the entire permit program being administered by the State department or agency at the time of such return or withdrawal, as the case may be; or

"(B) in the case of any approval under subsection (n)(4), any phased component of the permit program approved at the time of such return or withdrawal, as the case may be.".

(2) TECHNICAL AMENDMENT.—Section 402(c)(1) is amended by striking out "as to those navigable waters" and inserting in lieu thereof "as to those discharges".

SEC. 27. AUDITS.

Section 501(d) is amended by inserting at the end thereof the following new sentences: "For the purpose of carrying out audits and examinations with respect to recipients of Federal assistance under this Act, the Administrator is authorized to enter into noncompetitive procurement contracts with State audit organizations. Such contracts may only be entered into to the extent and in such amounts as may be provided in advance in appropriation Acts.".

SEC. 28. COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS.

(a) DEFINED AS A STATE.—Section 502(3) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

(b) DEFINED AS PART OF UNITED STATES.—Section 311(a)(5) is amended by striking out "the Canal Zone," and inserting in lieu thereof "the Commonwealth of the Northern Mariana Islands,".

SEC. 29. AGRICULTURAL STORMWATER DISCHARGES.

Section 502(14) (relating to the definition of point source) is amended by inserting after "does not include" the following: "agricultural stormwater discharges and".

SEC. 30. REPORTS TO CONGRESS.

Section 516 is amended by adding at the end thereof the following new subsections:

"(f) DAM DISCHARGE STUDY.—The Administrator, in cooperation with interested States and Federal agencies, shall study and monitor the effects on the quality of navigable waters attributable to the impoundment and discharge of water by dams. The results of such study, together with any recommendations for the control of such impoundment and discharge, shall be submitted to Congress not later than December 31, 1986.

"(g) STATE REVOLVING FUND REPORT.—

"(1) IN GENERAL.—Not later than February 10, 1990, the Administrator shall submit to Congress a report on the financial status and operations of Water Pollution Control Revolving Funds established by the States under section 220 of this Act. The Administrator shall prepare such report in cooperation with the States, including water pollution control agencies and other water pollution control planning and financing agencies.

"(2) CONTENTS.—The report under this subsection shall also include the following:

"(A) an inventory of the facilities that are in significant noncompliance with the enforceable requirements of this Act;

"(B) an estimate of the cost of construction necessary to bring such facilities into compliance with such requirements;

"(C) an assessment of the availability of sources of funds for financing such needed constructon, including an estimate of the amount of funds available for providing assistance for such construction through September 30, 1999, from the Water Pollution Control Revolving Funds established by the States under section 220 of this Act;

"(D) an assessment of the operations, loan portfolio, and loan conditions of such Funds;

"(E) an assessment of the effect on user charges of the assistance provided by such Funds compared to the assistance provided with funds appropriated pursuant to section 207 of this Act; and

"(F) an assessment of the efficiency of the operation and maintenance of treatment works constructed with assistance provided by such Funds compared to the efficiency of the operation and maintenance of treatment works constructed with assistance provided under section 201 of this Act.".

SEC. 31. NEWTOWN CREEK, NEW YORK.

(a) MODIFICATIONS TO TREATMENT PLANT.—The Administrator is authorized to make a grant to the city of New York to install such additional facilities in, and make such modifications to, the Newtown Creek sewage treatment plant as are necessary for the plant to provide secondary treatment. The Federal share of such project shall be 75 percent of the cost of installing such facilities and making such modifications.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated such sums as may be necessary to carry out this section for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 32. SAN DIEGO, CALIFORNIA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, surface water and public beaches, and water quality of the city of San Diego, California, and surrounding areas, which are endangered and are being polluted by raw sewage emanating from the city of Tijuana, Mexico.

(b) CONSTRUCTION GRANTS.—Upon approval of the necessary plans and specifications, the Administrator is authorized to make grants to the Secretary of the Army, acting through the Chief of Engineers (hereinafter in this section referred to as the Secretary), or any other Federal agency or any other appropriate commission or entity designated by the President. Such grants shall be for construction of a project consisting of—

(1) treatment works in the city of San Diego, California, to provide primary or more advanced treatment of municipal sewage and industrial waste from the city of Tijuana, Mexico; and

(2) a publicly owned treatment works in such city to provide primary or more advanced treatment of such amount of municipal sewage and industrial waste for such city of San Diego as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

(c) INTERIM MEASURES.—As an interim measure, the Administrator shall make grants to the Secretary or such other agency, commission, or entity as may be designated under subsection (b) for the construction of defensive treatment works to protect residents of the city of San Diego and surrounding areas from pollution resulting from any inadequacies or breakdowns in wastewater treatment works and systems in Mexico. The Secretary or such agency, commission, or entity is authorized to construct, operate, and maintain such defensive treatment works in order to accomplish the purposes of this section.

(d) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the Secretary or such agency, commission, or entity, in consultation with the city of San Diego, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under section 201 of the Federal Water Pollution Control Act.

(e) CAPACITY OF PROJECT.—The project authorized by this section shall provide capacity to provide treatment of municipal sewage and industrial waste for the cities of Tijuana and San Diego.

(f) APPLICABILITY OF ACT.—All provisions of the Federal Water Pollution Control Act which are applicable to a grant made to a State, municipality, or intermunicipal or interstate agency under section 201(g) of such Act shall apply to a grant made to an agency, commission, or entity for construction of treatment works under subsection (b)(2) of this section, except that the non-Federal share of the costs of such construction shall be paid by the city of San Diego and other non-Federal interests.

(g) FEDERAL SHARE.—Construction of the treatment works under subsections (b)(1) and (c) of this section with respect to municipal sewage and industrial waste from the city of Tijuana shall be at full Federal expense less any costs paid by the Government of Mexico as a result of agreements negotiated with the United States.

(h) OCEAN OUTFALL PERMIT.—Upon application of the city of San Diego, the Administrator may issue a permit under section 402 of the Federal Water Pollution Control Act which modifies the requirements of section 301(b)(1)(B) of such Act to permit the discharge of pollutants for any ocean outfall constructed with Federal assistance under this Act if such pollutants have received primary or more advanced treatment. Any permit issued pursuant to this subsection shall not be effective after December 31, 1993.

(i) EXTRA CAPACITY.—If the treatment works constructed under this section to provide treatment for municipal sewage and industrial waste from the city of Tijuana has capacity which is no longer necessary to provide such treatment, such capacity may be used to provide treatment for municipal sewage and industrial waste for the city of San Diego.

(j) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(k) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary to the Administrator to make grants under this section and such sums as may be necessary to the Secretary, or such other agency, commission, or entity as the President may designate under subsection (b), to carry out this section.

SEC. 33. NACO, ARIZONA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, and surface water and groundwater of the community of Naco, Arizona, which are endangered and are being polluted by raw sewage emanating from the city of Naco, Sonora, Mexico.

(b) CONSTRUCTION GRANTS.—Upon application of the county of Cochise, Arizona, the Administrator shall make grants to such county for construction of a project consisting of—

(1) a publicly owned treatment works in such community of Naco, Arizona, to provide primary or more advanced treatment of not less than 150,000 gallons of untreated sewage emanating from the city of Naco, Sonora, Mexico; and

(2) a publicly owned treatment works in such community of Naco, Arizona, to provide primary or more advanced treatment of such amount of municipal sewage and industrial waste per day for such community of Naco, Arizona, as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

(c) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the county of Cochise, Arizona, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under section 201 of the Federal Water Pollution Control Act.

(d) CAPACITY OF PROJECT.—The project authorized by this section shall provide capacity to provide treatment of municipal sewage and industrial waste for the city of Naco, Sonora, Mexico and the community of Naco, Arizona.

(e) APPLICABILITY OF ACT.—All provisions of the Federal Water Pollution Control Act which are applicable to grants made under section 201(g) of such Act shall apply to grants made under this section to provide treatment of municipal sewage and industrial waste for the community of Naco, Arizona.

(f) FEDERAL SHARE.—The Federal share of the cost of construction of the treatment works to provide treatment of municipal sewage and industrial waste for the city of Naco, Sonora, Mexico, shall be at full Federal expense less any costs paid by the Govern-

ment of Mexico as a result of agreements negotiated with the United States.

(g) EXTRA CAPACITY.—If the treatment works constructed under this section to provide treatment for municipal sewage and industrial waste for the city of Naco, Sonora, Mexico, has capacity which is no longer necessary to provide such treatment, such capacity may be used to provide treatment for municipal sewage and industrial waste for the community of Naco, Arizona.

(h) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(i) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Administrator $2,000,000 to make grants under this section for fiscal years beginning after September 30, 1985.

SEC. 34. LIMITATION ON DISCHARGE OF RAW SEWAGE BY NEW YORK CITY.

(a) IN GENERAL.—

(1) NORTH RIVER PLANT.—If the wastewater treatment plant identified in the consent decree as the North River plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1986, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1986 (as determined by the Administrator), except as provided in subsection (b).

(2) RED HOOK PLANT.—If the wastewater treatment plant identified in the consent decree as the Red Hook plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1987, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1987 (as determined by the Administrator), except as provided in subsection (b).

(b) WAIVERS.—

(1) INTERRUPTION OF PLANT OPERATION.—In the event of any significant interruption in the operation of the North River plant or the Red Hook plant caused by an event described in subparagraph (A), (B), or (C) of paragraph (5) occurring after the applicable deadline established under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to such plant, but only to such extent and for such limited period of time as may be reasonably necessary for the city of New York to resume operation of such plant.

(2) INCREASED PRECIPITATION.—In the event that the volume of precipitation occurring after the applicable deadline established under subsection (a) causes the discharge of raw sewage to exceed the limitation under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to either or both such plants, but only to such extent and for such limited period of time as the Administrator determines to be necessary to take into account the increased discharge caused by such volume of precipitation.

(3) VARIATIONS IN CERTAIN NORTH RIVER DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the North River drainage area constituting a violation of subsection (a)(1) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1986, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(1), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(4) VARIATIONS IN CERTAIN RED HOOK DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the Red Hook drainage area constituting a violation of subsection (a)(2) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1987, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(2), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(5) CIRCUMSTANCES BEYOND CITY'S CONTROL.—The Administrator shall extend either deadline under paragraph (1) or (2) of subsection (a) to such extent and for such limited period of time as may be reasonably required to take into account any—

(A) act of war,

(B) unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight, or

(C) other circumstances beyond the control of the city of New York, except such circumstances shall not include (i) the unavailability of Federal funds under section 201 of the Federal Water Pollution Control Act, (ii) the unavailability of funds from the city of New York or the State of New York, or (iii) a policy decision made by the city of New York or the State of New York to delay the achievement of advanced preliminary treatment at the North River plant or Red Hook plant beyond the applicable deadline set forth in subsection (a).

(c) PENALTIES.—Except as otherwise provided in subsection (b), any violation of subsection (a) shall be considered to be a violation of section 301 of the Federal Water Pollution Control Act, and all provisions of such Act relating to violations of such section 301 shall apply.

(d) CONSENT DECREE DEFINED.—For purposes of this section, the term "consent decree" means the consent decree entered into by the Environmental Protection Agency, the city of New York, and the State of New York, on December 30, 1982, relating to construction and operation of the North River and Red Hook wastewater treatment plants.

(e) COOPERATION.—The Administrator shall work with the city of New York to eliminate the discharge of raw sewage by such city at the earliest practicable date.

(f) SAVINGS CLAUSE.—Nothing in this section shall be construed as modifying the terms of the consent decree.

(g) SENSE OF CONGRESS.—It is the sense of Congress that the Administrator should not agree to any further modification of the consent decree with respect to the schedule for achieving advanced preliminary treatment.

(h) TERMINATION DATES.—

(1) NORTH RIVER PLANT.—The provisions of this section shall remain in effect with respect to the North River drainage area until such time as the North River plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(2) RED HOOK PLANT.—The provisions of this section shall remain in effect with respect to the Red Hook drainage area until such time as the Red Hook plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(i) MONITORING ACTIVITIES.—The Administrator shall establish and carry out a program within available funds to implement the monitoring activities which may be required under subsection (a) by December 1, 1984.

(j) ESTABLISHMENT OF METHODOLOGIES.—The Administrator shall establish the methodologies, data base, and any other information required for making determinations under subsection (b)—

(1) for the North River drainage area (as defined in the consent decree) by July 31, 1986, unless the requirements of subsection (h)(1) have been satisfied, and

(2) for the Red Hook drainage area (as defined by the consent decree) by July 31, 1987, unless the requirements of subsection (h)(2) have been satisfied.

(k) VIOLATIONS.—In carrying out this section, if the Administrator finds that a violation of subsection (a) has occurred, the Administrator shall also determine, within 30 days after such finding, whether a provision of subsection (b) applies. If the Administrator requires information from the city of New York in order to determine whether a provision of subsection (b) applies, the Administrator shall request such information. If the city of New York does not supply the information requested by the Administrator, the Administrator shall determine that subsection (b) does not apply. The city of New York shall be responsible only for such expenses as are necessary to provide such requested information. Enforcement action pursuant to subsection (c) shall be commenced at the end of such 30 days unless a provision of subsection (b) applies.

SEC. 35. DEER ISLAND TREATMENT PLANT, MASSACHUSETTS.

(a) EMERGENCY IMPROVEMENTS.—The Administrator is authorized and directed to make grants to the Metropolitan District Commission, Massachusetts, for a project to undertake emergency improvements at the Deer Island Waste Water Treatment Plant in Boston, Massachusetts. The Federal share of such project shall not exceed 75 percent of the cost of carrying out such improvements.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $10,000,000 per fiscal year for each of the fiscal years 1986, 1987, and 1988.

SEC. 36. OAKWOOD BEACH AND RED HOOK PROJECTS, NEW YORK.

(a) RELOCATION OF NATURAL GAS FACILITIES.—Notwithstanding any provision of the Federal Water Pollution Control Act, the Administrator shall pay, to the extent provided in appropriation Acts, in the same proportion as the Federal share of other project costs, all expenses for the relocation of facilities for the distribution of natural gas

with respect to the entire wastewater treatment works known as the Oakwood Beach (EPA Grant Numbered 360392) and Red Hook (EPA Grant Numbered 360394) projects, New York.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, not to exceed $9,000,000 to carry out this section.

SEC. 37. CHIPPEWA TOWNSHIP, PENNSYLVANIA.

In order to protect the public health, environment, and water quality endangered by the destruction of the Chippewa Township, Pennsylvania, sewage treatment facility and the resultant raw sewage discharge into Brady's Run and the Beaver River, Pennsylvania, the Administrator is directed to remove such raw sewage.

SEC. 38. DES MOINES, IOWA.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make a grant to the city of Des Moines, Iowa, for construction of the Central Sewage Treatment Plant component of the Des Moines, Iowa, metropolitan area project. The Federal share of such project shall be 75 percent of the cost of construction.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $85,000,000 for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 39. WASTEWATER RECLAMATION DEMONSTRATION.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make a grant to the San Diego Water Reclamation Agency, California, to demonstrate and field test for public use innovative processes which advance the technology of wastewater reclamation and which promote the use of reclaimed wastewater.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated not to exceed $3,000,000 to carry out this section for fiscal years beginning after September 30, 1985.

SEC. 40. BOSTON HARBOR AND ADJACENT WATERS.

(a) GRANTS.—The Administrator shall make grants to the Massachusetts Water Resource Authority for purposes of—

(1) assessing the principal factors having an adverse effect on the environmental quality of Boston Harbor and its adjacent waters;

(2) developing and implementing a management program to improve the water quality of such Harbor and waters; and

(3) constructing necessary waste water treatment works for providing secondary treatment for the areas served by such authority.

(b) FEDERAL SHARE.—The Federal share of projects described in subsection (a) shall not exceed 75 percent of the cost of construction thereof.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $20,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 41. TREATMENT WORKS IN WASHINGTON STATE.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make grants to the sewage treatment authorities discharging into Puget Sound and adjacent marine waters, including the Strait of Juan de Fuca and Bellingham Bay, to construct necessary treatment works for providing secondary treatment for the areas served by such authorities. The Federal share of such projects shall not exceed 75 percent of the cost of construction thereof.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $250,000,000 to carry out this section for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 42. IMPROVEMENT PROJECTS.

(a) AVALON, CALIFORNIA.—The Administrator shall make a grant of $3,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal year 1986 to the city of Avalon, California, for improvements to the publicly owned treatment works of such city.

(b) WALKER AND SMITHFIELD TOWNSHIPS, PENNSYLVANIA.—The Administrator shall make grants from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Pennsylvania for fiscal year 1986—

(1) to Walker Township, Pennsylvania, for developing a collector system and connecting its wastewater treatment system into the Huntingdon Borough, Pennsylvania, sewage treatment plant, and

(2) to Smithfield Township, Pennsylvania, for rehabilitating and extending its collector system.

(c) TAYLOR MILL, KENTUCKY.—Notwithstanding section 201(g)(1) of the Federal Water Pollution Control Act or any other provision of law, the Administrator shall make a grant of $250,000 from funds allotted under section 205 of such Act to the State of Kentucky for fiscal year 1986 to the city of Taylor Mill, Kentucky, for the repair and reconstruction, as necessary, of the publicly owned treatment works of such city.

(d) WATSONVILLE, CALIFORNIA.—The Administrator shall make a grant of $27,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal years beginning after September 30, 1985, to the city of Watsonville, California, for improvements to the wastewater treatment and disposal facilities of such city.

SEC. 43. STUDY OF REGULATION OF DE MINIMIS DISCHARGES.

(a) STUDY.—The Administrator shall study the feasibility and desirability of eliminating the regulation of discharges of pollutants into the navigable waters in amounts which, in terms of volume, concentration, and type of pollutant, are not significant.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit a report on the results of such study along with recommendations to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 44. STUDY OF EFFECTIVENESS OF INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES.

(a) EFFECTIVENESS STUDY.—The Administrator shall study the effectiveness on waste treatment of innovative and alternative wastewater treatment processes and techniques referred to in section 201(g)(5) of the Federal Water Pollution Control Act which have been utilized in treatment works constructed under such Act. In conducting such study, the Administrator shall compile information, by State, on the types of such processes and techniques utilized, on the number of facilities constructed with such processes and techniques, and a description of such processes and techniques which have not performed to design standards. The Administrator shall also determine which States have not obligated the full amount set aside under section 205(i) of such Act for such processes and techniques and the reasons for each such State's failure to make such obligations.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for providing more effective incentives for innovative and alternative wastewater treatment processes and techniques.

SEC. 45. WATER QUALITY IMPROVEMENT STUDY.

(a) STUDY.—The Administrator shall study the water quality improvements which have been achieved by application of best available technology economically achievable pursuant to section 301(b)(2) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the effectiveness of, and the costs and benefits associated with, application of best available technology economically achievable pursuant to such section and an analysis of the effectiveness of the water quality program under such Act and methods of improving such program, including site specific levels of treatment which will achieve the water quality goals of such Act in a cost-effective manner.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under subsection (a) together with recommendations for improving the water quality program and its effectiveness to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 46. STUDY OF TESTING PROCEDURES.

(a) STUDY.—The Administrator shall study the testing procedures for analysis of pollutants established under section 304(h) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the adequacy and standardization of such procedures. In conducting the analysis of the standardization of such procedures, the Administrator shall consider the extent to which such procedures are consistent with comparable procedures established under other Federal laws.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under this subsection, together with recommendations for modifying the test procedures referred to in subsection (a) to improve their effectiveness, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(c) BIENNIAL REVIEWS.—Biennially after the date of submission of the report under subsection (b), the Administrator shall conduct a state-of-the-art review of the test proce-

dures for the analysis of pollutants referred to in subsection (a) for the purpose of determining the adequacy and effectiveness of such procedures and shall, based on the results of such review, submit to the committees referred to in subsection (b) recommendations for modifying such procedures to improve their effectiveness.

SEC. 47. STUDY OF PRETREATMENT OF TOXIC POLLUTANTS.

(a) STUDY.—The Administrator shall study—

(1) the adequacy of data on environmental impacts of toxic industrial pollutants discharged from publicly owned treatment works;

(2) the extent to which secondary treatment at publicly owned treatment works removes toxic pollutants;

(3) the capability of publicly owned treatment works to revise pretreatment requirements under section 307(b)(1) of the Federal Water Pollution Control Act;

(4) possible alternative regulatory strategies for protecting the operations of publicly owned treatment works from industrial discharges, and shall evaluate the extent to which each such strategy identified may be expected to achieve the goals of this Act; and

(5) the adequacy of Federal, State, and local resources to establish, implement, and enforce multiple pretreatment limits for toxic pollutants for each such alternative strategy.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit a report on the results of such study along with recommendations for improving the effectiveness of pretreatment requirements to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 48. SULFIDE CORROSION STUDY.

(a) STUDY.—The Administrator shall conduct a study of the corrosive effects of sulfides in collection and treatment systems, the extent to which the uniform imposition of categorical pretreatment standards will exacerbate such effects, and the range of available options to deal with such effects.

(b) CONSULTATION.—The study required by this section shall be conducted in consultation with the Los Angeles City and County sanitation agencies.

(c) REPORT.—Not later than one year of the date of the enactment of this Act, the Administrator shall submit a report on the results of the study, together with recommendations for measures to reduce the corrosion of treatment works, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 to carry out this section for fiscal years beginning after September 30, 1985.

SEC. 49. PULP MILL STUDY.

(a) FEASIBILITY STUDY.—The Administrator, in consultation with the State of Alaska, shall conduct a study to determine the feasibility of resolving the air pollution control, solid waste disposal, water quality standards compliance, and energy impacts associated with the achievement of best practicable technology under section 301 of the Federal Water Pollution Control Act with respect to the Alaska Lumber and Pulp Company, located at Sitka, Alaska (NPDES permit numbered AK000053-1).

(b) REPORT.—Not later than 180 days after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under subsection (a) to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 50. STUDY OF RAINFALL INDUCED INFILTRATION INTO SEWER SYSTEMS.

(a) STUDY.—The Administrator shall study problems associated with rainfall induced infiltration into wastewater treatment sewer systems.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of such study, along with recommendations on reasonable methods to reduce such infiltration and on regulatory mechanisms to address special problems associated with increased flows from such systems resulting from such infiltration.

SEC. 51. STUDY OF pH IN DISCHARGES FROM MINING OPERATIONS.

(a) STUDY.—The Administrator shall study effluent limitations as they relate to pH in discharges from mining operations.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of such study along with the recommendations as to the feasibility of permitting modifications of such effluent limitations to permit lower pH in such discharges than is otherwise required.

SEC. 52. STUDY OF POLLUTION IN LAKE PEND OREILLE, IDAHO.

(a) COMPREHENSIVE STUDY.—The Administrator shall conduct a comprehensive study of the sources of pollution in Lake Pend Oreille, Idaho, and the Clark Fork River and its tributaries, Idaho, Montana, and Washington, for the purpose of identifying the sources of such pollution. In carrying out this subsection, the Administrator shall consider existing studies, surveys, and test results concerning such pollution.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of the study conducted under this section together with any recommendations of the Administrator.

(c) EDUCATION PROGRAM.—The Administrator shall make the report under subsection (b) available to the public and shall carry out such education programs as the Administrator deems appropriate for the purpose of making the public aware of the results of the study conducted under subsection (a) and the recommendations contained in such report.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section for fiscal years beginning after September 30, 1985, such sums as may be necessary.

SEC. 53. LIMITATION ON PAYMENTS.

No payments may be made under this Act except to the extent provided in advance in appropriation Acts.

Mr. ANDERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of H.R. 8, the Clean Water Reauthorization Act of 1985 as amended. At the outset, I want to commend JIM HOWARD, BOB ROE, GENE SNYDER and ARLEN STANGELAND on crafting another fine bill. Also, the majority and minority staffs of the Water Resources Subcommittee should be commended for their efforts.

As you know, this legislation reauthorizes the important Clean Water Act through 1994. As a coauthor of the landmark 1972 act, I have monitored its progress over the years and most agree that it has helped to improve our Nation's rivers, lakes and streams.

Yesterday, many of our colleagues addressed this Chamber to highlight the major points of H.R. 8. I take this opportunity to look at the bill in a more personal way. Specifically, how it will affect my area in southern California.

First, the EPA Administrator is directed to conduct a study, in consultation with the city and county of Los Angeles, on the problem of the corrosive effects of sulfides in collection and treatment systems.

Unlike much of the rest of the country, southern California has separate storm drains and sanitary sewers. While this eliminates the major environmental problems caused by combined sewer overflows which plagues many communities, it does result in a unique problem caused by the stronger sewage flowing through separate sewers, that is the generation of sulfides and subsequent deterioration of the sewers and treatment works that they cause. These works were constructed at enormous expense of Federal, State and local dollars and because they were properly constructed, they should last a long time. However, the strong sewage and warm temperature in southern California enhance sulfide generation.

The existence of sulfides in large concrete sewers throughout the Los Angeles basin results in the formation of sulfuric acid which corrodes the sewers and creates the potential for sewer collapse. If one of the large sewers, some of which are as large as 7 feet in diameter, were to collapse in Metropolitan Los Angeles, the resulting environmental and public health problems that would occur could be devastating. Further, sulfides are causing corrosion within the treatment works as the sewage enters the POTW.

One of the most effective controls of sulfide generation in sewers is the existence of heavy metals such as iron, zinc, or nickel in the sewage. These heavy metals combine with the sulfide as soon as they are generated, thus preventing the sulfides from corroding the sewers. With the advent of more stringent controls on the discharge of heavy metals into the sewers from industry, there is less metal in the sewer to inactivate the sulfide. The imminent implementation of categorical pretreatment standards on electroplaters and metal finishers will have an enormously profound negative effect on the sulfide problem as more metals are removed from the sewers.

As I have mentioned, this provision of the bill will provide for the EPA Administrator to work cooperatively with the Los Angeles sanitation agencies to develop methods to deal with the problem, including potential modification to the categorical problem.

Another important provision of the measure pertains to the city of Avalon. Avalon is located on Santa Catalina Island, 26 miles off the southern California coast. It is a resort community, whose population swells during the summer months. Prior to 1978, Avalon discharged its raw sewage into the ocean with little, if any, negative impact. Pursuant to the 1972 law, however, the city, in 1978, began operation of a secondary treatment plant.

The sewage treatment plant was designed for an average daily flow of 500,000 gallons, and a peak flow of 1 million gallons per day. The average daily flow during the peak of the summer season is 800,000 gallons per day—peak flows have been as high as 1,600,000 gallons.

To combat this problem, the bill directs the EPA Administrator to make a grant of $3 million to Avalon to upgrade and improve its treatment plant.

In conclusion, Mr. Chairman, I would like to express my strong support for this needed legislation and I hope that all of my colleagues will support it.

AMENDMENT OFFERED BY MR. JONES OF NORTH CAROLINA

Mr. JONES of North Carolina. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of North Carolina: strike section 36 and insert in lieu thereof the following new section:

SEC. . (a). PURPOSES AND POLICIES.

(1) Congress finds and declares that:

(A) the nation's estuaries are of great importance for fish and wildlife resources; marine transportation; recreation and economic opportunity;

(B) maintaining the health and ecological integrity of these esturaries is in the paramount national interest;

(C) increasing coastal population, unwise development, and other direct and indirect uses of these estuaries threaten their health and ecological integrity;

(D) long-term planning and management will contribute to the continued productivity of these areas, and will maximize their utility to the nation;

(E) better coordination among federal and state programs affecting estuaries will increase the effectiveness and efficiency of the national effort to protect, preserve, and restore these areas, and

(F) existing programs relating to the Chesapeake Bay have demonstrated the strength of the federal-state partnership in comprehensive planning for estuaries.

(2) The purposes of this section are to:

(A) identify nationally significant estuaries that are threatened by pollution, unwise development or overuse;

(B) promote comprehensive planning for, and conservation and management of, nationally significant estuaries by utilizing the water pollution control authorities of the Federal Water Pollution Control Act and the intergovernmental planning and management processes of the Coastal Zone Management Act;

(C) encourage the preparation of special area management plans for estuaries of national significance; and

(D) enhance the coordination of estuarine research.

SEC. . (b). NOMINATION AND SELECTION.

(1) The governor of any state may nominate to the Administrator of the Environmental Protection Agency and the Secretary of Commerce (hereinafter referred to as "Administrator" and "Secretary", respectively) an estuary lying in whole or in part within the state as an estuary of national significance and request a management conference to develop a comprehensive management plan for the estuary. The nomination shall document the need for the conference, the likelihood of success, and information relating to the factors in paragraph (2).

(2) The Administrator and the Secretary, in consultation with other federal agencies, state and local governments and the public, shall review each nomination submitted pursuant to paragraph (1) and select those estuaries of national significance for which comprehensive management plans should be developed. The selection shall be based upon:

(A) the ecological significance of the estuary;

(B) the biological productivity of the estuary and its contribution to fish and wildlife resources of commercial and recreational significance;

(C) the degree to which commercial, residential, recreational, or industrial activities within the estuary and its watershed have impaired or may impair the health and ecological integrity of the estuary; and

(D) the degree to which comprehensive planning and management may contribute significantly to the wise use of the estuary and to its health and ecological integrity.

SEC. . (c). ESTUARINE MANAGEMENT.

(1) The Administrator and the Secretary, with the concurrence of the Governor of each state in which the estuary is located, may convene a management conference for each estuary selected under subsection (b)(2).

(2) The members of the conference shall include the Secretary, the Administrator and other federal, regional, state, and local representatives, and members of the academic-scientific community and the public, as may be necessary to formulate balanced recommendations on the requirements of a comprehensive management plan, as specified in paragraph (3)(B). In addition, the members of the conference shall:

(A) select the conference chairperson;

(B) establish appropriate operating procedures; and

(C) submit to the Administrator and the Secretary a consolidated application for annual funds to be awarded under this section.

(3) The purpose of the management conference shall be to:

(A) undertake and compile research relating to the estuary for purposes of supporting the development and implementation of a comprehensive management plan for the estuary;

(B) develop a comprehensive management plan for the estuary that will restore and maintain the health and ecological integrity of the estuary. Any comprehensive management plan developed pursuant to this subsection shall meet the requirements for a special area management plan under section 304(17) of the Coastal Zone Management Act (P.L. 92-583) and shall include:

(i) priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems to the estuary's physical, chemical, and biological integrity;

(ii) measures providing for the conservation and management of the living resources of the estuary, including shellfish, fisheries, wildlife and associated habitat;

(iii) policies and standards to implement the coastal management objectives for the estuary; and

(iv) a clear delineation of the geographic scope of the management plan including tributaries, watersheds and adjacent ocean areas.

(C) coordinate the implementation of the management plan by the federal, state and local governments participating in the conference.

(4) A management conference convened under this section may be conducted for up to four years. The conference may be extended for one year if, after the initial four-year period, the Administrator and the Secretary determine that substantial progress has been made and that the conference is likely to succeed in fulfilling its objectives.

(5) The Administrator is authorized to make grants and expenditures as are necessary to support the administration of a management conference under this section. Such grants and expenditures shall not exceed 75 per centum of these administrative costs and shall be made on condition that non-Federal sources provide at least 25 per centum of the costs.

SEC. . (d). RESEARCH.

(1) Upon convening a management conference under this section, the Secretary and the Administrator, in conjunction with state and local authorities, shall undertake to develop, compile and make available information and research relating to the estuary that would assist in developing and implementing the comprehensive management plan.

(2) The management conference may develop a research plan, which shall include research needs, priorities and guidelines, to promote the coordination and utility of research relating to the estuary, and shall develop such a research plan prior to the award of grants under subsection (d)(4).

(3) In developing a research plan under this subsection, the management conference shall establish advisory committees or other procedures to provide the interdisciplinary technical expertise necessary to address the range of issues requiring research.

(4) The Secretary shall conduct such research as may be necessary to determine the need to convene a management conference under this section or as may be requested by a management conference. Such research shall comply with any applicable research plan under paragraph (2).

(5) The Administrator, with the concurrence of the Secretary, is authorized to make grants to State water pollution control agencies, State coastal zone management agencies, interstate agencies, other public or nonprofit private agencies, institutions, organizations, and individuals to carry out any research plan developed under subsection (d)(2). Such grants shall not exceed 75 per centum of these costs and shall be made on condition that non-Federal sources provide at least 25 per centum of the costs.

SEC. . (e). PLAN APPROVAL.

At the conclusion of a management conference, the Administrator, the Secretary and each participating governor shall review the plan to determine if it meets the requirements of this section and, if so, shall approve the plan.

SEC. . (f). PLAN IMPLEMENTATION.

(1)(A) The Administrator and each participating governor shall undertake the necessary actions pursuant to title III of the Federal Water Pollution Control Act (P.L. 92-500, as amended) and other authorities to implement the measures established pursuant to subsection (c)(3)(B)(i);

(B) The Secretary and each participating governor from a state with an approved coastal zone management program shall ensure that the state has incorporated the plan into its management program pursuant to section 306(g) of the Coastal Zone Management Act (P.L. 92-583); and

(C) The Secretary and each participating governor from a state without an approved coastal zone management program shall ensure that adequate authorities and procedures exist within that state for implementing the coastal management objectives of the plan.

(2) The Administrator is authorized to make grants to States and interstate agencies participating in a management conference which have adopted a comprehensive management plan pursuant to this section. Such grants shall be for purposes of implementing the plan. The amount of the grants to any State or interstate agency for a fiscal year shall be equal to 50 per centum of that State's or agency's cost of implementing the management plan for such fiscal year.

(3) The Secretary is authorized to provide financial assistance to states under the Coastal Zone Management Act (P.L. 92-583, as amended) to implement the requirements of a plan which has met the requirements of paragraph (1)(B).

(4) The Secretary and the Administrator shall monitor the implementation of any plan developed and adopted pursuant to this section. In the event that a state is not making reasonable progress in fulfilling the requirements of subsection (f)(1), the Administrator and the Secretary shall suspend further federal grants under this section until the requirements of subsection (f)(1) are fulfilled.

SEC. . (g). RELATIONSHIP TO OTHER MANAGEMENT PROGRAMS.

(1) Notwithstanding any other provision of this section, no management conference shall be convened for an estuary if the Administrator and the Secretary determine that a management program exists for the estuary that will achieve the purposes of this section.

(2) Nothing in this section shall apply to the Chesapeake Bay Program conducted pursuant to Public Law 94-116.

SEC. . (h). REPORT TO CONGRESS.

The Administrator and the Secretary shall submit to Congress not later than January 1, 1987 and biennially thereafter a comprehensive report on the activities authorized under this section, which shall:

(1) list the priority monitoring and research needs for estuaries to meet the objectives of this section;

(2) assess the health of the nation's estuaries evaluated under this section;

(3) discuss the pollution problems and trends that affect directly or indirectly the water quality, ecosystem, and existing or potential uses of each estuary evaluated under this section; and

(4) evaluate the effectiveness of pollution abatement activities and other management measures undertaken pursuant to this section.

SEC. . (i) RULES AND REGULATIONS.

No later than 180 days after enactment of this section, the Administrator, with the concurrence of the Secretary, shall promulgate regulations to implement this section 553 of title 5, United States Code.

SEC. . (j). AUTHORIZATION OF APPROPRIATIONS.

(1) There is authorized to be appropriated to carry out subsections (c)(5) and (d)(5) amounts not to exceed $10,000,000 for each fiscal year within the period beginning on October 1, 1985 and ending on September 30, 1990, of which not to exceed $2,000,000 annually shall be made available to the Secretary for the purpose of fulfilling the responsibilities outlined in subsections (b), (d), and (e).

(2) There is authorized to be appropriated to carry out subsection (f)(2) amounts not to exceed:

(A) $10,000,000 for the fiscal year ending September 30, 1988;

(B) $30,000,000 for the fiscal year ending September 30, 1989; and

(C) $50,000,000 for the fiscal year ending September 30, 1990.

(3) Amounts appropriated under this subsection are to remain available until expended.

Mr. JONES of North Carolina (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

Mr. SNYDER. Mr. Chairman, reserving the right to object, we do not have a copy of the amendment, so let me ask, is this the amendment that was printed in the RECORD?

The CHAIRMAN. This is the amendment that was printed in the RECORD.

Mr. SNYDER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. JONES of North Carolina. Mr. Chairman, the amendment which I am today offering to H.R. 8, as amended, is intended to add a new section to the bill to establish the National Estuarine Program.

Mr. Chairman, the Committee on Merchant Marine and Fisheries believes that the long-term health of our Nation's estuaries is vital to our commercial and recreational fisheries and to good coastal resource management.

In my district alone, for instance, virtually the entire shoreline area is a major estuary on which the economics of the coastal fishing and recreational industries depend. Its continued health is of fundamental long-term interest to our citizens. Other areas along our coasts have equally important estuaries and underscore the need for balanced Federal-State efforts as estuarine planning.

In offering my amendment, I must first call attention to the leadership of Chairman HOWARD, Chairman ROE, and the members of the Committee on Public Works and Transportation who deserve credit for developing the basic estuary planning approach in the amendment. That approach calls for the development of a comprehensive management plan for major estuaries through a cooperative Federal-State effort similar to the successful Chesapeake Bay Program. My amendment fully incorporates this basic approach and augments it in certain specific respects.

First, it authorizes State governments to nominate candidate estuaries for this planning effort. Second, it will require the planning conference to take account of commercial and recreational fisheries and coastal management considerations.

□ 1310

Third, it will ensure that no Federal implementation funds are spent unless Federal and State agencies make firm commitments to the plans.

Fourth, it provides for more careful research planning in order to ensure the usefulness of any research supported by Federal funds.

Mr. Chairman, I believe the amendment I am offering today represents a solid, carefully thought out proposal. We worked closely with the Committee on Public Works and Transportation and in particular with Chairman HOWARD and Chairman ROE with this proposal.

Mr. Chairman, I urge my colleagues to support this.

I would like to comment further on the cooperation we have had from the subcommittee chairman as well as the full committee chairman and I simply ask support for this amendment, which I was under the impression was acceptable to the Committee on Public Works.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. ROE AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. JONES OF NORTH CAROLINA

Mr. ROE. Mr. Chairman. I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. ROE as a substitute for the amendment offered by Mr. JONES of North Carolina: Page 86, after line 25, in lieu of the matter to be inserted by the Jones, N.C., amendment, insert the following:

SEC. 36. MAINTENANCE OF WATER QUALITY IN ESTUARIES.

(a) PURPOSES AND POLICIES.—

(1) FINDINGS.—Congress finds and declares that:

(A) the Nation's estuaries are of great importance for fish and wildlife resources and recreation and economic opportunity;

(B) maintaining the health and ecological integrity of these estuaries is in the national interest;

(C) increasing coastal population, development, and other direct and indirect uses of these estuaries threaten their health and ecological integrity;

(D) long-term planning and management will contribute to the continued productivity of these areas, and will maximize their utility to the Nation; and

(E) better coordination among Federal and State programs affecting estuaries will increase the effectiveness and efficiency of the national effort to protect, preserve, and restore these areas.

(2) PURPOSES.—The purposes of this section are to—

(A) identify nationally significant estuaries that are threatened by pollution, development, or overuse;

(B) promote comprehensive planning for, and conservation and management of, nationally significant estuaries;

(C) encourage the preparation of management plans for estuaries of national significance; and

(D) enhance the coordination of estuarine research.

(b) MANAGEMENT CONFERENCE.—

(1) NOMINATION OF ESTUARIES.—The Governor of any State may nominate to the Administrator an estuary lying in whole or in part within the State as an estuary of national significance and request a management conference to develop a comprehensive management plan for the estuary. The nomination shall document the need for the conference, the likelihood of success, and information relating to the factors in paragraph (2).

(2) CONVENING OF CONFERENCE.—

(A) IN GENERAL.—In any case where the Administrator, in consultation with the Secretary of Commerce, determines, on his own initiative or upon nomination of a State under paragraph (1), that the attainment or maintenance of that water quality in an estuary which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water, requires the control of point and nonpoint sources of pollution in more than one State, the Administrator shall select such estuary and convene a management conference.

(B) BASIS FOR SELECTION.—The selection of an estuary under subparagraph (A) shall be based upon—

(i) the ecological significance of the estuary;

(ii) the biological productivity of the estuary and its contribution to fish and wildlife resources of commercial and recreational significance;

(iii) the degree to which commercial, residential, recreational, or industrial activities within the estuary and its watershed have impaired or may impair the health and ecological integrity of the estuary; and

(iv) the degree to which comprehensive planning and management may contribute significantly to the wise use of the estuary and to its health and ecological integrity.

(C) PRIORITY CONSIDERATION.—The Administrator shall give priority consideration under this section to Long Island Sound; Buzzards Bay, Massachusetts; Delaware Bay, Delaware and New Jersey; Albemarle Sound, North Carolina; and Sarasota Bay, Florida.

(3) BOUNDARY DISPUTE EXCEPTION.—In any case in which a boundary between two States passes through an estuary and such boundary is disputed and is the subject of an action in any court, the Administrator shall not convene a management conference with respect to such estuary before a final adjudication has been made of such dispute.

(4) EXISTING MANAGEMENT PROGRAM EXCEPTION.—Notwithstanding any other provision of this section, the Administrator shall not convene a management conference with respect to an estuary if he determines that there exists a management program for the estuarine zone of such estuary with sufficient authority to achieve the purposes of this section.

(c) MEMBERS OF CONFERENCE; LEAD AGENCY.—The members of a conference under this section shall include the Administrator, the Administrator of the National Oceanic and Atmospheric Administration, a representative of each of those States which are located, in whole or in part, within the estuarine zone of the estuary for which the conference is convened, a representative of each interested Federal agency as determined appropriate by the Administrator, a representative of any interstate agency having jurisdiction over all or a significant part of the estuary, and representatives of local governments within the estuarine zone as deemed appropriate by the Administrator. In any case in which an interstate agency has jurisdiction over all or a significant part of the estuary, such agency shall be the lead agency for purposes of carrrying out this section.

(d) PURPOSES OF CONFERENCE.—The purposes of any management conference convened with respect to an estuary under this subsection shall be—

(1) to develop a comprehensive master plan for such estuary in accordance with subsection (e) that will restore and maintain the help and ecological integrity of the estuary;

(2) to coordinate the implementation of the master plan by the States participating in the conference; and

(3) to monitor the estuary to determine the effectiveness of actions taken pursuant to the master plan.

(e) MASTER PLAN.—

(1) CONTENTS.—The master plan developed pursuant to paragraph (1) of subsection (d) shall be developed in coordination with any relevant special area management plan under the Coastal Zone Management Act. Such plan shall include priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems to the estuary's physical, chemical, and biological integrity. Such actions may include, but need not be limited to any of the following standards and practices which are necessary for the attainment or maintenance of that water quality which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water:

(A) development of water quality standards for waters within the estuarine zone;

(B) development of toxicity-based standards for toxic pollutants;

(C) development of water quality based effluent standards for significant point sources of pollution;

(D) development of best management practices to control nonpoint sources of pollution; and

(E) other measures providing for the conservation and management of the living resources of the estuary.

(2) UTILIZATION OF EXISTING DATA.—In developing a master plan under this section, the management conference shall survey and utilize existing reports, data, and studies relating to the estuary that have been developed by or made available to Federal, interstate, State, or local agencies.

(f) PERIOD OF CONFERENCE.—A management conference convened under this section shall be convened for at least four years. Such conference may be extended by the Administrator, and if terminated after the initial four-year period, may be reconvened by the Administrator at any time thereafter, as may be necessary to meet the requirements of this section.

(g) GRANTS FOR IMPLEMENTATION OF MASTER PLAN.—The Administrator is authorized to make grants to States and interstate agencies participating in a management conference which has adopted a comprehensive master plan pursuant to this section for the estuary which is the subject of such conference. The amount of the grants to any State or interstate agency for a fiscal year shall, subject to such amounts as are provided in appropriation Acts, be equal to 50 percent of that State's or agency's cost of implementing the master plan for such fiscal year.

(h) PLAN APPROVAL.—At the conclusion of a management conference, the Administrator, is consultation with the Secretary of Commerce, and each participating governor shall review the comprehensive management plan for the estuary to determine if it meets the requirements of this section and, if so, shall approve the plan.

(i) RESEARCH.—

(1) RESEARCH TO ASSIST IN DEVELOPMENT OF PLAN.—Upon convening a management conference under this section, the Secretary and the Administrator, in conjunction with State and local authorities, shall undertake to develop, compile, and make available information and research relating to the estuary that would assist in developing and implementing the comprehensive management plan.

(2) RESEARCH PLAN.—The management conference may develop a research plan, which shall include research needs, priorities, and guidelines, to promote the coordination and utility or research to the estuary.

(3) ADVISORY COMMITTEES.—In developing a research plan under this subsection, the management conference shall establish advisory committees or other procedures to provide the interdisciplinary technical expertise necessary to address the range of issues requiring research.

(4) RESEARCH TO DETERMINE NEED FOR CONFERENCE.—The Secretary shall conduct such research as may be necessary to determine the need to convene a management conference under this section or as may be requested by a management conference. Such research shall comply with any applicable research plan under paragraph (2).

(j) DEFINITIONS.—For purposes of this section, the terms "estuary" and "estuarine zone" have the meanings such terms have in section 104(n)(4) of the Federal Water Pollution Control Act, except that the term "estuarine zone" shall also include those portions of tributaries draining into the estuary up to the historic height of migration of anadromous fish or the historic head of tidal influence, whichever is higher. For purposes of this section, the term "State" has the meaning such term has in section 502(3) of such Act.

(k) REPORT TO CONGRESS.—The Administrator, in consultation with the Secretary of Commerce, shall submit to Congress not later than January 1, 1987, and biennially thereafter a comprehensive report on the activities authorized under this section, which shall—

(1) list the priority monitoring and research needs for estuaries to meet the objectives of this section;

(2) assess the health of the Nation's estuaries evaluated under this section;

(3) discuss the pollution problems and trends that affect directly or indirectly the water quality, ecosystem, and existing or potential uses of each estuary evaluated under this section; and

(4) evaluate the effectiveness of pollution abatement activities and other management measures undertaken pursuant to this section.

(l) AUTHORIZATION OF APPROPRIATIONS.—

(1) GRANTS.—There is authorized to be appropriated to carry out this section not to exceed $13,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Amounts appropriated under this paragraph shall remain available until expended.

(2) OTHER EXPENSES.—There is authorized to be appropriated to the Administrator not to exceed $2,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, for—

(A) expenses related to the administration of management conferences under this section;

(B) grants to State water pollution control agencies, State coastal zone management agencies, interstate agencies, other public or nonprofit private agencies, interstate agencies, other public or nonprofit private agencies, institutions, organizations, and individuals for research, surveys, studies, and modeling and other technical work necessary for the development of a comprehensive master plan under this section; and

(C) monitoring the implementation of a comprehensive master plan by the management conference or by the Administrator in any case in which the conference has been terminated.

Mr. ROE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. Mr. Chairman, the distinguished gentleman from North Carolina has made a presentation from his committee's point of view on a very important piece of legislation that has to do with estuarine areas. At this stage of the discussion and after review of the amendment the gentleman from North Carolina [Mr. JONES] has presented, we have not been able to resolve some differences that exist between the Public Works Committee and the committee of the gentleman from North Carolina [Mr. JONES].

We are offering this substitute, which in essence does follow probably 95 percent of what is in the Jones amendment; however, we have a legitimate problem that I would like to share with both my good friend, the gentleman from North Carolina [Mr. JONES] and with the rest of the members of the committee. Our major difference with the Jones amendment is that it gives equal jurisdiction with NOA and EPA to carry out the clean water bill.

Now, the primary responsibility of the clean water bill is under EPA, and it is our deep concern that if we mix that level of responsibility, then we have two separate Appropriations Committees that are involved. We have an integral relationship with the coastal zone management plan and we just feel that mixing the level of responsibility is not going to be workable.

Now, what we are trying to do in our amendment here, our substitute amendment, is to absorb a substantial portion of what the Merchant Marine Committee has done under the very distinguished chairman and we would ask him to look at our substitute on that basis.

I would also make this point to the distinguished gentleman that we understand what they are trying to achieve. I am sure that between the Committee on Merchant Marine and the Committee on Public Works that we can hammer out that point before we go to conference and we will reflect the views of both committees. That is what we are trying to do. We think it will meet the needs of the Committee on Merchant Marine and the Committee on Public Works, who are really, you might say, compadres in this whole venture.

We feel if we do not go in our direction that we are going to be doing violence to the jurisdiction of the EPA.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. Yes, I will, of course.

Mr. STANGELAND. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the substitute amendment to the amendment by the gentleman from North Carolina.

Mr. Chairman, as you know, our committee has worked hard to develop a bill that can and should have the support of all of the Members of this body. Therefore, when the gentleman from North Carolina, the distinguished chairman of the Committee on Merchant Marine and Fisheries, expressed concerns with the provision the committee had drafted on the National Estuaries Program, our committee took another careful look at the provision and the provision offered by the gentleman from North Carolina. We have concluded that there is considerable merit in much of what the gentleman seeks to do. Therefore, we have developed a substitute amendment which is a composite of the ideas advanced by the distinguished chairman of the Merchant Marine Committee and those contained in the original committee version.

I believe ours is an approach that achieves the best of the two versions. Accordingly, I urge my colleagues to support our substitute amendment.

Mr. MCKINNEY. Mr. Chairman, will the gentleman yield?

Mr. ROE. Yes, of course.

Mr. MCKINNEY. Mr. Chairman, I appreciate the gentleman yielding.

Am I to understand that this substitute amendment would have in it the priority consideration that the gentleman spoke to yesterday on the floor?

Mr. ROE. The answer is yes.

Mr. MCKINNEY. I thank the gentleman very much. I appreciate the chairman's answer.

Mr. ROE. Well, I would hope, Mr. Chairman, that the committees could agree to this substitute, with the understanding that it is the intent of our committee to work as closely as we can. I know the gentleman from New Jersey [Mr. HOWARD], the chairman of the Committee on Public Works, and our distinguished colleague as chairman of the Committee on Merchant Marine need to work together to develop the proper language that we would be able to utilize in conference.

I really would ask the committee to go along in supporting this substitute.

Mr. THOMAS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. ROE. Yes, of course.

Mr. THOMAS of Georgia. Mr. Chairman, I would like to ask the gentleman from New Jersey, I have a specific concern of my own, if in the substitute amendment that there is proper provision made for the case in which a boundary, a State boundary passing through an estuary, that we might not convene a conference on that particular estuary if there is a court case involved until such time as the case has been adjudicated.

Mr. ROE. Yes; the gentleman is correct.

Mr. THOMAS of Georgia. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 3 additional minutes.)

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Florida.

Mr. FUQUA. Mr. Chairman, I rise in support of the substitute offered by the gentleman from New Jersey, which contains several sections that have been the subject of discussions and letters between the Public Works

and Transportation and Science and Technology Committees. I am pleased to report that the jurisdictional issues have been amicably resolved as reflected in the exchange of letters between Chairman HOWARD and myself.

COMMITTEE ON SCIENCE AND TECHNOLOGY,
Washington, DC, July 11, 1985.

Hon. JAMES J. HOWARD,
Chairman, House Committee on Public Works and Transportation, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing you concerning H.R. 8 which, as reported, does not contain any section over which our Committee claims jurisdiction. However, this year, as the Public Works Committee did last year on H.R. 3282, I am under the impression that you plan to offer these sections of the introduced bill that were purged from the reported bill as a floor amendment.

It is my hope that you will accept and agree to our claim of jurisdiction over several sections of the introduced bill.

I was disappointed last year that during the floor debate on the Roe amendment that our jurisdictional claim was not accepted, in fact, Mr. Stangeland said ". . . I must stress again that this action does not in any way admit that the jurisdictional claims were valid. To the contrary, the Committee believes they were not." H6894, June 26, 1984.

To better clarify our position vis-a-vis H.R. 8, I wrote the Speaker on June 27th seeking sequential referral of H.R. 8 as introduced. The request was denied by letter of July 9 since the reported bill was purged of sections over which we claim jurisdiction. The speaker also said: "I do not dispute that the sections of H.R. 8 introduced which you mention in your accompanying memorandum contain matter within the jurisdiction of the Committee on Science and Technology. Those sections have been removed from the Public Works and Transportation Committee's amendment in the nature of a substitute. While there obviously exists a jurisdictional overlap between your Committee and Public Works and Transportation with respect to the issue of pollution of navigable waters and its relation to environmental research and development questions, I would in this instance encourage your Committee, together with the Committee on Merchant Marine and Fisheries, which made a similar request, to cooperate in the development of possible floor amendments."

Today I have also prepared a bill for introduction which contains only the sections over which we claim jurisdiction. I am prepared to introduce it to further clarify the jurisdictional claim and to offer it as an amendment to H.R. 8. It contains the identical language as Sections 47, 48, 51, 52, and 53 of the introduced bill except Section 53 has been amended in two places, one, the amount has been reduced from $25 million to $2.5 million, and "the appropriate committees of the House and Senate" has been substituted for the Public Works Committees.

It is my hope that you can accept our jurisdictional claims, so that H.R. 8, which we support, can proceed expeditiously to the floor.

Sincerely,

DON FUQUA,
Chairman.

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, DC, July 22, 1985.

Hon. DON FUQUA,
Chairman, Committee on Science and Technology, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: As you know, H.R. 8, the Water Quality Renewal Act of 1985, as reported by the Committee on Public Works and Transportation, will be considered for action on the House Floor this week and we expect it will enjoy overwhelming support.

Your letter of July 11 requests our support in recognizing that sections of the introduced bill, specifically sections 47, 48, 51, 52 and 53, are within the joint jurisdiction of your Committee and ours. You state also that you are prepared to offer an amendment to H.R. 8 covering the identical language in sections 47, 48, 51, and 52 with section 53 modified to reduce the amount of $25 million to $2.5 million and "the appropriate committees of the House and Senate" has been substituted for the Committee on Public Works and Transportation.

This is to advise you that the Committee on Public Works and Transportation does recognize our joint jurisdictional claims in these matters between our Committees.

We appreciate your support for H.R. 8.

Sincerely.

JAMES J. HOWARD,
Chairman.

Mr. JONES of North Carolina. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am well aware that the substitute will prevail; however, it is a little disappointing, to be candid and frank, to work out what we thought was a compromise with this committee and with the Rule Committee that I would be able to offer this amendment. Only today at 10 minutes to 12 was I advised of this substitute; so with that, not being critical, I just am well aware of the prevailing sentiment of the House. I cannot attack the amendment, nor can I defend it, because I do not know what it does. I have not had a chance to analyze it at all.

Ms. MIKULSKI. Mr. Chairman, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. Mr. Chairman, I join Chairman JONES in support of the amendment to H.R. 8 establishing the National Estuarine Program. This program will allow State and local governments, along with EPA, NOAA, and other Federal agencies to manage important estuaries, to protect their living marine resources, and to preserve and restore water quality in them.

As chair of Oceanography Subcommittee, I share Chairman JONES' view that the National Estuarine Program should build upon the two major Federal laws affecting our Nation's coastal areas and estuaries—the Clean Water Act and the Coastal Zone Management Act.

This amendment establishes a management conference approach to estuarine cleanups. It has worked for the Chesapeake Bay, and I think that this model should be followed to clean up other major estuaries.

What I like about the National Estuarine Program, is that it operates with the active participation and support of State and local governments. Under this amendment to H.R. 8, estuary management plans will not be written in Washington by Federal agencies, but will be written by local and State people who live near these major estuaries.

Mr. Chairman, we must do something to prevent the degradation and destruction of our Nation's estuaries. We now know how enormously productive these areas are, and important they are to the economies of their regions.

I believe that this amendment to H.R. 8 will create an effective way to preserve, protect, and develop our major estuaries, and I urge my colleagues to support it.

Thank you.

Mr. JONES of North Carolina. Mr. Chairman, I can assure the gentlewoman that I have nothing but the most intense desire to work with this committee. In the past we have been able to work very well together.

Mr. EDGAR. Mr. Chairman, I move to strike the requisite number of words.

I yield to the Chairman, the gentleman from New Jersey [Mr. ROE].

Mr. ROE. Mr. Chairman, I really feel badly about there being apparently some misunderstanding of intent, or warmth, or respect. There is nobody, Mr. Chairman, that I would respect more than the distinguished chairman, the gentleman from North Carolina, the chairman of the Merchant Marine Committee.

□ 1320

There may be a little slippage here in the dialog, but it is not the intent of the Public Works and Transportation Committee, or the Water Resources Subcommittee, or anybody here on our respective committees to either attempt to take away any jurisdiction or to harm anything the gentleman is trying to do. We are simply saying that there is a legitimate problem that we will both face, your committee and our committee, in split authority and jurisdiction in appropriations and in two or three other ways. We do not want the gentleman in any way to feel that we are not being respectful to the great work he has done in a very important committee as chairman of that committee in this House.

What we will promise the gentleman we will do as we unfold this language is that we will work with him and his committee directly to hammer out language that will be acceptable before we go to conference on it. So I can

guarantee the gentleman from North Carolina [Mr. JONES] that we will follow in that direction.

Mr. EDGAR. Let me just use a moment of my time to congratulate the gentleman from New Jersey, Chairman ROE, and the gentleman from Minnesota [Mr. STANGELAND] for a very good, clean water bill, and to say that I support the Roe compromise amendment. He has made some important changes in the provisions of H.R. 8 in the areas of citizen suits, stormwater discharges, backsliding, and variances for fundamentally different factors.

But more importantly, I support the essence of the Clean Water Act that our committee worked so hard to put together. I think as we move to the second phase of what I call the second environmental revolution where we deal with the tougher environmental issues like nonpoint source pollution, this bill does a good job, and I want to commend both of my colleagues for their leadership.

I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. ROE] as substitute for the amendment offered by the gentleman from North Carolina [Mr. JONES].

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. JONES], as amended.

The amendment, as amended, was agreed to.

Mr. ROE. Mr. Chairman, I ask unanimous consent for the correction of a misspelled word in the overall amendment on page 5, line 17. The word should read "health," rather than "help."

The word was mispelled.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDMENT OFFERED BY MR. PACKARD

Mr. PACKARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PACKARD: Page 87, strike out line 16 and all that follows through line 4 on page 91, and insert in lieu thereof the following:

SEC. 32. SAN DIEGO, CALIFORNIA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, surface water and public beaches, and water quality of the city of San Diego, California, and surrounding areas, which are endangered and are being polluted by raw sewage emanating from the city of Tijuana, Mexico.

(b) CONSTRUCTION GRANTS.—Upon approval of the necessary plans and specifications, the Administrator is authorized to make grants to the Secretary of State, acting through the American Section of the International Boundary and Water Commission (hereinafter in this section referred to as the "Commission"), or any other Federal agency or any other appropriate commission or entity designated by the President. Such grants shall be for construction of a project consisting of—

(1) treatment works in the city of San Diego, California, to provide primary or more advanced treatment of municipal sewage and industrial waste from the city of Tijuana, Mexico; and

(2) a publicly owned treatment works in such city to provide primary or more advanced treatment of such amount of municipal sewage and industrial waste for such city of San Diego as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

(c) FURTHER MEASURES.—As a further measure, the Administrator shall make grants to the Commission or such other agency, commission, or entity as may be designated under subsection (b) for the construction of defensive treatment works to protect residents of the city of San Diego and surrounding areas from pollution resulting from any inadequacies or breakdowns in wastewater treatment works and systems in Mexico. The Commission or such agency, commission, or entity is authorized to construct, operate, and maintain such defensive treatment works in order to accomplish the purposes of this section.

(d) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the Commission or such agency, commission, or entity, in consultation with the city of San Diego, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under section 201 of the Federal Water Pollution Control Act.

(e) CAPACITY OF PROJECT.—The project authorized by this section shall provide capacity to provide treatment of municipal sewage and industrial waste for the cities of Tijuana and San Diego.

(f) APPLICABILITY OF ACT.—All provisions of the Federal Water Pollution Control Act which are applicable to a grant made to a State, municipality, or intermunicipal or interstate agency under section 201(g) of such Act shall apply to a grant made to an agency, commission, or entity for construction of treatment works under subsection (b)(2) of this section, except that the non-Federal share of the costs of such construction shall be paid by the city of San Diego and other non-Federal interests.

(g) FEDERAL SHARE.—Construction of the treatment works under subsections (b)(1) and (c) of this section with respect to municipal sewage and industrial waste from the city of Tijuana shall be at full Federal expense less any costs paid by the State of California and less any costs paid by the Government of Mexico as a result of agreements negotiated with the United States.

(h) OCEAN OUTFALL PERMIT.—Upon application of the city of San Diego, the Administrator may issue a permit under section 402 of the Federal Water Pollution Control Act which modifies the requirements of section 301(b)(1)(B) of such Act to permit the discharge of pollutants for any ocean outfall constructed with Federal assistance under this Act if such pollutants have received primary or more advanced treatment. Any permit issued pursuant to this subsection shall not be effective after December 31, 1993.

(i) EXTRA CAPACITY.—If the treatment works constructed under this section to provide treatment for municipal sewage and industrial waste from the city of Tijuana has capacity which is no longer necessary to provide such treatment, such capacity may be used to provide treatment for municipal sewage and industrial waste for the city of San Diego.

(j) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(k) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary to the Administrator to make grants under this section and such sums as may be necessary to the Commission or such other agency, commission, or entity as the President may designate under subsection (b), to carry out this section.

Mr. PACKARD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PACKARD. Mr. Chairman, my amendment simply is to enact some minor and technical changes. It in essence changes the jurisdiction of the project from the Army Corps of Engineers to the International Boundary and Water Commission. It also allows California to participate in the cost sharing.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. PACKARD. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, this is a technical amendment definitely, and we have reviewed this amendment on this side. We have no objection to the gentleman's amendment.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. PACKARD. I am happy to yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Chairman, likewise, we have reviewed the amendment on this side. It is an improvement over the committee print and the way the committee has reported the bill to the House, and certainly I support the amendment.

Mr. PACKARD. Mr. Chairman, I thank my chairman and ranking member, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. PACKARD].

The amendment was agreed to.

Mr. ANDREWS. Mr. Chairman, I move to strike the last word and to engage the chairman of the subcommittee at colloquy.

Mr. Chairman, I have a question concerning the sewage construction grants allocation formula contained in H.R. 8.

It is my understanding that the allocation formula contained in this bill is composed of two parts—half uses EPA's 1976 survey of needs and the estimated 1976 population and the other half uses the EPA's 1980 survey of needs. It is also my understanding that EPA has completed a 1984 survey of State needs and we have available population estimates from the Bureau of the Census. In my opinion, this updated EPA data should be used to input the formula used to calculate the allocation to the States.

While the Senate's Clean Water Act amendments includes an allocation formula which has been updated to utilize the EPA's 1984 survey of needs, it totally changes the structure of the formula. When the conference on the Clean Water Act meets, Mr. Chairman, it is my hope that you will support, at the very least, updating the current formula by using the most current population estimates and needs survey information so as to take into consideration the water quality needs of the Nation as they exist today. I wonder, Mr. Chairman, if you could reassure me of intentions on this matter.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, I wish to assure the gentleman we intend to examine the allotment formula very carefully in conference as part of this effort. We by all means will review all relevant data in order to develop an equitable allotment formula which takes into consideration the need of all of the States, and I think the gentleman has made a contribution to the debate today.

Mr. ANDREWS. Mr. Chairman, since the passage of the 1972 Clean Water Act, great strides have been made to improve the water quality of the Houston ship channel. Through the combined effort of industrial and domestic dischargers, loadings of oxygen demanding materials have been reduced sevenfold, from over 400,000 pounds per day to approximately 60 pounds per day. As a result, dissolved oxygen levels in the Houston ship channel have been significantly increased.

However, due to the physical characteristics of the channel, a sluggish body of water influenced by tidal activity and a salt wedge, we have reached the point where measurable increases in dissolved oxygen levels cannot be attained through state-of-the-art treatment technologies on publicly owned treatment plants.

Computer modeling has shown that even with the installation of state-of-the-art technology controls on these municipal plants, it will be very difficult, if not impossible, to attain water quality standards. Whereas, Federal law requires that POTW's meet effluent limits of 30 milligrams per liter of biochemical oxygen demand [BOD] and 30 milligrams per liter of total suspended solids [TSS], discharges in the Houston ship channel watershed currently operate under limits of 10 milligrams per liter BOD and 15 milligrams per liter of TSS. The computer modeling studies show that state-of-the-art technology, that is, reductions to 5 milligrams per liter BOD, will have no appreciable impact on dissolved oxygen levels.

On the other hand, studies are ongoing which indicate the utilization of instream aeration in the Houston ship channel, in combination with the advanced wastewater technology currently utilized, will result in the attainment of water quality standards in the Houston ship channel. Instream aeration can be initiated at a fraction of the cost to install state-of-the-art technology on POTW's. It has been estimated that capital costs and operating expenses for state-of-the-art treatment would cost up to $300 million through 1992 for discharges in the channel watershed, with no appreciable impact. Instream aeration would require expenditures of a few million dollars with a significant beneficial impact in dissolved oxygen levels in the Houston ship channel.

Mr. Chairman, I want to emphasize that the use of this alternative technology in my area is in no way a retreat from the strict water standards that must remain in place to ensure the protection of Galveston Bay. But I do believe that instream aeration could present an excellent alternative for the few areas like my own which face water quality problems that cannot be addressed by strict adherence to traditional methods.

I wonder if the chairman would please comment.

The CHAIRMAN. The time of the gentleman from Texas [Mr. ANDREWS] has expired.

(By unanimous consent, the gentleman from Texas [Mr. ANDREWS] was allowed to proceed for 2 additional minutes.)

□ 1330

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ANDREWS. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has done an admirable job in expressing and digesting for the benefit of the committee what the serious problems are which exist in the Houston ship channel. I think the gentleman is right on target. I would say to the gentleman that as far as the committee is concerned, and myself, of course, that his observation on the use of aeration as an added starter, if you like, an added technological use, should be encouraged by EPA. I think what is happening is that we have not given enough attention to the use of this mechanism that the gentleman has so well discussed. I thoroughly agree with what the gentleman is saying and will extend every effort to see that EPA does move in the direction of giving priority to aeration of these streams.

Mr. ANDREWS. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, will the gentleman from New Jersey [Mr. ROE] yield for a question and clarification of the intent of section 42(a) which requires the EPA Administrator to make a grant of $3 million to Avalon, CA, for improvements to the treatment facility in that community?

Mr. ROE. I yield to the gentleman from California.

Mr. ANDERSON. The city of Avalon received a clean water grant for phase I of a two-phase treatment plant construction project in 1973, and the present treatment plant was placed into operation in 1976. The grant was for $2.1 million and phase I was completed in early 1978. Phase II of the project, according to the California Water Quality Control Board: "is now needed to alleviate hydraulic and organic overloading of the phase I facilities * * *. This proposed phase II project is approximately 5 years overdue and the treatment facilities, although salvageable, are in a general state of disrepair." As this is phase II of the project which began in 1973, are we correct that the Federal share of this project is 75 percent?

Mr. ROE. If the gentleman will yield, the gentleman is absolutely correct.

Mr. ANDERSON. I thank the gentleman.

Mr. ROE. I think the gentleman has established the case very, very well, on the situation affecting Avalon, CA. Mr. Chairman, I welcome the opportunity to clarify with the gentleman what the intent of law is and what the community should be eligible to do.

Mr. ANDERSON. I thank the gentleman.

Mr. DYSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, several years ago I went to meet with the Subcommittee on Water Resources of the full Committee on Public Works and Transportation about the Chesapeake Bay, an issue very dear to me. We just received an EPA report that basically said that those of us who live in Pennsylvania, Maryland, and Virginia have just spent 350 years using and abusing the

Chesapeake Bay, and that if we wanted to do something to reverse that course we were going to have to get together as a unit and work together.

Mr. Chairman, I proposed some legislation that had the endorsement and cosponsorship of all the Representatives in those three States. It was referred to BOB ROE's Subcommittee on Water Resources. His subcommittee had a series of four hearings in which the Governors of all three of those States and Members of Congress went and spoke on this issue.

He has included this as part of the Howard amendment to H.R. 8, the water quality bill.

Mr. Chairman, I want to take the time today to thank him. For someone who is not from this area, he probably knows more about the Chesapeake Bay than probably anybody else on this committee.

I think what we are doing today is a real beginning for the cleanup of the Chesapeake Bay. It is a monumental task; $52 million may seem like a large amount of money, but it is not nearly enough for what we really need to do. As I say, we need to reverse about 350 years of abuse on the Chesapeake Bay.

This is a good beginning. It leaves the road to cleanup essentially to the States with coordination by the EPA.

Mr. Chairman, again I want to thank BOB ROE. I have never seen a Member of Congress, outside of myself, maybe, who works harder. He has just been amazing. As I said, for a very small issue in this overall very large bill, he did hold four hearings in which we were able to bring a number of people into Washington to testify on its behalf. We were also able to take members of the full committee and the subcommittee out on the Chesapeake Bay to take a firsthand look at the pollution problems in this estuary.

Mr. Chairman, it is certainly my hope in the future to get the gentleman from New Jersey to come out on the bay along with the chairman, Chairman HOWARD, and the ranking minority member, Mr. SNYDER, and also ARLAN STANGELAND, the ranking minority member on the Subcommittee on Water Resources.

Again, I want to thank the gentleman from New Jersey for his help. Again, it is going to go a long, long way. I think generations that he and I will never see or know will benefit from a cleanup of the Chesapeake Bay.

Mr. Chairman, this is a very important beginning today.

Mr. ROE. Mr. Chairman, I thank the gentleman for those kind words.

AMENDMENT OFFERED BY MR. STANGELAND

Mr. STANGELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STANGELAND: Page 58, after line 17, insert the following:

(c) EQUIVALENT LOCAL PRETREATMENT DEMONSTRATION PROGRAM.—Section 307 is amended by adding at the end the following new subsection:

"(f)(1) Any State may apply to the Administrator to operate an equivalent local pretreatment demonstration program under this subsection with respect to one or more qualifying treatment works located in such State.

"(2) For purposes of this subsection, the term 'qualifying treatment works' means a publicly owned treatment works which—

"(A) is in compliance with applicable effluent limitations pursuant to sections 301 and 302 of this Act and with all requirements of section 402(b)(8) of this Act;

"(B) has had approved by the Administrator before the date of enactment of this subsection the design for a pretreatment program meeting the standards established by the Administrator under subsection (b) of this section; and

"(C) is implementing an equivalent local pretreatment system—

"(i) with respect to which the owner or operator of such treatment works has sufficient funds, equipment, and personnel to effectively administer such equivalent system;

"(ii) with respect to which such owner or operator has adequate technical capability to effectively sample and monitor the quality of (I) the discharges regulated by such equivalent system and the discharge from the treatment works, (II) the sludge resulting from the operation of the treatment works, and (III) the water into which the discharges are made from the treatment works;

"(iii) with respect to which such owner or operator has adequate legal authority to enforce and ensure continued compliance with all requirements of such equivalent system; and

"(iv) which will not impair the ability of such owner or operator to safely use or dispose of sludge resulting from the operation of the treatment works.

"(3) For purposes of this subsection, the term 'equivalent local pretreatment system' means a system developed by the owner or operator of a publicly owned treatment works of regulating the introduction of pollutants into such works, which system is different from that required under section (b) of this section and section 402(b)(8) of this Act but which equally or more effectively prevents the discharge through such works of pollutants which interfere with, pass through, or otherwise are incompatible with such works or which impair current or planned sludge use or disposal.

"(4) The Administrator shall not approve demonstration programs with respect to more than four qualifying treatment works in each of the ten regions of the Environmental Protection Agency. If applications are received by the Administrator with respect to more than four qualifying treatment works for any such region, the Administrator shall select the treatment works for which the programs will be approved taking into account—

"(A) whether or not the State in which the treatment works is located has promulgated water quality standards for the pollutants covered by the equivalent local pretreatment system for such treatment works;

"(B) whether or not the State in which the treatment works is located has an approved permit program under section 402;

"(C) the number and type of indirect discharges that would be subject to the equivalent system;

"(D) the record of compliance achieved by the treatment works in meeting applicable effluent limitations;

"(E) the extent to which the treatment works is exceeding the requirements of secondary treatment under section 301(b)(1)(B); and

"(F) the effectiveness of the equivalent system in encouraging the recycling of pollutants compared to the effectiveness expected of the treatment works under the requirements of subsection (b) of this section in recycling pollutants.

"(5) The Administrator, or State in any case in which the State has an approved permit program under section 402(b), shall, after notice and opportunity for hearing, modify any permit issued under section 402 for a publicly owned treatment works with respect to which a demonstration program is approved under this subsection in order to permit such treatment works to operate an equivalent local pretreatment system. Any such modification shall not be effective after September 30, 1990.

"(6) If the Administrator or the State, as the case may be, determines that the owner or operator of a treatment works for which a permit has been modified under paragraph (5) is not meeting the requirements of this subsection, the Administrator or State may, after notice and opportunity for hearing, modify the permit of such treatment works under section 402 to—

"(A) rescind such permit modification, or

"(B) make such additional modifications in such permit as may be necessary to operate the equivalent local pretreatment system in accordance with the requirements of this subsection.

"(7) If a demonstration program application under this subsection is denied or, if a permit modification under this subsection is rescinded or ceases to be in effect, the affected source or sources shall, upon notification, be immediately subject to the applicable pretreatment standards under subsection (b) of this section and section 402(b)(8) of this Act. Each such source shall comply with such standards in the shortest possible time (as determined by the Administrator or State, as the case may be), which in the case of the denial of a demonstration program application shall not exceed the amount of time that the source had remaining for compliance when such application was filed.

"(8) Each State with an approved demonstration program under this subsection shall operate such program during the period beginning on the date of approval of such program and ending September 30, 1990. Each such State shall report annually to the Administrator on the status of such program.

"(9) Not later than September 30, 1989, the Administrator shall submit a report to Congress on the implementation and effectiveness of the demonstration program carried out by each State under this subsection, along with recommendations on whether the program should be continued after September 30, 1990.".

Mr. STANGELAND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. STANGELAND. Mr. Chairman, I would like to have the record reflect that I fully support H.R. 8, the Water Quality Renewal Act of 1985, which I cosponsored. I have nothing but respect and admiration for my colleague, the gentleman from New Jersey [Mr. ROE] for his tireless effort on this bill and his leadership as chairman of the Subcommittee on Water Resources on which I serve as the ranking Republican member. I believe that through the hard work of the chairman and the other members of our committee we have an excellent bill, one that I was happy to support.

There is, however, one important area not covered by H.R. 8 that I believe should be. Mr. Chairman, as you know, I advocate greater flexibility with the provisions contained in section 307 of the act requiring the application of national categorical pretreatment standards for indirect dischargers. These standards require that industrial sources of pollution which discharge into publicly owned treatment works, or POTW's as they are called, implement measures to treat their effluent before it enters into the POTW's wastewater treatment facility.

Under the act, pretreatment must conform with mandatory Federal standards promulgated by EPA which are not yet fully operational. These new standards will replace many existing and effective pretreatment programs developed at the local level by local officials in response to local needs. Even though these local pretreatment programs may be equal or superior to the protection afforded by the application of Federal standards, they will have to be scrapped at considerable expense to the affected industries and municipalities because the local program may not be identical to the program called for by the application of Federal standards.

It's my view, and the view of many others, that as long as a municipality can adequately demonstrate to the State and to EPA that its locally developed system of pretreatment is at least as effective as the different national categorical pretreatment standards recommended by the Agency, such a municipality should be afforded the opportunity to implement its own program.

I believe that it's unwise to require compliance with Federal categorical standards when other less costly methods are available, methods which are just as effective in achieving the goals of the act. Furthermore, such a rigid approach inhibit the development of new initiatives that could greatly improve water quality.

Accordingly, I am offering an amendment to H.R. 8 authorizing EPA to select up to 40 municipal treatment programs nominated by the States for inclusion in a 5-year demonstration program. In order to be eligible to participate, the owner or operator of the treatment works would have to show that the treatment works is in compliance with applicable secondary treatment and water quality based effluent limitations under section 301 and 302 and with all the requirements of its section 402 NPDES permit, and that the locally developed pretreatment system is at least as effective in preventing the pass-through of harmful pollutants as required by the national categorical standards. In addition, he would have to show that the POTW can adequately demonstrate effective administration of an equivalent program, including requirements for sampling and monitoring, that the POTW has adequate enforcement authority to insure compliance with its equivalent system, and that the equivalent system will not impair safe use and disposal of resulting sludge.

The amendment would also call for annual reports to the Congress by the States on the effectiveness of the demonstration program and a final report by EPA prior to the conclusion of the program.

Mr. Chairman, I realize that there are many who feel that any program mandated by EPA is always going to be better than one developed locally. I frankly do not agree.

I have visited local pretreatment works, have talked to the people who run them, and I believe that there are very dedicated, imaginative and capable professionals out there that are equal to the challenge of showing to the Federal Government that locally developed programs can be every bit as effective as Washington's if not more so.

To deny them the opportunity to do so, is not only unfair to them, but it is also unfair to the goals of the Clean Water Act.

Therefore, Mr. Chairman, I would ask my colleagues to seriously consider the merits of my proposal and to support my amendment, which would do nothing more than allow States to propose and operate under equally effective approaches to Federal pretreatment standards.

□ 1340

Mr. Chairman, I yield back the balance of my time.

Mr. EDGAR. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I reluctantly oppose the gentleman's amendment to allow pretreatment opt-out. Mr. STANGELAND has been a leader in the efforts to create what I think is one of the best environmental pieces of legislation that we have had before us in some time, and it is a bill that I think will help us move aggressively toward achieving the goal of clean water, and I commend him for his leadership.

I oppose this amendment on several specific grounds, and let me begin by stating that while the gentleman has indicated a number of groups that support the legislation, there is an equally distinguished group of individuals and organizations that oppose this amendment.

Pretreatment opt-out was rejected by Administrator Ruckelshaus when he was the Administrator of EPA, and it was rejected by our House Public Works and Transportation Committee when it was offered in committee and subcommittee; rejected by the Senate Environment and Public Works Committee, and it is absent from the Senate's Clean Water bill.

Specifically, there are several points that should be made. First, this amendment, if allowed to become law, would allow cities to run their own pretreatment programs rather than following the national program and will reduce environmental protection, which is the major goal of the Clean Water Act.

We have just gotten to the point where the pretreatment program is starting, after years of delay, to take effect and be implemented, and this amendment would just further delay protection from toxic pollution at this late date.

The States and the EPA, which has to review each cities' programs, would face a new administrative burden with a separate pretreatment program. For this reason and because technology to compare the national and local programs is not very far advanced, former EPA Administrator William Ruckelshaus, as I indicated, opposed allowing the pretreatment opt-out.

The opt-out could also pit city against city in an effort to attract industries by promising less stringent environmental regulations. We have just seen a nationwide competition for the General Motors Saturn plant, where community after community offered to this large corporation the lowering-of-tax benefits, free land, free opportunities to come into the community and all of those deals were very important as they were structured by local communities; I could envision in the future a local community going to a large corporation and saying: "Come to us. We now take care of our own pretreatment programs and we can give you a place where you can pollute at a higher rate."

I think it is false wisdom, and I would urge my colleague to withdraw his amendment. The amendment will endanger the environment. It allows 40 cities that have industries which have not complied with the law to replace national standards and industrial toxics with local standards.

51-059 O-86-4 (Pt. 15)

EPA does not have that data to decide what is equal or more effective. It will delay environmental cleanup; it will reward industries which have not complied, and I believe more importantly, that it is unnecessary.

We have a strong environmental bill; I would urge my colleagues to support what the committee did in full committee, and that is reject the gentleman's amendment.

I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

With all due respect to the gentleman, and I have a great deal of respect for him and for his environmental stand, he is absolutely and totally incorrect when he says that this amendment would allow for lesser standards.

Mr. Chairman, the amendment requires that a local pretreatment program meet national categorical standards. So it is not the lessening of the standards in terms of their effectiveness; it is allowing the local pretreatment to develop their own program so long as it meets the national categorical standards, the effective standards. If they cannot meet that, then they have to come under the national program.

It does not allow 40 cities to get into this program; it allows EPA to have up to 40 cities. It could be 5, 10, 15, or 20. It could be 40.

(By unanimous consent, Mr. EDGAR was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. Mr. Chairman, that is the very point. The local communities, the States, the local cities, do not have the same kind of standards and guidelines that we would hope would be in the national program, and I see no reason for 5 cities, 10 cities, 30 cities, or up to 40 cities being allowed this special treatment.

If our goal is for a national standard of clean waters that are swimmable, fishable; if our goal is for a national clean water act, then I think we have in the legislation already the guidelines and the proposals to work closely with State government, to identify what standards have to be laid out.

I do not think we ought to go, as the gentleman suggests, to a lower standard in certain areas.

The gentleman shakes his head that it is a lower standard. William Ruckelshaus says it was not workable; and William Ruckelshaus was, I think, a very outstanding Director of the Environmental Protection Agency, and he rejected the idea.

Those of us in the committee who have looked at this issue rejected it, in our committee jurisdiction, and I do not think the gentleman has given adequate evidence that anything has changed since the rejection of this idea in the past.

The concern by myself and others is that it will in fact give an opportunity for lowered standards, and give an opportunity to shop around for the city or the community that has the pretreatment standards that can best match a particular industry that may in fact want to pollute.

I appreciate the gentleman's trying to tailor and shape this language so that it looks like an innocent amendment, but I have to say that it just is not an innocent amendment.

I yield to the gentleman.

Mr. STANGELAND. Let me say that whether it is an innocent amendment or not, it is an amendment to enhance the goals of the Clean Water Act.

(On request of Mr. STANGELAND and by unanimous consent, Mr. EDGAR was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. I yield to the gentleman.

Mr. STANGELAND. The gentleman makes the point that what is different today than in the past, when this was rejected by committee.

First of all, the amendment in its present form is the most tightly drawn amendment that you have ever seen dealing with this issue. That is No. 1.

No. 2, the gentleman from Minnesota hopes that he can enlighten enough Members to allow for some local, equal equivalency. We are talking about the quality of the water out of the pipe, and if a local program can deliver the quality equal or better than the national categorical standards, they ought to be allowed to do so.

This can develop into new, different types of treatment that perhaps are most cost-effective than we have under the present national categorical standards program.

□ 1350

To say that this is contrary to clean water, I would just point out that the professionals in the field, all, I would expect, equal to, and some superior to, those who run EPA, say that this is workable, it is doable, and they can enhance the Act and enhance our goals of clean water with their local programs.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. EDGAR] has expired.

(By unanimous consent, Mr. EDGAR was allowed to proceed for 1 additional minute.)

Mr. EDGAR. I appreciate the author of the amendment trying to defend his position.

In summary, I believe the gentleman's amendment allows for up to 40 cities to replace the national standards for industrial toxics with less stringent local standards which purport to achieve equal or more effective results. But EPA does not have the data to decide what is equal or more effective. Neither EPA nor the States have set water quality or sludge standards for most industrial toxics. In all likelihood, less cleanup means worse results.

Further, I believe this amendment upsets the rules that took a decade to promulgate, just as enforcement of those rules starts.

And, finally, I believe this amendment gives those who violated past compliance deadlines a competitive advantage over those who installed the EPA-required controls.

We have a good bill here. I think it is a bill that has bipartisan support. We worked very hard and very long on this legislation. I would urge my colleagues to reject this amendment, go with the committee bill, which I think is one of the best pieces of legislation we have had before us in the recent past.

Mr. GROTBERG. Mr. Chairman, I move to strike the requisite number of words, and I would like to associate myself with the remarks of the gentleman from Minnesota.

Mr. Chairman, all the reasons that the gentleman from Pennsylvania suggests that this bill should not be passed are the very ones that it should be passed.

Until and unless we do something to help municipalities and local governments work in their own way toward the modification and better doing of national mandates, we will have failed.

I have two villages in my district. This amendment will come too late to be of any service to them. But the legal fees, everything that goes on because of the national standard, with no flexibility, even varying from their own theme, let alone the final results, of the outflow and the effluence of the water is something that has bothered me for so long. I have even tried to come up with some concept where we do not fine other units of Government with money fines. We need a nonmonetary sanction so that we are not having taxpayers pay fines to recycle our taxpayers' money. Within a lot of this are the EPA sanctions, and many of them are perceived and not real, and the model of 40 cities, up to 40 cities and municipalities being able to demonstrate a new and creative way to meet the standards or surpass the Federal standards, but do it in their own way, certainly is a commentary on what I think local government is all about, and the skills, believe it or not, of most local governments on their pollution control and their earnestness and conformity are equal to or surpass many of those that are involved at the district, region or national level with EPA.

I would urge my colleagues to support the Stangeland amendment.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. The idea of pretreatment opt-out was a bad idea when it was first proposed in the days of Ann Gorsuch, when she was head of the Environmental Protection Agency, and, consistently, it is a bad idea today.

The Public Works and Transportation Committee has consistently opposed the concept of pretreatment opt-out. The Senate has consistently opposed it. The EPA, under direction of Mr. Ruckelshaus, opposed the concept of pretreatment opt-out, and I do not see any support from the current Administrator of EPA for this concept either.

The amendment will allow many industries to get away with weaker locally imposed limits than the national technology-based pretreatment standards. It would virtually eliminate enforcement against industrial dischargers who violate alternative pretreatment requirements by putting an intermediary, the local community between EPA and the industry. EPA would not be able to take Federal enforcement action against industries who are violating local program requirements.

It could rescind approval only of the local program, and that would be a drastic action which would be contested in court when the sewage treatment facility violates the law and not when the industrial discharger violates the law.

While the rescission process is dragging on, the plant would continue to pour additional toxics into the Nation's waters and into drinking supplies. It has taken us 10 years to get national pretreatment standards established. And now that those standards are in place is the wrong time for us to back off from industrial pretreatment.

Over 1,100 cities in this country have already received approval from EPA for pretreatment in compliance with Federal law. The amendment just proposed would drastically slow down compliance while cities fight for the right to get out of the pretreatment program. This is unnecessary tampering with an disruption of the national program of pollution abatement.

Sewage treatment plants now can get relief through removal credits. There is a system established in existing law. It has been working. We ought not to undermine it and defeat it.

These credits allow industry to meet local limits instead of national standards, but only where cleanup actually is taking place. There is no need for an amendment that would simply reward cities and industries that up to this time have resisted complying with EPA's pretreatment regulations.

This amendment, make no mistake about it, is a reward for polluters and a disincentive for those who have worked hard and spent money to comply with the law. It is a bad idea. It was bad when it was first proposed some 5 years ago, it is bad today, it is bad national pollution abatement policy, it will set us back, not move us forward, and it would do so under the wrong premise, under the guise of economic relief. I think we would be making a terrible mistake if this amendment should be approved.

Our committee is strongly opposed to it and always has been. We have had extensive testimony in opposition to the amendment, and I urge my colleagues to defeat it.

Mr. MOLINARI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Minnesota. I think that a careful reading of the amendment would demonstrate that a lot of the concerns that have been raised by those who are opposing the amendment have been overstated.

We are talking about a demonstration program, first of all, not a permanent change. We are talking about a pretreatment program that has to be approved by the Administrator. It must show compliance with sections 301 and 302. The safeguards in the amendment with respect to implementation are such that I think it satisfies all of the concerns that have been raised in the past. Then it specifies, on page 3, that the system, if it is different from that required under section 307(b) of the act but which equally or more effectively prevents the discharge through such works of pollutants which interfere with, pass through, or otherwise are incompatible with such works or which impair current or planned sludge use or disposal, it could only then be considered.

And then it goes on to set forth one further safeguard, in that the Administrator, or the respective State, whichever the case it might be, has the right at such time in the future, if they believe that the owner of that publicly owned treatment work is not complying, can rescind such permanent modification and make additional modifications, if that be the case; so that we have so many safeguards in the amendment to ensure that the intent of the Clean Water Act is met, I think the gentleman's amendment passes muster and should be supported.

Mr. WISE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the pretreatment amendment. I have studied it for the last 2 years, and quite frankly I liked it better last year when it was more experimental and only dealt, I believe, with 20 cities at the time. A lot of the reasons have been enumerated why I would be opposed to it. I would like to list some of the ones that I think are important. It is called the pretreatement opt-out. I think it can also be equally called the pretreatment playoffs. If you have a chemical plant—in my case, I have 20—in your district, and there are some 6,000 to 11,000, depending upon whom you talk to across the country, then you are going to be subject to this playoff, because, as this amendment says, there are 40 cities that might initially qualify.

□ 1400

But what happens for instance when that plant comes to the city council and says, or to the State Economic Development Authority and says, "You know, we are a marginal operation; the imports are hurting us; times have been tough, and we are going to have to think about locating to another facility, perhaps shutting down this operation, some part of it or all of it, and move to another facility where indeed we are permitted to opt out of the pretreatment.

"City X will give us this kind of benefit; city Y, you are not giving us this, and we are going to have to move." So you see this kind of playoff logically occurring.

Some cities will benefit, but yet I think this amendment would also hold a gun at the heads of many cities; many municipal water systems to spend extra money and try to reduce the cost for those industries.

There is another concern I have. What happens, and I have heard some explanation of it, although I still think it is unresolved, what happens, for instance, city Y is not working with this pretreatment opt out, and yet the EPA comes in and says you are not meeting the standards you should; the water is polluted. Now, at that point, what happens? Does city Y undertake those repairs? Does the industry then say "well, we never engaged in this pretreatment before, it is too expensive, perhaps we will have to move elsewhere."

I urge people to consider the ramifications of this amendment to your area because I think it goes a long way toward changing the policy. The gentleman from Minnesota [Mr. OBERSTAR], said we have engaged in a national goal, a national objective for 10 years, and was to create a certain standard of pretreatment. That standard is finally being adhered to. Now, what this Congress would be saying by adopting this amendment is, that for some, you do not have to reach that standard, and so you send a signal to everyone that indeed, we were not serious and that you can weaken it.

As I said, it may be an opt out to some; it is a playoff to me. I would urge the Members to consider carefully the ramifications to your district

and urge you to oppose this amendment.

Mr. SNYDER. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, as you know, section 307 of the Clean Water Act requires industries to pretreat their wastes prior to being discharged into publicly owned treatment works. Under current law, this pretreatment must meet nationally mandated standards issued by the Environmental Protection Agency.

The Stangeland amendment would inject an element of flexibility into this process. Under the Stangeland amendment, the majority of communities in the United States would still be required to comply with the national categorical pretreatment standards.

However, communities that have developed their own pretreatment programs that are as good if not better than the Federal categorical plan would be allowed to implement their own plan rather than the Federal plan.

The basic issue involved in the Stangeland amendment is whether Congress and EPA know how to solve all the individual, site-specific problems for every sewage treatment plant in every city in the country.

I don't think that they do.

The current EPA Pretreatment Program, centered on national technology-based pretreatment standards, does not properly take into account whether all of the treatment required by the national standards is needed in every case. This can, and often does, result in costly, redundant and wasteful treatment by industry and publicly owned treatment works.

I believe that, as a general rule, local conditions are handled best by local entities developing locally responsive programs. Because many water quality problems are uniquely site specific and cannot readily be solved by uniform national standards, I believe that functioning equivalent, locally controlled pretreatment programs should be able to direct resources to particular site-specific problems rather than to treatment for treatment's sake.

Of course, some will argue that there shouldn't be any flexibility in the Federal law—that this is just a backdoor method to weaken the national standards. Well, I don't agree.

I believe that the Stangeland amendment has been carefully crafted and that it includes sufficient protections to insure that the environment will be adequately protected.

Let me enumerate some of the protections in the Stanglend amendment.

First, his amendment is not a blank check for local communities. Only 40 communities in the United States will be allowed to participate in this demonstration program.

Second, the pretreatment equivalency programs must be approved by the Environmental Protection Agency. Thus, in each and every case, EPA must make the determination that the local program will provide equal or better treatment than the national categorical program.

Third, before being approved for the equivalency program, the publicly owned treatment works will have to be achieving secondary treatment and will have to show it has adequate funding and resources—technical, legal, and administrative—to implement the equivalency program.

Fourth, a rigorous monitoring program would be required for every local system obtaining the authority provided. The monitoring is envisioned as going beyond current Federal law and would be specifically designed to advance the state of the art of biological monitoring and the development of toxicity data for receiving streams.

Fifth, the Stangeland amendment contains a sunset provision. The demonstration program will not continue beyond September 30, 1990, unless Congress specifically reauthorizes it.

Sixth, under the Stangeland amendment, EPA and the States are given ample authority to rescind or modify the approval for any local pretreatment equivalency program if it determines that the local program is not being carried out in accordance with the law.

And seventh, the proposal would not eliminate any existing enforcement authority. Both the local and State governments have undiminished enforcement authority over industrial users of a publicly owned treatment works through the existing provisions of the act. Federal and citizen enforcement is available through sections 309(f), 505(a) and (f), section 307(d) and EPA's general pretreatment regulations.

Mr. Chairman, I believe that these protections will insure that the flexibility provided by the Stangeland amendment will not be abused and that the environment will be adequately protected.

In closing, I would like to ask a simple question. Shouldn't locally developed programs that are creative, cost effective and improve water quality be allowed to move forward?

My answer is an emphatic "yes", and I hope the House feels likewise.

Mr. Chairman, I urge adoption of the Stangeland amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. STANGELAND].

The question was taken; and the Chairman announced that the "noes" appeared to have it.

RECORDED VOTE

Mr. STANGELAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 167, noes 257, not voting 9, as follows:

NOT VOTING—9

Coelho	Hatcher	Lantos
Downey	Hefner	Mica
Gray (IL)	Huckaby	Schneider

□ 1420

Messrs. ROEMER, GARCIA, LENT, and BEDELL changed their votes from "aye" to "no."

Ms. FIEDLER changed her vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. DELAY

Mr. DELAY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DELAY: Page 83, after line 23, insert the following new section:

SEC. 27. NATIONWIDE GENERAL DREDGE AND FILL PERMITS FOR CERTAIN NAVIGABLE WATERS.

Section 404(e) is amended by adding at the end thereof the following new paragraph:

"(3) Subject to the provisions of this subsection, the Secretary may issue, on a State, regional, or nationwide basis, a general permit for the discharge of dredged and fill material into all navigable waters, except those waters which—

"(A) are used,

"(B) are susceptible to use in their natural condition or by reasonable improvements, or

"(C) have historically been used, as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean high water mark."

Redesignate the subsequent sections of the bill accordingly.

Page 2, after line 8 and after the item relating to section 26 insert the following and redesignate the subsequent items in the table of contents accordingly:

Sec. 27. Nationwide general dredge and fill permits for certain navigable waters.

Mr. DELAY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DELAY. Mr. Chairman, I had prepared an amendment which was intended to allow for general dredge and fill permits to be issued by the Corps of Engineers for discharge into navigable waters except those waters which are:

1. Used,

2. Are susceptible to use in their natural condition or by reasonable improvements, or

3. Have historically been used, as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean higher water mark.

This amendment would be subject to all other provisions of subsection E. That means that the Corps of Engineers must determine that issuing such a permit will only have minimal adverse effect on the environment and may determine that a particular application may be better served by an individual permit.

In essence, my amendment would have allowed general permits for all waters but "traditionally navigable waters."

I recognize that this is a very controversial amendment and, therefore, I will be prepared to withdraw my amendment after making a brief statement and colloquy on this issue.

Let me give you some of the background of how our present law came into being and why it may need to be changed.

In April 1974 the corps published regulations to implement the section 404 permit program. These regulations limited the program to the same waters that were being regulated under the River and Harbor Act of 1899, that is, navigable waters as traditionally defined.

On March 25, 1975, the District Court for the District of Columbia decided that "navigable waters" meant "all waters of the United States" and ordered the Corps of Engineers to publish revised regulations expanding the scope of its section 404 permit program to cover all the waters of the United States, and away we went. In response to the court's directive, the corps took the original 250 words of section 404 and puffed them into about 35,000 words of new regulations. These new regulations expanded the definition of "navigable waters" to include every lake and pond in the country with a surface area of 5 acres or more and every river, stream, and creek in the country up to its "headwaters," which is defined as the point "above which the flow is normally less than 5 cubic feet per second." The upshot was that a Federal section 404 permit would be required for discharge of dredged or fill material into virtually any stream, lake, or pond or "wet spot" in the country. This seemed far afield from the stated objective of Public Law 92-500 to "restore and maintain the chemical, physical and biological integrity of the Nation's waters." And it certainly did not promise much in the way of a "drastic minimization of paperwork * * * and the best use of available manpower and funds * * *."

Thus from the tiny acorn of section 404 a mighty oak of Federal bureaucratic intervention into State and local affairs has grown. The Corp of Engineers is placed in the position of being able to determine whether it is in the public interest to allow any physical activity of almost any size or kind on virtually any stream, lake, pond, or wetland for almost any reason, whether or not that reason has anything to do with water quality and without regard to private property rights or the rights of other levels of Government to provide for the needs of their citizens.

The paperwork, expense, and delay generated by the process I have described is enormous. The bottom line to all this is that over half of the 12,000 to 14,000 applications for 404 permits are "mom and pop" outfits, people who just want to build a boatdock or add on to their house. They usually only apply for one permit in their lifetime and they are total novices compared to some companies who have specialized counsel for these matters. We set these people adrift in a bureaucratic sea of confusion and that is my major concern.

I know that now the corps is under attack in the other body for the limited administrative and regulatory changes they have made to relieve the majority of small permit applicants. I would hate to see the necessity for legislation, and the only reason I offered this amendment was to have the opportunity to engage in a colloquy with the leadership of my Public Works Committee on this matter. I would be

happy to withdraw this amendment after that time.

□ 1430

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. DELAY. I am glad to yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I am very glad that the gentleman from Texas [Mr. DELAY] has taken this opportunity to raise this concern about overregulation of the regular "folks" in our country—and that he has done so in the spirit of cooperation and bipartisanship on this committee.

In recent years, we have seen a deterioration in the corps efficient handling of permitting because of the increasing amount of studies, restudies, evaluations, and reevaluations required by the increasingly complex guidelines and regulations under which it must work. Even more objectionable, and probably more serious in its long-term implications, than this self-paralysis of Federal water resources programs is the developing trend toward increased and unwarranted Federal interference with the efforts of State and local governments to carry out their own programs for meeting the needs of their citizens and in affairs of the citizens themselves.

On October, 18, 1972, Congress enacted the Federal Water Pollution Control Act Amendments of 1972 with the declared objective being "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters." Section 101(f) states that: "It is the national policy that to the maximum extent possible the procedures utilized for implementing this act shall encourage the drastic minimization of paperwork and interagency decision procedures, and the best use of available manpower and funds, so as to prevent needless duplication and unnecessary delays at all levels of governments."

I agree with that statement and I support your efforts to insure we in Congress adhere to those guidelines.

Mr. DELAY. Mr. Chairman, I certainly thank the distinguished ranking minority leader of the Public Works and Transportation Committee.

Mr. SNYDER. Mr. Chairman, I thank the gentleman.

Mr. DELAY. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENTS OFFERED BY MR. KANJORSKI

Mr. KANJORSKI. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. KANJORSKI: On page 34, line 12 insert a new subparagraph (c) as follows:

(c) PROJECTS UNDER JUDICIAL ORDER.—Section 202(a)(1) is amended by adding at the end thereof the following:

"Notwithstanding the first sentence of this paragraph, in the case of the Wyoming Valley Sanitary Authority project mandated by judicial order under a proceeding begun prior to October 1, 1984, such project shall be eligible for grants at 75 percent of the cost of construction thereof."

Redesignate subsequent sections accordingly.

On page 105, after line 12, insert:

(E) PRIORITY FOR COURT ORDERED PROJECTS.—The Commonwealth of Pennsylvania, from the sums allocated to it under this Act, shall give first priority to the Wyoming Valley Sanitary Authority Secondary Treatment project mandated under Federal court order, regardless of the date of start of construction made pursuant to the court order.

Mr. KANJORSKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. KANJORSKI. Mr. Chairman, the Wyoming Valley Sanitary Authority, located in my congressional district, is currently under a Federal court order to upgrade its primary sewage treatment system to a secondary system. This court order is the result of litigation going back as far as 1981, and project planning over the last 5 years. With the approval of the Federal district court in Scranton, the EPA and the authority entered into a consent agreement effective June 23, 1985.

Under this court order the sanitary authority is required to upgrade its primary sewage treatment system to a secondary system even though the authority has not yet moved up high enough on the State of Pennsylvania's priority list to obtain Federal matching funds. If the authority complies with the court order it may never receive Federal matching funds because current law prevents projects from receiving matching funds retroactively. If the authority waits for approval of matching Federal funds it will be in contempt of court.

These amendments allow the authority to comply with the Federal court order while at the same time receiving matching Federal funds.

Amendment No. 1 is modeled after the existing language in section 12(b) of the committee bill which provides a 75-percent Federal match for projects begun prior to October 1, 1984, on which construction has been halted due to a judicial injunction. Amendment No. 1 provides a similar 75-percent Federal match for the Wyoming Valley Sanitary Authority project mandated by a judicial order under proceedings begun prior to October 1, 1984.

Amendment No. 2 provides that from the funds allocated to the Commonwealth of Pennsylvania under the act, the State shall give first priority to the Wyoming Valley Sanitary Authority Secondary Treatment Project mandated under Federal court order, regardless of the date that construction on the project actually begins. Thus the full project will be eligible for Federal matching funds even if construction begins as mandated by the court order prior to the actual award of Federal matching funds.

Mr. Chairman, this amendment does not increase Federal funding, nor does it alter the allocation of funds to the States. It merely states that from the funds allocated to the Commonwealth of Pennsylvania under the act, first priority shall go to the Wyoming Valley Sanitary Authority's Secondary Treatment Project.

I also want to make it clear, Mr. Chairman, that these amendments cover the full $35 million cost of the project including the upgrading and improvement of all pumping stations which are integral parts of the overall project.

Mr. Chairman, I want to congratulate Chairmen ROE and HOWARD, and ranking members SNYDER and STANGELAND for producing an excellent clean water bill, and for their support of these amendments. I look forward to working with them to improve the quality of our Nation's water supply and I yield to the distinguished and hard working gentleman from New Jersey, the chairman of the subcommittee.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. KANJORSKI. Yes, I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, we have reveiewed this very important amendment having to do with the Wyoming Valley, specifically in Pennsylvania. It does not affect any other substance of the bill, and I think the cause is just.

Mr. Chairman, the committee on this side has no objection to the gentleman's amendments en bloc.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. KANJORSKI. Yes, I certainly do.

Mr. SNYDER. Mr. Chairman, we are pleased to accept the amendment.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Pennsylvania [Mr. KANJORSKI].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. MILLER OF CALIFORNIA

Mr. MILLER of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MILLER of California: Section 31 needs to be amended to read as follows:

SEC. 31. Definition of Point Source.

For purpose of the Federal Water Pollution Control Act, the term "point source" includes a landfill leachate collection system.

Mr. MILLER of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. MILLER of California. Mr. Chairman, this is a technical amendment that deals with the leachate collection systems, which was an overly broad definition by the committee.

I have discussed this amendment both with the majority and the minority to cure this problem.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, the amendment is a fine amendment. It is a technical amendment and one that is important to the bill.

Mr. Chairman, this side has no objection.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. Yes, I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, we have no objection on this side; however, the gentleman from New York does intend to speak to the issue.

Mr. MOLINARI. Mr. Chairman, will the genleman yield?

Mr. MILLER of California. I yield to the gentleman from New York.

Mr. MOLINARI. Mr. Chairman, I just want to say that it was my amendment that defined the leachate collection system. It was intended to deal with the landfill issue.

I have no objection whatsoever to amending that provision.

Mr. MILLER of California. Mr. Chairman, I appreciate that, and I ask for an "aye" vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. MILLER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. KLECZKA

Mr. KLECZKA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KLECZKA: In the matter inserted on page 100, after line 16, and designated as "SEC. 36. GREAT LAKES INTERNATIONAL COORDINATION OFFICE.", redesignate subsection (g) as subsection (i) and insert after subsection (f) the following new subsections:

(g) GREAT LAKES RESEARCH.—

(1) ESTABLISHMENT OF RESEARCH OFFICE.—There is established within the National Oceanic and Atmospheric Administration the Great Lakes Research Office (hereinafter in this section referred to as the "Research Office").

(2) IDENTIFICATION OF ISSUES.—The Research Office shall identify issues relating to the Great Lakes resources on which research is needed. The Research Office shall submit a report to Congress on such issues before the end of each fiscal year which shall identify any changes in the Great Lakes system with respect to such issues.

(3) INVENTORY.—The Research Office shall identify and inventory Federal, State, university, and tribal environmental research programs (and, to the extent feasible, those of private organizations and other nations) relating to the Great Lakes system, and shall update that inventory every four years.

(4) RESEARCH EXCHANGE.—The Research Office shall establish a Great Lakes research exchange for the purpose of facilitating the rapid identification, acquisition, retrieval, dissemination, and use of information concerning research projects which are on-going or completed and which affect the Great Lakes system.

(5) RESEARCH PROGRAM.—The Research Office shall develop, in cooperation with the Coordination Office, a comprehensive environmental research program and data base for the Great Lakes system. The data case shall include, but not be limited to, data relating to water quality, fisheries, and biota.

(6) MONITORING.—The Research Office shall conduct, through the Great Lakes Environmental Research Laboratory, the National Sea Grant College program, other Federal laboratories, and the private sector, appropriate research and monitoring activities which address priority issues and current needs relating to the Great Lakes.

(7) LOCATION.—The Research Office shall be located in a Great Lakes State.

(h) RESEARCH AND MANAGEMENT COORDINATION.—

(1) JOINT PLAN.—Before October 1 of each year, the Coordination Office and the Research Office shall prepare a joint research plan for the fiscal year which begins the following calendar year.

(2) CONTENTS OF PLAN.—Each plan prepared under paragraph (1) shall—

(A) identify all proposed research dedicated to activities conducted under the Great Lakes Water Quality Agreement of 1978;

(B) include the Agency's assessment of priorities for research needed to fulfill the terms of such Agreement; and

(C) identify all proposed research that may be used to develop a comprehensive environmental data base for the Great Lakes system and establish priorities for development of such data base.

In subsection (i) (as redesignated by preceding amendment) of such matter, add the following new paragraph:

(3) FOR GREAT LAKES RESEARCH.—There are authorized to be appropriated for purposes of carrying out subsections (g) and (h) not to exceed—

(A) $2,000,000 per fiscal year for fiscal years 1986 and 1987; and

(B) $3,000,000 per fiscal year for fiscal years 1988, 1989, and 1990.

Mr. KLECZKA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin [Mr. KLECZKA]?

Mr. SNYDER. Mr. Chairman, until we get a copy, I will have to object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk continued the reading of the amendment.

Mr. SNYDER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD. We now have a copy.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. KLECZKA. Mr. Chairman, on behalf of the gentleman from Michigan [Mr. HERTEL], the gentleman from New York [Mr. NOWAK], the gentleman from Ohio [Mr. ECKART], and myself, I am offering a brief but important amendment to strengthen our understanding and protection of the Great Lakes.

The amendment calls for the establishment of a Great Lakes Research Office within NOAA, the National Oceanographic and Atmospheric Administration. Currently, considerable research on the Great Lakes is being performed by many bodies, including the EPA, NOAA, universities, tribal, and environmental groups. These efforts are frustrated, however, by a lack of coordination and communication.

The problem of coordinating Great Lakes research efforts was clearly pointed out in a 1982 study by the General Accounting Office, entitled "A More Comprehensive Approach Is Needed to Clean Up the Great Lakes." The report specifically recommended that Congress establish a Great Lakes Research Office within NOAA to play a coordinating role.

Also in 1982, legislation was approved by the House Science and Technology and Merchant Marine and Fisheries Committees which would have established a Great Lakes Research Office within NOAA. Unfortunately, this bill never became law.

My current proposal is similar to the 1982 bill, as well as to a component of the Great Lakes Management and Research Act of 1985, H.R. 2744, of which I was a cosponsor. According to my amendment, the new Great Lakes Research Office would:

Identify research needs on the lakes in an annual report to Congress;

Inventory existing research programs concerning the lakes;

Establish and facilitate a research exchange program among participating institutions; and

Develop a comprehensive environmental research program and database for the lakes.

All these activities would be conducted in cooperation with the appropriate authorities within EPA.

□ 1440

I should add that my amendment stipulates that the Research Office be located in a Great Lakes State. While I assume that the final siting decison will be made by NOAA, I would like to point out that my own Wisconsin district is host to one of the finest of the Great Lakes research facilities, the Center for Great Lakes Studies at the University of Wisconsin, Milwaukee. This center is the only major lakes research facility located right on the water, and I believe it would make an excellent choice for the new research office.

I realize there may be some concern over cost, and I want to stress that the cost is modest. My amendment would authorize $2 million per year for fiscal 1986 and 1987, and $3 million per year for fiscal 1987–1990. According to the GAO Report, there is currently such a lack of coordination among Great Lakes researchers that I am sure this research office would pay for itself. In addition, the other body has already agreed to a similar program and similar funding for the research office. I am confident that, with the support of the chairman and ranking minority member of the Water Resources Subcommittee, we can make a fine start today in ensuring the coordinated management of the Great Lakes, our Nation's most precious water resource.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. KLECZKA. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, again we have reviewed this amendment. We have worked very closely with the distinguished member of our committee, the gentleman from New York [Mr. NOWAK], and yourself and others, and we have no objection on this side to the amendment.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. KLECZKA. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, we have no problem and are prepared to accept the amendment.

Mr. KLECZKA. I thank the chairman, the gentleman from New Jersey [Mr. ROE], and the ranking minority member, the gentleman from Kentucky [Mr. SNYDER], and the staff for their help with this amendment.

Mr. NOWAK. Mr. Chairman, will the gentleman yield?

Mr. KLECZKA. I yield to the gentleman from New York.

Mr. NOWAK. Mr. Chairman, I rise in support of the amendment offered by my colleague from Wisconsin, JERRY KLECZKA. This amendment establishes an important role for the National Oceanic and Atmospheric Administration in coordinating Great Lakes research activities with the Environmental Protection Agency.

Earlier today we adopted a package of amendments offered by the distinguished chairman of the Public Works Committee which included an amendment which I sponsored providing a comprehensive research and management framework for cleaning up the Great Lakes. As a representative from one of the Great Lakes States, I am deeply concerned about the continuing preservation and protection of the environmental quality and resources of the Great Lakes. Despite years of cleanup efforts the United States and Canada have failed to adequately protect this valuable resource. I recently had the pleasure of traveling to Michigan with several of our colleagues to meet with Canadian Members of Parliament to discuss the United States-Canada Water Quality Agreement. I am pleased to report that the Great Lakes initiative embodied in H.R. 8 met with uniformly favorable reviews. My amendment represents a serious effort to target spending within the EPA to provide support for the ambitious goals of the Water Quality Agreement. Briefly, my amendment does the following:

Provides explicit recognition of the Water Quality Agreement by the U.S. Congress for the first time.

Designates EPA's Great Lakes Program Office as the lead agency responsible for meeting the goals of the agreement and it provides $60 million during the next 5 years to upgrade this Office. That $12 million-per-year average is more than twice as much as this Office has received in any single year recently.

Directs the Great Lakes Program Office to work with Federal/State agencies to develop a management strategy to meet the goals of the Water Quality Agreement.

Requires the establishment of a Toxics Monitoring and Surveillance Network for the Great Lakes. Recommending that EPA begin studies on the feasibility of toxic sediment removal at five specific sites in the Great Lakes—Saginaw Bay, MI; Sheboygan Harbor, WI; Grand Calumet River, IN; Ashtabula River, OH; Buffalo River, NY.

Requires periodic reports to Congress regarding progress made in implementing the goals of the Water Quality Agreement.

The Great Lakes constituting the world's largest expanse of fresh water have long been recognized as a critical economic and environmental resource for the Nation. Thanks to the Clean Water Act and the wastewater treatment program, we have begun to see hopeful signs of improvement in the lakes' water quality. The control of municipal effluents has at least checked phosphorus pollution in the lakes; the algae growth that was choking off the life in Lake Erie has begun to subside, and fish have returned to parts of the shoreline. But the job is not done, we must continue our efforts to strengthen the environmental protection of the Great Lakes. I am pleased to have been a part of developing this important legislation and hope my colleagues will support its enactment and give careful consideration to this proposal.

Mr. HERTEL of Michigan. Mr. Chairman, will the gentleman yield?

Mr. KLECZKA. I yield to the gentleman from Michigan.

Mr. HERTEL of Michigan. Mr. Chairman, I want to thank the gentleman from Wisconsin, for offering this amendment today. As the gentleman has mentioned, similar language to this amendment has already been included by the other body in parallel authorization. That point is important. This body has passed virtually identical language in the last three Congresses. Until now, the other body has failed to act on this language.

I salute the foresight the House has consistently shown on Great Lakes issues. This is not an isolated instance of promoting regional interests. This amendment addresses the problem of extremely scarce resources for Great Lakes research by promoting cooperation and coordination of research by State and Federal agencies to utilize research dollars in a way that will produce the maximum usable data.

Equally important, it does not create another bureaucracy which can eat up research dollars in red tape. This amendment establishes a research office within NOAA at existing NOAA facilities on the Great Lakes. By doing this, coordination can be improved because researchers, their problems, and the decision makers can be in closer proximity and priorities can be swiftly evaluated. In the case of a serious environmental contamination, the time saved can be critical with respect to the amount of damage the fragile ecosystems of the Lakes might sustain. To the taxpayer, it means that tax dollars are spent more effectively and with greater and faster results.

The Great Lakes are America's fourth coast line, yet they are unique because they are entirely fresh water. The vast amount of fresh water contained in the Lakes makes them a more fragile ecosystem than their saline counterparts. In many ways, the Great Lakes have led the way in aquatic research which has had direct and immediate applications on oceanographic and saline ecological research. Problems first identified by Great Lakes researchers, like the problem

with PCB contamination, have sounded the warning for marine researchers. It is in that spirit today's amendment is offered. It is our hope that the coordinator of Great Lakes management and research will become a model for the Nation and the world to emulate. We can set the example of protecting our priceless resources and still prudently conserve our tax dollars. I ask that the House support this amendment offered by the gentleman from Wisconsin and myself.

Those of us who have worked on this issue for the past 5 years appreciate the thoughtful concern the House has always given to this vital issue.

STATE OF MICHIGAN,
OFFICE OF THE GOVERNOR,
Lansing, MI, June 18, 1985.

Hon. ROBERT ROE,
Chairman, Water Resources Subcommittee, Committee on Public Works and Transportation, House of Representatives, Washington, DC.

DEAR BOB: I am writing to express my support for amending the Clean Water Act to prohibit "backsliding" from existing wastewater discharge permit effluent limits. I am particularly concerned about the potential adverse impacts on Great Lakes water quality of relaxing permit limits and allowing increased pollutant discharges by existing dischargers.

The Great Lakes are the repository of many different persistent, bioaccumulative toxic pollutants. Once in the Lakes, these pollutants remain for generations, contaminating the water, the fish, and other aquatic organisms. Analyzing an individual discharger's effluent at the point of discharge to justify relaxing permit limits ignores the cumulative impact of all discharges of these pollutants. Therefore, as a mimimum control measure, dischargers should be required to continue to meet existing permit limits even if water quality in the immediate vicinity of the discharge meets or exceeds minimum standards. Otherwise, the Great Lakes states (and others) will face competitive pressures to retain industry by giving away water quality improvements to existing dischargers.

Since many toxic pollutants adhere to solids and other "conventional" pollutants found in wastewater, I believe that the prohibition against backsliding should extend to these pollutants as well. Relaxed permit limits for conventional pollutants should be allowed only after the individual toxic pollutants of concern for a particular discharger have been identified and specifically limited in the permit.

Therefore, I urge you to support amending H.R. 8 to prohibit backsliding from permit limits for persistent, bioaccumulative toxic pollutants, and to allow backsliding from conventional pollutant limits only where the relationship with toxic pollutants in the particular discharge is understood and the toxic pollutants of concern are specifically limited in the permit.

Thank you for your assistance. If you have any further questions concerning my position, please feel free to contact me or Tom Martin of my staff.

Sincerely,

JAMES J. BLANCHARD,
Governor.

Mr. KLECZKA. Mr. Chairman, I thank the gentleman from Massachusetts [Mr. CONTE] for allowing a junior member to precede him today, and I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. KLECZKA].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: Page 113, after line 13, insert the following new title:

TITLE II—ACID DEPOSITION CONTROL

SECTION 1. SHORT TITLE.

This title may be cited as the "Water Quality Improvement and Acid Deposition Reduction Act of 1985".

SEC. 2. PURPOSE.

The purpose of this Act is to improve water quality, protect human health and preserve aquatic resources in the United States by reducing the threat of acid deposition.

Subtitle I—Acid Deposition Control and Assistance Program

SEC. 101. AMENDMENT OF CLEAN AIR ACT.

Title I of the Clean Air Act is amended by adding the following new part at the end thereof:

"PART E—ACID DEPOSITION CONTROL

"Subpart 1—General Provisions

"SEC. 181. PURPOSE OF PART.

"The purpose of this part is to decrease sulfur dioxide emissions in the 48 contiguous States by requiring certain electric utility plants and other sources to reduce their rates of sulfur dioxide emissions. The reduced rates shall be rates which (if achieved by those sources in the emissions baseline year) would have resulted in total emissions from such sources 12,000,000 tons below the actual total of sulfur dioxide which those sources emitted in the emissions baseline year. The reduction is to be achieved within 10 years after the date of the enactment of this part. Such reduction shall be achieved through—

"(1) a program under subpart 2 consisting of direct federally mandated emission limitations for 50 of the largest emitters of sulfur dioxide; and

"(2) a program under subpart 3 consisting of State plans to provide for such reductions in the emission rates of other existing sources as may be necessary to achieve the remaining portion of such 12,000,000 ton reduction.

90 percent of the capital costs of continuous emission control technology used for the purpose of the program under subpart 1 shall be funded through a fee on the generation of electric energy as provided in subpart 4. Such fee shall also be used to provide revenue to the States to carry out the program under subpart 2.

"SEC. 182. CERTAIN ACTIVITIES NOT AFFECTED.

"Nothing in this part shall be construed to—

"(1) prevent the construction or modification of any electric utility unit or any other new source of sulfur dioxide; or

"(2) prevent any oil or gas fired electric utility unit or other oil or gas fired source from changing the fuel which such unit or other source used during the baseline year;

"(3) prevent any existing electric utility plant or any other existing stationary source of sulfur dioxide from at any time increasing rates of production or operation above baseline year levels;

"(4) require any State to reduce emissions under subpart 2 of this part to take into account emissions increases attributable to the construction, modification, or increased utilization of the units or sources referred to in paragraphs (1), (2), and (3); or

"(5) require any State to reduce emissions under subpart 2 of this part to take account of emissions increases attributable to a change in fuel at any existing source of sulfur dioxide which converts from gas as a primary fuel to oil or coal or which converts from oil as a primary fuel to coal.

"SEC. 183. DEFINITIONS.

"As used in this part—

"(1) The terms 'new' and 'modified' when used with respect to an electric utility unit or other source means an electric utility unit or other source which commenced construction (or modification) after December 31, 1980, and which is subject to new source performance standards for sulfur dioxide under section 111.

"(2) The term 'commenced' when used with respect to construction or modification has the same meaning as when used in section 111.

"(3) The term 'fossil fuel fired electric utility generating plant' means all of the fossil fuel fired electric utility steam generating units owned or operated by an electric utility which are located on one or more contiguous or adjacent properties.

"(4) The terms 'steam generating unit', 'electric utility', and 'fossil fuel' have the same meanings as provided in regulations under section 111 applicable to electric utility steam generating units for which construction is commenced after September 18, 1978 (40 CFR 60.41a), except that the term 'steam generating unit' shall include only those steam generating units which are capable of combusting more than 50 million Btu/hour heat input of fossil fuel (either alone or in combination with any other fuel).

"(5) The term 'Btu' means a British thermal unit.

"(6) The term 'technological system of continuous emission reduction' has the meaning provided by section 111(a)(7).

"(7) The term 'sulfur dioxide' when used with respect to emissions means total sulfur emissions expressed as sulfur dioxide emissions.

"(8) The term 'baseline year' means the calendar year 1980, except that in the case of—

"(A) any fossil fuel fired steam generating unit which is not part of an electric utility generating plant; or

"(B) any stationary source of industrial process emissions,

the Administrator may designate a subsequent calendar year as the baseline year if he determines that reasonably reliable data is available for that year with respect to the actual sulfur dioxide emission rates of the unit or source involved.

"(9) The term 'stationary source of industrial process emissions' means any major stationary source in one of the following categories or in any other category of major stationary sources which the Administrator determines, by rule, to contribute significantly to concentrations of sulfur dioxide in any region of the 48 contiguous States: nonferrous smelters, petroleum refineries, Portland Cement plants, natural gas plants, iron and steel mills, sulfuric acid plants, kraft pulp mills.

"SEC. 184. RELATIONSHIP TO OTHER REQUIREMENTS.

"Nothing in this part shall be construed to affect or impair the requirements of section 110 (or of any applicable implementation plan) or of any other section of this Act. Any stationary source which is subject to any such requirements may also be subject to additional requirements under this part.

"Subpart 2—Retrofit Technology for 50 Facilities

"SEC. 185. FEDERALLY MANDATED EMISSION REDUCTIONS.

"(a) IDENTIFICATION OF HIGH EMISSION ELECTRIC UTILITY PLANTS.—The Administrator shall identify each fossil fuel fired electric utility generating plant which emitted sulfur dioxide during the calendar year 1980 at an annual average rate equal to or in excess of 3 pounds per million Btu.

"(b) LIST OF 50 PLANTS.—

"(1) INITIAL PUBLICATION.—Not later than 2 months after the date of the enactment of this part, the Administrator shall publish in the Federal Register a list of the 50 plants among those identified under subsection (a) which have the largest total emissions of sulfur dioxide during the calendar year 1980 and shall notify the owner or operator of each plant on such list.

"(2) FINAL PUBLICATION.—Not later than 4 months after the date of enactment of this part, and after notice and opportunity for comment, the Administrator shall promulgate, and publish in the Federal Register, a final list of the 50 plants among those identified under paragraph (1) which the Administrator determines had the largest total emissions of sulfur dioxide during the calendar year 1980.

"(c) SUBSTITUTION.—

"(1) APPLICATION.—The owner or operator of any plant included on the final list under paragraph (2) of subsection (b) and the owner or operator of any other fossil fuel fired electric utility generating plant located in the same State may submit an application to the Administrator for the substitution of one or more fossil fuel fired steam generating units of such other fossil fuel fired electric utility generating plant for a unit of the plant included on such list. If an owner or operator of a plant included on the final list under subsection (b)(2) owns one or more other fossil fuel fired electric utility plants in the same State, he may submit an application under this paragraph for such a substitution. An application for substitution under this paragraph shall be submitted not later than 18 months after the date of the enactment of this part.

"(2) APPROVAL.—A substitution of units may be approved by the Administrator under this subsection only if the Administrator determines that—

"(A) the total emissions of the substitute unit during the calendar year 1980 were equal to or greater than the total emissions of the original unit; and

"(B) the substitute unit emitted sulfur dioxide during the calendar year 1980 at an annual average rate equal to or greater than 3 pounds per million Btu.

"(3) COMPLIANCE BY EXEMPTED UNITS WITH CERTAIN NSPS.—

"(A) COMPLIANCE WITH NSPS IF OPERATION EXTENDS BEYOND NORMAL USEFUL LIFE.—In any case in which—

"(i) a substitute unit has been approved under this subsection for any unit of a plant, and

"(ii) the normal useful life of such unit of the plant will expire before the date 10 years after the date of approval of such substitution,

the Administrator shall require that during any operation of such unit after the expiration of such useful life, the unit shall comply with the standards of performance applicable under section 111 to electric utility steam generating units which commenced construction after September 18, 1978.

"(B) NORMAL USEFUL LIFE.—For purposes of this paragraph, the normal useful life of a unit for which a substitute has been approved shall be determined by the Administrator at the time of approval of the substitution.

"(C) ENFORCEMENT.—The requirement established under this paragraph shall be treated as a requirement of section 111 and enforced in the same manner and subject to the same penalties and procedures as are applicable to the enforcement of the requirements of section 111.

"(d) EMISSION LIMITATIONS.—

"(1) FOR ELECTRIC UTILITY GENERATING PLANTS.—Except as provided in paragraph (3), each compliance schedule under this section shall provide that—

"(A) a technological system of continuous emission reduction shall be used for each steam generating unit in the fossil fuel fired electric utility generating plant concerned (other than a unit for which a substitute has been approved under subsection (a)(4)), and

"(B) sulfur dioxide emissions from such plant (excluding each unit for which a substitute has been approved under subsection (a)(4)) for the calendar year 1995 and for each calendar year thereafter shall not exceed—

"(i) 1.2 pounds per million Btu heat input and 10 percent of the total annual sulfur dioxide emissions during the calendar 1980 (90-percent reduction), or

"(ii) 0.6 pounds per million Btu and 30 percent of the total annual sulfur dioxide emissions during the calendar 1980 (70-percent reduction).

"(2) DETERMINATION OF COMPLIANCE.—Compliance by the plant with such emission limitation shall be determined in the same manner as provided for determination of compliance with regulations under section 111 applicable to electric utility steam generating units for which construction is commenced after September 18, 1978, except that (A) such regulations shall be applied on a plantwide basis (including all fossil fuel fired electric utility units which comprise the plant other than those units for which a substitute has been approved under subsection (a)(4)) and (B) compliance with the 1.2 pounds per million Btu and 0.6 pound per million Btu rates set forth in clauses (i) and (ii) shall be determined on the basis of average annual emissions of the plant in lieu of the 30-day rolling average which is applicable to each steam generating unit under such regulations.

"(3) SUBSTITUTE UNITS.—In the case of a substitute unit approved under subsection (c), each compliance schedule under this section shall provide that—

"(A) a technological system of continuous emission reduction shall be used for the unit, and

"(B) sulfur dioxide emissions from such unit for the calendar year 1995 and for each calendar year thereafter shall not exceed—

"(i) 1.2 pounds per million Btu heat input and 10 percent of the total annual sulfur dioxide emissions during the calendar 1980 (90-percent reduction), or

"(ii) 0.6 pounds per million Btu and 30 percent of the total annual sulfur dioxide emissions during the calendar 1980 (70-percent reduction).

Compliance by the unit with such emission limitation shall be determined in the same manner as provided for determination of compliance with regulations under section 111 applicable to electric utility steam generating units for which construction is commenced after September 18, 1978, except that compliance with the 1.2 pounds per million Btu and 0.6 pound per million Btu rates set forth in clauses (i) and (ii) shall be determined on the basis of average annual emissions of the plant in lieu of the 30-day rolling average which is applicable to each steam generating unit under such regulations.

"(e) COMPLIANCE SCHEDULES.—

"(1) SUBMISSION BY OWNERS OR OPERATORS.—Not later than January 1, 1985, the owner or operator of each plant listed under subsection (b) and the owner or operator of each substitute unit approved under subsection (c) shall submit to the Administrator a compliance schedule under this section, including increments of progress. Within 1 year after the submission of a compliance schedule, and after notice and opportunity for hearing, the Administrator shall approve or disapprove the schedule.

"(2) PROMULGATION BY EPA.—If a compliance schedule is not submitted on or before the date required under paragraph (1) for any plant listed under subsection (b) or for any substitute unit approved under subsection (c), or if a schedule submitted under paragraph (1) for such plant or unit is not approved by the Administrator before January 1, 1986, the Administrator shall promulgate a compliance schedule, including increments of progress, for such plant or unit on January 1, 1986. If, after January 1, 1986, the Administrator determines that any previously approved compliance schedule, including the increments of progress in such schedule, is inadequate to meet the requirements of subsection (d), the Administrator shall require submission of, or promulgate, a modified compliance schedule, including increments of progress, for such plant.

"(3) PUBLICATION.—Each schedule which is approved or promulgated by the Administrator under this subsection shall be published in the Federal Register.

"(4) DEADLINES.—The compliance schedule under this subsection shall provide that—

"(A) contracts shall be entered into for the purchase and installation of the technological systems of continuous emission reduction not later than January 1, 1993;

"(B) such systems shall be installed and in operation not later than January 1, 1995; and

"(C) the emission limitation required under subsection (d) shall be achieved for each calendar year after 1994.

"(f) ENFORCEMENT.—For purposes of sections 113, 114, 116, 120, and 304 of this Act, a compliance schedule under this section (including any increment of progress set forth in such schedule) shall be treated as an emission limitation.

"SEC. 186. PAYMENT FOR CAPITAL COSTS OF CONTROL.

"(a) 90 PERCENT PAYMENT.—From the fund established under subpart 4 of this part, the Administrator shall make available to each owner or operator of a plant which contains a unit subject to a compliance schedule under section 185 such sums as the Administrator deems necessary to pay for 90 percent of the costs of the construction and installation of the technological system of continuous emission reduction necessary to comply

with the emission limitation applicable under section 185(d).

"(b) REGULATIONS.—The Administrator, after consultation with the Secretary of the Treasury, shall promulgate regulations under which—

"(1) no payment may be made under this section to a utility for any costs unless the Administrator determines that, under applicable rates schedules, the full amount of such payment will be used to reduce those electric rate increases (payable by customers of the utility) which otherwise would result from the construction and installation concerned; and

"(2) such payments shall be made at such times as will minimize any electric rate increases for customers of the utility.

"Subpart 3—State Plans for Additional Emission Reductions

"SEC. 191. CALCULATION OF STATE SHARES.

"(a) SHARE OF 12,000,000 TON REDUCTION.—

"(1) EPA COMPUTATION.—For each of the 48 contiguous States, the Administrator shall compute a State share of the 12,000,000 ton reduction in annual emissions of sulfur dioxide referred to in section 181(a). The Administrator shall compute the State share for each such State as provided in subsection (b) not later than 18 months after the date of the enactment of the National Acid Deposition Control Act of 1985.

"(2) DATA TO BE USED IN COMPUTATION.—In making computations under subsection (b), the Administrator shall use the best available data. To the extent that other better data regarding the emissions of sulfur dioxide from any category of sources is not available on or before the date 18 months after the date of the enactment of the national Acid Deposition Control Act of 1985, the Administrator shall utilize the inventory of emissions developed in fulfillment of the requirements of the memorandum of Intent on Transboundary Air Pollution signed by Canada and the United States on August 5, 1980.

"(b) STATE SHARE.—

"(1) GENERAL RULE.—The State share for each such State shall be the number of tons which is the sum of the amounts computed under subparagraphs (A), (B), and (C).

"(A) ELECTRIC UTILITY EXCESS EMISSIONS TONNAGE.—The tonnage computed under paragraph (2) for fossil fuel fired electric utility plants in the State.

"(B) NON-UTILITY BOILER EXCESS EMISSIONS TONNAGE.—The tonnage computed under paragraph (3) for other fossil fuel fired steam generating units in the State.

"(C) PROCESS EMITTERS EXCESS EMISSIONS TONNAGE.—The tonnage under paragraph (4) for industrial process emitters of sulfur dioxide in the State.

"(2) ELECTRIC UTILITY EXCESS EMISSIONS TONNAGE.—

"(A) FRACTION OF 10,000,000 TONS.—The Administrator shall compute an excess emissions tonnage amount under this paragraph for fossil fuel fired electric utility plants in the State. The amount shall be determined by multiplying 10,000,000 tons by a fraction the numerator of which is determined under subparagraph (B) and the denominator of which is determined under subparagraph (C).

"(B) NUMERATOR OF ELECTRIC UTILITY FRACTION.—The numerator of the electric utility fraction shall be the tonnage of emissions of sulfur dioxide which the Administrator estimates to have been emitted during the baseline year at a rate in excess of 1.2 pounds per million Btu from fossil fuel fired electric generating plants which are located in the State and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of 1.2 pounds per million Btu.

"(C) DENOMINATOR OF ELECTRIC UTILITY FRACTION.—The denominator of the electric utility fraction shall be the tonnage of emissions of sulfur dioxide which the Administrator estimates to have been emitted during the baseline year at a rate in excess of 1.2 pounds per million Btu from all fossil fuel fired electric generating plants which are located in the 48 contiguous States and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of 1.2 pounds per million Btu.

"(3) NON-UTILITY BOILER EXCESS EMISSIONS.—

"(A) FRACTION OF 1,000,000 TONS.—The Administrator shall compute an excess emissions tonnage amount under this paragraph for fossil fuel fired steam generating units other than those which are part of electric utility plants in the State. The amount shall be determined by multiplying 1,000,000 tons by a fraction the numerator of which is determined under subparagraph (B) and the denominator of which is determined under subparagraph (C).

"(B) NUMERATOR.—The numerator of the fraction under this subparagraph shall be the tonnage of emissions of sulfur dioxide which the Administrator estimates to have been emitted during the baseline year at a rate in excess of 1.2 pounds per million Btu from fossil fuel fired steam generating units which are located in the State (other than units which are part of a fossil fuel fired electric generating plant) and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of 1.2 pounds per million Btu.

"(C) DENOMINATOR.—The denominator under this subparagraph shall be the tonnage of emissions of sulfur dioxide emitted during the baseline year at a rate in excess of 1.2 pounds per million Btu from all fossil fuel fired steam generating units which are located in the 48 contiguous States (other than units which are part of a fossil fuel fired electric generating plant) and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of 1.2 pounds per million Btu.

"(4) PROCESS EMITTERS EXCESS EMISSIONS TONNAGE.—

"(A) FRACTION OF 1,000,000 TONS.—The Administrator shall compute an excess emissions amount under this paragraph for industrial process emitters of sulfur dioxide in the State. The amount shall be determined by multiplying 1,000,000 tons by a fraction the numerator of which shall be the amount computed under subparagraph (B) and the denominator shall be the amount computed under subparagraph (C).

"(B) NUMERATOR.—The numerator of the fraction under this subparagraph shall be the tonnage of emissions of sulfur dioxide emitted during the baseline year at an annual average rate in excess of the rate determined under subparagraph (D) from emissions units of industrial process emitters of sulfur dioxide which are located in the State and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of the rate determined under subparagraph (D).

"(C) DENOMINATOR.—The denominator of the fraction under this subparagraph shall be the total tonnage of emissions of sulfur dioxide emitted during the baseline year at an annual average rate in excess of the applicable rate determined under subparagraph (D) from emissions units within industrial process emitters of sulfur dioxide which are located in the 48 contiguous States and which, during the baseline year, emitted sulfur dioxide at an annual average rate in excess of the rate determined under subparagraph (D). The amount computed under this clause shall be referred to as the 'national industrial process excess emissions amount'.

"(D) AVERAGE BACT EMISSIONS LIMIT.—

"(i) For purposes of this paragraph, the average annual rate determined under this subparagraph for any emissions unit within a stationary source of industrial process emissions shall be the rate which the Administrator determines to be the national average BACT emissions limit for sulfur dioxide for emissions units within the category of process emitters involved.

"(ii) Utilizing the BACT/LAER Clearinghouse data available at the Environmental Protection Agency, the Administrator shall review the emission limitations for industrial process emitters which were established as "best available control technology" (BACT) under this Act during the period August 1977 through December 12, 1984. On the basis of such data, and not later than 1 year after the date of the enactment of the National Acid Deposition Control Act of 1985, the Administrator shall establish a national average BACT emission limit for sulfur dioxide for emissions units within each category of process emitters of sulfur dioxide.

"(c) REALLOCATION AMONG STATES.—Under regulations promulgated by the Administrator, the Governors of any two or more contiguous States may (by agreement) reallot among agreeing States the State share of two or more agreeing States if, under such reallotment, the total reduction in annual emissions of sulfur dioxide from all stationary sources subject to emission limitations under section 193(a) is equal to or greater than, and contemporaneous with, the total reduction in annual emissions of sulfur dioxide from such sources which would be required under this part in the absence of such reallotment. The Administrator may promulgate such regulations under this subsection as may be necessary to carry out the purposes of this part.

"SEC. 192. SUBMISSION AND APPROVAL OF STATE PLANS.

"(a) BASIC REQUIREMENT.—Not later than one year after determination by the Administrator under section 191 of the State share for each State, each State for which a share is calculated shall submit a plan to the Administrator under this section.

"(b) APPROVAL BY EPA.—If a State plan is submitted under this section on or before the required date, the Administrator shall approve or disapprove such plan within 6 months from the date on which such plan is submitted. The Administrator shall approve the plan if he determines that the plan contains provisions, including enforceable increments of progress, adequate to assure that the emission limitations required under section 193 will be achieved as expeditiously as practicable but not later than January 1 of the first year which commences more than 10 years after the date of the enactment of this Act.

"(c) FAILURE TO SUBMIT STATE PLAN.—If no plan has been approved by the Administrator on or before the date two years after the enactment of the National Acid Deposition Control Act of 1985, effective on the date 10 years after such date of enactment all sta-

tionary sources of sulfur dioxide in the State which are referred to in subsection (d) and which are not subject to more stringent emission limitations under other provisions of this Act (or under State plans in effect under such other provisions) shall be subject to the emission limitations set forth in subsection (d).

"(d) FEDERAL BACK-UP EMISSIONS LIMITATIONS.—The emission limitations applicable under this subsection in the absence of an approved State plan under this part are as follows:

"(1) 0.8 pounds of sulfur dioxide per million Btu for each steam generating unit of a fossil fuel fired electric generating plant (other than an electric utility steam generating unit which is required to comply with emission limitations under part 1);

"(2) 0.8 pounds of sulfur dioxide per million Btu for each fossil fuel fired steam generating unit which is not part of an electric utility plant; and

"(3) the national average BACT emissions limit for sulfur dioxide for the category of process emitters involved (as developed under section 191) in the case of each industrial process emitter of sulfur dioxide in the State.

The emission limitations applicable under this subsection shall be treated, for purposes of sections 113, 114, 116, 120, and 304 as requirements of an applicable implementation plan.

"SEC. 193. EMISSION LIMITATIONS IN STATE PLANS.

"(a) EMISSION LIMITATIONS FOR COVERED SOURCES.—The plan for each State required to submit a plan under section 192 shall provide for emission limitations applicable to any covered stationary sources. The emission limitations for each stationary source subject to the State plan shall establish an allowable average annual sulfur dioxide emission rate for the source. The allowable average annual sulfur dioxide emission rates for such sources shall be established at such levels that if each source had emitted sulfur dioxide at the allowable rate during baseline year for that source, the sum of the total reductions in actual annual emissions of sulfur dioxide in the State during both baseline years would be equal to—

"(1) the State share determined under section 191(a), reduced by

"(2) the subpart 2 credit for that State.

"(b) STATE DISCRETION IN MEANS OF COMPLIANCE.—The State plans under this subsection may provide for compliance with the emission limitations applicable under such plans through the use of a technological system of continuous emission reduction or any other requirements which the State deems appropriate to reduce the sulfur dioxide emission rate.

"(c) ENFORCEMENT.—Each requirement of a State plan approved or promulgated by the Administrator under this section shall be treated, for purposes of sections 113, 114, 116, 120, and 304 as a requirement of an applicable implementation plan.

"(d) DEFINITIONS.—For purposes of this section—

"(1) COVERED STATIONARY SOURCE.—The term 'covered stationary source' means for any State a stationary source (other than a plant or unit which is required to comply with emission limitations under subpart 2 of this part) in the State for which—

"(A) the actual annual sulfur dioxide emission rates have been calculated by the Administrator for the baseline year, and

"(B) no new source standard of performance is applicable under section 111.

"(2) SUBPART 2 CREDIT.—The term 'subpart 2 credit' means, for any State, the total annual tonnage reduction in emissions of sulfur dioxide which would have been achieved in the State during the baseline year if all electric utility plants (and units thereof) in the State which are required to comply with emission limitations under subpart 2 were in compliance during that year with those limitations.

"SEC. 194. FINANCIAL ASSISTANCE FOR COMPLIANCE WITH STATE PLANS.

"(a) GRANTS TO STATES.—From the fund established under subpart 5, whenever funds are available under section 196(c)(2), the Administrator shall make available to each State—

"(1) which has in effect a State plan approved under this subpart, and

"(2) in which each plant subject to subpart 2 has achieved the emissions reduction required under subpart 2,

a portion of the total amount available for all States under section 196(c)(2) the fiscal year concerned.

"(b) DATE OF AVAILABILITY.—Sums shall be made available under this section to each State following the later of—

"(1) the date on which funds under section 196(c)(2) are first made available to States, or

"(2) the date on which the State plan for the State concerned is approved under this subpart.

"(c) PORTION ALLOCATION.—The portion allocated to any State under subsection (a) for any fiscal year shall be a percentage of the total amount available for all States during that fiscal year. Such percentage shall be determined by dividing—

"(1) the State emission reduction share calculated under section 191, and reduced by the State subpart 2 credit, as defined in section 193(d), by

"(2) 12,000,000 tons, reduced by the sum of the State subpart 2 credits for all States.

"(d) USE OF AVAILABLE FUNDS.—

"(1) IN GENERAL.—Sums made available to a State under this subpart shall be used by the State in such manner as the State deems appropriate for purposes of—

"(A) providing for the emission reductions required in that State pursuant to this subpart;

"(B) reducing, or providing refunds with respect to, the fee imposed under section 197; or

"(C) funding any other State program which the State deems appropriate to carry out the purposes of this Act.

In any case in which the State has conducted and planning or in which any reductions required under this subpart have been achieved prior to the availability of funds to the State concerned, the sums available to that State under this subpart shall be treated as reimbursement. Any fee reduction or refund provided pursuant to subparagraph (B) shall be provided on a ratable basis (per kilowatt hour) with respect to all electric utilities in the State which are subject to such fee.

"(2) ADMINISTRATIVE EXPENSES.—Not more than 5 percent of the amount made available to any State under this subpart in any fiscal year may be used by the State for purposes of administration of the State plan under this subpart.

"Subpart 4—Acid Deposition Control Fund

"SEC. 196. ESTABLISHMENT OF FUND.

"(a) ESTABLISHMENT.—There is established in the Treasury of the United States a trust fund to be known as the 'Acid Deposition Control Fund' (hereinafter in this subpart referred to as the 'Fund'), consisting of such amounts as may be transferred to such Fund as provided in this section.

"(b) CREDITS.—There are hereby credited, out of any money in the Treasury not otherwise appropriated, to the Fund amounts determined by the Secretary of the Treasury (hereinafter in this title referred to as the 'Secretary') to be equivalent to the amount received in the Treasury under section 196.

"(c) USE OF FUND.—

"(1) IN GENERAL.—Amounts in the Fund shall be available only for purposes of making expenditures which are described in this subsection.

"(2) PRIORITIES.—If amounts available in the fund are inadequate to make all expenditures which are required to be made by the Administrator under this part, the Administrator shall make such expenditures in accordance with the following priorities:

"(A) FIRST PRIORITY.—(i) The Administrator shall make payments to utilities under section 197(c) for utility rate reductions specified in section 197(c)(2).

"(ii) Not more than $10,000,000 may be made available from the fund for purposes of the l.i.m.b. demonstration project under section 198(a) of subpart 5.

"(iii) Not more than $10,000,000 may be made available from the fund in any fiscal year for purposes of accelerated research of other technologies under section 198(b) of subpart 5.

"(iv) Not more than $25,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990 may be made available from the fund for purposes of the mitigation program under title III of the Acid Rain Deposition Control Act of 1985.

"(B) SECOND PRIORITY.—The Administrator shall next make expenditures under section 186 and, if amounts in the fund are inadequate to make all expenditures under such section 186, the available amounts shall be allocated first to the facilities which first applied for payment under such section 186.

"(C) THIRD PRIORITY.—If all expenditures which can currently be made under section 186 have been made, the Administrator shall provide funding to States under section 194.

"(d) ADMINISTRATIVE PROVISIONS.—

"(1) TRANSFER.—The amounts appropriated by subsection (b) shall be transferred at least monthly from the general fund of the Treasury to the Fund on the basis of estimates made by the Secretary of the amounts referred to in such subsection (b). Proper adjustments shall be made in the amount subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"(2) REPORTS.—The Secretary shall be the trustee of the Fund, and shall report to the Congress for each fiscal year ending on or after the date one year after the date of the enactment of this part, on the financial condition and the results of the operations of such Fund during such fiscal year and on its expected condition and operations during the next 5 fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(3) INVESTMENT.—It shall be the duty of the Secretary to invest such portion of such Fund as is not, in his judgment, required to meet current withdrawals. Such investments shall be in public debt securities with maturities suitable for the needs of such Fund and bearing interest at rates deter-

mined by the Secretary, taking into consideration current market yields on outstanding marketable obligations of the United States of comparable maturities. The income on such investments shall be credited to, and form a part of, such Fund.

"SEC. 197. FEES.

"(a) IMPOSITION OF FEE.—Under regulations promulgated by the Administrator, there shall be imposed a fee for each kilowatt hour of electric energy generated in the contiguous 48 States by an electric utility and for each kilowatt hour of electric energy imported into the contiguous 48 States.

"(b) AMOUNT OF FEE.—The fee shall be applied during each calendar quarter at a rate per kilowatt hour which is equal to 1.5 mill multiplied by the inflation adjustment for the calendar quarter in which the electric energy is generated or imported. The inflation adjustment for a calendar quarter is the percentage by which—

"(1) the implicit price deflator for the gross national product for the second preceding calendar quarter, exceeds

"(2) such deflator for the calendar quarter ending on December 31 of the year in which this part is enacted.

For the purposes of this subsection, the first revision of the price deflator shall be used.

"(c) NUCLEAR AND HYDROELECTRIC POWER.—

"(1) EXEMPTION.—The fee imposed under this section shall not apply to any electric energy (including imported electric energy) which is generated by nuclear or hydroelectric power.

"(2) STATEMENT OF EXEMPT FRACTION.—Each electric utility which generates or imports electric energy and sells such electric energy to any other electric utility or to any other person shall determine the fraction of the total number of kilowatt hours of electric energy sold during each billing period which is exempt from the fee under this section by reason of paragraph (1). Where sales of electric energy are made by a utility to two or more other persons, such fraction shall be the same for all electric energy sold during the same period. The amount of the fee imposed with respect to electric energy sold by an electric utility to any person during any billing period, and the total number of kilowatt hours of electric energy sold to such person by any electric utility during such billing period on which such fee has been paid, shall be separately stated on each billing document rendered to the purchaser in connection with such sale.

"(d) LOW-INCOME AND ELDERLY CUSTOMERS.—

"(1) PAYMENTS TO UTILITIES.—Under regulations promulgated by the Administrator, the Administrator shall make payments from the fund established under section 196 to each electric utility which has sold electric energy to any individual customer who certifies that, at the time of such certification, he is—

"(A) receiving aid to families with dependent children under a State plan approved under part A of title IV of the Social Security Act;

"(B) receiving supplemental security income benefits under title XIV of such Act;

"(C) receiving low-income home energy assistance under the Low-Income Energy Assistance Act of 1981;

"(D) a member of a household (within the meaning of the Food Stamp Act of 1977) which is receiving food stamps under that Act; or

"(E) receiving payments under section 415, 521, 541, or 542 of title 38 of the United States Code or under section 306 of the Veterans and Survivors Pensions Improvement Act of 1978.

Such certification shall be submitted within 180 days after the date of the sale of the electric energy with respect to which such payment is made.

"(2) RATE REDUCTION REQUIRED FOR LOW-INCOME AND ELDERLY CUSTOMERS.—No payment may be made to a utility under this subsection with respect to electric energy sold to any customer certified under paragraph (1) unless the Administrator determines that—

"(A) under applicable rate schedules, the full amount of such payment will be used to reduce the electric rates of the certified customer; and

"(B) the utility has established adequate procedures to assure that each customer of the utility will be informed in the utility's periodic billings of the payment authorized under paragraph (1) and the rate reduction available under this paragraph.

"(3) AMOUNT OF PAYMENT.—The amount of the payment made under this subsection to an electric utility with respect to sales of electric energy in any period shall be equal to—

"(A) 1.5 mill (multiplied by the inflation adjustment for the preceding calendar quarter) for each kilowatt hour of electric energy sold during that period to customers certified under this paragraph, multiplied by

"(B) a fraction—

"(i) the numerator of which is the total number of kilowatt hours of electric energy sold by the electric utility in that period for which a fee was paid by the generator or importer under this section, and

"(ii) the denominator of which is the total number of kilowatt hours of electric energy sold by the electric utility in that period.

"(e) REGULATIONS.—The regulations of the Administrator under subsection (a) shall be promulgated not later than 6 months after the date of the enactment of this part and shall set forth the time and manner required for payment of the fee imposed under subsection (a), the information required to be reported in connection with the payment of such fee, and the requirements applicable to the exemption and rate reduction provided under this section.

"(f) ENFORCEMENT.—

"(1) CIVIL PENALTIES.—Any electric utility (or importer of electric energy) which fails or refuses to pay any amount of a fee imposed under subsection (a) or which fails or refuses to file any report or other document required by the Administrator in connection with the imposition of such fee shall, in addition to liability for any unpaid amount of such fee (and interest on any such unpaid amount), be liable for a civil penalty of $50,000 for each day during which such failure or refusal continues. Any person who makes any false or misleading statement in any such report or other document required by the Administrator in connection with the imposition of such fee shall be liable for a civil penalty of $50,000 ($500 in the case of any person who makes any false or misleading statement in a certificate under subsection (d)).

"(2) CIVIL ACTIONS.—The Administrator shall bring a civil action against any electric utility (or importer) which fails or refuses to pay any amount of a fee imposed under subsection (a), fails or refuses to file any report or other document required by the Administrator in connection with the imposition of such fee, or makes any false or misleading statement in any such report or other document required by the Administrator in connection with the imposition of such fee. The Administrator shall bring a civil action against any person who makes any false or misleading statement in any document used for purposes of obtaining an exemption under subsection (d). Civil actions under this subsection shall be brought in the same manner and in accordance with the same procedures as are applicable to civil actions brought under section 113(b) against any person who violates any requirement of an applicable implementation plan.

"(g) CRIMINAL PENALTY.—Any electric utility (or importer of electric energy) which knowingly fails or refuses to pay any amount of a fee imposed under subsection (a) or which knowingly fails or refuses to file any report or other document required by the Administrator in connection with the imposition of such fee shall, in addition to civil liability under subsection (f), be subject to a criminal penalty of $100,000. Any person who knowingly files any false certificate or other document for purposes of obtaining an exemption under subsection (d) shall, in addition to civil liability under subsection (f), be subject to a criminal penalty of $1,000.

"(h) EFFECTIVE DATE; TERMINATION.—The fees imposed under this section shall take effect with respect to electric energy generated or imported after December 31 of the year in which this part is enacted. The fee shall cease to apply on December 31 of the first year which ends more than 10 years after such enactment.

"Subpart 4—Accelerated Research on Cleaner Burning Industrial Processes

"RESEARCH FUNDS

"SEC. 198. (a) FULL-SCALE DEMONSTRATION PROJECT.—The Administrator is authorized and directed to carry out a full-scale demonstration project to demonstrate the feasibility of the limestone injected multistaged burner (LIMB) technology. Not more than $10,000,000 is authorized to be appropriated from the fund established under subpart 4 for purposes of such project.

"(b) ACCELERATED RESEARCH FOR OTHER PROCESSES.—The Administrator shall make such grants and enter into such contracts and other arrangements as may be necessary to accelerate the research necessary to develop advanced industrial processes (including atmospheric fluidized bed combustion and magnetohydrodynamics (MHD)) other than the limestone injection multistate burner technology which may result in lower levels of sulfur dioxide and oxides of nitrogen. In each of the five fiscal years commencing with the fiscal year 1986, not more than $10,000,000 is authorized to be appropriated from the fund established under subpart 4 for purposes of this subsection.".

CONFORMING AMENDMENTS

SEC. 102. (a) ENFORCEMENT.—Section 113(a)(3) of the Clean Air Act is amended by inserting "or is in violation of any requirement in effect pursuant to subpart 1 of part E," after "inspections, etc.)".

(b) CIVIL ACTIONS.—Section 113(b) of the Clean Air Act is amended by inserting the following immediately after paragraph (5): "Whenever any person violates any requirement in effect pursuant to subpart 1 of part E, the Administrator may commence a civil action for permanent or temporary injunction or to assess and recover a civil penalty

of not more than $25,000 per day of violation, or both.".

(c) CRIMINAL PENALTIES.—Section 113(c)(1)(C) of the Clean Air Act is amended by inserting "or violates any requirement in effect pursuant to subpart 1 of part E," before "or".

(d) JUDICIAL REVIEW.—Section 307(b)(1) of the Clean Air Act is amended by inserting ", any final action taken by the Administrator under part E of title I" after "120" in the first sentence thereof.

Subtitle II—Control of Nitrogen Oxide Emissions

REVISIONS OF NEW SOURCE PERFORMANCE STANDARD

SEC. 201. Section 111 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(k) The Administrator shall revise the standards of performance for emissions of nitrogen oxides from electric utility steam generating units which burn bituminous or subbituminous coal. Such revised standards shall prohibit the emission of nitrogen oxides from such units at a rate which exceeds—

"(1) 0.30 pounds per million Btu's, in the case of subbituminous coal; and

"(2) 0.40 pounds per million Btu's, in the case of bituminous coal,

based on a 30-day rolling average. Such revised standard shall take effect with respect to units which commence construction after the date of the enactment of this subsection. As used in this subsection, the terms 'electric utility steam generating unit', 'bituminous coal', and 'subbituminous coal' have the same meanings as when used in 40 CFR part 60, subpart Da, as in effect on January 1, 1983.

"(l) NSPS FOR NO_x EMISSIONS FROM CERTAIN STEAM GENERATING UNITS.—The Administrator shall promulgate standards of performance under this section for emissions of oxides of nitrogen from all fossil-fuel-fired steam generating units which are new sources within the meaning of subsection (a)(2) and which are capable of combusting more than 50 million Btu's per hour heat input of fossil fuel (either alone or in combination with any other fuel). The standards under this section applicable to fossil-fuel-fired steam generating units which are capable of combusting more than 250 million Btu's per hour heat input may vary from the standards applicable to units which are not capable of combusting more than 250 million Btu's per hour heat input.".

EMISSIONS FROM MOBILE SOURCES

SEC. 202. (a) TRUCKS AND TRUCK ENGINES.—Section 202 of the Clean Air Act is amended by adding the following new subsection at the end thereof:

"(g) OXIDES OF NITROGEN EMISSIONS FROM LIGHT-DUTY TRUCKS AFTER 1987.—Effective with respect to vehicles and engines manufactured during and after the model year 1987, the regulations under subsection (a) applicable to emissions of oxides of nitrogen from trucks and truck engines the gross vehicle weight of which does not exceed 8,500 pounds shall contain standards which provide that such emissions may not exceed the number of grams per vehicle mile specified in the following table:

Gross vehicle weight:	Emission standard
Not in excess of 6,000 lbs	1.2
In excess of 6,000 lbs	1.7

Effective with respect to vehicles and engines manufactured during and after the model year 1987, the regulations under subsection (a) applicable to emissions of oxides of nitrogen from trucks and truck engines the gross vehicle weight of which exceeds 8,500 pounds shall contain standards which provide that such emissions may not exceed 4.0 grams per brake horsepower-hour. Nothing in subparagraph (B) or (E) of subsection (a)(3) shall apply to any standard established under this subsection.".

(b) CONFORMING AMENDMENT.—Section 202(a)(3) (A)(ii) is amended by inserting "and except as otherwise provided in subsection (g)," after "(E)".

Subtitle III—Acid Deposition Damage Mitigation Program

STATE PLANS; FEDERAL ASSISTANCE

SEC. 301. (a) RESTORATION PROGRAM.—Any State may prepare, and submit to the Administrator for his approval and to the Director of the United States Fish and Wildlife Service for his comment—

(1) a survey of water quality deterioration in such State which has resulted from acid deposition, and

(2) a proposal for research on mitigating the effects of acid deposition on terrestrial and aquatic ecosystems;

(3) proposed methods and procedures to restore the quality of water in such State which has deteriorated as a result of acid deposition.

(b) FINANCIAL ASSISTANCE.—

(1) IN GENERAL.—From the fund established under section 196 of the Clean Air Act, the Administrator, after consultation with the Director of the United States Fish and Wildlife Service, shall provide financial assistance to States in order to carry out research on mitigation, and to carry out methods and procedures for restoration, which have been approved by the Administrator under this section.

(2) 80 PERCENT LIMIT.—The amount granted under this section to any State for any fiscal year shall not exceed 80 percent of the funds expended by such State in such year for carrying out approved methods and procedures under this section.

(3) APPORTIONMENT AMONG STATES.—The Administrator shall provide for an equitable distribution of sums appropriated under this section among States with approved methods and procedures. Such distribution shall be based on the relative need of each such State for the restoration of water quality which has deteriorated as a result of acid deposition. The amount of any grant to a State under this section shall be in addition to, and not in lieu of, any other Federal financial assistance.

Mr. CONTE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. SNYDER. Mr. Chairman, I reserve a point of order against the amendment.

Mr. CONTE. Mr. Chairman, I want to commend the efforts of the Public Works Committee in bringing this bill to the floor. With a goal to make our waters drinkable, fishable, and swimmable once again, the Clean Water Act is an important environmental safeguard. However, there is one pressing water quality issue that is not addressed in this legislation.

Acid rain poses a national and potentially disastrous threat to the quality of water in this country. Lakes, streams, and reservoirs are dead and dying. In some cases, entire ecosystems are threatened. And most tragically, our drinking water supplies are being contaminated by this "silent killer."

Mr. Chairman, acid rain is a clear and present danger to our environment and to our health. Every day, more than 166,000 tons of sulfur and nitrogen oxides—the equivalent by weight of 4,100 fully loaded freight cars—are shot into the skies of America. Let's face it. Acid rain is out of control.

To address this widespread threat to our water quality, my amendment directly attacks the source of this water pollution by controlling these acid rain causing emissions. This comprehensive Acid Rain Control Program is designed to reduce sulfur dioxide by 12 million tons and nitrogen oxide by 4 million tons within 10 years. In phase 1, the top 50 largest sulfur dioxide emitters are required to reduce a total of 6.5 million tons, and in phase 2, another 5.5 million tons are distributed among the States for further reductions. A generous cost-sharing provision is also included. Since the program is financed by a separate "Superfund" for acid rain control, there's no cost to the Federal Government.

Believe it or not, New Englanders are sensitive to the employment effects in the coal mining States. We are aware of the regional costs of reducing SO_2, and we are concerned about the impact of cost sharing the consumer. But we are equally serious about protecting our environment, our water quality and our health. The Congress has stalled on this issue for too long. It's time to face the facts and take a stand.

Just look at the facts. Acid rain has a devastating effect on water quality.

In the Eastern States, including the Midwest, OTA estimates that 17,000 lakes and 112,000 miles of stream are at risk from acid rain.

In Massachusetts, over 200 waterbodies are already dead—acidified with no signs of life. A recent study showed that 82 percent of the surface water in my State is vulnerable to long term acidification. And 20 percent of these water bodies, including the Quabbin Reservoir, are critically close to losing their capacity to neutralize acid.

Let me tell you about the Quabbin, a reservoir that supplies drinking water to the city of Boston. With 85 percent of the service pipes made of lead, the city must spend $1.3 million annually to treat the acidic water from the Quabbin. This deadly combination—

lead pipes and corrosive water—presents a significant human health risk.

As you might expect, acid rain has dramatically affected aquatic life in the Quabbin. Since 1980, there has been a sharp decline in fish population and reproduction. For example, the egg mortality rate for the rainbow trout has reached a staggering 90 percent in some tributaries. Even with State stocking efforts, the trout catch has dropped 46 percent in the past 2 years.

The damage caused by acid rain is not limited to the Northeast region. In Wisconsin, for example, the Department of Natural Resources reported that 302 lakes in that State are now dead—killed by acid rain—and that another 1,400 are extremely threatened and probably will be dead before long.

Recent studies have also documented acid rain damage in the Rocky Mountain region and in the South.

It's a fact. Acid rain is causing significant damage now, and the effects will be disastrous in the future if controls are not in place. The National Academy of Sciences predicts that "at current rates of emissions of sulfur and nitrogen oxides, the number of affected lakes can be expected to more than double by 1990 and to include larger and deeper lakes."

It's clear that in Massachusetts and across the country, the acid reign of terror has ravaged the environment. This threat to our water quality, our health, forests and natural resources must be addressed on a national level in a timely fashion.

We can't afford to wait any longer.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(On request of Mr. JEFFORDS and by unanimous consent, Mr. CONTE was allowed to proceed for 5 additional minutes.)

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I rise in strong support of the amendment offered by my colleague from Massachusetts. He is bringing before this body a workable solution to the growing problem of acid rain. Acid deposition is threatening our environment, health and economic well-being.

Mr. Chairman, for too long, the current administration, too many of our colleagues and others have stonewalled a national response to the problem of acid rain. We have all heard the litany of excuses from "acid rain is beneficial" to the current standard excuse "we don't have enough information on it." But while we fiddle, Rome burns.

The jury is in, Mr. Chairman, and the verdict on acid deposition is guilty. Acid rain exists; it is a problem and we must act. There is no disputing the information we have received and the increasing scientific documentation of the growing threat of acid rain.

This May, my Subcommittee on National Parks and Recreation conducted hearings on air quality in the national parks. These hearings revealed the threat to our national parklands from air pollution. Witness after witness testified about the degradation in the parks from the loss of vegetation and poorer water quality to deteriorating cultural resources and visibility. Unless we counteract this growing problem, our national treasures will be lost forever.

The subcommittee hearings also focused on the impact of acid rain on our environment.

While the major public focus of acid rain has been on the Northeast and Midwest, the hearings indicated that the problems associated with acid rain may not be limited to those regions. Several witnesses indicated that both the Southeast and West could fall victims to the savage impacts of acid rain. Among those Western National Parks which were identified as sensitive to acid rain are: Mount Rainier, Yosemite, Sequoia, Yellowstone, and Glacier.

Mr. Chairman, as one of the witnesses succinctly stated: We are sitting on a time bomb. We must act now to defuse this bomb before it is too late.

Mr. CONTE. I thank my good friend, the gentleman from Minnesota [Mr. VENTO], for his contribution and his interest.

□ 1450

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I certainly want to enthusiastically join in this amendment. I think it is critical that we do something at this time. My State, the State of Vermont, probably receives the worst part of the acid rain at least from the ramifications not only on our pure water in the streams and lakes, but also on our forest growth. It is time to do something.

I know the gentleman is disappointed as I was disappointed that the Environmental Protection Agency, which had a chance to take a move in this area, failed to do so. Yet the gentleman knows as well as I know that the water pollution is a critical element here. I think the gentleman's amendment is excellently drafted in order to make sure that we have an opportunity to raise this issue. For to me it makes no difference whether the pollution comes out of the top of the stack or out of the bottom of the stack and runs across the land, it ends up in the water. And when it ends up in the water it creates a problem and creates pollution which is a serious one.

When I think of the numerous reports and studies on the damaging effects of acid rain on our natural environment, it is amazing to realize that we are just now debating this issue on the floor of the House. We can no longer ignore this byproduct of our industrial society. Smokestack pollution dispersed downwind is wreaking havoc on high mountain lakes, ponds, and streams to the detriment of water quality, aquatic life, and recreational opportunities. Sulfur dioxide and nitrogen oxide emissions from towering smokestacks are as damaging to our surface waters as the land based, nonpoint source pollutants addressed in other sections of this legislation.

This amendment to attach acid rain controls to the Clean Water Act is not designed to disrupt today's proceedings nor is it offered to merely prove a point. Acid rain is killing the surface waters of the Northeast. The Clean Water Act has been a success story of our Nation's desire to have clean, drinkable, and swimmable waters. But, we have to look beyond cleaning up municipal and industrial wastes discharged directly into our waters. With the phenomena of acid rain, we must now look skyward to pollutants that may be discharged into the heavens but fall to Earth as poisonous acid precipitation. The impacts of which can be so devastating that a water body can be left sterile and devoid of all aquatic life.

An opportunity to control the effects of acid rain was lost on the Environmental Protection Agency recently with the announcement of their so-called tallstacks regulations. Much to the chagrin of New Englanders, these regulations continue to allow the use of tallstacks as a pollution control technique. It is this very device that sends utility and industrial emissions downwind to destroy the quality of our surface waters. In discussing a renewal of the Clean Water Act today, we are offered an excellent opportunity to address the control of this environmental dilemma.

Vermont, along with much of the New England region, is highly susceptible to the effects of acid rain. Not only are we downwind of the primary sources of smokestack emissions, our geologic formations are extremely sensitive to acidic precipitation. Bedrock with a low chemical buffering capacity cannot neutralize the acidic composition of acid rain. Geologic surveys show that well over 50 percent of Vermont is sensitive to acid rain with medium to no buffering capacity. This area includes most of the Green Mountain and Taconic Mountain ranges and all of the Green Mountain National Forest.

The latest data from the Vermont Agency of Environmental Conservation has found 10 high-altitude lakes

in these sensitive areas to be "dead." All of these lakes displayed high acidity. In addition, the agency has identified 108 lakes, representing 11,246 surface acres of water, as extremely sensitive to further acidic precipitation. The buffering capacity of these lakes has been so eroded over the years that their natural ability to rebound from an acidic rain event has been virtually destroyed.

The effects of acid rain are already evident in Vermont and given the sensitivity of a large portion of our State we can only expect the damages to increase. This situation concerns Vermonters and in the Yankee tradition this concern has not be kept quiet. This past March at our annual town meeting day, more than half of our towns felt it was their duty to send Washington a message on acid rain. A resolution urging the Environmental Protection Agency to do all in its power to institute controls over the sources of acid rain was considered at 154 town meetings. It was adopted at all but two and at most by unanimous consent.

This is not the first time that Vermonters have spoken out on this issue. In 1983 the Vermont Legislature adopted a resolution calling on President and Congress to enact legislation to reduce sulfur dioxide emissions by one-half by 1990. My own legislative survey of last year found 95 percent of the respondents in agreement that something had to be done to control acid rain. Out of this group, an impressive 81 percent were willing to bear a portion of the cost of a cleanup program as long as it meant something would get done.

Where our Government has not acted, the New England region has taken the initiative to control our own, albeit small, contribution to the acid rain problem. Recently, the New England Governors and the Eastern Canadian Premiers agreed to a program to reduce sulfur dioxide emissions from within our region. This international effort marks the first time that a concerted effort will be made to control this problem. And this is by a region that is the primary victim of acid rain in North America.

The acid rain amendment to the Water Quality Renewal Act presented here today supports each of the initiatives I have outlined. This is control legislation, calling for reduction goals of 12 million tons for sulfur dioxide emissions and 4 million tons for nitrogen oxides, it is a nationwide plan with each State contributing to the cleanup campaign based on their contribution and it includes a funding mechanism with contributions from all electricity users. Vermonters support this approach, we are willing to help with the solution even though we are not a source of the problem. I hope all States can display as much regard for our environment.

Mr. Chairman, I again want to commend Mr. CONTE for bringing this issue to the House floor. I hope each of my colleagues will give this initiative their full consideration. Our environment cannot wait.

I would be happy to yield back.

Mr. BOEHLERT. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. BOEHLERT. Mr. Chairman, I commend my colleague in the well for his leadership on this very sensitive issue. It is no longer a regional issue, it is not even a national issue, it is an international issue, involving both the United States and Canada. The problem of acid rain is an international issue and we had better address it. We are creating a magnificent sewer in the sky and we are sitting here guilty of inaction.

Mr. Chairman, I want to commend the gentleman in the well, Mr. CONTE. His leadership on this issue is well known to all of us.

Mr. Chairman, I would urge all of our colleagues to take a good look at this amendment. It is very deserving of our support.

Mr. CONTE. Mr. Chairman, I thank the gentleman from New York for his kind comments.

Mr. NIELSON of Utah. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Utah.

Mr. NIELSON of Utah. Mr. Chairman, as the gentleman in the well knows, we had a study on acid rain last year in which the Member in the well at this time was a member of that committee. I think the report did recommend an acid rain bill. However, I have to say that the Committee on Energy and Commerce has jurisdiction in this area and specifically the Committee on Health and Environment has jurisdiction. They defeated an amendment similar to this 10 to 9 last year. Such an amendment has not come forward.

I believe if you would look at the bill which is similar to the bill by Mr. UDALL and Mr. CHENEY of Wyoming, I think it is very similar to that. Is that correct?

I am generally supportive of that, but I do think it needs committee action. I do not think it is appropriate at this time. For that reason I would have to oppose it.

Mrs. JOHNSON. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentlewoman from Connecticut.

Mrs. JOHNSON. Mr. Chairman, I thank the gentleman very much.

Mr. Chairman, I rise in strong support of the gentleman's amendment and wish to submit for the record a report that was published in 1983 by the Connecticut Agricultural Experiment Station in New Haven. This outstanding organization did carefully research on this subject from our perspective in Connecticut and concluded that there is little doubt that rain in Connecticut and elsewhere in the Northeast has been acidified by increased emission of sulfur dioxide and nitrogen oxide. It further notes that though the effects of acid rain are subtle, current levels of acid rain caused air pollution may cause genetic, biological, and ecosystem changes that have yet to be identified.

Mr. Chairman, during 1980 over 27 million tons of sulfur dioxide and 21 million tons of nitrogen oxide were emitted into the U.S. atmosphere. Our own Office of Technology and Assessment reported that.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. CONTE] has expired.

(By unanimous consent, Mr. CONTE was allowed to proceed for 2 additional minutes.)

Mrs. JOHNSON. Mr. Chairman, will the gentleman continue to yield?

Mr. CONTE. I yield further to the gentlewoman from Connecticut.

Mrs. JOHNSON. I thank the gentleman for yielding.

Mr. Chairman, our own Office of Technology Assessment reported that if energy use patterns and current laws do not change, both sulfur and nitrogen pollutants will remain high for at least the next 50 years which would be disastrous to America's natural ecosystems.

Mr. Chairman, I commend the gentleman for his leadership in this area.

ACID RAIN: SOURCES AND EFFECTS

CONCLUSIONS

Nature and sources of acid rain

There is little doubt that rain in Connecticut and elsewhere in the Northeast has been acidified by increased emissions of suffur dioxide and nitrogen oxides. The increased emissions of sulfur dioxide can be attributed largely to increased combustion of fossil fuels. Nitrogen oxides are produced during high temperature combustion regardless of the composition of the fuel and the observed increases can be attributed largely to automobiles as well as stationary combustion sources.

In addition to acidifying rain, the gaseous oxides of nitrogen and sulfur may react directly with materials they contact, or they may react with other substances to produce particulate aerosols. Thus, acid rain is a mixture of acids dissolved in water, reactive gaseous oxides, and fine particulate sulfate and nitrate aerosols. In addition, air contains other pollutants such as ozone, hydrocarbons and heavy metals that also may be harmful. Unfortunately, these various pollutants are often grouped together under the heading of "acid rain," which has become a subject of national and even international environmental concern.

The sources of acid rain and other air pollutants in Connecticut are not readily quantified. This is due in part to the varied components of acid rain: if damage is caused

largely by gaseous SO2, for example, its relatively short residence time in the atmosphere suggests that local sources are important. Fine particulate aerosols, on the other hand, can be transported over longer distances. The more distant the source, the more difficult it becomes to specify that source. Present models that attempt to estimate the trajectory of polluted parcels of air have errors of the order of 50% the distance involved. However, it is clear that regions and perhaps even states can be identified as source areas.

Rain in Connecticut has an average pH of about 4.3-4.4, which is highly acidic compared to unpolluted rain with pH 5.6. The area of most highly acidified rain (pH~4.2) lies to the west of Connecticut, covering the general area of western Pennsylvania, western New York, eastern Ohio, and southeastern Ontario. Measurements of sulfate and nitrate deposition confirm that this area is the center of acid deposition. Because large amounts of sulfur dioxide and nitrogen oxides are produced in the 28 states east of the Mississippi, it is reasonable to conclude that, once again, man has fouled his own nest.

Effects of acid rain

To date, the effects of acid rain on the environment of Connecticut can be summarized as subtle. The soils of Connecticut are generally well buffered and show no evidence of acidification by acid rain. Measurements of the alkalinity of 35 lakes in Connecticut show little or no change since earlier measurements in 1937-1939. Similarly, there is no evidence that fish in our lakes have been affected by acid rain, but there are 1,000 lakes in Connecticut large enough to have names and some changes may have gone undetected. There is no evidence of damage to agricultural crops, and little or no reason to believe that our forests have been adversely affected to date. However, concern has been expressed that current levels of air pollution may cause genetic, biological and ecosystem changes that have yet to be identified.

The effects of acid rain on structures in Connecticut are evident in the weathering of some statues and other building stone. The damage is caused largely by the sorption of gaseous oxides, particularly suflur dioxide, which then dissolves in dew or other moisture to produce sulfuric acid.

There is little evidence of any direct effect of acid rain—i.e. increased acidity of rainfall—on human health. The notion that acid rain will burn skin or dissolve one's clothing has no basis in fact. However, there is no question that some forms of air pollution are harmful to health. Specifically, fine particulate aerosols can lodge in the lung and cause respiratory problems. A portion of these aerosols are acidic due to the presence of sulfur oxides. The association between these are pollutants and human health is statistical, rather than clinical, with one published study indicating an increase in mortality in New England due to air pollution. The precise role of sulfate aerosols in this complex air pollution problem is not known.

Mr. CONTE. I thank the gentlewoman from Connecticut for a fine contribution.

Mr. SCHEUER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. SCHEUER. I thank the gentleman for yielding.

Mr. Chairman, I want to congratulate the gentleman for this initiative. I assume he has the full backing of the EPA leadership and the administration. I congratulate the gentleman on this tremendous quantum jump, this leap ahead in their thinking.

I have chaired a Science Committee which has had several hearings on acid rain. We have jurisdiction over acid rain research. Up to now the administration has always been in favor of more research but less action.

Mr. CONTE. Well let me say to the gentleman if he can get it out of his committee, to heck with the administration and EPA. I do not see this Congress moving expeditiously on acid rain legislation. There are a lot of things that the administration, the EPA and other agencies do not like and we pass it over their objections. So do not be bashful, get the bill out here to the floor. This is the first time we ever had a chance to talk about it on the floor.

Mr. SCHEUER. Mr. Chairman, I congratulate the gentleman in the well, the gentleman from Massachusetts [Mr. CONTE].

Mr. MOAKLEY. Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from Massachusetts [Mr. CONTE]. While many may believe that acid rain is a problem of the Northeast and does not affect their constituencies, nothing can be further from the truth.

Our own Office of Technology Assessment [OTA] estimates the number of acid-altered lakes as 2,983, or 17 percent of the lakes in the Eastern half of the United States, mostly in the northeast and north-central regions. Recent evidence indicates that many lakes in high alpine areas of the West must also be added. OTA similarly estimated that 22,765 stream miles, or 19 percent have been acid-altered. Nearly all areas in the Eastern United States, including parts of the Midwest, are impacted. In Massachusetts, 19 percent of the surface waters are potentially acid altered.

The sad fact is that the advertisements you see of the beautiful crystal blue lakes—the lakes that look as clear as your neighborhood swimming pool—the lakes with the solitary fisherman. The sad fact is that that solitary fisherman will be sitting there all day without so much of a nibble. The sad fact is that those crystal blue lakes are dead from acid rain. The sad fact is that we know about this problem, it is well documented, and we have not taken corrective action.

In urban districts like mine, however, we are also losing our built environment as well. What is ironic about the loss of our built environment, is that many of the building materials which were originally chosen for their durability, have been found to be highly susceptible to acid rain. The result is not only the loss of much of our heritage, but enormous financial costs as we attempt to save these structures. Unfortunately, very little is known about how to prevent deterioration to buildings and sculptures from acid rain.

Frankly, the loss of either our lakes or buildings is probably not our biggest problem. While both the loss of our lakes and buildings are extremely serious, the ultimate threat is the effect of acid rain on human health.

We have clear documentation of the seriousness of sulfuric acid and the oxides of sulfur and nitrogen inhaled by people with chronic bronchitis, asthma, and emphysema. We do not know, however, precisely at what levels these people are at risk or whether these acids acting together may pose an even higher risk.

According to Dr. Morton Lippmann, director of the Aerosol and Inhalation Research Laboratory and professor of the Department and Institute of Environmental Medicine at the New York University Medical Center, it has been "clearly demonstrated that asthmatics are an especially sensitive segment of the population with respect to the bronchoconstrictive effects of sulfuric acid and nitrogen oxide," and that "adolescent asthmatics may well be an especially sensitive subsegment of the asthmatic group."

The most serious threat, however, does not affect just those suffering from respiratory problems, but is affecting everyone who drinks water. By mobilizing toxic metal such as lead and mercury, acid rain is undoubtedly getting into our drinking water—either directly from our wells and reservoirs, or added as acidic water gradually corrodes our distribution system.

To prevent metal pollution, and to protect the pipes, millions of dollars are spent annually throughout the United States to raise the pH of "raw" water entering our distribution systems. Gus Foss, the Boston Metropolitan District Commission's principal sanitary engineer, adds sodium hydroxide to the MDC system to raise the water to a pH of 8.8—enough to reduce the solubility of lead prevalent in the pipes of the service lines. Even nonacidified water, such as the MDC's water supply, would have to be treated to acquire this pH-acidified water which will require even further additions of sodium hydroxide.

While those of us receiving town or city water can demand action, many of my constituents use well water and have little recourse.

The amendment offered by the gentleman from Massachusetts seeks to resolve this problem now rather than waiting—waiting until the problem is worse and the solutions are more difficult. I believe that the 12-million-ton reduction in sulfur emissions mandat-

ed from this act are necessary if we are going to adequately attack this problem. Those of us in the Northeast have already expressed our willingness to carry our fair share of the load. New York has already passed legislation to reduce acid rain in that State. Governor Dukakis has endorsed legislation in Massachusetts to cap sulfur emissions in our State and requiring additional reductions if Federal standards are not forthcoming.

Mr. Chairman, I support this amendment—my constituents demand this amendment. I urge my colleagues to support this amendment and demonstrate to the American people that this Congress is serious about protecting both the environment and public health.

● Mr. ST GERMAIN. Mr. Chairman, I rise in support of the amendment to H.R. 8 which my colleague Mr. CONTE is offering to institute a program to control the harmful effects of acid rain. We in New England are too well acquainted with the disastrous effects of acid precipitation on our lakes, rivers, and streams. Individually and as a group, members of the New England delegation have worked for years attempting to bring an effective control program into being. In spite of the crucial nature of the issue, we have yet to consider it on the floor of the House. My constituents regard acid precipitation as the most pressing of environmental problems, with the possible exception of hazardous waste disposal.

Acid rain is causing significant damage to our waters and thus can well be addressed under the Water Quality Renewal Act. We have repeatedly delayed considering remedies to the damage which have already been caused by acid precipitation and while we have delayed the effects have grown worse. The amendment which is being introduced would establish a fair and effective program to curb acid emissions and to share the cost of so doing nationally. We have authorized continued studies of acid rain essentially to buy time and avoid dealing with the real issue. There is simply no more time to buy; it is important that we act now.●

● Mr. SIKORSKI. Mr. Chairman, I would like to thank the gentleman from Massachusetts for raising the important issue of acid rain. He addressed a problem that deserves the immediate attention of this body and the American public. This is a problem that relates very clearly to the quality of our water, our food, and our life. This issue is germane to any consideration of the public health and continued welfare, regardless of the vehicle used to bring this hazard to the American peoples' attention.

Acid rain is probably the most serious environmental threat to the North American continent. But for too long the debate has construed the problem of acid rain as solely one facing the States in the Northeast and the solution an Eastern one. We are now beginning to see the impact of acid rain beyond the Northeast. The EPA has reported that the regions of the United States that are vulnerable stretch from Florida to the State of Washington, from California to Maine. Even the deserts of New Mexico and Arizona show extreme levels of acidic deposition. All across the country, thousands of lakes, millions of trees, and millions of acres of land are threatened by the poisons of acid rain.

While the threat of acid rain poses is environmental in nature, it endangers more than just our Nation's health. Its effects also strike at the heart of our Nation's economic vitality. Agriculture, which accounts for 40 percent of the economy of my home State of Minnesota, is directly threatened by acid rain. The forest industry, which contributes significantly to our Nation's economy, is also threatened by continued exposure to acid rain, as is the tourism and sportfishing industries. In short, acid rain touches all regions of our Nation and all sectors of our economy.

Moreover, acid rain poses a serious threat to human health. Scientific evidence indicates that acid rain may be linked to several forms of human brain degeneration, particularly Alzheimer's disease, a common but devastating form of senility. Other research has uncovered links between sulfur dioxide (the primary precursor of acid rain) and premature death in humans—up to 50,000 a year.

We don't need another commission, another study. We need to act.

I appreciate Mr. CONTE's desire to promote the resolution of the issue of acid rain. I share his sense of urgency and I thank the gentleman for his amendment.●

● Mr. ROTH. Mr. Chairman, I rise in support of this effort to protect and preserve the quality of our Nation's water. I would like to commend the gentleman from Massachusetts [Mr. CONTE] for offering this amendment and giving us at long last an opportunity to discuss the topic of acid rain. It is clear that acid rain is damaging one of our most valued natural resources, our lakes.

Acid rain is intimately related to the pending subject of water quality. Acid deposition does result in a deterioration in the water quality of our lakes, streams, and ponds. Countless scientific studies have documented the widespread damage and potential threats to our rivers and lakes. In my home State of Wisconsin, there is a clear potential for serious long-term damage from acid rain.

The Wisconsin Department of Natural Resources reports that 302 of Wisconsin's 11,000 lakes have shown the first signs of stress due to acid rain. Water chemistry measurements indicate that these lakes measures no alkalinity. Another 1,400 lakes in Wisconsin are extremely sensitive, with very low alkalinity levels measured.

Nationwide, water bodies are being threatened by acid rain. Lakes and streams are dying, in turn, threatening entire natural habitats.

By addressing the issue of acid rain now, we can prevent a crisis in States like Wisconsin, where the threat of dying lakes already exists. We can avert a disaster if we have the will to act.

Mr. Chairman, I again want to commend Mr. CONTE for giving us this overdue opportunity to debate acid rain on the House floor. I hope that my colleagues will join with me in supporting this effort to truly promote water quality. There is nothing more germane to the issue of water quality, particularly in the Northeast and Midwest, than acid rain. There is a time to study and a time to act. The time to act is here.●

● Mr. MARKEY. Mr. Chairman, I rise to join Mr. CONTE in his efforts to get acid rain included as a part of the debate on clean water.

This amendment, which includes much of the bill that my colleague from Massachusetts and I have introduced, is entirely germane to this bill and deserves to be heard.

For many years, we have tried to get the serious question of acid rain debated on the floor of this House. We have been unsuccessful because of a deliberate policy to block debate on this critical environmental issue. Consequently, I strongly support this amendment as a vital step toward controlling acid rain.

As a chairman of a subcommittee which has some jurisdiction over the acid rain issue, I support this amendment. Acid rain deserves the attention of this Congress, and should be debated and passed by this Congress.●

Mr. CONTE. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from Kentucky [Mr. SNYDER] insist on his point of order?

Mr. SNYDER. Mr. Chairman, I do insist on the point of order and I would like to be heard on it.

The CHAIRMAN. The gentleman will state his point of order.

POINT OF ORDER

Mr. SNYDER. Mr. Chairman, the amendment is subject to a point of order on two grounds. First it is in violation of House rule XVI which states that "No motion or proposition on a subject different from that under consideration shall be admitted under color of amendment."

The amendment which the gentleman offers is not germane. It is, with

minor changes, substantially that embodied in H.R. 1030, which the gentleman introduced on February 7, 1985. The purpose of that bill was to decrease sulphur dioxide emissions by requiring certain electric utilities plants and other sources to reduce their rates of emissions. Since the bill made extensive amendments to the Clean Air Act, it was referred solely to the Committee on Energy and Commerce, who have jurisdiction of this matter.

Today we have almost identical provisions before us embodied in Mr. CONTE's amendment which are far beyond the scope of the bill we are now considering, H.R. 8, and deal with the subject properly within the jurisdiction of another committee, that is, the Committee on Energy and Commerce.

The scope of H.R. 8 is limited to the Clean Water Act and does not include extensive amendments to the Clean Air Act as the gentleman has proposed.

The gentleman's amendment would set air emission standards for certain electric utilities and other sources and would set up a financing mechanism to fund the program. According to subpart 4 of the amendment, a fund would be established to pay for the owner operators' capital costs to install appropriate air emission equipment required under the amendment.

Mr. Chairman, therein lies the other problem making this subject to a point of order. It is in violation of section 303 of the Budget Act since it increases revenues before the first Budget Act has been enacted. As we know, we do not have the first Budget Act enacted at this time.

So for those two reasons, Mr. Chairman, I strongly suggest that it is subject to a point of order.

I might say, too, Mr. Chairman, as an aside that having looked at the New York Times, when the gentleman from Massachusetts says that the Public Works Committee—on last Sunday—never says "no" to anything, our leadership; today we are saying no to this.

The CHAIRMAN. Does the gentleman from Massachusetts [Mr. CONTE] want to be heard on the point of order?

Mr. CONTE. Yes, Mr. Chairman.

The CHAIRMAN. The gentleman from Massachusetts is recognized.

Mr. CONTE. Mr. Chairman, it is very difficult to refute that scholarly legal opinion offered by the jurist from Kentucky. But I will do my humble best.

Mr. Chairman, the amendment I feel is germane to the committee amendment. It deals with the same subject matter as contained in the bill.

For example, the committee amendment includes a program to address the acidification of this Nation's lakes. If implemented, this amendment would accomplish the same goal by controlling the source of this acidity. Also, the bill, as a whole, is concerned with the protection and improvement of water quality in this country. And this amendment directly addresses the protection of water quality by controlling acid rain.

For these reasons, the amendment is in order and germane to the bill.

Mr. Chairman, I rest my case.

Mr. JEFFORDS. Mr. Chairman, I ask to be heard on the point of order.

The CHAIRMAN. The gentleman from Vermont is recognized.

Mr. JEFFORDS. Mr. Chairman, I think it is important to analyze the situation we are talking about here and to examine it with respect to the jurisdiction of the committee. The committee has jurisdiction over both issues, whether it be air pollution or water pollution. I think there is no question about that.

The question here is the germaneness of the bill. In addition to the remarks made by the gentleman from Massachusetts [Mr. CONTE] this bill also has non-point water pollution provisions in it. What are we involved with here in acid rain? We are involved with non-point water pollution. How does that occur? If you have a plant that has emissions in its stack, if you have scrubbers in it and it scrubs the pollution out, that effluent should run across the land and go into the water, then it would be covered, no question about it, as water pollution.

What we have here is the effluent goes out of the stack, it goes up, it comes down in water on land and runs across the land into the water and pollutes it. There is no question in my mind that that is a very relevant aspect of the water pollution problem, whether it be manure or whether it be from serious contaminating elements from stacks.

□ 1500

So it would appear to me that this committee is not restricted in its ability to take care of water pollution merely because it may also be an air pollution problem.

Mr. FRANK. Mr. Chairman, I rise to speak on the point of order.

Mr. Chairman, I want to associate myself with the remarks of the gentleman from Vermont [Mr. JEFFORDS] on the point of order. The question of the relevance of this to legislation dealing with clean water seems to me overwhelming. From the standpoint of my own district and my own State, there is no greater threat that people are concerned about, and I would hope that we would be given the chance, given that clear relevance, to debate this and act on it in this context.

Mr. MARTIN of New York. Mr. Chairman, I rise to speak on the point of order.

Mr. Chairman, I would like to embrace the comments of the gentleman from Massachusetts, and my colleague and neighbor from Vermont. I can think of nothing that would be more relevant to pollution of our waters than the tragic problem we have with sulfur dioxide, nitrogen oxides polluting the lakes and streams and rivers of this country, particularly in the Great Northeast.

I can think of nothing more relevant, and I support the position of the gentleman from Massachusetts [Mr. CONTE].

Mr. NIELSON of Utah. Mr. Chairman, I rise to speak on the point of order.

Mr. Chairman, I concur with many of the things that have been said about the desirability of having acid rain before us, and I am cosponsor of a bill to do exactly that. However, the statement made by the gentleman from Vermont is incorrect. The Public Works and Transportation Committee does have water pollution, but they do not have air pollution; they do not have air quality in their committee.

As the gentleman from Kentucky appropriately stated, this is the exclusive province of the Committee on Energy and Commerce and the Health and Environment Subcommittee of that committee.

I believe also some aspects need to be looked at as to the employment effects on the Eastern coal, which I think is a very serious possibility; I think all these things need to be taken into account, and therefore, I would hope that the Chair would rule for the point of order.

Mr. VENTO. Mr. Chairman, I rise to speak on the point of order.

Mr. Chairman, I think that this amendment is clearly germane. The fact is, if we take the arguments of our distinguished colleagues and add them together, we find that one committee deals with the air and one committee deals with the water, and that never the two shall mix.

The fact of the matter is that that means that under any context we could never deal with the particular issue.

So I would submit that this airborne pollutant, and that in fact produced from fossil fuel very often, from various types of sources whether they are point or non-point sources, which this legislation deals with.

The fact is, it means that all these lakes that are experiencing this heightened pH would not be able to—we cannot deal with the problem, then in essence, is what the arguments of those that have been presented would dictate to us.

So I would suggest that it is in order; that this is a very important source of pollution in these environments, and certainly deals with water quality and we cannot change that water quality unless we can deal with the physical

environment and the activities of man in that environment that are affecting it, and this is certainly one of the most important, Mr. Chairman.

The CHAIRMAN (Mr. REID). It is the ruling of the Chair that the amendment changes a law not amended in the pending bill and outside the jurisdiction of the reporting committee, and deals with the regulation of emissions not within the scope of the bill.

For that reason, the amendment is not germane.

As to the point of order under section 303(a) of the Budget Act, the amendment does raise revenues through fees on electrical energy for fiscal year 1986, to be deposited in the Treasury, and since Congress has not adopted a first budget resolution for fiscal year 1986, the Chair also sustains the point of order on that basis.

AMENDMENT OFFERED BY MR. ROBINSON

Mr. ROBINSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROBINSON: In the matter designated as "SEC. 42. GRANTS FOR REPLACEMENT OF CONTAMINATED GROUNDWATER." and inserted on page 86, after line 25, by Mr. Howard's amendments, insert after subsection (h) the following new subsection:

(i) JACKSONVILLE, ARKANSAS.—The Administrator shall make a grant under this section of $2,000,000 in each of fiscal years 1986, 1987, and 1988 to the city of Jacksonville, Arkansas, for the purpose of providing alternative water supply on a temporary basis and providing permanent remedies for water supply problems resulting from groundwater contamination.

Mr. ROBINSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. ROBINSON. Mr. Chairman, the measure we have before us, the Water Quality Renewal Act, is of great importance. And the amendment by the distinguished gentleman from New Jersey is a vital adjunct to H.R. 8. Its importance has been brought home to me in a most graphic way.

Jacksonville, AR, is my hometown. And it is in trouble. A couple of weeks ago, Jacksonville residents opened their newspapers to read headlines that revealed the possible contamination of Jacksonville's municipal water supply.

That contamination is due to trace elements of two isomers of dioxin being found in an initial water sample. Dioxin is a known carcinogen—and a safe exposure level, if there is such a thing, has not been set.

I am aware of the fact that it is unusual for dioxin to be found in water. In fact the Environmental Protection Agency has retested both the city's water supply as well as private wells to determine the extent of the problem we face in Jacksonville.

Included in the amendment of the gentleman from New Jersey is a provision providing $150 million for replacement of contaminated ground water. Up to $2 million a year per locality in the form of a grant with a $10 million cap per State is mandated.

My amendment would simply earmark funds to ensure pure drinking water for the citizens of Jacksonville. I urge my colleagues to support my amendment.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ROBINSON. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, we have examined this very important amendment on our side. It relates to a specific, very serious problem in Jacksonville, AR, and we have no objection to the amendment.

Mr. HAMMERSCHMIDT. Mr. Chairman, I rise to support the gentleman's amendment.

First, I want to commend Mrs. NANCY JOHNSON for adding the section 42, "Grants for replacement of contaminated ground water." I do know that the gentleman from Arkansas [Mr. ROBINSON] has a valid cause, that the city of Jacksonville has potential real damage done to their ground water, and I think we ought to have the authorization, as he suggests in his amendment. Therefore, we support his amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas [Mr. ROBINSON].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PURSELL

Mr. PURSELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PURSELL: Page 113, after line 13, insert the following:

SEC. 54. LIMITATION ON TOTAL APPROPRIATIONS FOR FY 1986.

Notwithstanding any other provision of this Act and any amendment made by this Act—

(1) not more than $2,606,726,000 may be appropriated for the fiscal year ending September 30, 1986;

(2) not more than $2,661,467,246 may be appropriated for the fiscal year ending September 30, 1987;

(3) not more than $2,713,365,857 may be appropriated for the fiscal year ending September 30, 1988;

(4) not more than $2,762,206,442 may be appropriated for the fiscal year ending September 30, 1989; and

(5) not more than $2,793,971,816 may be appropriated for the fiscal year ending September 30, 1990;

to carry out this Act and the Federal Water Pollution Control Act.

Mr. PURSELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. PURSELL. Mr. Chairman, on behalf of myself and Congressman PENNY from Minnesota, we are offering today a freeze amendment to take the Water Quality Renewal Act to the 1985 appropriated level.

We have had several freeze amendments to authorization bills through the House this session: Seven in total, on six of which we have had recorded votes. I am not going to take the time today to detail that overwhelming bipartisan support, Democrats and Republicans, who have been consistent in the principle of trying to achieve, through the freeze amendment process, absent a Budget Conference Report, at least $32 billion in savings in the attack on the deficit.

This Nation is looking at us each day, looking at our recorded votes. I suggest that if we take a close look at H.R. 8, the water quality bill, this bill is not only over the 1985 level, it is $2 billion above the fiscal year 1985 appropriated level.

So I suggest, on behalf of my colleagues who are supporting this amendment, that we address this issue up front and squarely today, and we will certainly ask for a recorded vote at the end of the debate.

I would like to also announce that the administration and the author of the letter which I have in my hand, Mr. Lee Thomas, have indicated that they strongly oppose H.R. 8, the Water Quality Renewal Act of 1985, unless significant changes are made.

Mr. Thomas writes:

Our most serious fiscal concerns of H.R. 8 are the excessive authorization levels which would reverse 4 years of fiscal restraint, at a time when control of the deficit continues to be one of the Nation's gravest problems.

We all understand what a veto is, and I am suggesting that our amendment is better in keeping the committee at the 1985 appropriated level than the administration's early budget requests, which are below that.

□ 1510

Our amendment does exactly that, freeze at the level of the 1985 appropriated number of $2.6 billion, and will allow, I might add, half of projected inflation costs in the out years, 1987 through 1990. The House-passed budget resolution projects inflation at 4.3 percent in fiscal year 1986, 4.2 percent in fiscal year 1987, in 1988, based on the projections of the House-passed budget resolution, 3.9 percent; in 1989 a projected inflation rate of 3.6 percent, and in 1990, an inflation rate of 3.3 percent. In the outyears, our amendment allows for an increase

equal to half of these projected rates of inflation. In summary, we are asking for a freeze in 1986 at the current, fiscal year 1985 appropriated level. Then, our amendment provides for an inflation adjustment of half the projected rate.

The House has stated its will quite clearly in the past. You might have looked at and read David Broder's column of yesterday in many papers throughout the United States, and I have a great respect for the columnist, who wrote:

> If this were a rational world, the government would end its mindless procrastination in dealing with the problems of runaway Federal deficits. Those deficits are the cancer of our economic society, and the longer they are left untreated, the more certain and painful will be the end of our current prosperity. Every diagnostic effort to look at the economic cancers leads to the recommendation that the budget deficit must be cut with whatever short-term pain by dealing with defense, domestic spending, entitlements and taxes.

Like the good doctor, Mr. Broder has correctly diagnosed the illness of our body politic. Unlike President Reagan's doctors, he cannot perform the surgery. Only this Congress can implement the cure. We are deciding today whether we have the skill and the will to save the life of our patient, America's economic recovery.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. PURSELL] has expired.

(On request of Mr. PENNY and by unanimous consent, Mr. PURSELL was allowed to proceed for 5 additional minutes.)

Mr. PURSELL. I yield to the gentleman from Minnesota [Mr. PENNY].

Mr. PENNY. I thank the gentleman for yielding.

I join my colleague from Michigan [Mr. PURSELL] in offering this freeze amendment. At a time of huge budget deficits, it seems clear to all of us here in the House that we cannot afford to spend more on any programs, regardless of how high a priority we may place on those programs. In fact, given the size of the deficit, we all recognize that some of the lower priority items, in terms of Federal programs, in fact have to be reduced.

This program has been increased in the authorization bill by $2 billion. Our House budget resolution called for a continued funding level for this program at $2.6 billion.

Again, what we are asking for is to keep the funding level for this program at a constant level. Fund this program in fiscal year 1986 at the same level that we funded it in fiscal year 1985. If we want to make serious deficit reduction here in the House, we have to keep both authorization bills and spending bills, appropriation bills, within our budget, and we have to begin with an across-the-board freeze effort in those areas.

The budget resolution does call for a freeze in funding levels for this program at $2.6 billion in fiscal year 1986. It then allows half of the rate of inflation in the outyears for this program. All we are trying to achieve by the Pursell-Penny amendment is to abide by that budget resolution, keep the funding level frozen in fiscal year 1986 and abide by the budget resolution numbers in those outyears.

Again, I join the gentleman in offering this amendment and I urge its adoption.

Mr. PURSELL. I want to congratulate the gentleman from Minnesota. There has been a bipartisan effort consistently on the floor this year. I think that in looking at the numbers of Democrats, there are at least one-third of the number on the gentleman's side of the aisle who have consistently voted to put a freeze level to the authorized and appropriation level. And, might I add, 90 percent of House Republicans, 165, have voted consistently in support of freeze amendments. If we cannot do that, if we cannot achieve just a basic freeze level this year, and this obviously will be the first big test of the House as a budget buster, we are not even going to accomplish, let alone $50 billion, the opportunity to achieve only the $32 billion in cuts a freeze provides. The test today is going to be perceived publicly. If you vote against the amendment, you're providing an opportunity to bust the budget and forget the budget resolution and all the good efforts that have gone heretofore by the Budget Committee. No single bill should stand out, regardless of the merits of the program. I serve on the Labor-HHS Subcommittee of the Committee on Appropriations. I can think of a lot of great programs for nurses and education and student aid and all of the other programs. But we have to bite the bullet, and if we can stay within the 1985 levels, we have made a major contribution toward reducing the Federal deficit and the burden it places on this Nation's taxpayers. Let's be consistent in defense and discretionary programs, and vote to freeze this bill.

Mr. PENNY. If the gentleman will further yield, did the gentleman share with the membership a few moments ago the list of authorization bills that have already been frozen by a vote here in the House?

Mr. PURSELL. Yes.

Mr. PENNY. I think it might be helpful if the gentleman would repeat that list, just to remind the Members that we are all on record, or many of us are on record, in support of those budget freezes for other authorization bills as they came before the House earlier in this year. All we are asking for today is to continue that trend. We have made a commitment to at the very least freeze authorizations at fiscal year 1985 levels, and the amendment we are offering today continues that pattern. Again the gentleman might read the list of programs.

Mr. PURSELL. I will read those very carefully. The first budget freeze amendment was to the NASA authorization, the first major authorization bill this year, which was passed on April 3, 1985, by a vote of 369 to 36, with a 4.8-percent or $376 million savings, staying at the 1985 level.

Next was the National Science Foundation authorization bill, a 6.1 percent or $98.3 million saving. That vote was 407 to 4.

Third, the National Bureau of Standards authorization bill, an 11.2 percent or $16.1 million savings, 398 to 2.

I might point out at that time, after those 2 recorded votes, the chairmen of some of the respective jurisdictional authorization committees began to offer their own amendments to reprioritize their programs to come within fiscal year 1985 appropriated levels. I credit the authorizing committees who have done that.

The State Department authorization was next, on May 9 with a 0.7 percent or $27.6 million savings, 398-to-1 vote.

Then the refugee assistance amendment, which I offered, a 10.8 percent, or $56.2 million savings.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. PURSELL] has again expired.

(By unanimous consent, Mr. PURSELL was allowed to proceed for 5 additional minutes.)

Mr. PURSELL. The Refugee Assistance Act freeze amendment vote was 278 to 112.

The defense authorization bill freeze amendment was offered by Chairman LES ASPIN, as the Members will recall, which the majority supported in the freeze movement effort, and it was a 3.3 percent, or $10 billion savings, a 301-to-115 vote, a 3-to-1 ratio on the floor—bipartisan.

Then, the foreign assistance authorization freeze was done on a voice vote, a savings of 3.2 percent, or $412.6 million in which both the gentleman from Michigan [Mr. BROOMFIELD] and the gentleman from Florida [Mr. FASCELL] offered—a freeze level in their committee and authorization bill. That passed on a voice vote just recently.

So we have had seven out of seven, and a track record of consistency. I think the House must stay at that consistent level in order to accomplish at least a $32 billion level of savings in fiscal year 1986.

Mr. PENNY. I thank the gentleman.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. PURSELL. I yield to the gentleman from Iowa.

Mr. TAUKE. Mr. Chairman, I want to commend the gentleman for his

leadership on this issue. As he has just indicated, over the past several weeks a majority of us in the House of Representatives have been able to vote for and successfully pass freezes on all of the bills, authorization bills, that have come before this body. And once again, as the gentleman points out, we are facing a moment of truth. We do have before us a bill which has a very substantial increase over current spending levels. If I understood the gentleman correctly, it is about a 77-percent increase; is that correct?

Mr. PURSELL. That is correct.

Mr. TAUKE. And that kind of increase can no doubt be justified if we look only at the needs that are out there in the country. But the problem is if we look at the needs in any given area, they far outstrip our ability to pay for the solutions to all of those problems which confront us, which means that somewhere along the line we have to prioritize and make hard judgments.

I think the gentleman is asking us to make some very hard judgments here today, but it is something we have to do now in order to be able to have the resources later to maintain current levels of funding and also to be able to continue current efforts to deal with some of these ongoing problems. If we do not deal with this budget problem now, we are not going to be able to deal with any of the other problems that this bill and others would like to address in the future.

So I commend the gentleman for his effort and I hope that a majority of the Members of the House will continue with this tough, ongoing, plodding effort to try to hold down the deficit and reduce expenditures here at the Federal level.

Mr. PURSELL. I congratulate the chairman of the 92 Group, Mr. TAUKE of Iowa, for his outstanding leadership on the budget resolution. As you know, our particular group has drafted what we call a balanced, fair program, and I think the issue here is one of fairness to all the programs, whether it be clean water, student aid, the defense budget, foreign aid, we have tried to establish a consistent principle here, and consistency is an important issue.

I would like to call it discipline. It is a sense of discipline that the House for the first time this year has got a new historical track record that the Nation is watching.

□ 1520

I call that discipline. It is tough; I know these are popular programs. I have been here 9 years; I have been a former State senator. I know it is easy to have a nice project, go out there and make a press release and have a nice conference back home that you have got a great project to help improve the quality of your community.

But when you go back to the communities today, they are talking about the deficit. They are talking about getting the House in fiscal order for this Nation. I think Congress must look above those popular programs and say let us stay within the 1985 level. Let us keep it at 1985. Let us be fair; let us have a balanced program. Go across the board and ask every single agency and every appropriation committee and every authorization committee to be fair and to discipline themselves to that fiscal year 1985.

So I ask the House today to look beyond just the popularity of a specific project and try to discipline ourselves today for a freeze amendment which will continue the program, but will give us some sense of fiscal responsibility for this Nation.

Mr. ROE. Mr. Chairman, I rise in opposition to the amendment.

Mr. ROE. Mr. Chairman, I certainly want to thank our distinguished colleagues for a very splendid presentation. I know it is sincere and from the heart.

I want to use some of the words that some of my southern friends use: "My daddy taught me." My daddy taught me one thing. He said, "More mistakes are made from lack of facts than from poor judgment."

Now, I think the House ought to know a couple of points. The administration's bill that was submitted to the Congress for consideration was a 4-year bill. This bill that we have before us is not a 4-year bill, it is a 9-year bill. It is a 9-year bill. On the basis of that, we are dealing with twice the amount of time than the administration has spoken to and as was addressed in the letter that came to Mr. MICHEL and to Speaker O'NEILL from Mr. THOMAS.

In that very same letter from Mr. THOMAS, Mr. THOMAS complimented the Public Works Committee, and I quote. He said:

> The administration is committed to reauthorization of the Federal Water Pollution Control Act at funding levels which will continue to move us towards meeting the goals and objectives of the Act. Earlier this year the administration sent to the Congress legislation proposing a 4-year, $7 billion reauthorization Act. The Committee, on Public Works and Transportation responded to the administration's funding proposals by reducing the authorized level for the Construction Grants Program from $5 billion to $3 billion.

That is in that letter.

Therefore the Public Works Committee has been extraordinarily responsive, perhaps with even tears in our eyes. The committee is very responsible as far as budget costs are concerned. The operation was a success but the patient died.

We speak of the moment of truth. We say this is a freeze we are talking about, and it is a budget-buster. It is not a freeze. This is cutting the program in half. Literally and figurally cutting the program in half. EPA has told us that; they thanked us for our help. They want to cut it further.

For the benefit of the Members, so that you know the facts, and more mistakes are made from lack of facts than from poor judgment, the administration bill was a 4-year bill and would totally phase out the grant program in a 4-year period of time—in case you did not realize that.

There was a report that has just been issued and sent here to the Congress and dated July 6, 1985, from the Comptroller General, and he speaks of the problems in a review of the program. He makes the following comment, which I would like to get into the RECORD, so the Members know what they are going vote on.

It says and I quote from this Comptroller General report of the U.S. Government:

"The Environmental Protection Agency's EPA Construction Grant Program awards local communities grants to plan, design, and build wastewater treatment facilities," and it explains that. And it says, "Between the years of 1972 and 1985 we obligated $45 billion for Federal grants."

Now here is the point. For all of you that have amendments that you wanted to add today, and did add some of them, when they talked about phased and segmentalized programs and partially completed programs all over the country, EPA and the Comptroller General make the statement that the money needed for this bill to complete the obligations that Congress spoke to is an additional $109 billion to the year 2000.

One of my dear friends made the point of view about the illness of our public body, and they made the point of view of the cancer, the economic cancer on our society. Let me tell you about Americans in this country. Every child and every man and woman and mother and father, if they were to invest their capital money in this country, they would not be sending $11 billion in foreign aid which we just voted on to every country throughout the world. Not that it is all wrong; the aid helps to build their water supplies and to correct their pollution and their sewage. I am not against feeding Ethiopians, but we are sending money to do that, and we cannot do that here.

We talk of cancer on our society. Come and walk with me and walk in my town, I will take you in an area that I do not know the answer to. We have Thorium pollution. It was not the peoples' fault; there are about 70 families living in the area. They are desparate as to what to do because it is a problem that affects their kids in the future and mutations and everything, and nobody knows the answer. That material is leaking into the water

supply that is going into our drinking water. We do not know what to do with it; we have a special program trying to solve it.

There are love canals all over this country that we are faced with. The toxic waste issue. Is water pollution and the water supply of the Nation in the same category, in your minds, as military and as education? And as food stamps? Or are we coming back and saying that man and woman kind and the human race can survive without water?

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 5 additional minutes.)

Mr. ROE. The human race cannot survive without water. A few days and it is over. Now, I do not put the quality of the water and the sustenance of the very human lives of this country into the same category as MX missiles. It is not one and the same. We are not talking about equity and balance in budget financing. We are talking fundamentally about the absolute health of the people of this country. When we speak of the economic cancer, let us speak of the cancer of the people that they are getting from this polluted water supply.

I for one in this House am fed up to the teeth of listening to this point of boondoggles and that what we are doing that is logrolling. There is not one Member in this House, Democrat or Republican alike that has not come to the Public Works Committee if you had a dam problem, a water supply problem, a pollution problem, everything you have spoken to.

I resent the sanctimonious point of view where people come to this floor and they attempt to mix up the needs of the American people, the fundamental purpose of life, and compare it with anything else we have to vote on.

I think that if we cut this bill one more penny, you are destroying the pollution control program of this country, and you are destroying the water supply of this country in every State of the Nation; all the areas we are responsible for. I would humbly suggest that every person that is here and that is listening would remember that when you vote on this issue, and we are going to ask for a vote on this issue you look at this point of view. When you go home, do not speak to the budget issue; of course you have to tell them you want to cut the deficit; of course we do. But you answer the question, when they turn that tap on and they flush that toilet and they make their food, and they produce their goods, they cannot do it without a clean, safe water supply. There is nothing in this Nation, other than the water we drink and the food we consume, that makes this country as great as it is.

So I would respectfully suggest that my colleagues join with me in the defeat of this amendment.

Mr. MORRISON of Connecticut. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the amendment. I think the gentleman from New Jersey has given a very eloquent statement about the importance of what is involved in this legislation. I do not think there are many Members of the House, if any, who would disagree with him about that importance.

□ 1410

In fact, when most authorizations come here to the floor, we can make those kinds of statements. Some of us agree more, some less, with particular bills. There are many important things to be done by this country to solve problems that we have.

We also have this budget problem, and it cannot be minimized. That $200 billion deficit is not a joke; it is also not an accident. It has been visited upon us by some very poor choices in the past. It will not be solved by continuing bad choices.

We have gone through a budget process. We have passed a budget through this House. Tomorrow we are going to consider making the budget resolution that we passed in this House the budget resolution we are going to live by for the rest of this fiscal year, if the Senate does not come forward with an agreement that we can vote on.

What does that budget say? That budget says that programs in this category are frozen for 1986; that in years 1987 and 1988 they will get a half of the cost-of-living increase.

What does it mean to ignore that? In the authorization process that we are in right now perhaps it does not mean anything. Perhaps it is just a symbol. Perhaps we can pass this bill without freezing it and somehow suggest that it is not a problem; it is a statement that we are making in favor of fighting water pollution, which we are all in favor of.

But the fact is that the money is not there in our budget to deal with this problem, unless, of course, we really do not mean what we said in the budget, unless we mean that this money that is needed to raise the expenditures $2 billion above current spending levels is somehow going to come from somewhere else, and yet each and every program, as we hear about it, is critically important.

The freeze is tough medicine. It is not perfect. The budget process sought to even out some of those bumps, to make concessions in certain areas of special need. This was not one of those areas. This area in our budget, which a large majority of this House voted for, froze the spending level for this program.

All we are doing in this amendment is putting further discipline into that process. It is every bit more important for the fact that we do not have a budget resolution, for the fact that we do not have other ways to discipline this spending. So when it comes to us on an authorization, we have a choice: The symbolism of high authorizations that we cannot fund, or the discipline of authorizations that match the budget. I think the discipline is the better route. I think it will cause us to focus on if we want more for these programs, the money will have to come from somewhere else. We have not done it in the budget for this year. Perhaps we will do it in future years if we think it is important, but let us not kid ourselves. Let us not authorize an amount of money that we have no willingness or ability to pay for, and tell the American people that there is more available to do a job. If they want more available to do this job, let them support the resources to do more, but in the budget we have today, $2 billion more than last year's level is just plain not available.

Let us speak the truth in this vote and pass the amendment.

Mr. SNYDER. Mr. Chairman, I rise in opposition to the amendment, although I must admit that it is somewhat in reluctant opposition because we all know the fiscal situation. However, I think that we have to look at this objectively.

H.R. 8 as reported by this committee and as it is before us today is quite similar to H.R. 3282, which passed the House in the last Congress by an overwhelming vote of 405 to 11. There is one major exception, and that is that our committee this year reduced the level of authorization by over $7 billion compared to the bill that passed last year 405 to 11. Four Members thus far have spoken in favor of the amendment. I must commend them on their new-found morality because they all voted for last year's bill which was $7 billion higher last year.

The gentlemen who offered the amendment are seeking to continue an effort wherein every bill that comes before the House is reduced or frozen at the level of last year's appropriation. I understand that objective but I must, frankly, say that this approach sometimes ill advisedly makes sacrosanct last year's appropriation decisions, most of which we all remember were made in the context of the continuing resolution adopted in the waning hours of the 98th Congress without much scrutiny of the policy decisions made in the appropriations initiatives.

Mr. Chairman, every time the American people are surveyed on the issues,

they rank as one of their highest priorities clean water. The gentleman from New Jersey addressed that very eloquently, the need for clean water. As Members know, the major sources of pollution of our water are threefold: One, industrial discharges; two, municipal or publicly owned treatment plants; and three, nonpoint sources.

In 1972 the Congress embarked this Nation on a program to clean up pollution from these sources. Industry has invested billions of dollars to achieve the stringent clean-up standards of the Clean Water Act. However, the progress made in clean-up of municipal pollution and nonpoint pollution has been woefully inadequate.

In the municipal area, one of the prime reasons we have not achieved the goals of the Clean Water Act has been the failure of the Federal Government to appropriate the funds necessary to meet the commitment of the Federal Government for their share of project costs. Appropriations have plummeted from a high of $7 billion to the level mentioned in the colloquy today of $2.4 billion.

Additionally, in the 1981 clean water amendments, the Federal share of the eligible projects was reduced from 75 percent to 55 percent, and in that conference we eliminated most Federal funding for other types of projects. In short, the Federal Government, primarily for fiscal reasons, has reduced its participation in the efforts to clean up our waterways and transferred that burden to the States and the localities.

What has been the result? Eight years after the compliance deadline mandated in the 1972 Act, we still have nearly one-half of our municipalities that are not in compliance.

Mr. Chairman, nonpoint sources of pollution may account for over one-half of the pollution loading of our waterways. Even though the 1972 act stated that by July 1, 1984, we would achieve the national goal of fishable and swimming waterways, we are a long way from any realistic expectation of that noble accomplishment.

So how does H.R. 8 respond to these problems? First, with a program and a plan for nonpoint source pollution cleanup; and second, with a 5-year continuation of a minimal municipal funding program and a proposal to get the Federal Government out of the program once and for all by establishing a State-managed revolving loan fund which would once and for all end Federal funding by 1994.

I would also call to the attention of my colleagues that the other body has passed S. 1128, which has very similar authorizations for the construction grant program and for the nonpoint source initiatives. I believe it extremely unwise for the House to gut the municipal and nonpoint source program.

In the last Congress, only 11 of our colleagues disagreed with that statement and the bill was $7 billion more over the 4-year period. If we are for clean water, as is the American public, I hope you will stand with the committee and oppose the anticlean water amendment offered by Messrs. PENNY and PURSELL.

While I would say to these gentlemen that I might have been inclined to support a more limited amendment to reduce authorizations in the bill, I believe this sweeping cut in these two vital programs guts the clean water program and is extremely ill-advised.

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has expired.

(By unanimous consent, Mr. SNYDER was allowed to proceed for 2 additional minutes.)

Mr. SNYDER. I say, too, to the gentlemen, if they feel so strongly about reducing the construction grant program, as I am sure they do, I would note for the next 4 years their States will receive $600 million under the program. Of course, this would eliminate the Federal share of clean water projects in their States if we pass this amendment. It would eliminate many of them all across the country. If any of the ladies and gentlemen who are going to be voting on this would like to see the list of projects from their States, we have that available.

Mr. PURSELL. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I have talked about the gentleman from Michigan, so I will yield to him.

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, I come from the great State of Michigan, and I acknowledge that we have had a number of grants over the years in the water quality bill.

Mr. SNYDER. You have some currently, I might say, in this bill.

Mr. PURSELL. Right, and I suggest the taxpayers now are concerned about the fiscal effort. You must realize that we, as a Congress, and the Treasury, are borrowing 20 percent of our revenue.

□ 1540

So how can we give the States this excessive amount compared to fiscal year 1985 and still borrow money and not be able to bring our interest rate down and not stimulate our housing industry and our auto industry?

I am suggesting that we are not gutting the bill. We are trying to stay within the budget, for fiscal year 1986 with inflation increases for the out years. That is all we are asking to do.

Mr. SNYDER. Mr. Chairman, if I might respond, I agree totally with the gentleman that our deficit and our national debt are intolerable, but I want to say to the gentleman that those things will not amount to much if in fact we do not have clean water for our people to drink, if we do not clean up the illness around the country. We have a bigger cancer rate on the Ohio River than anyplace else, and it is attributable, most people think, to polluted water. If we just want to let the water that we drink get polluted and get contaminated, and our people get sick and die, we will not be collecting many taxes, either, because there will not be any people to pay or economic development to support those taxes.

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has expired.

(On request of Mr. LEVIN of Michigan, and by unanimous consent, Mr. SNYDER was allowed to proceed for 2 additional minutes.)

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. Mr. Chairman, I appreciate the distinguished gentleman's yielding.

I have been listening to most of this debate, and I do not really understand—and I sit on an authorizing committee—how the committee expects us to vote for an authorization level that is $2 billion above an appropriation level that will be set or that has already essentially been set by action of this House and that will be reasserted hopefully within 24 hours. I do not understand it when the gentleman makes his arguments about the urgency. And I agree with the urgency. You seem to be saying what to the Appropriations Committee? To go beyond the level that will be within the budget resolution or to ask for a waiver?

Mr. SNYDER. No, no.

Mr. LEVIN of Michigan. I do not understand it.

Mr. SNYDER. Well, of course, the Appropriations Committee will set the level of expenditures year by year. This is a 9-year bill, as Chairman ROE has pointed out, and this amendment just sets a cap on the whole thing.

I think perhaps what is confusing the gentleman from Michigan is that, when you talk about the $4 billion as opposed to the $2 billion, the assumption is made there by CBO that all of the money in the bill for individual project-specific authorizations would be spent in that first year, which just is not true. It is only an assumption, an artificiality of the CBO costing procedures with respect to the calculation. The Appropriations Committee will set the binding funding levels each year during the 9 years covered by this bill.

Mr. LEVIN of Michigan. It is the gentleman's assumption that the Appropriations Committee, acting under this authorization, would come out for next year within the $2.6 billion that is set in the budget resolution?

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has again expired.

(On request of Mr. LEVIN of Michigan, and by unanimous consent, Mr. SNYDER was allowed to proceed for 2 additional minutes.)

Mr. LEVIN of Michigan. if the gentleman will yield further, I am asking these questions because I think the Members who are here and, even more so, the Members who are watching away from here, want a clear-cut answer. We are talking about clean water. We want a clear-cut answer as to how an authorization bill fits within the budget resolution, and most of us are not going to be satisfied, I think, by the answer that it is only an authorization bill. So how do you fit them together?

Mr. SNYDER. Mr. Chairman, the gentleman has asked a multiple question there.

First, let me say that the budget resolution sets caps by budget functions rather than by specific programs. For instance, many of the issues we deal with in our committee relate to transportation. This is Budget Function 400. The total in that function covers programs in many areas affecting many committees. Within the total, it is up to the Appropriations Committee to split that money between perhaps the Coast Guard over at merchant marine and other programs that we have. So first we have that difference.

Second, it is the function of the authorizing committees to receive testimony and establish what they believe to be the proper identification of the needs of the country in a specific program. It is then the function of the Appropriations Committee to set the priorities as to how and when appropriated funds will be spent. And they will continue to do that under this bill. But what the amendment proposes is to restrict the ability of the Appropriations Committee to set those priorities.

Mr. LEVIN of Michigan. Mr. Chairman, if the gentleman will yield further, I understand that. I appreciate his answer, and maybe the subcommittee chairman can make it clear. But I think we have been saying that this year is a different year than previously and after the budget resolution is hopefully passed tomorrow, we are going to know the allocations within accounts, and we want to know before we vote on authorization bills how those fit into the budget resolution. So I say to the gentleman you need to come up with a clear answer right here and now.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I yield to the subcommittee chairman and let the gentleman from New Jersey take a shot at answering the question.

Mr. ROE. Mr. Chairman, the gentleman is making a fundamental assumption that the budget is going to drive the will of the House. I have to call to the gentleman's attention the fact that the function and the operation of the House of Representatives and its respective committees must be taken into consideration, and I do not say this to the pedantic at all.

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has again expired.

(On request of Mr. LEVIN of Michigan, and by unanimous consent, Mr. SNYDER was allowed to proceed for 3 additional minutes.)

Mr. ROE. Mr. Chairman, if the gentleman will yield, the budget is not driving the authorizing committees at this time. Our job is to present to our Appropriations Committee, and they to our Budget Committee, what the overall balance is. We must remember that although the Appropriations Committee may make a determination, they still have to come back to the House to vote on the bill.

Now, what we are talking about here is the will of this committee and the will of the House. We are not quarreling at all with the Appropriations Committee. We are not quarreling with the budget process whatsoever. We are simply saying that in the judgment of the House, or at least this committee at the moment until we vote, we believe those standards and those levels of appropriations ought to be set higher. The Appropriations Committee goes through its evaluations, they hold hearings, and they either agree or disagree. They could come right to the top of that authorization.

We are caught here in a moment where we have an ersatz budget situation, a budget that is floating back and forth. No budget has been adopted. We are voting on a 9-year bill. We are not trying to abrogate appropriations. That is not our function. We are here to say to the House of Representatives that this is the need we see for our people and this is what it means for our respective States.

We are not going contrary to the budget; we are not going contrary whatsoever to appropriations, as I see the facts before us and in answer to what you are asking. Let us not forget that the Members of the House have the right to determine whether the Appropriations Committee is doing the right thing, too. They come in and vote on the appropriation bills.

Mr. LEVIN of Michigan. Mr. Chairman, if the gentleman will yield further during the rest of his time—and I hope perhaps there can be a fuller explanation after you have finished because this is a critical issue—I say to the distinguished subcommittee chairman that what we did when we voted for the budget resolution, in the judgment of the Members who voted for it, was indeed to set the parameters within which we were going to operate this year. That is No. 1. No. 2, in that sense the budget resolution is driving the rest of the process.

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has once again expired.

(On request of Mr. LEVIN of Michigan, and by unanimous consent, Mr. SNYDER was allowed to proceed for 1 additional minute.)

Mr. ROE. Mr. Chairman, I wonder if I could just interrupt the gentleman on that point, and I will ask the gentleman from Kentucky to yield.

Mr. SNYDER. Yes; I yield to the subcommittee chairman.

Mr. ROE. On the final budget resolution, if what you are saying is fact—and I know the gentleman has enormous prestige and is well-regarded—then there is no quarrel between our Speaker or between Mr. DOLE and the White House on Social Security and there is no quarrel on military. Those items are open yet. That is not what our function is here today at all.

Our function is, as the distinguished gentleman from Kentucky has said, to present to the House the needs of the Nation. We are willing to work with the Appropriations Committee and the Budget Committee, and the argument is, do we want the authorization levels to be artificially cut at this point? If they are, we cannot deal with what the will of the House is in appropriations then because we are reducing what the authorization system is about in the first place.

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. Mr. Chairman, tomorrow we are going to act on the budget resolution. I think we have different understandings of the budget process, and I think we need to air it out right here today.

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. SNYDER] has expired.

(By unanimous consent, Mr. SNYDER was allowed to proceed for 30 additional seconds.)

Mr. SNYDER. Mr. Chairman, I just want to say to the gentleman that there is nothing in this legislation that violates the budget resolution, assuming that it were enacted as we passed it here in the House, including its energy and natural resources function level. Our bill might set a different priority than that based on the assumptions that the Budget Committee made as to what money was going where, but insofar as violation is concerned, there is plenty of money in category 300 to cover the funding authorization levels in H.R. 8. There is $13.1 billion in category 300 of the

House-passed budget resolution for fiscal year 1986, and our bill does not approach that level.

□ 1550

Mr. HOWARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, we may possibly be losing our perspective here at this time. We are not talking solely about dollars, solely about deficits. We are talking here about clean water. We are talking here about the future of our country.

When I first came to this body over 20 years ago, in the Public Works Committee there was a gentleman, a Representative from the great State of Minnesota, who I feel was a great statesman. His name was John Blatnik. He was chairman of the Water Resources Subcommittee.

Back in 1965 he saw long before these great environmental movements that we were in deep trouble in this country as far as water is concerned, that we were ruining and polluting the waters of this Nation and that our future could be in jeopardy.

Water as we know is at the same time the cheapest and yet the most valuable commodity on this planet. Nothing can grow, nothing can live without it.

So that committee worked for several years and they came up with the first clean water bill in the Congress. We found that this was a problem that we could handle. Water pollution control may be one of the problems that you can solve by throwing money at it. We know where the pollution is. We know where the pollution comes from. We do not need great technical breakthroughs in many areas. All we need is the commitment and the will and if we put those funds into these projects, we will clean up the waters.

Down through those years, the late 1960's and the 1970's, we saw a slow gradual improvement in the quality of water in this country. To pollute water is very quick and very cheap. To clean it up takes a long time and is expensive, but we were working by the end of the 1970's at a rate of Federal spending of $5 billion a year to help the communities build adequate sewage treatment plants and clean up their waters; but come 1981, that was changed. We found that instead of a commitment of $5 billion a year, we could only save $2.4 billion. We cut it by more than half, cut it $2.6 billion 1 year, and the next, and the next.

People talk about the fact that we have to cut this program so that we can help the budget. Well, during all those past years when they took $2.6 billion away from this small part of the budget [bill], the deficits went up and up; so cutting water pollution control apparently is not going to solve the deficit problem. They took that money from cleaning of the water and put it into other areas of Government spending and then added more spending, because the deficits have gotten bigger, while the money for water pollution control has been cut.

And what has happened? Are we continuing to clean the waters? No. We have seen just in the last 4 or 5 years that we are starting to go downhill again.

One thing I particularly resent maybe as chairman of this committee is the idea that when people get up and talk about these programs and this legislation, they talk about Members going home and talking about their projects and we get the scent of pork barrel once again, as though everything that comes out of this committee is something that is not needed, just a waste of time.

Well, I will say it is a lot more serious than that across this country in the small towns and in the great cities. We have a situation today with New York City, maybe we are aware of it. It needs water pollution control. It needs an adequate system that is being built that will not be built in time if we pass this amendment. There are 220 million gallons of raw sewage a day being pumped out into the Hudson River going down and polluting the communities downstream.

Fixing that problem, building this plant, that sort of pork barrel, something that should not be done, a waste that is very, very important to the people in that area that it go forward.

It was mentioned by one of the sponsors of the bill that we have a debt that we owe to our citizens back home on this deficit. We have a debt to our people today, but we also in this Congress have a debt to our citizens of the future. Are we going to say that we are going to let this go downhill? We will let the pollution increase and tell our children and grandchildren that we are going to do that because we are a little selfish. We are going to save a couple of bucks and you will have the big problem after we are gone. I do not think we can do that.

The real vote here today is whether we are going to keep a commitment to help the States and local communities clean up this environment.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. HOWARD] has expired.

(By unanimous consent, Mr. HOWARD was allowed to proceed for an additional 2 minutes.)

Mr. HOWARD. Mr. Chairman, I have asked for 2 additional minutes because I want to yield to the gentleman from Massachusetts.

That is the vote right here. Even if we defeat this amendment, we are still way, way below where we were in the 1970's. We have taken our cuts. We have taken more than our share and it has not brought us a balanced budget. This amendment will not do it. All it will do is put us and the future into a deeper hole, so I hope we will defeat the amendment.

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Massacusetts.

Mr. FRANK. Mr. Chairman, I thank the gentleman. I want to congratulate him on the great work he has been doing here.

I want to express my hope that the amendment will be defeated. This is an example of mindlessness. The freeze applies to the starved and to the bloated alike. You take areas of the budget that have been pampered and upon which billions of excess dollars have been lavished for years and you take areas such as this that have already been cut below what they should have been and then you say, now we are going to freeze you equally. We are going to freeze you at this level. We are going to freeze you at the low level.

It is an abdication of legislative judgment and when people congratulate themselves for the courageous action they are taking, we are told to vote for the courageous freeze, maybe it is courageous to check your brain at the door and treat everything alike and ignore past history about what has been overspent and what has been underspent. I do not think it is.

In addition, I would say the gentleman makes a good point about the municipalities. There are municipalities that are under legal obligation to clean up their waters. What you do here is you do not save taxpayers' money. You shift it. Some local taxpayers will get hurt. They will still be under that legal obligation. You will be in a situation of taking back with one hand while you insist with the other.

Federal mandates will say to go ahead and clean it up and spend the money, but we will take the money back.

Finally, we are told we are borrowing too much. There are areas where borrowing is inappropriate, but if we were a private business, all this would be borrowed because we are talking now about important capital projects. We do not use these up in 1 year. It is good fiscal planning to look at these kind of long-term projects that are going to make a continuing contribution to economic development, to health and to safety, and to deal with them on a somewhat streched-out basis.

We are not talking here about a group that is going to be consumed.

So I congratulate the good work the committee has done and I hope the amendment is defeated.

Mrs. BENTLEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, today I rise in opposition to the Pursell-Penny amendment. I wish to express my support of the passage of H.R. 8, the Water Quality Renewal Act of 1985, or better known as the Clean Water Act. With enactment of the Clean Water Act funding for various clean water programs and revision of regulatory requirements will be reauthorized.

In September 1985, the $2.4 billion a year Construction Grant Program to build municipal sewage treatment plants will expire. Maintenance and new construction of water treatment plants of our Nation directly affects every Member of this Congress, as has been pointed out by our distinguished chairman and subcommittee chairman today. Enactment of H.R. 8 will provide reauthorization of construction grants to maintain and construct our waste water treatment plants.

The Clean Water Act is needed to help achieve control of pollutants that invade our Nation's water supply. In my home State of Maryland, the Chesapeake Bay plays a vital role in our State's economy. Many of our industries are directly affected by the condition of the Chesapeake Bay, as are those in Virginia, Delaware, and Pennsylvania.

In H.R. 8, provisions are indicated to significantly assist controlling nonpoint source pollution. Fifty percent of the water pollution of the upper Chesapeake Bay results from land runoff pollutants. Enactment of H.R. 8 at the current funding levels will provide an increase in participation by local governments and regional organizations in controlling water pollution.

I might point out here, Mr. Chairman, that the State of Maryland has enacted legislation establishing a critical areas commission, so that it will do its role in keeping that water clean there and they will now control everything that is built within 1,000 feet of the shore; so Maryland is doing its share. The other States are joining in and I say now is the time for this Congress to act to ensure that our Nation's waters are made safe from pollutants. Support of the Clean Water Act at this time is cost effective and environmentally sound.

Mr. Chairman, I urge my colleagues to support the position of the Public Works Committee and vote "no" on this amendment.

□ 1600

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the issue here has been raised as one of budget deficit cutting and responsibility toward the large issue of budget deficits, and that, the proponents and offerers of this amendment argue, is the justification for making further reductions.

First point: The Public Works and Transportation Committee was directed by the budget resolution to make reductions of $600 million in its functional category, and that $600 million reduction in budget authority was made. We have complied with the budget resolution that passed this body, and that Members voted for.

But let us go back a few steps in time. Some of the speakers earlier did not have the institutional memory because some of them were not even here when the budget resolution of 1981 and the Reconciliation Act were adopted. In that year, the Public Works and Transportation Committee agreed to a better than 50 percent reduction in the commitment that the Congress and the country would make to the cleanup of the Nation's wastewater discharges. We reduced the authorization for construction grants that was included in the 1972 and 1977 act amendments from $5 billion to $2.4 billion. We further went back and adjusted even the estimates on need from $128 billion to clean up the Nation's wastewater discharges down to $24 billion that the Federal Government would commit to clean up the Nation's wastewater discharges.

This committee has made enormous reductions, to the bare bones of the kind of effort that is needed to keep pace with cleaning up our lakes and streams, an effort that has been tremendously successful.

When the cities of Minneapolis and St. Paul discharge raw sewage into the Mississippi River, it affects the city of Winona which is a downstream user of that water, as it does Dubuque. I see the gentleman from Iowa is interested. And if those cities have an interest in clean water, it is in seeing that this problem is actually funded so that other upstream users of waters and dischargers will clean up their wastes. As the gentleman from New Jersey [Mr. HOWARD] said a moment ago, New York discharging into the Hudson River raw sewage of 220 million gallons daily affects the shores of New Jersey and the people who live along those waters.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I am glad to yield to the gentleman from Minnesota.

Mr. VENTO. I want to commend the gentleman for his statement. I think he is providing some help for Members in terms of the budget issue, and especially, of course, he mentions St. Paul and Minneapolis. We are in the midst of trying to address the problem of storm and sanitary overflows. In dealing with that effectively, I think we see material progress.

But if the aggregate amounts in this bill are not authorized and subsequently appropriated, it means the States will not be able to help with that particular program, and that burden will fall almost exclusively on the residents of our area without any help from the State; and I think we need it. I think there is a broad public benefit in this.

Furthermore, I would like to point out to the gentleman we have made this progress. The gentleman from the 8th District in Minnesota I know can point with pride to the work he has done in this particular bill, and I want to commend him because he carries on that heritage we spoke of a little earlier, and our chairman did of Mr. Blatnik, and, of course, that is the district that my colleague in the 8th District represents, and the work that has been done in the Great Lakes, and the improvements in Lake Erie. All of this has been done and demonstrates the feasibility of the types of dollars we are talking about here in terms of providing clean water in our environment.

I think what the problem with this budget issue is, is not that we do not have a budget resolution, but we have all of a sudden 12 experts with different criteria for what constitutes the budget of the House. One has a 13-inch ruler, one has an 11-inch ruler, and they all have different standards, and by the time we get done we do not have any program, because that is the problem with not having a budget resolution. Everyone has their own standards and everyone has their own criteria, and the process to throwing out of any type of coherent policymaking that this Public Works and Transportation Committee wants to do with regard to clean water.

The CHAIRMAN. The time of the gentleman from Missesota [Mr. OBERSTAR] has expired.

(On request of Mr. VENTO and by unanimous consent, the gentleman from Minnesota, Mr. OBERSTAR, was allowed to proceed for 2 additional mintues.)

Mr. VENTO. I thank the gentleman for yielding and I appreciate his comments.

Mr. OBERSTAR. I thank the gentleman for his contribution and for his kind words, and for pinpointing the key issue here, and that is that cleanup progress has been made in our interstate rivers and interstate bodies of water such as the Great Lakes. And that is the focus of this and the whole point of this program to begin with, is to clean up the environment, and we have succeeded.

But if you cut further than in the judgment of the committee is wise and responsible to cut, you will not make that progress and will reverse the success of the last several years.

Remember the Cuyahoga River no longer catches on fire because we have cleaned up the discharges into the Cuyahoga River through this program

of pollution abatement. There were no fish a few years ago in Lake Erie, and now fishing has returned as a major recreational, sport, and commercial activity.

In the St. Louis River in northern Minnesota, there were no fish until we had the cleanup program on the St. Louis River discharging into Lake Superior, and now people are catching very sensitive fish in clean water, and that is the walleyed pike. We have similar success stories all across the United States.

But if accepted the amendment that was offered by the gentleman from Minnesota and the gentleman from Michigan, you will eliminate, you will severely cut back on the construction grants and you will severely affect the Revolving Loan Fund Program established, and you will severely reduce the nonpoint source control program. You will severely affect the nonpoint areawide planning program that sets up means of dealing with pollution abatement, the ground water contamination water program and the very expensive operating of the Clean Water Act, and the support that we give to the State governments to administer this program in a cooperative fashion with the Federal Government.

The CHAIRMAN. The time of the gentleman from Minnesota [Mr. OBERSTAR] has again expired.

(By unanimous consent, the gentleman from Minnesota, Mr. OBERSTAR, was allowed to proceed for 1 additional minute.)

Mr. OBERSTAR. In sum, this legislation is not an entitlement program. By providing the approval of the authorization in this legislation, we are not mandating and committing Congress irrevocably to a certain level of funding. The appropriations process can and will adjust to these numbers to suit the budget process.

But I want to make it very clear that this committee has done what it was directed to do in the budget process. It has made the cuts. We made them this year. We made them 5 years ago, and we have faithfully complied with this process.

The bill we present to you today is a responsible, cautious, conservative, I believe too conservative, approach to the funding needed to make progress and continued progress on the clean water program of the United States.

Mr. TAUKE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the members of the committee who have presented this bill have indeed done a wonderful job over the last several years in attempting to develop good policy in the water pollution control area. And certainly they have done an outstanding job today in making the case for expenditures of money in this area.

But I ask my colleagues to not lose sight of the fact that the recommendation from this committee is that we increase expenditures in fiscal year 1985 to fiscal year 1986 from $2.5 billion to $4.6 billion. Let me repeat that: We are currently spending $2.6 billion, and the figure authorized in this bill for the next fiscal year is $4.6 billion. That is a 77-percent increase.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. I will be happy to yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, that simply is factually not correct, sir. It just simply is factually not correct.

The budget level this year is $2.4 billion. We are asking for in an authorization, which is part of this 9-year bill, yet to be dealt with by the Appropriations Committee, and yes, we are asking for $3 billion this year. We know we are not going to get that full $3 billion.

But anybody who tells you this is a 77-percent increase is totally, absolutely, unequivocably wrong. It is not the fact, and that bulletin that is floating around here is not factual, sir. It is not factual. We wrote the bill and we know that it is not factual.

Mr. TAUKE. Let me accept the gentleman's figure then for the time being. We will not quibble about the figures. It still is a substantial increase over current levels of funding.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. TAUKE. Yes, I yield to the gentleman from New Jersey.

Mr. ROE. It is not substantial, we are not asking for that. The level of authorization and appropriation this year in fiscal year 1985 is $2.4 billion. We are simply holding that line. We are not quarreling with it. We reduced the committee's bill that the people voted on 405 to 11 in this House here last year, almost every Member.

Mr. TAUKE. Is the gentleman suggesting that this bill in essence maintains freeze and authorizes for fiscal year 1985 the same amount we spent in fiscal year 1985?

Mr. ROE. This bill does not do that. This bill comes back and says to the people of this House what to vote on. If the gentleman will yield further, in our judgment, we think this is the level it should be. We are an authorizing committee. Those are the needs of America in the authorization, and if the budget process decides differently, we have to, of course, be guided by that.

□ 1610

But anybody who says we are doubling the figures is absolutely, totally incorrect. We have cut the bill from last year, supported by 411 votes, we cut it down in half.

Mr. TAUKE. I thank the gentleman for his comments but I think what we are doing is comparing apples and oranges.

The gentleman wants to talk in relationship to the bill we approved last year rather than talk in relationship to the measure or to the current levels of spending.

Last year's bill was a 4-year authorization bill but we are not talking about comparing with last year's authorization bill. We are talking about comparing with current levels of spending. Now the gentleman and others have said that this program is more important than all of the others. I sit on the Committee on Education and Labor and on the Committees on Energy and Commerce and we have everybody coming before our committees telling us about how health care is more important and we would not want to shortchange the health of the American people, about how child care is more important, how education is more important, how food stamps are more important and ADC. When we come to the floor, we hear about a variety of other programs all of which are critical to the health, welfare, and well-being of the American people. The problem is if we continue as the gentleman from New Jersey wants us to do, to base our authorization bills on what we need, rather than on the basis of what we can afford, we are going to continue to overspend. And I suggest that the authorization committees have more responsibility than to just come to the floor with statements of what we need. The authorization committees have a responsbility to come to the floor with the best programs that can be fashioned within the limits of the budget resolution.

Putting it another way, they have a reponsibility to come to the floor with the best budgets or the best programs that can be fashioned within the limits of what we can afford.

The CHAIRMAN. The time of the gentleman from Iowa [Mr. TAUKE] has expired.

(By unanimous consent, Mr. TAUKE was allowed to proceed for 1 additional minute.)

Mr. TAUKE. Mr. Chairman, coming to the floor with statements of need is a contribution to the problem that we have in the Nation of huge economic difficulties. Coming to the floor with programs that deal with the need and the best way possible within the limits of our resources are really making a contribution to strong public policy.

The gentleman knows, as I do, that within a few hours we are going to be adopting formally some kind of limitation on the expenditures in this area which will be substantially below, without arguing about the figures, substantially below what is authorized in this bill. And while I think he had done a remarkable job defending the programs, the fact is we need to look

at this in the context of all other programs and in the context of what we can afford.

On that basis it seems to me that we are compelled if we are responsive legislators looking at all the needs of the Nation to hold the line on this program for 1 year as we hold the line on all other programs.

We are not asking for cuts in current levels of spending, we are saying do not increase levels of spending.

Mr. EDGAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to my chairman.

Mr. ROE. Mr. Chairman, I thank the gentleman from Pennsylvania most profoundly for yielding to me because I know I have had my chance. I think we have had an opportunity to express our views both strongly and emotionally. I want to make a point clear: I have been in this House 17 years, 17 years. I never expected to stay that long, 17 years.

I do not ever come to the floor of the House to defend anything; I come to the floor of the House with what I believe in, never to defend. I am not defending this program, not at all. But I would like to call your attention to something: This Congress is going to be spending $1⅓ trillion, $1⅓ trillion in the next 3 years. So do not talk to me about budget balances—$1⅓ trillion to bury the MX, to put them on shelves, to do whatever. We are not in confrontation with that situation as far as the budget is concerned. It is in a situation that can wait. Come to the rivers and the harbors.You listened to the distinguished minority leader of the Committee on Appropriations. He came to us and he brought a great program and we applauded it from both sides. We talked about acid rain. Everybody said it is a great idea but somebody is going to have to pay for it.

We are not comparing this with education, we are not comparing it with transportation. We are saying fundamentally and basically in this country "Don't you understand that you cannot supply your family with water, with anything that has water in it unless you have the water supply to deal with?" Do we have to have to say to everybody that the raw dung—and I can use that word because it is in the dictionary and not meant to be profanity—is floating down river after river. Go to the beaches along our coast, go to our lakes; they are so fouled that people cannot even enjoy them.

You would dare compare $2.4 billion a year for all of the pullution control in this country and one MX missile which costs $3 billion. Try to explain that to the people of this country when we are talking about priorities and what is needed for the sustenance of the human beings of this Nation.

Mr. EDGAR. I would like to associate myself with the remarks of the gentleman from New Jersey [Mr. ROE].

Mr. Chairman, I think the issue is the question of what is needed. The gentleman and others have suggested that we have got fiscal constraints and the gentleman from Pennsylvania works very hard to focus attention on those fiscal constraints as they relate to infrastructure improvements, to water policy, trying to target the limited dollars that we have to the specific needs that we have in a variety of areas. I think this bill meets the test where it sets out for the next several years authorization levels to clean up our water. The question has been raised: Can we afford it? I think the question has to be raised: Can we afford not to have a commitment to cleaning those waters up in a positive way?

What we have tried to do is stay within categories of the budget. We held the line on the nonpoint source pollution provisions, we held the line on some other programs such as the acid rain issue that this gentleman from Pennsylvania would like to have seen expanded. But in no way do we think this bill has come to the floor trying to break the budget.

In fact, what we tried to do is lay out what the need is to move into the second phase of cleaning up the waters and streams of our Nation is a very fiscally conservative environmental environment.

Now I would like to say one other thing before I yield to the gentleman and that is that emotions are flying high on numbers. As I see the process, the budgetary process, the appropriations process and the authorizing process, it is our responsibility as an authorizing committee to lay out what the need is, to meet the needs of the society. The gentleman has an important disagreement with our numbers, but I think that fight is more appropriately made with the Budget Committee, with the Committee on Appropriations. And if they ask us to fall within particular number levels, we will set those priorities. We will work on those priorities.

The CHAIRMAN. The time of the gentleman from Pennsylvania [Mr. EDGAR] has expired.

(By unanimous consent, Mr. EDGAR was allowed to proceed for 2 additional minutes.)

Mr. EDGAR. If that pressure comes to us, as it has, we are fully capable of moving toward reductions and perhaps those reductions will come in other categories of our budget jurisdiction as opposed to the category that is so important to us, and that is cleaning up our waterways.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Iowa [Mr. TAUKE].

Mr. TAUKE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I will not rehash our differences of viewpoint about philosophy and what authorization committees should do. But the question has arisen about the numbers and what authorization levels this bill provides for, for fiscal year 1986.

The gentleman from New Jersey indicated that it was substantially below $4.6 billion and suggested that it was, in fact, $3 billion.

Mr. Chairman, let me point out that in the committee report on page 55, the Congressional Budget Office cost estimate says that the estimated cost authorization level for this bill for fiscal year 1986 is $4.6 billion. That is the figure that I relied upon.

□ 1620

Mrs. JOHNSON. Will the gentleman yield?

Mr. EDGAR. I yield to the gentlewoman.

Mrs. JOHNSON. Mr. Chairman, I think this is a very important point, and I think this is where there is so much misunderstanding on the floor of the House now and in the preceding half an hour.

We do all have a responsibility to the deficit reduction effort that we must make; we are concerned with fiscal constraints within which we must operate, but it is important for the Members as they proceed toward this vote to understand exactly what spending this does commit us to.

There is a discrepancy between the CBO figure just quoted and the $3 billion amount that this commits us to in 1986. The source of the discrepancy is quite simple. It is that CBO includes in its 1986 budget estimate the cost of all special grants and projects as if they were being spent in 1986 when in reality all of those grants and projects will be spent over the 9-year life of the bill and we know from experience that some of those will not be spent at all.

(By unanimous consent, Mr. EDGAR was allowed to proceed for 1 additional minute.)

Mr. EDGAR. I yield to the gentlewoman.

Mrs. JOHNSON. What we are committed to spending in the next year, in 1986, is $3 billion. The committee arrived at that number by making cuts from last year's bill of $1 billion in the Sewer Construction Grants Program, reducing it from $3.4 billion to $2.4 billion, a level at which it has been now since 1981, and reducing the State revolving fund from $1.6 billion to $6 million, which brings us—because it is that fund that eventually is going to

get the Federal Government out of this business altogether.

So, had we progressed toward that goal more rationally, we would more quickly achieve our deficit reduction goal.

Mr. EDGAR. I thank the gentlewoman for her comments.

Mr. GALLO. Mr. Chairman, I move to strike the last two words.

I yield to the gentlewoman from Connecticut.

Mrs. JOHNSON. I thank the gentleman for yielding.

Mr. Chairman, so what we have here really is a history of spending in this function of the budget that if you look back to 1981, involved the Congress, led by the Public Works Committee, more than having the program to achieve the goals of the Clean Water Act in this Nation in 1981.

Cutting that program by more than half, then level-funding that program every year until this year and now proposing an increase of about 20 to 25 percent.

Now that is what the Members must determine when they support this bill; whether we can make a small increase due to the enormity of the problem and the changes in that problem that have surfaced in recent years, whether we will deal with ground water contamination which we see now contaminating major drinking water aquifers, whether we will begin to address nonpoint-source pollution, whether we will take some of the steps that indeed our future depends upon.

Do not mistake the lumping of the special grants funding, which will be spent out over 9 years for an 1986 expenditure even though CBO does make that misleading statement.

Mr. PURSELL. Will the gentleman yield?

Mr. GALLO. I yield to the gentleman.

Mr. PURSELL. I would like to comment with respect to the gentlewoman from Connecticut's analysis here. The House Budget Committee budget authority is $2.6 billion, period, in this program.

The House bill budget authority that is recommended by the committee is $4.6 billion. So it is obviously a $2 billion, pure and simple, increase in 1986 over 1985.

Now they have been using authorization figures, and they have been using budget outlay numbers, but we are trying to compare apples to apples. OMB and CBO agree on this issue; there is no disagreement between the Office of Management and Budget and the Congressional Budget Committee; and that in itself is unique.

So I suggest we had better be very careful here, but this bill is over the authorized level; it is over appropriation level for 1985, and that is where the amendment stands.

Mr. GALLO. Mr. Chairman, I understand where the gentleman is coming from as far as the amendment itself and the rationale in trying to react to the significant deficit we have, but I think there is more to this whole bill and this whole discussion that should take place.

I remember the commitments as a former local official. The commitments that were made by the Federal Government in dealing with our Clean Water Act as to the grant procedure and the amount of money that would be available to the municipalities.

That never came about. It started off very nicely, and then all of a sudden we lost a lot of that grant money, back to the point where it went to 50 percent.

So in a sense, in 1988 when this Clean Water Act becomes where municipalities have to come about and meet all the criteria, they are going to have a difficult time, and it is not going to be any better if in fact we do not recognize here in Congress the need for additional funds in an area not only to protect our water, but also the environment that surrounds the municipalities that we are so concerned about.

When we talk about the dollars, and I do not mean to minimize the significance of what the amendment says, but when we want to talk about the growth, the future growth of this country and what that means to us, means to the Federal Government in additional revenues, then I think you have to look beyond that investment that you are making today.

Frankly, I have 134 towns in the State of New Jersey right now that are on building ban, based on the fact that they have not been able to comply with the clean water standards because of lack of money—not because of lack of willingness; or the want to clean the environment—but because the dollars are not there.

I think it is short-sighted if in fact we go along with this amendment, because even with the amount of money we are talking about, as Chairman ROE has indicated and Chairman HOWARD, the amount that is needed is so tremendous for us to get moving, we have got to start someplace.

This is a 9-year commitment; one that is needed; it is needed by the States, it is needed by the municipalities, and I certainly support it and hope everyone else supports it.

Mr. CARPER. Mr. Chairman, I rise in support of the Penny-Pursell amendment this afternoon.

Mr. Chairman, this is a difficult step for me; it is difficult for several reasons. First of all, because of the great respect for which I hold the chairman of the subcommittee, Mr. ROE, my understanding of the deep feeling that he has for this issue.

It is also a difficult step for me because water pollution, in my State of Delaware, is a serious problem just as it is in the State of almost everyone who is represented here today.

We have sludge in the oceans off of the Atlantic shore; we have groundwater contamination, as many of you do in your districts; we have inland bays that have been polluted, and we have groundwater; we have lakes; we have streams that are polluted as well; not as badly as they used to be before we adopted the Clean Water Act, but they are still a serious concern.

I think the issue today is not whether or not we are committed to a clean environment; it is not whether or not we are committed to clean air and clean water and clean oceans.

As I have listened to this debate over the last hour, the people who have spoken for and against this amendment are people who for the most part I think have some of the best environmental records in the House. These are people who are concerned about the environment.

The issue here today is not whether or not we have passed a budget resolution and how that budget resolution provides funding for this particular area; the issue today is not whether or not we should spend more money for cleaner water; I think all of us can easily agree we could easily spend a great deal more.

I think the basic question that we have to face today is whether we can afford to spend more money for literally anything—whether it is clean water, whether it is MX missiles, or whether it is programs for education, or you name it.

In a few minutes, I will be walking off of the House floor. I will be going off to speak and to meet with postal workers from my State. Those postal workers are going to be saying to me that they would like not less money next year; they would like more money from the Federal Government.

Last week I met with educators from my State; they did not ask for less money for education programs from the Federal Government; they wanted more.

I have met with senior citizens in the last week; they sought not less money for their programs, but more.

I have talked in the past week with military officials who wanted not less pay, not the same pay; they wanted more, and they wanted new aircraft, they wanted new ships; they wanted new chemical weapons.

Finally, I have talked with local officials in my State, and they do not want a freeze or a cut in revenue sharing, they would like more.

Let me go back to one comment that was made by an earlier speaker who said that if we want clean water, we can throw money at the problem; and in this case we actually do end up with cleaner water.

□ 1630

I suspect in this case that is probably true. The unfortunate thing is, Mr. Chairman, we do not have any more money to throw at this problem or any other problem. We do not have more money. That is a hard truth.

Again I want to commend the chairman of the subcommittee, I want to commend the committee. I know you have worked hard, you have endeavored to bring us a good bill, and I think you have. I must reluctantly support this amendment.

I yield to the gentleman from Minnesota [Mr. PENNY] for any comments he might have.

Mr. PENNY. I thank the gentleman for yielding.

I simply want to stress that this amendment could be called the truth-in-budgeting amendment. The budget resolution that we are attempting to abide by here in the House provides for a $2.6 billion funding level for this program in the coming year. That is going to bind the Appropriations Committee to spend only $2.6 billion on this program in the coming year, and we ought to be honest at the outset, upfront, with this authorization bill, and put in this bill that same $2.6 billion funding level. Let us freeze this budget, let us be consistent on the freeze resolution.

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. CARPER. I yield to the gentleman from Washington.

Mr. CHANDLER. I thank the gentleman for yielding, and I want to compliment him for his articulate comments.

Mr. Chairman, I represent the State of Washington. The chairman of the committee has been a real gentleman to me and to Members of our delegation in trying to help us. It is a sad day when we have to choose between priorities that we as Members look at and try to feel in our hearts which are the most important. I had to come down on the side of fiscal responsibility in this case. I look at the trade imbalance that is crippling our State, at the interest rates, at the value of the dollar, at the likelihood of the return of inflation if we do not get this fiscal situation under control. As high a priority as this is for people who live in the most beautiful part of the world, I have to say that we have simply got to freeze spending entirely. You all remember the impassioned plea that the gentleman from Florida [Mr. NELSON] made.

The CHAIRMAN. The time of the gentleman from Delaware [Mr. CARPER] has expired.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. PURSELL].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PURSELL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 207, noes 219, not voting 7, as follows:

[Roll No. 249]

NOT VOTING—7

Downey	Lantos	Wright
Hefner	Martinez	
Hubbard	Schneider	

□ 1650

The Clerk announced the following pair:

On this vote:

Mrs. Schneider for, with Mr. Lantos against.

Messrs. DAVIS, ROSE, SAXTON, GRAY of Pennsylvania, HORTON, GILMAN, and HUNTER changed their votes from "aye" to "no."

Messrs. WYDEN, BRYANT, and HERTEL of Michigan changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. OBERSTAR

Mr. OBERSTAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBERSTAR: Page 86, after line 25, insert the following:

SEC. 40. DEMONSTRATION PROGRAM ON ACIDIFIED LAKES.

(a) RESTORATION OF BIOLOGICAL INTEGRITY.—The Administrator, in conjunction with the United States Fish and Wildlife Service and the environmental agencies of the States, shall carry out a demonstration program to restore the biological integrity of acidified lakes and watersheds through liming. The Administrator, in coordination with the environmental agencies of the States, shall select sites to carry out such program which will enable the Administrator to demonstrate and determine the effectiveness of liming in reducing the acidity of lakes and watersheds and in restoring the biological integrity of acidified lakes and watersheds.

(b) REPORT.—Not later than 90 days after completion of the demonstration program and not later than three and six years after completion of the program, the Administrator shall submit to the appropriate Committees of Congress reports on the results of the demonstration program carried out under this section. Such reports shall include, but not be limited to, an analysis of the effectiveness of liming in reducing the acidity of lakes and watersheds and in restoring the biological integrity of acidified lakes and watersheds in the long-term and the short-term.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $10,000,000 for fiscal years beginning after September 30, 1985, to remain available until expended.

Mr. OBERSTAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. OBERSTAR. Mr. Chairman, the amendment would establish a demonstration program to be administered by the Environmental Protection Agency on the feasibility of cleaning up lakes that have been damaged by acid rain.

Acidified lakes, particularly those in the northern tier area that are highly vulnerable to acid depositions, the so-called glaciated lakes, are among those that are the most sensitive in the Nation's inventory of lakes that have been very severely affected by acid deposition.

This program would allow the Environmental Protection Agency for a period of time to demonstrate techniques for the cleanup of such lakes and see whether it is possible to restore them to their prior state of cleanliness.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I would be glad to yield to the gentleman from New Jersey.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, the committee on this side has reviewed the gentleman's very good amendment. We have no objection and we think it is an addition to the bill and we accept the amendment.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the ranking minority member, the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, we are prepared to accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. OBERSTAR].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. OBERSTAR

Mr. OBERSTAR. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Amendment offered by Mr. OBERSTAR: Page 71, after line 3, insert the following:

"(e) ACIDITY MITIGATION PROGRAM.—

"(1) STATE SURVEYS AND PLANS.—Any State may prepare, and submit to the Administrator for his approval—

"(A) a survey of surface waters in such State in which water quality has deteriorated as a result of high acidity that may reasonably be due to acid deposition or acid mine drainage, and

"(B) methods and procedures that may be applied to mitigate the harmful effects of such acidity on such waters.

"(2) DESCRIPTION OF CERTAIN ELIGIBLE METHODS.—Methods which the Secretary may approve under this subsection may include, but are not limited to—

"(A) innovative methods of neutralizing and restoring buffering capacity of surface water, such as through the use of alkaline substances, that have become so acidic as to endanger game fish species, and

"(B) methods of removing from surface water toxic metals and other toxic substances mobilized by high acidity.

"(3) GRANTS.—The Administrator, in consultation with the Secretary of the Interior, shall make grants to States to carry out methods and procedures approved by the Administrator under this subsection.

"(4) FEDERAL SHARE.—The amount granted under this subsection to any State for any fiscal year shall not exceed 80 percent of the funds expended by such State in such year for carrying out approved methods and procedures under this subsection.

"(5) DISTRIBUTION OF FUNDS.—The Administrator shall provide for an equitable distribution of sums appropriated under this subsection among States with approved methods and procedures. Such distribution shall be based on the relative need of each such State for the mitigation of the harmful effects on surface waters of high acidity that may reasonably be due to acid deposition or acid mine drainage. The amount of any grant to a State under this subsection shall be in addition to, and not in lieu of, any other Federal financial assistance.

"(6) MONITORING AND ANNUAL REPORTS.—The Administrator and the Secretary of the Interior shall monitor and assess the effectiveness of the methods and procedures utilized by the States under this subsection and shall submit a report on such monitoring and assessment annually to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

"(7) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection $25,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Amounts appropriated under this subsection shall remain available until expended.".

Page 71, line 4, strike out "(e)" and insert in lieu thereof "(f)".

Page 74, line 13, strike out "and (d)" and insert in lieu thereof ", (d), and (e)".

Page 74, line 14, after "Act" insert "and under section 36 of this Act, relating to maintenance of water quality in estuaries,".

Mr. OBERSTAR (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. OBERSTAR. Mr. Chairman, this amendment is in concert with the previous amendment just adopted by the Committee. It would provide funding to States to establish surveys of their intrastate waters, surface waters, within their State to determine their condition of acidity, whether due to acid deposition of mine drainage to enable such States to set up programs for acid rain cleanup.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the chairman of the subcommittee, the gentleman from New Jersey.

Mr. ROE. I thank the gentleman for yielding.

Mr. Chairman, this is a very fine amendment and it is really a technical amendment and we appreciate it. We accept the amendment.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, we accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. OBERSTAR].

The amendment was agreed to.

□ 1700

Mr. SOLOMON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, earlier this afternoon the Committee of the Whole passed a committee amendment establishing a badly needed grants program to provide for the first time aid to localities where ground water supplies have been polluted. The same amendment was added to the Clean Water Act amendments in the House bill last year, but it was never passed, as we all know.

One of the most seriously affected municipality in the country was, and

still is, the town of Moreau in a rural area of New York State. This was one of the top priorities of need communities, according to the debate last year. At this point, Mr. Chairman, I would like to ask the chairman of the subcommittee, the gentleman from New Jersey [Mr. ROE], if he would engage in a brief colloquy.

Mr. ROE. Yes, of course, if the gentleman will yield.

Mr. SOLOMON. Mr. Chairman, am I correct in my understanding that, as our discussion last year showed, a new water district for the town of Moreau is considered a top priority of the committee and would be eligible for full funding of up to $2 million under the terms of the Johnson legislation, as incorporated in your amendment this year?

Mr. ROE. Mr. Chairman, if the gentleman will yield, I think the gentleman has exactly articulated the entire issue involved. There is no question that under the Johnson language in the legislation the town of Moreau should receive top priority.

Mr. SOLOMON. Mr. Chairman, I thank the gentleman, and again I would like to commend the gentlewoman from Connecticut [Mrs. JOHNSON] and the other members of the committee for developing this workable approach to the problem of ground water contamination, and on behalf of all the people in this country I want to commend Chairman ROE for the outstanding job he has done on this subcommittee.

AMENDMENT OFFERED BY MR. MOODY

Mr. MOODY. Mr. Chairman, I offer an amendment, and I ask unamimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The text of the amendment is as follows:

Amendment offered by Mr. MOODY: In the matter inserted on page 80 after line 14 by Mr. Howard's amendment, insert at the end of subparagraph (B) the following:

A permit issued under this section may cover one or more than one municipal separate storm sewer.

Mr. MOODY. Mr. Chairman, this is a brief technical amendment to make clear the intent of a section of the Howard amendments to the committee amendment that were adopted earlier regarding the nonexemption of urban areas from requiring a permit for stormwater overflow.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. MOODY. I yield to the subcommittee chairman.

Mr. ROE. Mr. Chairman, we have reviewed this amendment. It is really a clarifying and an important amendment. We are prepared to accept the amendment on this side.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. MOODY. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, we are prepared to accept the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. MOODY].

The amendment was agreed to.

Mr. YOUNG of Missouri. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will ask the gentleman from New Jersey [Mr. ROE], the subcommittee chairman, if he will engage in a colloquy.

Mr. ROE. I will, of course, Mr. Chairman, if the gentleman will yield.

Mr. YOUNG of Missouri. Mr. Chairman, it has been brought to my attention that EPA is contemplating a policy that would deny Federal grant funds to local treatment projects that will not be completed by the July 1, 1988 secondary treatment deadline. Apparently, this unwritten interpretation is based on the national municipal policy adopted in 1984 by EPA. Mr. Chairman, what concerns me is that we have numerous local agencies that have been working diligently and against substantial financial and other limitations to comply with the 1988 secondary deadline. Mr. Chairman, as you know, there are numerous projects now under construction to comply with this deadline. We also know that while some of these projects may not meet the July 1, 1988 deadline, an EPA policy as I described will gurantee that these projects will not meet the deadline.

Mr. Chairman, does the intent of Congress on this legislation support such a policy by EPA.

Mr. ROE. No, it is absolutely converse to the policy.

Mr. YOUNG of Missouri. Mr. Chairman, furthermore, it seems the whole intent of this legislation before us today, as well as the Senate bill now pending before this Chamber, recognizes that despite the best efforts of many agencies, completion of some projects will occur after the deadline. I cannot believe that the intent of Congress could be interpreted to support a policy to fund only those projects that would be completed by the July 1, 1988 deadline and then deny funds to a project slated for completion for August 1, 1988. Such a policy, it seems, negates the efforts of the Congress in developing legislation to assist communities in coming into compliance with this Federal requirement before and after the July 1, 1988 deadline.

Mr. Chairman, do you feel that additional statutory direction is necessary to guarantee that this policy will not be implemented.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Missouri. I yield to the subcommittee chairman.

Mr. ROE. No; I think, as the gentleman has pointed out, that the provisions of our bill provide that sufficient funding will be available to complete more projects than originally contemplated by the administration.

Mr. YOUNG of Missouri. Mr. Chairman, I thank the gentleman. I am pleased to know that our agencies can continue to expect Federal assistance in meeting these deadlines.

Mr. Chairman, I yield back the balance of my time.

Mrs. JOHNSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in very strong support of the passage of H.R. 8, and I want to take this opportunity to commend the chairman of the subcommittee, the gentleman from New Jersey [Mr. ROE], the chairman of the committee, the gentleman from New Jersey [Mr. HOWARD], and the ranking members, the gentleman from Kentucky [Mr. SNYDER] and the gentleman from Minnesota [Mr. STANGELAND]. These gentlemen have together worked to craft for us a superior piece of legislation.

This is not merely a reauthorization of legislation that has gone far to clean the rivers and sources of water in America but is a refinement of that legislation. It represents the best in the legislative tradition of oversight, and it improves as well the ability of States to utilize their resources to implement more economically the requirements of this important legislation.

I also want to point out that it has in it three portions that are of particular importance to the Northeast area that I represent. I do want to call to the Members' attention that the combined sewer overflow program, which in the past was not eligible for ordinary sewer grant funds except on a limited basis, will, as a result of this thoughtful and thorough piece of legislation, be eligible for any amount of funding the State desires to make available to it. That is extremely important, especially to the older cities of America.

It also addresses the crying need for prevention of non-point-source pollution and for addressing the serious problem of ground water contamination.

Mr. Chairman, I merely want to commend the chairman of the committee and the chairman of the subcommittee for their thoughtful and able leadership, and I join them in supporting this reauthorization.

Mr. ROE. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the chairman of the subcommittee.

Mr. ROE. Mr. Chairman, we express to the gentlewoman our great appreciation for the superb job she has done and for having contributed to the

legislation. It would not have been possible without her.

Mrs. JOHNSON. Mr. Chairman, I thank the gentleman.

AMENDMENT OFFERED BY MR. BREAUX

Mr. BREAUX. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BREAUX: On page 80, strike out lines 7 through 14 and insert in lieu thereof the following:

"ing precipitation runoff and which do not come into contact with any overburden, raw material, intermediate product, finished product, by-product, or waste product located on the site of such operations. Any person discharging stormwater runoff not described in the preceding sentence from mining operations or oil or gas exploration, production, processing, or treatment operations or transmission facilities shall monitor the quality of water in such flows and shall report not less often than annually to the Administrator, or at such intervals as the Administrator or the State deems appropriate.".

Mr. BREAUX (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. BREAUX. Mr. Chairman, I would say to the members of the committee that the amendment I am offering goes to a section of the bill, section 26, which sets up a procedure for various exemptions from the permitting of certain storm-water runoff. What we are dealing with, for instance, is rain water that runs across a field.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I am glad to yield to my subcommittee chairman.

Mr. ROE. Mr. Chairman, we have looked at this amendment. We feel the amendment is reasonable, and we have no objection to it on this side.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I am glad to yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I want to say that this is a good amendment, and we are pleased to accept it.

Mr. BREAUX. Mr. Chairman, I am prepared to provide a further explanation of the amendment, but now, with the assurance of the chairman of the subcommittee and the ranking minority member, I ask for an aye vote on my amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana [Mr. BREAUX].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. CRAIG

Mr. CRAIG. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CRAIG: Page 56, line 10, before "Section" insert: "(a) IN GENERAL.—".

Page 57, after line 4, insert the following:

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Administration and the States, in developing, publishing, and revising water quality criteria under section 304(a)(1) of the Federal Water Pollution Control Act should—

(1) consider the economic effects of implementation of the proposed water quality criteria;

(2) consider cyclical changes in the climate and environment; and

(3) take into account the recommendations of the concerned States and the findings and results of site specific and areawide research, tests, experiments, and demonstration programs conducted by the concerned States.

Mr. CRAIG (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. CRAIG. Mr. Chairman, in 1981, in concurrence with the Idaho Health and Welfare Department, the State legislature acted to modify proposed State water quality standards below hydroelectric facilities to establish a dissolved oxygen standard of 5 milligrams/litre (m/l) average during a 4-hour period between the months of May and October and a 6 m/l average during the remaining months. EPA later disapproved these standards siting that they would not adequately protect salmonid spawning and the other life processes of these fish. Earlier this year, the EPA argued that the dissolved oxygen standard should be 6.5 m/l on a 30-day average, 5 m/l for a 7-day average, and a minimum of 4 m/l during nonspawning periods.

If the EPA's proposed standard was adopted, dams in Idaho would be forced to install monitoring devices and other expensive equipment to increase the level of oxygen in water below the dams. The issue to be addressed here is the legitimacy of EPA's claim that their standards are necessary. The EPA has testified before the Idaho Legislature that it cannot identify any areas of adverse impact to fisheries or aquatic life but all the same, they feel we should modify our standards in order to meet these arbitrary levels.

If the EPA and Idaho can't reach an agreement regarding the disputed standards, the EPA will promulgate its own and enforce them. If the State refuses to follow the EPA's standards, we would lose Federal funds for construction of city wastewater treatment plants.

In closing, Mr. Chairman, my amendment is a sense of the Congress that the Administrator and the States in developing, publishing, and revising water quality criteria under section 304(a)(1) of the Federal Water Pollution Control Act should consider the economic impact of their decisions on the impacted States.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. CRAIG. I yield to the subcommittee chairman.

Mr. ROE. Mr. Chairman, again this is a splendid amendment. This side has no objection to it. It is a fine contribution to our effort.

Mr. SYNDER. Mr. Chairman, will the gentleman yield?

Mr. CRAIG. I yield to the gentleman from Kentucky.

Mr. SYNDER. We are pleased to accept the amendment, Mr. Chairman.

Mr. CRAIG. Mr. Chairman, I appreciate the support of the chairman and the ranking minority member of the subcommittee, and I thank them for their acceptance of this amendment. I urge its passage.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho [Mr. CRAIG].

The amendment was agreed to.

□ 1710

AMENDMENT OFFERED BY MR. STUDDS

Mr. STUDDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STUDDS: The Committee substitute is amended by adding at the end thereof the following new section:

"SEC. . RIGHT AND LIABILITIES UNDER OTHER FEDERAL LAW.

Section 505 of the Federal Water Pollution Control Act is amended by inserting the following new subsection (f) and by designating the succeeding subsections accordingly:

'(f) Nothing in this Act shall affect or modify the rights or liabilities of any person under other Federal law with respect to damages caused by noncompliance with any requirement of this Act or any permit issued under this Act.' "

Mr. STUDDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. STUDDS. Mr. Chairman, this amendment provides simply that nothing in the Federal Water Pollution Control Act shall affect or modify the rights or liabilities of any person under other Federal law with respect to damages caused by noncompliance with any requirement of this act or any permit issued under this act.

Since circulating the amendment for comment, I have been asked by several Members, why is this amendment necessary? Isn't it obvious that fishermen and beach-front property owners should have the right to sue for dam-

ages suffered as a result of illegally caused pollution? Has not this right always been available?

The answer to both of these questions is yes, but the fact is that this amendment is necessary because the right of persons to sue under Federal law for economic loss suffered as a result of maritime pollution damage does not now exist; it has been taken away by recent court decisions that concluded that Congress, through enactment of the Federal Water Pollution Act, preempted Federal common and maritime tort law in the field of pollution.

What do these court decisions mean?

They mean that if an oil tanker were to discharge its cargo off the coast of California, or Florida, or Long Island, or Cape Cod and in so doing, cause damage to private property, and loss of income to the operators of tourist hotels, those suffering economic loss as a result would have no means—I repeat no means—of seeking compensation for their loss under Federal law.

The court decisions mean that if an ocean incineration vessel, carrying huge quantities of toxic waste were to stop above a shellfish bed, and the operator of that vessel were to intentionally discharge the entire cargo of the vessel into the waters above that shellfish bed, the Government could sue for the costs of cleaning up that spill; the Government could seek to recover for the damage to natural resources; but the fishermen whose livelihoods may have depended for generations on the health of that shellfish bed would be out of luck; they would have no recourse under Federal law.

My amendment would merely restore a right that has existed, in one form or another, from the beginning of our country. It would not create any new rights; it would permit suits only in cases involving a violation of the law; and its scope is limited strictly to the question of damages. The amendment would not overturn the Supreme Court's decision in the so-called Milwaukee II case insofar as that decision relates to the authority of Federal courts to fashion abatement and control remedies that exceed the requirements of discharge permits issued under the FWPCA.

The case for the amendments is bolstered by a brief filed by the Department of Justice in one of the court cases that prompted me to offer this amendment. In that brief, which was filed last year, the Justice Department stated that:

> A ruling that maritime tort claims were precluded by the FWPCA would adversely affect the United States as a shoreside and marine property owner, and as a custodian of natural resources.
>
> The * * * conclusion that maritime tort remedies are preempted by the * * * FWPCA is plainly wrong. The language, legislative history, and overall statutory scheme * * * reveals no Congressional intention to displace traditionally available maritime tort remedies for pollution caused property damage. To the contrary, there is ample evidence in the language and legislative history of the FWPCA that such remedies are specifically preserved * * * the FWPCA was neither designed nor intended to provide relief for pollution-caused property damage. Thus, it does not preempt the remedies traditionally available for such damage under the maritime law.

That is what the Department of Justice argued last year. The arguments it made were logical; they were presented for the purpose of protecting the interests of the United States; and they reflected an informed judgement about the history and scope of the Federal Water Pollution Control Act. But the courts did not agree with the Department of Justice.

The courts argued that the Congress, and more particularly the House Committee on Public Works and Transportation, which has taken the lead in passing environmental legislation for the past 15 years in this Congress, intentionally sought to deprive private citizens of the right to sue under Federal law for economic loss suffered as the result of maritime pollution. The courts argued that Congress and the Public Works Committee did this despite the fact that there is no reference in the committee report that accompanied this law when it was first enacted to the effect that this was the intent of the committee; there was no indication during debate on the floor that this was the intent of the House when it approved this legislation; there was no reference in the conference report that it was the intent of Congress to deprive citizens of this right; there is, in fact, no reference anywhere in the legislative history of this statute to indicate that any Member of Congress who voted for this bill intended at any point to eliminate the right of persons who suffer damage from illegally caused pollution to seek recovery for that loss.

The issue raised by this amendment is simple.

The courts have said that this Congress intended to take away from private citizens a right that they have enjoyed for decades. It is a limited right—the right to seek compensation under admiralty law or, where appropriate, some other Federal law, for economic loss suffered as the result of pollution. The courts, in this instance, are wrong. Congress never intended to deprive citizens of this right. But saying that the courts were wrong will not change the effect of their decisions. We can only do that by adding to the law the one simple sentence proposed by this amendment; it will clarify the intent of the Congress; it will state that Congress does believe people who are hurt by those committing illegal acts should be accorded the right to their day in court.

This amendment would not, I repeat, create any new rights. It will not lead us into a position of legal uncertainty about what protection the law does or does not provide. The right it seeks to restore is a traditional right; a right that has existed since the founding of the Republic; and a right that the very simplest principles of justice demand we restore. I believe that this amendment will strengthen the legislation we are considering today by restoring a measure of lost integrity to the landmark legislation this bill seeks to amend; the Federal Water Pollution Control Act is one of the most important pieces of environmental legislation in the history of our country. It is a law that was developed and enacted to protect our people from the effects of unregulated pollution; the courts have argued the contrary, that this is a law that deprives citizens of their right to seek compensation when injured by pollution. My amendment says the courts are wrong, and that those who have, like myself, pointed with pride and respect to the FWPCA for years, are correct; this is a law that protects the rights of our people; not a law that takes those rights away.

Mr. Chairman, because of lingering concerns on the part of member of the committee, I am willing, in deference to the committee, to accept a change in the amendment changing the word "law" to "statutes."

In so doing, I stand by my statement; I think we can and should fully restore the rights of those who suffer damage as a result of illegal pollution.

With this change, we go part of the way, but it is an important step in that direction; and I hope that as consideration of this bill proceeds to conference, a consensus in support of more comprehensive language can be developed.

Mr. Chairman, I understand there are some concerns both by the majority and the minority sides of the Committee with respect to the amendment as originally drafted and printed in the RECORD and introduced.

In order to accommodate those concerns and in accordance with the agreement reached between both the minority and the majority sides, I ask unanimous consent, Mr. Chairman, that my amendment be modified by inserting the word "STATUTES" in lieu of the word "LAW."

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts [Mr. STUDDS]?

There was no objection.

The text of the amendment, as modified, is as follows:

> Amendment offered by Mr. STUDDS, as modified: The Committee substitute is amended by adding at the end thereof the following new section:

"SEC. . RIGHTS AND LIABILITIES UNDER OTHER FEDERAL STATUTES.

Section 505 of the Federal Water Pollution Control Act is amended by inserting the following new subsection (f) and by designating the succeeding subsections accordingly:

'(f) Nothing in this Act shall affect or modify the rights or liabilities of any person under other Federal law with respect to damages caused by noncompliance with any requirement of this Act or any permit issued under this Act.' "

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, I thank the gentleman for yielding.

Both sides have really debated and discussed this amendment and with the revision that the gentleman from Massachusetts [Mr. STUDDS] is making in his text, we have no objection on this side.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I thank the gentleman for yielding. I understand the gentleman has some concerns about both admiralty law and common law, and the gentleman has accommodated us by not putting that in there.

I think we might well want to take a look at that in the future.

Mr. Chairman, we are pleased to accept the amendment on this side.

Mr. STUDDS. Mr. Chairman, I thank both gentlemen for their cooperation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. STUDDS], as modified.

The amendment, as modified, was agreed to.

Mr. OBERSTAR. Mr. Chairman, I move to strike the last word.

Mr. Chairman, as the chairman of our subcommittee knows, one of my concerns throughout the process of consideration of this legislation has been the prospect that some States and some industries may be allowed to slide back in their commitment to clean water. We have discussed this extensively in the subcommittee and again in the full committee and privately and with many Members.

I really do want to express my deep appreciation to the chairman of the subcommittee, the gentleman from New Jersey [Mr. ROE], for the enormous amount of time and attention the gentleman has given to this issue.

With respect to the language that is now included in the bill, which is very carefully and skillfully crafted and does address the issue of my concern, the 2½-year period during which prohibition against backsliding would be in effect, how does the chairman intend that this matter should be handled by the regulatory agency after the 2½-year period?

Mr. ROE. Well, Mr. Chairman, if the gentleman will yield, we require a report from EPA 2 years after enactment. That is the final report with recommendations, which will give us 6 months in which to take action. With the decision of Congress on this issue, I would expect the EPA to continue the policy continued in our provision until legislative action needed is taken. In other words, we intend to see that this matter is dealt with directly.

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for that response. I concur in that approach and insist that it should be carried out that way by the Agency.

Second, with respect to section (F)(2)(b) of the bill, does the chairman understand that the language "information available which was not available at the time of permanent issuance" to include waste load reallocations which might occur, for example, when one plant on a stream segment would close?

I think the issue of reallocation is an extremely important matter that might prevent progress toward clean water if waste loads are reallocated only to existing industries. If that should occur, economic expansion could be choked off and then the worst situation is that waste load allocations would acquire an economic value in and of themselves.

Does the gentleman understand that waste load allocations could be treated among companies under the gentleman's language?

Mr. ROE. Well, if the gentleman will yield, our intent is that the water quality standards have to be met. Our intent is that any new industry that would locate on a stream would have to locate and put the equipment in whatever the level of treatment had been determined, BAT or higher, so we do not see the point of one competing with the other.

Mr. OBERSTAR. The language is not intended, not should it on its face ascribe any economic value to waste load allocations?

Mr. ROE. That is correct.

Mr. OBERSTAR. Finally, Mr. Chairman, I just want to say I rise in very strong support of H.R. 8, the Water Quality Renewal Act of 1985. I want to offer just enormous compliments and congratulations to the gentleman from New Jersey [Mr. ROE] who has spent hundreds of hours on this legislation, devoted weekends, exhausted the staff and other members and himself in the process and he still stands tall in this body with the enormous amount of work that has been done and contributed to one of the most complicated pieces of legislation in the clean water field that we have had, including in those remarks, I say, the Clean Water Act of 1972.

It is a very strong environmental bill. It provides program funding and, more important, it provides continuity for the construction grants program. Its clean lakes provisions, its attention to problems and programs unique to the Great Lakes, its antitoxics stance, and its estuaries and bays provisions are much needed and greatly appreciated.

I am particularly pleased with the antibacksliding language in the committee amendment, and am most grateful to the gentleman from New Jersey [Mr. ROE] for his personal attention to this issue, which has been my chief concern. I do have two questions, which I will raise with the gentleman, but overall I believe the amendment addresses my concerns, and will give it my full support. My philosophy is, if the water is clean, keep it clean. This amendment will help accomplish that goal.

I am also grateful to our committee leadership for including in this bill, as they did in last year's version, my Nonpoint Source Control Act to control runoff and improve water quality in urban and rural areas.

Section 7 of H.R. 8 adds a new section 319 which establishes a voluntary program to encourage States to develop and implement control programs for nonpoint sources of pollution. This is to be an implementation program, not a planning program, using existing data where applicable, and building on programs, best management practices [BMP's] and other measures where they are already being implemented. No new planning funds are provided.

The intent of this program is not only to reduce nonpoint sources of pollution, but to improve water quality.

While this first phase of the program is voluntary in nature, section 319 does not preclude regulatory programs at the State level. Many States already have such programs for certain categories of sources, and enforcement is included as an eligible implementation activity. However, I am convinced that, during these first 4 years, the decision to implement a regulatory program should be made at the State rather than at the Federal level.

Each State is required, first, to submit to EPA a report which identifies streams not meeting applicable water quality standards or the goals and requirements of the act because of nonpoint sources; which identifies categories, such as agricultural, silvicultural, urban, construction and mining, and their subcategories, of nonpoint sources; identifies existing State and local nonpoint source control programs; and describes the process for identifying best management practices and other control measures. This information is to be based on existing data where available and adequate, including that collected under other pro-

visions of the act, and approved under section 208 or 303 of the act.

Each State is also required to submit to EPA a plan which the State intends to implement over the next 4 years. This plan must specify those significantly affected streams which the State will address; the order and schedule for implementation; the categories and subcategories of sources to be included in the implementation plan; the best management practices and other measures to be used; other methods including but not limited to demonstration programs, enforcement, technical assistance, education, training, and cost sharing; sources of funding other than this program; and the estimated cost of the total implementation program.

The purpose of the plan is to inform the administrator precisely what the State intends to implement, when, and where. States need not address all their significantly impacted waters during these first 4 years. Rather, they should concentrate on those for which they have the resources to achieve real gains in pollution control and water quality improvement. However, initial implementation must concentrate on the most serious problem waters.

Section 319 does not set fixed implementation dates; the State is the proper entity to determine which dates it believes it can attain. However, the schedule must establish an expeditious time period for implementation of BMP's and other measures for each category and subcategory, and must indicate the estimated dates by which these practices and measures will be implemented. Expedition is the condition for initial approval of the plan, and the State's progress in attaining those goals is a condition of continued funding. The State must submit an annual report describing its activities and progress made in meeting its schedule during the preceding year. No grant for the coming fiscal year may be made unless the administrator determines the State's progress has been satisfactory during the past year.

To ensure that the State has addressed the major sources of nonpoint pollution, the plan should indicate to the administrator the relative contributions of each category and subcategory to the overall nonpoint source problem.

The State need not include in its plan all the methods listed in the bill, but implementation of BMP's is required.

Cost sharing is a necessary tool to encourage implementation of BMP's. However, the limited resources authorized in the bill preclude widespread use of cost sharing. This should thus be used very sparingly, and only when absolutely necessary to assure critically needed compliance where these costs would otherwise be beyond the individual farmer's means. Demonstration programs and other methods with wider application should be the predominant choices by the States.

To the maximum extent practicable, plans should be developed and implemented on a watershed-by-watershed basis.

In the development and implementation of their plans, States should, to the maximum extent practicable, utilize local agencies and organizations with expertise in nonpoint source controls, such as conservation districts, watershed districts, and public comprehensive planning organizations.

Because of the short timeframe between enactment of this bill and the final report to be issued by EPA in 1989 States are required to submit both the report and the plan within 270 days of enactment. However, we don't want to close the door on States which may not be able to complete the requirements within the first 9 months. Therefore, States may request, and EPA must grant, an extension of up to 9 additional months to permit as many States as possible to participate in the program.

EPA is to examine the State's plan against the data submitted under the report and against the goals and requirements of the act. EPA must make a final decision on the plan and report within 6 months, or the plan is automatically approved. EPA may disapprove the plan or portion of it if it is unlikely to satisfy the goals and requirements of the act; if the State's authority or resources are not adequate; if the implementation schedule is not sufficiently expeditious; or if the plan is not adequate to improve water quality or reduce nonpoint source pollution.

All States are required to participate. However, if a State does not choose to do so, or if its plan is not approved, the bill provides that EPA develop the information required in the report for waters not meeting water quality standards or the goals and requirements of the act, and categories and subcategories of sources in order to assure a nationally consistent data base. There is no implementation provision in the report.

In order to achieve the maximum implementation nationwide, section 319 provides that, if a State does not participate, or if its plan is not approved, a local public agency or organization may, with the approval of its State, develop and implement a plan for its area. Such a local organization must have expertise in, and authority to, control nonpoint source pollution in its area, and must be of sufficient geographic size to implement an effecitve program. It may request technical assistance from EPA in developing its plan, and if the plan is approved the local organization may receive funding and implement its plan in the same manner as if it were a State.

There is some concern that other Federal and State programs and activities may at times work at cross purposes with the State's efforts to control nonpoint source pollution. Accordingly, the States are to identify Federal and State programs which are inconsistent with their plans, and recommend changes which could be made to make them consistent, and assist with implementation. EPA is to consolidate the State's recommendations, and forward them to the appropriate agencies. Each agency must then consider these recommendations and, to the maximum extent practicable and consistent with existing law, accommodate those recommendations and carry out its own programs and activities in a way which will be consistent with, and assist implementation of, the plans.

Section 319 provides further incentives to consistency by referencing this section in section 304(k) of the act, which authorizes EPA to enter into agreements with other Federal agencies to provide for the maximum utilization of other Federal laws and programs in controlling nonpoint sources of pollution. I encourage EPA to reach agreements with all appropriate agencies, but especially the Department of Agriculture, and the Office of Surface Mining, Reclamation and Enforcement in the Department of Interior.

Section 319 establishes a mechanism for reconciling pollution of one State's waters by another State. At the request of a downstream State with an approved plan, or at the initiation of EPA, an interstate management conference of all States contributing nonpoint source pollution to the water body shall be convened, in a case where the water body is not meeting water quality standards or the goals and requirements of the act. Upstream States would be required either to implement or to revise their plans to address the interstate water body, but the choice of BMP's and other implementing measures is to be made by each individual State. There is no provision in the bill for another State or the conference to impose specific measures on any State. Each State must implement its revised plan.

Management conferences or compacts already exist for many interstate water bodies. Where appropriate, EPA should consider using these existing bodies for this purpose as well.

Section 319 authorizes $150 million per year through 1990 and provides for up to a 50 percent Federal match for costs incurred by the States. However, the Federal share could rise to 60 percent where the administrator determines that a significant number of non-Federal, non-State interests in a watershed area agree to participate.

The administrator is provided the flexibility to determine when a significant number of participants has joined the program.

The application should contain, in detail specific to each watershed, information similar to that required for the plan: that is, it should provide, at the project level, for the year for which the funds are requested, an identification of the stream segments to be addressed, the specific pollutants involved, and the sources of pollution. It should lay out the strategy for controlling these sources, including BMP's and other measures, together with a schedule of activities to be undertaken, and a discussion of other activities of Federal and State agencies cooperating in the effort.

Section 319 contains no formula for allocations to States; rather, each State is encouraged to apply for as much assistance as it is able to match, although a cap of 15 percent of the appropriation per State is established.

The section requires EPA to report annually to the House Committee on Public Works and Transportation, and to the Senate Committee on Environment and Public Works, on the preceding year's programs and activities, and the progress made in reducing nonpoint source pollution.

A final report is required on January 1, 1989, on the activities carried out under this program. While improved water quality is the ultimate goal of this program, such improvements may take longer than 4 years to be fully measured and documented. Therefore, the final report should give full attention to the effectiveness of the plans, BMP's, and other measures in controlling nonpoint sources of pollution, and provide an analysis of the effectiveness of a voluntary program. The recommendations should include a determination of whether this voluntary approach should be continued, or whether the Congress should consider a regulatory and enforceable approach in the next phase of the program.

Complementing this nonpoint source control program for surface waters is section 31 of the substitute, which provides $7.5 million per year, which assist States in moving toward a comprehensive surface and ground waters nonpoint source protection program. Some States may not have the necessary information on ground water for such a comprehensive program now. Therefore, section 31 provides additional funding, on request by States with approved programs under section 319, of up to $150,000 per State per year on a 50-50 matching basis, for research, planning, ground water assessments, demonstrations, enforcement, technical assistance, education, training and other activities aimed at protecting ground water quality from nonpoint sources of pollution.

Again, I commend our committee leadership for bringing this bill forward, and urge its support by the entire House.

Mr. ROE. Mr. Chairman, I thank the gentleman.

Mr. BOLAND. Mr. Chairman, I move to strike the last word.

Mr. Chairman, earlier today the Chair sustained a point of order against an acid rain amendment offered by my colleague from Massachusetts, Mr. CONTE. At the time the amendment was brought up, I was appearing before the Rules Committee in support of a rule for my subcommittee's appropriations bill. While I respect the ruling of the Chair on the point of order, I want the Members of the House to know that I understand and share the sense of concern and frustration that lead to the amendment's being offered.

I can think of few environmental problems which pose a greater threat to our Nation's air and water supplies than does the problem of acid rain. For years, those of us from New England have been especially senstive to the effects of acid rain because we have seen those effects all around us. The degradation of the streams, lakes, forests and soil of New England, and the Northeast, as a result of acid rain have been well documented. Our region continues to suffer from this environmental catastrophe, but now it has been joined in its suffering by other regions including the Southeast and the Pacific northwest. Acid rain is no longer a local problem, it is a national problem with which we must deal.

We have studied acid rain, and studied it, and studied it. We may not know all there is to know about its causes, but we certainly know enough to realize that the emissions of nitrogen oxide and sulfur dioxide are among its principle components. And we certainly should be aware that to control acid rain, and to begin to end its devastation of our bodies of fresh water, we must control those emissions.

The New England congressional caucus, which Mr. CONTE and I cochair, has worked for several years to draft a piece of legislation that would produce a consensus on a way in which to curb sulfur dioxide and nitrogen oxide emissions. We introduced that legislation last year, and it did not reach the floor. Along with 16 cosponsors, we introduced it again this year, but so far no action has been taken on it. That bill was embodied in Mr. CONTE's amendment. The approach our bill takes acknowledges that acid rain is a national problem that demands a national solution. Just as no region is totally immune from all of the causes or all of the effects of acid rain, no region can be expected to bear all of the control costs by itself.

Central to the caucus bill as it was carried in the Conte amendment are two concepts: Meaningful emissions reductions and a fair sharing of the costs of producing those reductions. We seek a 50-percent reduction in emissions—12 million tons in sulfur dioxide emissions over the next decade, and 4 million tons in nitrogen oxide emissions over the next 12 years. The first phrase of those reductions would be accomplished by requiring the 50 highest emitting power plants to install modern, effective emissions control devices. The choice of the means of achieving the remaining reductions would be left to the Eastern 31 States.

We realize an Emissions Control Program will be costly. We also realize that there is a tremendous cost in terms of water quality that results from doing nothing. That cost is growing. The caucus bill and the Conte amendment spread the emissions control costs equitably among all States, save Alaska and Hawaii, by the imposition of a modest fee on generated electricity. This cost-sharing arrangement should remove what has been one of the biggest stumbling blocks to a meaningful control program—the fear that such a program would economically devastate a particular region of the country. Under the caucus plan, all regions would in some way benefit, and the cost would be manageable for each.

Mr. Chairman, the time has long since passed for action on acid rain. H.R. 8 is intended to improve the quality of our water supplies. It cannot fully accomplish that goal unless it acknowledges the danger posed to water quality by acid rain. The amendment would have added a sound and fair Acid Rain Control Program to an already fine piece of legislation. In so doing, it would have made it better, and provided this House with an opportunity to pass a clean water bill that is truly comprehensive in scope.

I regret that we did not have a chance to vote for an Acid Rain Control Program within the context of the Clean Water Act extension. I want, however, to compliment Mr. CONTE for raising this important environmental issue, and giving those of us concerned with it an opportunity to bring our views to the attention of the House. I hope that this effort will hasten the day when we can thoroughly debate, and adopt, a national acid rain control measure.

● Mr. UDALL. Mr. Chairman, for some time, I have been very concerned about the issue of acid rain. Thousands of lakes and tens of thousands of streams in the Eastern United States and Canada are in peril due to acid rain. Crop yields have been lowered, our forests have been damaged and even man-made structures have suffered due to acidic precipitation.

While I recognize that the amendment offered by the gentleman from Massachusetts is not germane, and in all likelihood I would not support his amendment if it were, I commend the gentleman for his attempt to bring this issue before the full House for consideration. While there are a wide range of proposals for dealing with this problem, including my own, we have not had the benefit of debating this issue on the floor. I am hopeful that the committees of jurisdiction will allow the full House the opportunity to debate the various acid rain control proposals in the near future.●

● Mr. STARK. Mr. Chairman, I would like to congratulate the members of the Public Works Committee for their hard work on the Water Quality Renewal Act of 1985. They have done a good job with this legislation.

Chairman ROE deserves special thanks for his assistance in working with the East Bay Municipal Utility District of Oakland, CA with their stormwater infiltration problem. The regulatory resolution of the problem of stormwater infiltration into the sewer system is one of the most important issues facing the East Bay Municipal Utility District.

House Resolution 8 provides for a study by the Environmental Protection Agency Administrator to find the best method of regulating the rainfall induced overflow in the sewer system of the utility. This is important because if current regulations continue, East Bay Municipal Utility District will be required to make a minimum investment of $800 million for equipment to satisfy storm induced situations that occur only 10 days a year.

It should be noted that East Bay Municipal Utility District has been working hard on reducing the amount of rainwater infiltration into its sewer system. Approximately $300 million will be spent to reduce infiltration into the sewer system and provide treatment to the rainfall that does enter the sewer system. Additionally, East Bay Municipal Utility District will be investing over $100 million in new treatment facilities.

I look forward to continuing to work with Chairman ROE, the Public Works Committee, and the East Bay Municipal District to solve this problem while working to preserve water quality in San Francisco Bay.●

● Mr. ECKART of Ohio. Mr. Chairman, water pollution is not a problem that will ever go away. As long as we continue producing hazardous materials, the Congress needs to continually monitor and develop policy programs that will assure that wastes produced are properly disposed of. We do not want to return to the state of the 1960's when some of our Nation's waters were so polluted that people talked of our lakes and rivers dying. There is no doubt that the passage of the 1972 Clean Water Act, that our Nation has taken great strides in addressing the pollution hazards facing its oceans, lakes, and rivers. Yet our job is by no means over. Today, the Congress is showing its continued dedication to controlling water pollution, in considering H.R. 8, the Water Quality Renewal Act.

I wholeheartedly support the efforts of the Committee on Public Works and commend them for the excellent work of its members in developing this vital legislation. Today I would like to address a particular section of the bill, which is of longstanding interest to me; enhancing the water quality of the Great Lakes.

In June, I introduced legislation with several of my colleagues from New York, Michigan, and Wisconsin, that set specific guidelines to address the pollution problems facing these waters. I am pleased to report that all of my bill is within the other body's version of the Clean Water Act and a large portion of it is included in the committee amendment we are considering right now. Later on, we will offer an amendment, directing the NOAA to create a comprehensive data base on the Great Lakes, to include the remainder of our bill in the final House version of this legislation.

The importance of the Great Lakes water quality is by no means limited to the interest of the Midwestern States, but to all the United States and Canada. The Great Lakes provide 95 percent of our fresh surface water equivalant to 20 percent of the entire world's fresh water. The Great Lakes basin, which includes all the States bordering these waters plus Ontario, Canada, contains 20 percent of our total U.S. population and 50 percent of Canada's. It supports 25 percent of our country's total income and 60 percent of Canada's. The lakes also provide a vital shipping route to the Atlantic from the Central and Eastern States and is a major source of recreational boating and fishing for scores of Americans. In short, the importance of these waters to both the United States and Canada cannot be disputed and must not be ignored.

Fifteen years ago these waters were dying. The grave pollution hazards facing the Great Lakes sparked unprecedented cooperation between the United States and Canada in identifying the pollutants and developing the means to control their damage to the lakes. The two governments endorsed the Joint Water Quality Agreement which commenced the successful eradication of a large percentage of the contents of lead, phosphorous, and mercury in the lakes.

Yet today, even greater hazards face these lakes; toxic substances. The pollutants we sought to control in the early 1970's are being replaced with toxics that are posing dangers to the lakes that could far exceed those of earlier decades. In a May 1982 report, the GAO criticized U.S. efforts in maintaining the objectives of the Joint Water Quality Agreement. The report pointed out that despite spending millions of dollars on clean water programs, the U.S. Government has neither the knowledge, the strategies, nor the proper management to keep control of the hazards threatening these lakes.

Our legislation embraces the proposals put forth by the GAO. It coordinates U.S. efforts under the leadership of the EPA and NOAA, to establish a comprehensive Water Quality Monitoring and Cleanup Program for the Great Lakes. This legislation authorizes $8 million in the first year to: direct the Great Lakes National Program Office, under the EPA, to pursue the goals of the Water Quality Agreement; to establish a toxic monitoring and surveliance network; and create a comprehensive environmental data base on the lakes which will be administered by NOAA. Finally, both the EPA and NOAA will present joint annual reports to the Congress discussing their efforts in complying with the act.

We believe that the cost required for this program is very little compared with the benefits it will provide these lakes and our citizens who use them. We do not seek to create huge new programs, but instead reorganize existing Federal efforts. During its consideration of legislation to maintain adequate water quality throughout the Nation, the Congress cannot afford to overlook the importance of the Great Lakes. I hope that our efforts to create a successful program, which has already been extended to the Chesapeake Bay, will be wholeheartedly endorsed. I rise in support of the amendment offered by the gentleman from New Jersey and urge my colleagues to support it.●

● Mr. HAMMERSCHMIDT. Mr. Chairman, I rise in support of H.R. 8, the Water Quality Renewal Act of 1985. Mr. Chairman, this is an important, I might say essential, piece of legislation. It will insure continuation of the commitment made by this country to clean water in 1972 that we have reaffirmed on a number of occasions. It is a bill that has truly been drafted in a bipartisan manner under the able leadership of the gentleman from New Jersey [Mr. HOWARD], chairman of the Committee on Public Works and Transportation and the ranking Republican member, the gentleman from Kentucky [Mr. SNYDER]. I also want to especially thank the gentleman from New Jersey [Mr. ROE] who chairs the Subcommittee on Water Resources and the gentleman from Minnesota [Mr. STANGELAND] who serves as the

ranking Republican on the subcommittee.

I just want to take a moment to thank them on behalf of the people of Arkansas for the hard work and their legislative accomplishments. I would be remiss if I didn't mention two provisions in the bill which are of particular interest to my constituents. I speak of the provision contained in section 25 of the bill authorizing a 1-year study of the pollution problems at Beaver Lake, AR. I also want to commend the committee leadership for including a provision allowing for partial delegation of the National Pollutant Discharge Elimination System [NPDES] to States that are willing and able to take over a portion of this program. I believe that this will be of benefit in my State of Arkansas and in many others as well.

Again, I just want to take this opportunity to thank the committee leadership and the other members of the committee for their tireless work and dedication to the goals of clean water and I urge my colleagues to support passage of this important legislation.●

● Mr. FLORIO. Mr. Chairman, I rise to commend my colleagues from New Jersey [Mr. HOWARD and Mr. ROE], for their perseverance in bringing forth H.R. 8, the Water Quality Renewal Act of 1985. I am pleased that we are once again given the opportunity to debate the reauthorization of the Clean Water Act and to ensure that we have a policy that will restore our Nation's water resources.

I am especially pleased that the Committee on Public Works and Transportation has again included in this reauthorization a section authorizing funding for improving the water quality of our Nation's lakes. The clean lakes section authorizes the sum of $50 million annually through 1990 to fund grants to the State for controlling nonpoint sources of pollution which are contributing to the degradation of water quality in lakes.

One particular provision in this section has important implications for the residents of Pitman, NJ. Under the Clean Lakes Program, funding is granted for a demonstration project for the restoration of Alcyon Lake in Pitman. The project, which is authorized at $3.5 million, will include the removal and disposal of contaminated sediments from Alcyon Lake.

In January 1980, Alcyon Lake was closed to the public because BCEE (bis-2-dichlorethyl ether), a known carcinogen, was found in the water. Alcyon Lake is located 900 feet away from Lipari Landfill, which has been ranked No. 1 on the Superfund national priorities list. Analyses confirmed the fears of the community of Pitman. Toxic contaminants had indeed leached from Lipari and infiltrated Alcyon Lake.

The $3.5 million authorized in this bill will speed the recovery of Alcyon Lake by funding the removal and disposal of contaminated sediments in the Lake. Once this project is finished, a report must be submitted to both the House Public Works Committee and the Senate Environment and Public Works Committee recommending further cleanup measures.

Once again, the citizens of Pitman will be able to fish and swim safely in this body of water. Without question, this funding will help speed the recovery of Alcyon Lake. It is a strong effort to restore Alcyon Lake as an environmentally sound natural resource, and a source of recreation, pride and beauty to the residents of Pitman and Gloucester County.

The contamination of our resources by pollution is one of the most important and far-reaching concerns that face our society. Through H.R. 8, the States and the Environmental Protection Agency will be given strong direction and funding for improving and maintaining the quality of our Nation's water resources in an effective and environmentally sound manner.●

● Mr. GALLO. Mr. Chairman, H.R. 8, the Water Quality Renewal Act of 1985, is a good bill. I am proud, as a member of the Subcommittee on Water Resources, as a member of the Committee on Public Works and Transportation, and today as a Member of the House, to have had three opportunities to be a part of the team that has crafted this fine piece of legislation.

H.R. 8 provides tools to help us with a number of serious environmental problems. For example, for the first time, runoff from farmland and city streets is recognized as having a negative effect on our environment. Also, the bill establishes a State-Federal program for cleaning up toxic hot spots, and makes projects designed to deal with combined storm water and sanitary sewer overflows eligible for grant assistance.

As I have just said, I am proud of my role in fashioning these and the other measures designed to protect our health and environment. Today, however, I want to emphasize section 16, which adds a program of grants to States to establish water pollution control revolving funds.

Under this program, each State will set up its own revolving loan fund so that it can assist its municipalities in financing the construction of wastewater treatment works. Beginning with grants of $0.6 billion in fiscal year 1986, through 1994 a total of $9.0 billion will be provided to enable States to help themselves. By 1990 these funds will replace the outright Federal grants.

We finally have come to recognize that we can't keep running to the Federal till for more money.

Yet, the need continues to grow. In 1984, the assessment of needed publicly owned wastewater treatment facilities was submitted to Congress. The needs assessment estimates that $35.8 billion of Federal money and a total of $101.7 billion is required to meet all of our municipal water pollution control needs.

In New Jersey alone there are over 200 municipal sewer systems that need help in order to meet Federal clean water standards. Without a revolving fund such as we are creating today, those municipalities can rely only on money borrowed at market rates. Obviously, such costly money makes it impossible to get the job done.

To meet our pollution control needs, we must make our dollars do double duty. We have learned to do this in New Jersey.

As minority leader of the New Jersey Assembly, I was the original sponsor of the Nation's first infrastructure bank legislation. The transportation portion of New Jersey's legislation was enacted in 1984 and provided a loan pool for the repair of roads, bridges, and mass transit systems.

In the Congress, I am proud to take part in this first infrastructure measure. This fund is a major breakthrough for infrastructure development because it will increase the number of local sewer authorities receiving Federal assistance while reducing the drain on Federal revenues.●

● Mr. MINETA. Mr. Chairman, I rise in support of H.R. 8, and urge its adoption by this House. This bill, when enacted, will protect the hard fought gains we have made in cleaning up our rivers and streams; and provide the tools we need to continue those efforts.

This legislation has been guided to the floor by the two gentlemen from New Jersey [Mr. HOWARD and Mr. ROE] who chair the Committee on Public Works and Transportation and its Subcommittee on Water Resources, respectively. I wish to congratulate them on their leadership, and the courtesy with which they have responded to all of us who have been interested in this bill.

I am particularly pleased that this bill includes a section creating a special study of toxic pollutants in San Francisco Bay. This provision is a big boost in the fight for improved water quality in the bay. The study ensures that the efforts to clean up the bay are effectively coordinated among all of the interested parties—Federal, State, and local governments, as well as industry and environmental groups.

As my colleagues know, we have become all too familar with the problems of toxic pollutants in the last few years. To be sure, San Francisco Bay has been studied in the past, but this

will be the first time we have focused on the toxic problem. This study, and the management plan it will produce, will enable us to respond to this new environmental threat with a clear understanding of the problems we face and the best strategy for response.

Adoption of H.R. 8 will be a major step forward for the Nation. I urge my colleagues to join in approving this bill.

Thank you very much.●

● Mr. YOUNG of Alaska. Mr. Chairman, I rise in support of the amendment that will be offered by the gentleman from New Jersey [Mr. HOWARD].

In particular, I strongly support the provisions which will help to steamline regulatory decisions over log transfer facilities. Under current policies of the Environmental Protection Agency, log transfer facilities are subject to duplicative regulation by both the Army Corps of Engineers and EPA under two sections of the Clean Water Act. This duplicative regulation is being imposed on logging operators despite congressional intent to avoid subjecting business to more than one regulatory scheme under the act.

I believe that regulation under section 404 and State approvals required under the Clean Water Act are sufficient to meet environmental safeguards. Further regulation under section 402 is not necessary. Furthermore, I do not believe this body ever intended to treat log transfer facilities as industrial dischargers.

For some reason, EPA and the Corps of Engineers have been unable to reach an agreement on a single regulatory mechanism for the construction and operation of log transfer sites. The amendment provides clear congressional intent that the two agencies shall work out permitting in the context of a single permit wherever possible. In most cases, this permit should be a permit issued under section 404.

Mr. Chairman, I commend the chairman for this cooperation and insight into the problems faced by operators of by transfer facilities in meeting Federal environmental protection regulations.

The amendments will continue to safeguard the environment without imposing unnecessary regulation on a struggling industry. For this reason I support the amendment.●

The CHAIRMAN. The question is on the Committee amendment in the nature of a substitute, as amended.

The Committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. REID, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 8) to amend the Federal Water Pollution Control Act to provide for the renewal of the quality of the Nation's waters, and for other purposes, pursuant to House Resolution 222, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the Committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. DELAY

Mr. DELAY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. DELAY. I am, Mr. Speaker, in its present form.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. DELAY moves to recommit the bill, H.R. 8, to the Committee on Public Works and Transportation.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. LUNGREN. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 340, noes 83, not voting 10, as follows:

[Roll No. 250]

□ 1730

Mr. HUNTER and Mr. ZSCHAU changed their votes from "aye" to "no."

Mr. LIVINGSTON changed his vote from "no" to "aye."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 8, WATER QUALITY RENEWAL ACT OF 1985

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill H.R. 8 the Clerk be authorized to correct section numbers, cross references, and the table of contents and make such other technical and conforming amendments as may be necessary to reflect the actions of the House in amending the bill H.R. 8.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HOWARD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1128) to amend the Clean Water Act, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1128

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Clean Water Act Amendments of 1985".

TITLE I—REGULATORY AMENDMENTS

AUTHORIZATION

SEC. 101. (a) Section 104(u)(1) of the Clean Water Act is amended by inserting immediately following "1982" the phrase ", and not to exceed $22,770,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

(b) Section 104(u)(2) of the Clean Water Act is amended by inserting immediately following "1982" the phrase ", and not to exceed $3,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

(c) Section 104(u)(3) of the Clean Water Act is amended by striking "and" after "1981," and by inserting immediately following "1982" the phrase ", and not to exceed $1,500,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

(d) Section 106(a)(2) of the Clean Water Act is amended by striking "and" after "1981" and inserting in lieu thereof a comma and by inserting ", 1986, 1987, 1988, and 1989" immediately following "1982".

(e) Section 112(c) of the Clean Water Act is amended by striking "and" after "1981," and inserting immediately following "1982" the phrase ", and $7,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

(f) Section 314(c)(2) of the Clean Water Act is amended by striking "and" after "1981," and inserting immediately following "1982" the phrase ", and $30,000,000 per fiscal year for fiscal years 1986, 1987, 1988, and 1989".

(g) Section 517 of the Clean Water Act is amended by striking "and" after "1981," and inserting immediately following "1982" the phrase ", and $160,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

SMALL FLOWS CLEARINGHOUSE

SEC. 102. Section 104(q) of the Clean Water Act is amended by adding the following new paragraph:

"(4) Notwithstanding section 205(d) of this Act, from funds that are set aside by States under section 205(i) of this Act and not obligated by the end of the twenty-four month period provided under section 205(d), the Administrator shall award a grant under this section in the amount of $1,000,000 or such unobligated amount, whichever is less, in each year, to support a National Clearinghouse to collect and disseminate information on small flows and innovative or alternative technologies, consistent with paragraph (3).".

COMPLIANCE DATES

SEC. 103. (a) Section 301(b)(2)(C) of the Clean Water Act is amended by striking "not later than July 1, 1984," and inserting immediately after "of this paragraph" the following: "as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than July 1, 1988".

(b) Section 301(b)(2)(E) of the Clean Water Act is amended by striking "not later than July 1, 1984," and inserting in lieu thereof "as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than July 1, 1988, compliance with".

(c) Section 301(b)(2)(F) of the Clean Water Act is amended by striking "not" after "subparagraph (A) of this paragraph" and inserting in lieu thereof "as expeditiously as practicable but in no case", and by striking "or not later than July 1, 1984," through the end of the sentence and inserting in lieu thereof "and in no case later than July 1, 1988".

(d) Section 301(b) of the Clean Water Act is amended by adding the following new paragraph:

"(3)(A) for effluent limitations under paragraph (1)(A)(i) of this subsection promulgated after January 1, 1982, and requiring a level of control substantially greater or based on fundamentally different control technology than under permits for such industrial category issued before such date, compliance as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than July 1, 1988; and

"(B) for any effluent limitation in accordance with paragraph (1)(A)(i), (2)(A)(i), or (2)(E) of this subsection established only on the basis of section 402(a)(1) in a permit issued after enactment of the Clean Water Act Amendments of 1985, compliance as expeditiously as practicable but in no case later than three years after the date such limitations are established, and in no case later than July 1, 1988.".

OCEAN WAIVER

SEC. 104. (a) Section 301(h)(5) of the Clean Water Act is amended to read as follows:

"(5) sources introducing waste into such treatment works are in compliance with all applicable pretreatment requirements and the applicant has assured continued compliance with such requirements and, in the case of any treatment works serving a population of five thousand or more, the applicant has adopted and is enforcing a program to control the entrance of toxic pollutants from industrial sources into such treatment works, comparable to that required by section 402(b)(8);".

(b) Section 301(h) of the Clean Water Act is amended by—

(1) in paragraph (7), striking the period immediately after "the permit" and inserting in lieu thereof a semicolon.

(2) adding immediately after paragraph (7) the following new paragraph:

"(8) the applicant at the time such modification becomes effective will be discharging effluent which has received at least primary or equivalent treatment. For the purposes of this paragraph, "primary or equivalent treatment" means treatment by screening, sedimentation, and skimming adequate to remove at least 30 per centum of the biological oxygen demanding material and of the suspended solids in the treatment works influent, and disinfection, where appropriate.";

(3) in that portion of subsection (h) following new paragraph (8) as added by this Act,

(A) adding immediately after the first sentence thereof the following new sentence: "Such marine waters must exhibit characteristics assuring that water providing dilution does not contain significant amounts of previously discharged effluent from such treatment works."; and

(B) adding at the end thereof the following: "No permit issued under this subsection shall authorize the discharge of any pollutant into saline estuarine waters which at the time of application do not support a balanced indigenous population of shellfish, fish and wildlife, or allow recreation in and on the waters or which exhibit ambient water quality below applicable water quality standards adopted for the protection of public water supplies, shellfish, fish and wildlife or recreational activities or such other standards necessary to assure support and protection of such uses. The prohibition contained in the preceding sentence shall apply without regard to the presence or absence of a causal relationship between such characteristics and the applicant's current or proposed discharge.".

(c) Section 301(j)(1)(A) of the Clean Water Act is amended by inserting before the semicolon the following: ", except that a publicly owned treatment works which prior to December 31, 1982, had a contractural arrangement to use a portion of the capacity of an ocean outfall operated by another publicly owned treatment works which has applied for or received a modification under subsection (h) of this section, may apply for a modification under subsection (h) in its own right not later than thirty days after the enactment of the Clean Water Act Amendments of 1985".

MODIFICATION FOR NONCONVENTIONAL POLLUTANTS

SEC. 105. (a) Section 301(g)(1) of the Clean Water Act is amended by striking all preceding "upon a showing by the owner or operator" and inserting in lieu thereof "The Administrator, with the concurrence of the State, may modify the requirements of subsection (b)(2)(A) of this section with respect to the discharge from any point source of ammonia, chlorine, color, iron, or total phenols (4AAP) (when determined by the Administrator to be a nonconventional pollutant under this Act)".

(b) Section 301(g) of the Clean Water Act is amended by adding the following new paragraphs:

"(3) The Administrator may evaluate pollutants subject to this subsection prior to the enactment of the Clean Water Act Amendments of 1985, and if the Administrator determines that for one or more pollutants satisfactory test methods and data are available to make the determination required by paragraph (1), may recommend to the Congress the inclusion of such pollutants under this subsection.

"(4) Any request for a modification under this subsection shall be deemed to have been denied, if not approved by final agency action within one year after submission to the Administrator.

"(5) The amendment made to this subsection by the Clean Water Act Amendments of 1985 shall apply to all modification requests under this subsection pending on the date of enactment of the Clean Water Act Amendments of 1985. Such amendment to this subsection shall not have the effect of extending or reopening the deadline established in section 301(j)(1)(B).".

(c) Section 301(j)(2) of the Clean Water Act is amended by inserting after the first sentence thereof the following: "An application for a modification under subsection (g) shall not stay the applicant's obligation to comply with effluent limitations for all pollutants not the subject of an application for modification, and nothing in this section shall preclude the Administrator (or the State as appropriate) from issuing a permit containing effluent limitations for all pollutants not subject to a stay under this subsection pending a final decision on the request for a modification.".

(d) Section 301(g)(1) is amended by inserting "(1)" immediately after "subsection (b)(2)(A)".

FUNDAMENTALLY DIFFERENT FACTORS

SEC. 106. (a) Section 301 of the Clean Water Act is amended by adding the following new subsections:

"(n)(1) The Administrator, with the concurrence of the State, may establish an alternative requirement under subsection (b)(2) or section 307(b) for a facility that modifies the requirements of national effluent limitation guidelines or categorical pretreatment standards that would otherwise be applicable to such facility, if the owner or operator of such facility demonstrates to the satisfaction of the Administrator that—

"(A) the facility is fundamentally different with respect to the factors (other than cost) specified in section 304 (b) or (g) and considered by the Administrator in establishing such national effluent limitation guidelines or categorical pretreatment standards;

"(B) the application is based solely on information and supporting data submitted to the Administrator during the rulemaking for establishment of the applicable national effluent limitation guidelines or categorical pretreatment standard specifically raising the factors that are fundamentally different for such facility;

"(C) the alternative requirement is no less stringent than justified by the fundamental difference; and

"(D) the alternative requirement will not result in a non-water quality environmental impact which is markedly more adverse than the impact considered by the Administrator in establishing such national effluent limitation guideline or categorical pretreatment standard.

"(2)(A) an application for an alternative requirement under this subsection shall be submitted to the Administrator not later than one hundred twenty days after the publication of the final effluent limitation guideline or categorical pretreatment standard in the Federal Register. The Administrator shall deny any application that is not complete, without providing an opportunity for reapplication.

"(B) an application for an alternative requirement under this subsection shall be deemed to have been denied, if not approved by final agency action within two hundred forty days after submission to the Administrator.

"(C) for the purposes of this subsection, an application for an alternative requirement based on fundamentally different factors which is pending on the date of enactment of the Clean Water Act Amendments of 1985 shall be deemed to have been submitted to the Administrator thirty days after such date of enactment.

"(3) An application for an alternative requirement under this subsection shall not stay the applicant's obligation to comply with the effluent limitation guideline or categorical pretreatment standard which is the subject of the application.

"(4) The authority of this subsection shall apply only to those primary industrial categories identified in the permit regulations issued under section 402 as of the date of enactment of the Clean Water Act Amendments of 1985.

"(o) The Administrator shall prescribe and collect from each applicant fees reflecting the reasonable administrative costs incurred in reviewing and processing applications for modifications submitted to the Administrator pursuant to section 301 (c), (g), (h), (i), (m), and (n), section 304(d)(4), and section 316(a) of this Act. All amounts collected by the Administrator under this subsection shall be deposited into miscellaneous receipts of the Treasury.".

(b) Section 301(l) of the Clean Water Act is amended by striking "The" and inserting in lieu thereof "Other than as provided in subsection (n) of this section, the".

WATER QUALITY-BASED EFFLUENT LIMITATIONS AFTER BAT ATTAINMENT

SEC. 107. (a) Section 305 of the Clean Water Act is amended by adding the following new subsection:

"(c) Each State shall prepare and submit to the Administrator and the Congress within two years after the enactment of the Clean Water Act Amendments of 1985, and revise biennially thereafter, an identification of—

"(1) those waters within or adjacent to such State which after the application of effluent limitations required under section 301(b)(2) of this Act cannot reasonably be anticipated to attain or maintain (A) water quality standards for such waters reviewed, revised or adopted in accordance with section 303(c)(2)(B) of this Act, due to toxic pollutants, or (B) that water quality which shall assure protection of public health, public water supplies, agricultural and industrial uses, and the protection and propagation of a balanced population of shellfish, fish and wildlife, and allow recreational activities in and on the water; and

"(2) those waters within or adjacent to such State which are public water supplies or otherwise important to public health protection, or which have a high quality use designation, and which because of such use and current or potential pollution are of high priority to such State.

In the case of any State which fails to submit the identification required by paragraph (1), or which submits an incomplete identification, the Administrator shall promptly prepare an identification in accordance with paragraph (1).".

(b) Section 304(a) of the Clean Water Act is amended by adding the following new paragraphs:

"(7) The Administrator, after consultation with appropriate State agencies and on the basis of criteria and information published under paragraphs (1) and (2) of this subsection, shall develop and publish, within nine months after the date of enactment of the Clean Water Act Amendments of 1985, guidance to the States on performing the identification required by section 305(c)(1) of this Act.

"(8) The Administrator, after consultation with appropriate State agencies and within two years after the date of enactment of the Clean Water Act Amendments of 1985, shall develop and publish information on methods for establishing and measuring water quality criteria for toxic pollutants on other bases than pollutant-by-pollutant criteria, including biological monitoring and assessment methods.".

(c) Section 303(c)(2) of the Clean Water Act is amended by inserting "(A)" after "(2)" and by adding the following new subparagraph:

"(B) Whenever a State reviews water quality standards pursuant to paragraph (1) of this subsection, or revises or adopts new standards pursuant to this paragraph, such

State shall adopt criteria for all toxic pollutants listed pursuant to section 307(a)(1) of this Act, the discharge or presence of which in the affected waters could reasonably be expected to interfere with those designated uses adopted by the State, as necessary to support such designated uses. Such criteria shall be specific numerical criteria for such toxic pollutants and in addition may include criteria based on biological monitoring or assessment methods consistent with information published pursuant to section 304(a)(8). Particular attention shall be given to toxic pollutants which are highly persistent in the environment, bioaccumulative, or known or suspected carcinogens, mutagens, or teratogens. Nothing in this section shall be construed to limit or delay the use of effluent limitations or other permit conditions based on or involving biological monitoring or assessment methods or previously adopted numerical criteria.".

(d) Section 303(d) of the Clean Water Act is amended by adding the following new paragraph:

"(4) Not later than two years after the submittal of the identification required by section 305(c)(1) of this Act, each State shall establish effluent limitations for point sources discharging into each portion of the navigable waters identified under section 305(c)(1)(A) as necessary to attain applicable water quality standards, taking into account any substantial nonpoint source contributions of toxic pollutants and existing or planned controls on all sources. Such effluent limitations shall be incorporated into permits under section 402 of this Act, which shall provide for compliance as expeditiously as practicable, but in no event later than three years after the establishment of such effluent limitation.".

(e)(1) Section 302(a) of the Clean Water Act is amended by (1) inserting after "in the judgment of the Administrator" the phrase ", or as identified under section 305(c)"; and (2) inserting after "protection of" the phrase "public health,".

(2) Section 302(b) of the Clean Water Act is amended to read as follows:

"(b)(1) Prior to establishment of any effluent limitation pursuant to subsection (a) of this section, the Administrator shall publish such proposed limitation and within ninety days of such publication hold a public hearing.

"(2)(A) The Administrator, with the concurrence of the State, may issue a permit which modifies the effluent limitations required by subsection (a) of this section for pollutants other than toxic pollutants, if the applicant demonstrates at such hearing that (whether or not technology or other alternative control strategies are available) there is no reasonable relationship between the economic and social costs and the benefits to be obtained (including attainment of the objective of this Act) from achieving such limitation.

"(B) The Administrator, with the concurrence of the State, may issue a permit which modifies the effluent limitations required by subsection (a) of this section for toxic pollutants for a single period not to exceed five years, if the applicant demonstrates to the satisfaction of the Administrator that such modified requirements (1) will represent the maximum degree of control within the economic capability of the owner and operator of the source, and (2) will result in reasonable further progress beyond the requirements of section 301(b)(2) toward the requirements of subsection (a) of this section.".

(f) Section 304 of the Clean Water Act is amended by adding the following new subsection:

"(l) Within twelve months of the date of enactment of the Clean Water Act Amendments of 1985, and biennially thereafter, the Administrator shall publish in the Federal Register a plan which shall:

"(A) establish a schedule for the annual review and revision of promulgated effluent guidelines, in accordance with subsection (b) of this section;

"(B) identify categories of sources discharging toxic or nonconventional pollutants for which guidelines under subsection (b)(2) of this section and section 306 have not previously been published; and

"(C) establish a schedule for promulgation of effluent guidelines for categories identified in subparagraph (B), under which promulgation of such guidelines shall be no later than four years after the date of enactment for categories identified in the first published plan or three years after the publication of the plan for categories identified in later published plans.

"(2) The Administrator shall provide for public review and comment on the plan prior to final publication.".

INDIRECT DISCHARGE OF CONVENTIONAL POLLUTANTS

SEC. 108. Section 402 of the Clean Water Act is amended by adding at the end thereof the following new subsection:

"(m) In issuing a permit under this section, the Administrator shall not require pretreatment by dischargers of conventional pollutants identified pursuant to section 304(b)(4) of this Act as a substitute for municipal treatment adequate to meet the requirements of a permit issued under this section for a treatment works (as defined in section 212 of this Act) which is publicly owned if such discharger is in compliance with all applicable requirements of local pretreatment programs approved under subsection (b)(8) of this section. Nothing in this subsection shall affect the Administrator's authority under sections 307 and 309 of this Act, affect State and local authority under sections 307(b)(4) and 510 of this Act, relieve such treatment works of its obligations to meet requirements established under this Act, or preclude such works from pursuing whatever feasible options are available to meet its responsibility to comply with its permit under this section.".

CIVIL AND CRIMINAL PENALTIES

SEC. 109. (a) Section 309(d) is amended by—

(1) inserting ", or any requirement imposed in a pretreatment program approved under section 402(a)(3) and (b)(8) of this Act," immediately after "section 404 of this Act by a State";

(2) deleting "$10,000 per day of such violation" and substituting "$25,000 per day for each violation";

(3) adding the following at the end thereof: "In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.".

(b) No State shall be required to modify a permit program approved or submitted under section 402 of the Clean Water Act as a result of the amendment made by subsection (a) of this section before July 1, 1987.

(c) Section 404(s) of the Clean Water Act is amended by striking paragraph (4), by redesignating paragraph (5) as paragraph (4), and in redesignating paragraph (4), by—

(1) deleting "$10,000 per day of such violation" and substituting "$25,000 per day for each violation";

(2) adding the following at the end thereof: "In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.".

(d) Section 309 of the Clean Water Act is amended by adding a new subsection (g) as follows:

"(g)(1) ADMINISTRATIVE PENALTIES.—In addition to any other relief provided, whenever on the basis of any information available the Administrator finds that any person has violated section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or has violated any permit condition or limitation implementing any of such sections in a permit issued under sections 402 of this Act by him or by a State, or in a permit issued under section 404 by a State, or any requirement imposed in a pretreatment program approved under section 402 (a)(3) and (b)(8) of this Act, the Administrator may, after notice to the State in which the violation occurs, issue an order assessing a civil penalty of not more than $10,000 per day for each violation, up to a maximum administrative penalty of $125,000. In addition to any other relief provided, whenever on the basis of any information available the Secretary of the Army finds that any person has violated any permit condition or limitation in a permit issued under section 404 of this Act by the Secretary of the Army, the Secretary may, after notice to the State in which the violation occurs, issue an order assessing a civil penalty of not more than $10,000 per day for each violation, up to a maximum administrative penalty of $125,000.

"(2) The authority provided in paragraph (1) of this subsection shall expire on September 30, 1990.

"(3) PROCEDURE.—(A) A civil penalty assessed by the Administrator or the Secretary of the Army under this subsection shall be by an order made after opportunity (provided in accordance with this subparagraph) for a hearing. Before issuing the order, the Administrator or the Secretary of the Army shall give to the person to be assessed a civil penalty written notice of the Administrator's or Secretary's proposal to issue such order and the opportunity to request, within thirty days of the date the notice is received by such person, a hearing on the proposed order. Such hearing shall not be subject to section 554 or 556 of title 5, United States Code, but shall provide a reasonable opportunity to be heard and to present evidence.

"(B) The Administrator or the Secretary of the Army shall provide public notice of and reasonable opportunity to comment on any proposed assessment.

"(C) Any citizen who comments on a proposed assessment under subparagraph (B) shall be given notice of any hearing held under this subsection and of any order assessing a penalty. In any hearing held under subparagraph (A), such citizen shall have a reasonable opportunity to be heard and to present evidence. If no hearing is held prior to issuance of the order assessing the penal-

ty, then upon presentation by such citizen, within thirty days of issuance of the order, of evidence that such order was inadequate or improper, the Administrator or the Secretary of the Army shall set aside such order immediately and provide a hearing in accordance with subparagraph (A) on the proposed order.

"(D) Any order issued under this subsection shall become final thirty days following its issuance unless an appeal is taken pursuant to paragraph (6) or the order is set aside pursuant to subparagraph (C).

"(4) CONTENT OF ORDER.—In determining the amount of a civil penalty, the Administrator or the Secretary of the Army shall take into account the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.

"(5) EFFECT OF ORDER.—(A) Action taken by the Administrator or the Secretary of the Army pursuant to this subsection shall not affect or limit the Administrator's or Secretary's authority to enforce any provision of this Act: *Provided, however,* That any violation with respect to which the Administrator or the Secretary of the Army has commenced and is diligently prosecuting an action under this subsection, or for which the Administrator or the Secretary of the Army has issued a final order not subject to further judicial review and the violator paid a penalty assessed under this subsection, shall not be the subject of a civil penalty action under section 309(d), section 311(b), or section 505 of this Act: *Provided further,* That the foregoing limitation on civil penalty actions under section 505 of this Act shall not apply with respect to any violation for which (i) a civil action under section 505(a)(1) of this Act has been filed prior to commencement of an action under this subsection, or (ii) a notice of violation under section 505(b)(1) of this Act has been given prior to commencement of an action under this subsection and an action under section 505(a)(1) of this Act is filed prior to 120 days after such notice is given.

"(B) Nothing in this subsection shall change the procedures now existing under other subsections of section 309 of this Act for issuance and enforcement of orders by the Administrator.

"(C) No action by the Administrator or the Secretary of the Army pursuant to this subsection shall affect any person's obligation to comply with any section of this Act or with the terms and conditions of any permit issued pursuant to section 402 or 404 of this Act.

"(6) JUDICIAL REVIEW.—Any person against whom a civil penalty order is issued or who commented on a proposed assessment pursuant to paragraph (3) may file an appeal of such order in the United States district court for the District of Columbia or in the district in which the violation is alleged to have occurred. This appeal may only be filed within the thirty-day period beginning on the date the civil penalty order is issued. Appellant shall simultaneously send a copy of the appeal by certified mail to the Administrator or the Secretary of the Army and to the Attorney General. The Administrator or the Secretary of the Army shall promptly file in such court a certified copy of the record on which the order was issued. The district court shall not set aside or remand such order unless there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or unless the Administrator's or Secretary's assessment of the penalty constitutes an abuse of discretion and shall not impose additional civil penalties for the same violation unless the Administrator's or Secretary's assessment of the penalty constitutes an abuse of discretion.

"(7) COLLECTION.—If any person fails to pay an assessment of a civil penalty—

"(A) after an order is final under paragraph (3), or

"(B) after a court in an action brought under paragraph (6) has entered a final judgment in favor of the Administrator or the Secretary of the Army,

the Administrator or the Secretary of the Army shall request the Attorney General to bring a civil action in an appropriate district court to recover the amount assessed (plus costs, attorneys' fees, and interest at currently prevailing rates from the date of the final order or the date of such final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review.

"(8) SUBPOENA.—The Administrator or the Secretary of the Army may, in connection with administrative proceedings under this subsection, issue subpoenas compelling the attendance and testimony of witnesses and subpoenas duces tecum, and may request the Attorney General to bring an action to enforce any subpoena under this section. The district courts shall have jurisdiction to enforce such subpoenas and impose sanctions.".

(e) Section 309(c) of the Clean Water Act is amended to read as follows:

"(c)(1) Any person who (A) negligently violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(a)(3) and (b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, or who (B) negligently introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage, or, other than in compliance with all applicable Federal, State or local requirements or permits, causes such treatment works to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of this Act by the Administrator or a State, shall be punished by a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than one year, or by both.

"(2) Any person who (A) knowingly violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(a)(3) and (b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, or who (B) knowingly introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage, or, other than in compliance with all applicable Federal, State or local requirements or permits, causes such treatment works to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of this Act by the Administrator or a State, shall be punished by a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than three years, or by both.

"(3)(A) Any person who knowingly violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, and who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment of not more than fifteen years, or both. A defendant that is an organization shall, upon conviction of violating this subparagraph, be subject to a fine of not more than $1,000,000.

"(B) For the purpose of subparagraph (A) of this paragraph—

"(i) In determining whether a defendant who is a natural person knew that his conduct placed another person in imminent danger of death or serious bodily injury—

"(I) the person is responsible only for actual awareness or actual belief that he possessed; and

"(II) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant:

Provided, That in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information.

"(ii) It is an affirmative defense to prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—

"(I) an occupation, a business, or a profession; or

"(II) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent. The defendant may establish an affirmative defense under this subparagraph by a preponderance of the evidence.

"(iii) The term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons.

"(iv) The term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

"(4) Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this Act

or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this Act, shall upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or by both.

"(5) If a conviction is for a violation of paragraph (1), (2), (3), or (4) of this subsection committed after a first conviction of such person under the same paragraph, the maximum punishment under the respective paragraph shall be doubled with respect to both fine and imprisonment.

"(6) For the purpose of paragraphs (1), (2), (3), and (4) the term 'person' shall mean, in addition to the definition contained in section 502(5) of this Act, any responsible corporate officer.

"(7) For the purpose of paragraphs (1) and (2), the term 'hazardous substance' shall mean (A) any substance designated pursuant to section 311(b)(2)(A) of this Act, (B) any element, compound, mixture, solution, or substance designated pursuant to section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act has been suspended by Act of Congress), (D) any toxic pollutant listed under section 307(a) of this Act, and (E) any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act.".

"(8) Whenever any action is brought under this section in a court of the United States, the plaintiff shall provide a copy of the complaint to the Attorney General of the United States and to the Administrator. No consent judgment shall be entered in an action brought under this section in which the United States is not a party prior to forty-five days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator.

"(9) The Secretary shall prepare and submit a report to the Congress, not later than December 1, 1987, which shall examine and analyze various enforcement mechanisms for use by the Secretary, including an administrative civil penalty mechanism. Such report shall also examine, in consultation with the Comptroller General, the efficacy of the Secretary's existing enforcement authorities, and shall make recommendations for improvements in their operation.".

PARTIAL NPDES PROGRAM APPROVAL

SEC. 110. (a) Section 402(b) of the Clean Water Act is amended by—

(1) inserting ", or part of a permit program in accordance with paragraph (10) of this subsection," immediately after "its own permit program" in the first full sentence; and

(2) adding at the end thereof the following new paragraph:

"(10) In the event a Governor submits a plan to administer part of a permit program, the Administrator may approve such plan upon a showing that—

"(A)(i) the plan provides for administration of permit program components which represent a significant and identifiable part of the State program authorized by this section; and

"(ii) the plan provides for and the State agrees to make all reasonable efforts to assume administration of the remainder of the program by a specified future date not to exceed five years from submission of the State's initial plan; or

"(B)(i) the plan provides for administration of a permit program for one or more discharge categories such as Federal facilities, municipal or industrial categories, or any other category of dischargers which represent a significant and identifiable part of the permit program in the State; and

"(ii) the plan covers all categories of discharges under the jurisdiction of the State agency or department responsible for administering the plan and represents a complete permit program for all categories of discharges contained in the plan. For purposes of the preceding sentence, 'a complete permit program,' means one for which adequate authority exists to carry out each of the activities listed in paragraphs (1) through (9) of this subsection.".

(b) Section 402(c)(1) of the Clean Water Act is amended by striking "as to those navigable waters" and inserting in lieu thereof "as to those activities and discharges".

(c) Section 402(c) of the Clean Water Act is amended by adding a new paragraph (4) as follows:

"(4) In the event a determination is made (A) by a State to return administration of the program to the Administrator or (B) by the Administrator to withdraw approval pursuant to paragraph (3) of this subsection, return of administration or withdrawal of approval may only be made of the entire program currently being administered by the State.".

JUDICIAL REVIEW AND AWARD OF FEES

SEC. 111. (a) Section 509(b)(1) of the Clean Water Act is amended by (1) striking the phrase "transacts such business" and inserting in lieu thereof, "transacts business which is directly affected by such action"; and (2) striking "ninety" and "ninetieth" and inserting in lieu thereof "one hundred and twenty" and "one hundred and twentieth", respectively.

(b) Section 509(b) of the Clean Water Act is amended by adding at the end thereof the following new paragraphs:

"(3)(A) If applications for review of the same agency action have been filed under paragraph (1) of this subsection in two or more Circuit Courts of Appeals of the United States and the Administrator has received written notice of the filing of one or more applications within thirty days or less after receiving written notice of the filing of the first application, then the Administrator shall promptly advise in writing the Administrative Office of the United States Courts that applications have been filed in two or more Circuit Courts of Appeals of the United States, and shall identify each court for which he has written notice that such applications have been filed within thirty days or less of receiving written notice of the filing of the first such application. Pursuant to a system of random selection devised for this purpose, the Administrative Office thereupon shall, within three business days of receiving such written notice from the Administrator, select the court in which the record shall be filed from among those identified by the Administrator. Upon notification of such selection, the Administrator shall promptly file the record in such court. For the purpose of review of agency action which has previously been remanded to the Administrator, the record shall be filed in the Circuit Court of Appeals of the United States which remanded such action.

"(B) Where applications have been filed under paragraph (1) of this subsection in two or more Circuit Courts of Appeals of the United States with respect to the same agency action and the record has been filed in one of such courts pursuant to paragraph (3)(A), the other courts in which such applications have been filed shall promptly transfer such applications to the Circuit Court of Appeals of the United States in which the record has been filed. Pending selection of a court pursuant to paragraph (3)(A), any court in which an application has been filed under paragraph (1) of this subsection may postpone the effective date of the agency action until fifteen days after the Administrative Office has selected the court in which the record shall be filed.

"(C) Any court in which an application with respect to any agency action has been filed under paragraph (1) of this subsection, including any court selected pursuant to paragraph (3)(A), may transfer such application to any other Circuit Court of Appeals of the United States for the convenience of the parties or otherwise in the interest of justice.

"(4) In any judicial proceeding under this subsection, the court may award costs of litigation (including reasonable attorney and expert witness fees) to any prevailing or substantially prevailing party whenever it determines that such award is appropriate.".

(c) Section 505(d) of the Clean Water Act is amended by inserting "prevailing or substantially prevailing" before "party" in the first sentence thereof.

NONPOINT SOURCE POLLUTION

SEC. 112. (a) Title III of the Clean Water Act is amended by adding the following new section:

"NONPOINT SOURCE POLLUTION MANAGEMENT PROGRAM

"SEC. 319. (a)(1) Each State, by itself or in combination with adjacent States, shall, after notice and opportunity for public comment, submit to the Administrator, within eighteen months after the date of enactment of the Clean Water Act Amendments of 1985, a proposed nonpoint source pollution management program which shall—

"(A) identify those waters within its boundaries which without additional action to control nonpoint sources of pollution cannot reasonably be expected to attain or maintain (i) applicable water quality standards, or (ii) the goals and requirements of the Act;

"(B) designate categories or subcategories of nonpoint sources of pollutants or, where appropriate, particular nonpoint sources, that contribute significant pollution loadings to the waters identified under subparagraph (A);

"(C) identify best management practices which will be undertaken to reduce pollutant loadings resulting from each category, subcategory or particular nonpoint source designated under subparagraph (B), taking into account the impact of the proposed practice on ground water quality;

"(D) identify programs (including, as appropriate, nonregulatory or regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, and demonstration projects) to achieve implementation of the best management practices by the categories, subcategories, and particular nonpoint sources designated under subparagraph (B);

"(E) include a schedule containing annual milestones for (i) utilization of the program

implementation methods identified in subparagraph (D), and (ii) implementation of the best management practices identified in subparagraph (C) by the categories, subcategories, or particular nonpoint sources designated under subparagraph (B). Such schedule shall provide for utilization of the program implementation methods and implementation of best management practices at the earliest practicable date;

"(F)(i) include a statement from the attorney general of such State or States (for the attorney for those State water pollution control agencies which have independent legal counsel) that the laws of such State or States, as the case may be, provide adequate authority to carry out the described program, or what additional authorities would be necessary to do so, and (ii) if this statement identifies additional needed authorities, include a schedule and commitment by the State to seek such authorities as expeditiously as practicable; and

"(G) include an identification of Federal financial assistance programs and Federal development projects for which the State will review individual assistance applications or development projects for their effect on water quality pursuant to the procedures set forth in Executive Order 12372 as in effect on September 17, 1983, to determine whether such assistance applications or development projects would be consistent with and further the purposes and objectives of the program prepared under this subsection. For the purposes of this paragraph, identification shall not be limited to the assistance programs or development projects subject to the Executive Order 12372 but may include any programs listed in the most recent Catalog of Federal Domestic Assistance which may have an effect on the purposes and objectives of the State's nonpoint source pollution management program.

"(2) In developing the nonpoint source management program required by this section, the State (A) may rely upon information developed pursuant to sections 208, 303(e), 304(f), 305(b), and 314, and other information as appropriate, and (B) may utilize appropriate elements of the waste treatment management plans developed pursuant to section 208(b), to the extent such elements are consistent with and fulfill the requirements of this section.

"(3) In developing and implementing the management program described in this subsection, a State may make use of local agencies or organizations.

"(b)(1) Within six months of the date of receipt of a proposed nonpoint source management program, the Administrator shall, after notice and opportunity for public comment, make a determination whether the State's proposed management program meets the requirements of subsection (a)(1) of this section.

"(2) If the Administrator determines that the proposed management program does not meet the requirements of subsection (a)(1) of this section, he shall within six months of receipt of the proposed program notify the State of any revisions or modifications necessary to obtain approval. The State shall thereupon have an additional three months to submit its revised management program and the Administrator shall approve or disapprove such revised program within three months of receipt.

"(3) Pursuant to paragraph (1) or (2) of this subsection, the Administrator shall approve those State management programs that he determines meet the requirements of subsection (a)(1) of this section.

"(4) If the Administrator fails to approve the State management program pursuant to paragraph (1) of this subsection or fails to notify the State of necessary revisions pursuant to paragraph (2) of this subsection within six months of receipt of the State program, or if he fails to approve or disapprove the program pursuant to paragraph (2) of this subsection within three months of receipt of the revised program, the program shall be deemed to have been approved by the Administrator.

"(c) If a State fails to submit a nonpoint source pollution management program that the Administrator determines meets the requirements of subsection (a)(1) of this section, the Administrator shall notify such State, and within thirty months after the date of enactment of the Clean Water Act Amendments of 1985, after consultation with appropriate Federal and State agencies and other interested persons, carry out the requirements of subsections (a)(1) (A) and (B) of this section for such State. Upon completion of this requirement, the Administrator shall report to Congress on his actions pursuant to this section.

"(d)(1) The Administrator shall award grants, subject to such terms and conditions as the Administrator considers appropriate, to assist States in the implementation of management programs which have been approved pursuant to subsection (b) of this section. Such grants shall not exceed 75 per centum of the costs of implementing the program in any fiscal year and shall be made on condition that non-Federal sources provide at least 25 per centum of the costs that receive funding under this subsection.

"(2)(A) Two-thirds of the funds appropriated in any fiscal year for grants under this section shall be made available for allotment to the several States in accordance with the following table:

State	Percentage allotment
Alabama	1.56
Alaska	.50
Arizona	1.95
Arkansas	1.43
California	6.37
Colorado	2.19
Connecticut	.68
Delaware	.50
District of Columbia	.50
Florida	2.66
Georgia	2.04
Hawaii	.50
Idaho	1.20
Illinois	4.03
Indiana	2.07
Iowa	2.39
Kansas	2.78
Kentucky	1.32
Louisiana	1.56
Maine	.55
Maryland	1.03
Massachusetts	1.25
Michigan	2.67
Minnesota	2.43
Mississippi	1.40
Missouri	2.44
Montana	2.46
Nebraska	2.26
Nevada	1.78
New Hampshire	.50
New Jersey	1.62
New Mexico	1.93
New York	4.22
North Carolina	1.90
North Dakota	2.14
Ohio	3.14
Oklahoma	2.05
Oregon	1.75
Pennsylvania	2.97
Rhode Island	.50
South Carolina	1.09
South Dakota	1.94
Tennessee	1.50
Texas	8.08
Utah	1.36
Vermont	.50
Virginia	1.60
Washington	1.58
West Virginia	.60
Wisconsin	1.90
Wyoming	1.39
Guam	.10
Northern Marianas	.10
Pacific Trust Territories	.10
Puerto Rico	.72
Samoa	.10
Virgin Islands	.10
Total	100.00

"(B) One-third of the funds appropriated in any fiscal year for grants under this section shall be made available to the Administrator who shall make grants in response to applications from States if the Administrator determines such grants are necessary and appropriate to assist such States in—

"(i) controlling particularly difficult or serious nonpoint source pollution problems, including, but not limited to, problems resulting from mining activities;

"(ii) implementing innovative methods or practices for controlling nonpoint sources of pollution, including both regulatory or nonregulatory programs where the Administrator deems appropriate;

"(iii) controlling interstate nonpoint source pollution problems;

"(iv) assessing the relationship between nonpoint source pollution and ground water contamination; or

"(v) providing financial assistance for implementation by an Indian tribe, within the reservation, of an approved management program: *Provided*, That any such Indian tribe shall be subject to all terms and conditions of this section applying to a State. Financial assistance to any one reservation under this clause shall not exceed one-third of 1 per centum of the total amount appropriated for grants for each year.

"(3) The funds allotted to the States pursuant to paragraph (2)(A) of this subsection for a fiscal year shall remain available for obligation for the fiscal year for which appropriated. The amount of any such allotments not obligated by the end of such fiscal year and any unobligated funds remaining under paragraph (2)(B) of this subsection shall be reallotted by the Administrator for the next fiscal year on the basis of the table in paragraph (2)(A).

"(4) States may use funds from grants made pursuant to this section for financial assistance to persons only to the extent that such assistance is related to the costs of demonstration projects.

"(5) No grant shall be made to a State under this section unless the Administrator determines, on the basis of information provided by the State and from other relevant sources, that the State is implementing the program satisfactorily in terms of the requirements and objectives of this section.

"(6) No grant shall be made under this section to any State in any fiscal year in which the expenditure of non-Federal funds by such State for purposes comparable to the activities assisted by this section are less than the average level of such expenditures

in the two fiscal years of such State next preceding the date of enactment of the Clean Water Act Amendments of 1985.

"(7) The Administrator may request such information, data, and reports as he may deem necessary to make the determination of continuing eligibility for grants under this section.

"(8) For the purpose of this section, there are authorized to be appropriated, to remain available until expended, $70,000,000 for the fiscal year ending September 30, 1986, $100,000,000 for the fiscal year ending September 30, 1987, and $130,000,000 for the fiscal year ending September 30, 1988.

"(e) Each State shall report to the Administrator on an annual basis concerning (1) its progress in meeting the schedule of milestones submitted pursuant to subsection (a)(1)(E) of this section, and (2) to the extent that appropriate information is available, reductions in nonpoint source pollutant loading and improvements in water quality resulting from implementation of the management program.

"(f) The Administrator shall—

"(1) transmit to the Office of Management and Budget and the appropriate Federal departments and agencies a list of those assistance programs and development projects identified by each State under subsection (a)(1)(G) for which individual assistance applications and projects will be reviewed pursuant to the procedures set forth in Executive Order 12372 as in effect on September 17, 1983. Beginning not later than sixty days after receiving notification by the Administrator, each Federal department and agency shall modify existing regulations to allow States to review individual development projects and assistance applications under the identified Federal assistance programs and shall accommodate, according to the requirements and definitions of Executive Order 12372, as in effect on September 17, 1983, the concerns of the State regarding the consistency of such applications or projects with the State nonpoint source pollution management program;

"(2) collect and make available, through publications and other appropriate means, information pertaining to management practices and implementation methods, including, but not limited to, (A) information concerning the costs and relative efficiencies of best management practices for reducing nonpoint source pollution; and (B) available data concerning the relationship between water quality and implementation of various management practices to control nonpoint sources of pollution; and

"(3) submit to the Congress, within thirty-six months of enactment of the Clean Water Act Amendments of 1985, a report which on the basis of information submitted by the States pursuant to subsections (a) and (e) of this section, and other information as appropriate:

"(A) describes the management programs being implemented by the States by types and amount of affected waters, categories and subcategories of nonpoint sources, and types of best management practices being implemented;

"(B) describes the experiences of the States in adhering to schedules and implementing best management practices;

"(C) describes the amount and purpose of grants awarded pursuant to subsection (d) of this section;

"(D) identifies, to the extent that information is available, the progress made in reducing pollutant loads and improving water quality in the waters of the United States; and

"(E) indicates what further actions need to be taken to attain and maintain in those waters (i) applicable water quality standards and (ii) the goals and requirements of the Act.".

(b) Section 304(k)(1) of the Clean Water Act is amended by inserting after the word "Act" the following: "and nonpoint source pollution management programs approved under section 319 of this Act.".

(c) Section 205(j) of the Clean Water Act is amended by adding the following new paragraph:

"(5) In addition to the sums reserved under paragraph (1), the Administrator shall reserve each fiscal year for each State 1 per centum of the sums allotted and available for obligation to such State under this section for each fiscal year beginning on or after October 1, 1986, or $100,000, whichever is greater, for the purpose of carrying out section 319 of this Act. Sums so reserved in a State in any fiscal year for which such State does not request the use of such sums, to the extent such sums exceed $100,000, may be used by such State for other purposes under this title.".

NATIONAL ESTUARY PROGRAM

SEC. 113. Title III of the Clean Water Act is amended by adding at the end thereof the following new section:

"NATIONAL ESTUARY PROGRAM

"SEC. 320. (a)(1) Whenever the Administrator determines that the attainment and maintenance of the chemical, physical, and biological integrity of an estuary requires the interstate or international control of sources of pollution to supplement existing controls, the Administrator shall convene, for a period not to exceed five years, an estuarine management conference, to—

"(A) assess trends in water quality, natural resources, and uses of the estuary;

"(B) collect, characterize, and assess data on toxics, nutrients, and natural resources within the estuarine zone to identify the causes of environmental problems;

"(C) develop the relationship between the inplace loads and point and nonpoint loadings of pollutants to the estuarine zone and the potential uses of the zone, water quality, and natural resources;

"(D) develop a comprehensive conservation and management plan that recommends priority corrective actions and compliance schedules addressing point and nonpoint sources of pollution to restore and maintain the chemical, physical, and biological integrity of the estuary, including restoration and maintenance of water quality, a balanced indigenous population of shellfish, fish and wildlife, and recreational activities in the estuary, and assure that the designated uses of the estuary are protected;

"(E) develop plans for the coordinated implementation of the plan by the States as well as Federal and local agencies participating in the conference;

"(F) monitor the effectiveness of actions taken pursuant to the plan; and

"(G) review any Federal financial assistance program or federal development project subject to the requirements of Executive Order 12372, as in effect on September 17, 1983, to determine whether such assistance program or project would be consistent with and further the purposes and objectives of any plan prepared under this section. For purposes of this subparagraph, these programs and projects shall not be limited to the assistance programs or development projects subject to Executive Order 12372, but may include any programs listed in the most recent Catalog of Federal Domestic Assistance which may have an effect on the purposes and objectives of any plan developed pursuant to this section.

"(b) The members of a management conference convened under this section shall include, at a minimum, the Administrator and representatives of—

"(1) each State and foreign nation located in whole or in part in the estuarine zone of the estuary for which the conference is convened;

"(2) international, interstate, or regional agencies having jurisdiction over all or a significant part of the estuary;

"(3) each interested Federal agency, as determined appropriate by the Administrator;

"(4) local governments within the estuarine zone, as determined appropriate by the Administrator; and

"(5) affected industries, public and private educational institutions and the general public in the estuarine zone.

"(c) Prior to developing a comprehensive conservation and management plan under this section, the management conferees shall survey and use existing reports, data, and studies as well as local master or regional plans relating to the estuary that have been developed by or made available to Federal, interstate, international, State, or local agencies.

"(d)(1) Not later than ninety days after the completion of a conservation and management plan, the Administrator shall, if the plan satisfies the purposes of this section and the affected Governor or Governors concur, approve such plan.

"(2) Upon approval of a conservation and management plan under this section, funds authorized to be appropriated under titles II and VI and section 319 of this Act may be used in accordance with the applicable requirements of this Act, to assist States with the implementation of such plan.

"(e) There are authorized to be appropriated to the Administrator not to exceed $12,000,000 per fiscal year for each of the fiscal years 1986, 1987, 1988, and 1989, for:

"(1) expenses related to the administration of management conferences under this section, not to exceed 10 per centum of the amount appropriated under this paragraph;

"(2) grants to State, interstate or regional water pollution control agencies for research, surveys, studies, monitoring, modeling, and other technical work necessary for the development of a conservation and management plan under this section: *Provided*, That such grants shall not exceed 75 per centum of the costs of such technical work and shall be made on condition that non-Federal sources provide at least 25 per centum of the costs that receive funding under this paragraph; and

"(3) the costs of monitoring the implementation of a conservation and management plan. Such monitoring shall be done by the management conference or, in any case in which the conference has expired or been terminated, by the Administrator.

The Administrator shall provide up to $5,000,000 per fiscal year of the sums authorized to be appropriated under this subsection to the Administrator of the National Oceanic and Atmospheric Administration to carry out tasks assigned under subsection (g).

"(f) Any State, interstate, or regional agency that receives a grant under subsection (e) shall report to the Administrator

not later than eighteen months after receipt of such grant and biennially thereafter on the progress being made under this section.

"(g)(1) In order to determine the need to convene a management conference under this section or at the request of such a management conference, the Administrator shall coordinate and implement, through the National Marine Pollution Program Office and the National Marine Fisheries Service of the National Oceanic and Atmospheric Administration, as appropriate, for one or more estuarine zones—

"(A) a long-term program of trend assessment monitoring measuring variations in pollutant concentrations, marine ecology, and other physical or biological environmental parameter which may affect estuarine zones, to provide the Administrator the capacity to determine the potential and actual effects of alternative management strategies and measures;

"(B) a program of ecosystem assessment assisting in the development of (i) baseline studies which determine the state of estuarine zones and the effects of natural and anthropogenic changes, and (ii) predictive models capable of translating information on specific discharges or general pollutant loadings within estuarine zones into a set of probable effects on such zones;

"(C) a comprehensive water quality sampling program for the continuous monitoring of nutrients, chlorine, acid precipitation dissolved oxygen, and potentially toxic pollutants (including organic chemicals and metals) in estuarine zones, after consultation with interested State, local, interstate, or international agencies and review and analysis of all environmental sampling data presently collected from estuarine zones; and

"(D) a program of research to identify the movements of nutrients, sediments and pollutants through estuarine zones and the impact of nutrients, sediments, and pollutants on water quality, the ecosystem, and designated or potential uses of the estuarine zones.

"(2) The Administrator, in cooperation with the Administrator of the National Oceanic and Atmospheric Administration, shall submit to the Congress no less often than biennially a comprehensive report on the activities authorized under this subsection including—

"(A) a listing of priority monitoring and research needs;

"(B) an assessment of the state and health of the Nation's estuarine zones, to the extent evaluated under this subsection;

"(C) a discussion of pollution problems and trends in pollutant concentrations with a direct or indirect effect on water quality, the ecosystem, and designated or potential uses of each estuarine zone, to the extent evaluated under this subsection; and

"(D) an evaluation of pollution abatement activities and management measures so far implemented to determine the degree of improvement toward the objectives expressed in subsection (a)(1)(D) of this section.

"(h) For the purposes of this section, the terms 'estuary' and 'estuarine zone' shall have the same meanings such terms have in section 104(n)(4) of this Act, except that the term 'estuarine zone' shall include those portions of tributaries draining into the estuary up to the historic height of migration of anadromous fish or the historic head of tidal influence, whichever is higher.".

STORMWATER RUNOFF FROM OIL AND GAS OPERATIONS

SEC. 114. Section 402(l) of the Clean Water Act is amended by inserting "(1)" after "(l)" and by adding the following new paragraph:

"(2) The Administrator shall not require a permit under this section nor impose effluent limitations, nor shall the Administrator directly or indirectly require any State to require such a permit or impose such limitations, for discharges of stormwater runoff from oil or gas exploration, production, processing, or treatment operations (including transmission pumping stations), composed entirely of flows from conveyances or systems of conveyances (including pipes, conduits, ditches, and channels) used for collecting and conveying precipitation runoff and not contaminated with process wastes, toxic pollutants, hazardous substances in excess of reportable quantities, or oil or grease in excess of reportable quantities.".

ANTI-BACKSLIDING

SEC. 115. (a) Section 402 of the Clean Water Act is amended by adding the following new subsection:

"(n) In the case of effluent limitations established on the basis of subsection (a)(1)(B) of this section, a permit may not be renewed, reissued or modified solely on the basis of effluent guidelines promulgated under section 304(b) subsequent to the original issuance of such permit, to contain effluent limitations which are less stringent than the comparable effluent limitations in the previous permit. If the source has installed the treatment facilities required to meet the effluent limitations in the previous permit and has properly operated and maintained the facilities but has nevertheless been unable to achieve the previous effluent limitations, the limitations in the renewed, reissued or modified permit may reflect the level of pollutant control actually achieved (but shall not be less stringent than required by effluent guidelines in effect at the time of permit renewal, reissuance or modification). In the case of effluent limitations established on the basis of section 301(b)(1)(C) or section 303 (d) or (e), a permit may be renewed, reissued, or modified on the basis of subsequently revised waste load allocations under section 303(d) to contain effluent limitations which are less stringent than the comparable effluent limitations in the previous permit only in compliance with section 303(d)(5).".

(b) Section 402(a)(1) of the Clean Water Act is amended by inserting "(A)" after "either" and by inserting "(B)" after "this Act, or".

(c) Section 303(d) of the Clean Water Act is amended by adding the following new paragraph:

"(5)(A) For waters identified in paragraph (1)(A) where the applicable water quality standard has not yet been attained, any effluent limitation based on a total maximum daily load or other waste load allocation established under this section may be revised only if (i) the cumulative effect of all such revised effluent limitations based on such total maximum daily load or waste load allocation will assure the attainment of such water quality standard, or (ii) the designated use which is not being attained is removed in accordance with regulations established under this section.

"(B) For waters identified in paragraph (1)(A) where the quality of such waters equals or exceeds levels necessary to protect the designated use for such waters, any effluent limitation based on a total maximum daily load or other waste load allocation established under this section, or other permitting standard, may be revised only if such revision is subject to and consistent with the antidegradation policy established under this section.".

STORMWATER DISCHARGES

SEC. 116. (a) Section 402 of the Clean Water Act is amended by adding the following new subsection:

"(o)(1) Following the date of enactment of the Clean Water Act Amendments of 1985 and prior to October 1, 1992, the Administrator or the State (in the case of a State with a permit program approved under section 402 of this Act) shall not require a permit under this section for discharges composed entirely of stormwater, other than (A) those associated with industrial activity or a municipal separate storm sewer, or (B) those for which the Administrator or the State determines that the stormwater discharge violates a water quality standard or is a significant contributor of pollutants to waters of the United States.

(2) Prior to October 1, 1988, the Administrator, in consultation with States with a permit program approved under section 402 of this Act, shall submit to the Congress the report of a study (i) to identify stormwater discharges or classes of stormwater discharges for which permits were not required pursuant to paragraph (1) of this subsection, and (ii) to determine, to the maximum extent practicable, the nature and extent of pollutants in such discharges. Prior to October 1, 1989, the Administrator, in consultation with States with a permit program approved pursuant to section 402 of this Act, shall submit to the Congress the report of a study setting forth procedures and methods to control stormwater discharges to the extent necessary to attain and maintain water quality standards.

SEWAGE SLUDGE

SEC. 117. (a) Section 405(d) of the Clean Water Act is amended by inserting "(1)" after "(d)", by striking "(1)", "(2)" and "(3)" and inserting in lieu thereof "(A)", "(B)" and "(C)", and by adding the following new paragraphs:

"(2)(A)(i) Not later than April 1, 1986, the Administrator shall identify those toxic pollutants which, on the basis of available information on their toxicity, persistence, concentration, mobility, or potential for exposure, may be present in sewage sludge in concentrations which may adversely affect public health or the environment, and propose regulations specifying acceptable management practices for sewage sludge containing each such toxic pollutant and establishing numerical limitations for each such pollutant for each use identified under paragraph (1)(A).

"(ii) Not later than March 1, 1987, and after opportunity for public hearing, the Administrator shall promulgate the regulations required by subparagraph (A)(i).

"(B)(i) Not later than February 1, 1987, the Administrator shall identify those toxic pollutants not identified under subparagraph (A)(i) which may be present in sewage sludge in concentrations which may adversely affect public health or the environment, and propose regulations specifying acceptable management practices for sewage sludge containing each such toxic pollutant and establishing numerical limitations for each pollutant for each such use identified under paragraph (1)(A).

"(ii) Not later than December 15, 1987, the Administrator shall promulgate the regulations required by subparagraph (B)(i).

"(C) The management practices and numerical criteria established under subpara-

graphs (A) and (B) shall be adequate to protect public health and the environment from any reasonably anticipated adverse effects of each pollutant. Such regulations shall require compliance no later than twelve months after their publication, unless such regulations require the construction of new pollution control technology, in which case the regulations shall require compliance as expeditiously as practicable but in no case later than two years from the date of their publication.

"(D) For purposes of this subparagraph, if, in the judgment of the Administrator, it is not feasible to prescribe or enforce a numerical limitation for a pollutant identified under this paragraph, the Administrator may instead promulgate a design, equipment, management practice, or operational standard, or combination thereof, which in the judgment of the Administrator is adequate to protect public health and the environment from any reasonably anticipated adverse effects of such pollutant.

"(E) Prior to the promulgation of the regulations required by subparagraphs (A) and (B), the Administrator shall impose conditions in permits issued to publicly owned treatment works under section 402 of this Act or take such other measures as the Administrator deems appropriate to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge.

"(F) Nothing in this section authorizes the establishment of any requirement or time for compliance which is less stringent than required by any other law.".

(b) Section 405(e) of the Clean Water Act is amended to read as follows:

"(e) The determination of the manner of disposal or use of sludge is a local determination, except that it shall be unlawful for any person to dispose of sludge from a publicly owned treatment works or any other treatment works treating primarily domestic sewage (but not including privately owned treatment works operated in conjunction with industrial manufacturing and processing facilities) for any use for which regulations have been established pursuant to subsection (d) of this section, except in accordance with such regulations.".

(c) Section 405 of the Clean Water Act is further amended by adding at the end thereof the following:

"(f)(1) Any permit issued under section 402 of this Act to a publicly owned treatment works or any other treatment works treating primarily domestic sewage (but not including privately owned treatment works operated in conjunction with industrial manufacturing and processing facilities) shall include requirements for the use and disposal of sludge that implement the regulations established pursuant to subsection (d) of this section, unless such requirements have been included in a permit issued under the appropriate provisions of subtitle C of the Solid Waste Disposal Act, part C of the Safe Drinking Water Act, the Marine Protection, Research and Sanctuaries Act of 1972, or the Clean Air Act, or under State permit programs approved by the Administrator, where the Administrator determines that such programs assure compliance with any applicable requirements of this section. Not later than December 15, 1985, the Administrator shall promulgate procedures for approval of State programs pursuant to this paragraph.

"(2) In the case of a treatment works described in paragraph (1) that is not subject to section 402 of this Act and to which none of the other above listed permit programs nor approved State permit authority apply, the Administrator may issue a permit to such treatment works solely to impose requirements for the use and disposal of sludge that implement the regulations established pursuant to subsection (d) of this section. The Administrator shall include in the permit appropriate requirements to assure compliance with the regulations established pursuant to subsection (d) of this section. The Administrator shall establish procedures for issuing permits pursuant to this paragraph.".

(d)(1) Section 308(a)(4) of the Clean Water Act is amended by inserting "405," before the phrase "and 504".

(2) Section 505(f) of the Clean Water Act is amended by striking "or" where it appears before "(6)", and inserting before the period a semicolon and the following: "or (7) a regulation under section 405(d) of this Act,".

(3) Section 509(b)(1)(E) of the Clean Water Act is amended by striking "or 306" and inserting in lieu thereof "306, or 405".

INTERSTATE DISPUTE RESOLUTION

SEC. 118. (a) Section 402(d)(2) of the Clean Water Act is amended by inserting "(A)" after "(2)", by striking "(A)" and "(B)" and inserting in lieu thereof "(i)" and "(ii)" respectively, and by adding the following subparagraph:

"(B) In the case of the failure of any State to accept the recommendations of another State whose waters may be affected by the issuance of a permit, submitted in accordance with subsection (b)(5), the Administrator shall determine within 90 days following written objection to the Administrator by the State whose recommendations were not accepted, whether any substantial violation of a water quality requirement (including any standard) of the affected State or adverse effect on public health of the affected State will result from the issuance of such permit. If the Administrator so determines, the Administrator shall object to the issuance of such permit or provide specific modifications to such permit. Any such determination shall be provided in writing to the affected State and such determination or such objection shall be reviewable in the appropriate Circuit Court of Appeals under section 509(b) of this Act as the issuance or denial of a permit under section 402.".

(b) Section 402(b)(1) of the Clean Water Act is amended by adding the following:

"(E) shall be reconsidered for termination or modification at any time a State other than that in which the source is located provides notice that the permitted discharge is causing a substantial violation of a water quality requirement (including any standard) of such State or adversely affecting the public health of such State and seeks a modification of such permit;".

(c) Section 511 of the Clean Water Act is amended by adding a new subsection (e) as follows:

"(e) Any State or municipality the water quality of which is adversely affected by pollutants from another State may petition the Administrator who, upon determining on the record after opportunity for Agency hearing pursuant to 5 U.S.C. 554, 556, and 557 that such pollution is causing a substantial violation of a water quality requirement (including any standard) of such State or adversely affecting the public health of such State, shall issue an order within 90 days restraining any person causing or contributing to such pollution or providing such other relief as is appropriate, taking into account the goals and requirements of this Act and other equitable considerations. In no case shall such order or other relief based solely on this subsection supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws. This subsection shall not apply in any case in which section 402(d)(2)(B) or section 402(b)(1)(F) is available, nor shall this subsection or section 402(d)(2)(B) or section 402(b)(1)(E) apply to any pollution which is subject to the Colorado River Basin Salinity Control Act, nor to any water pollution which results from emissions from mobile or stationary sources which are regulated under the Clean Air Act.".

PRESERVATION OF OTHER RIGHTS

SEC. 119. (a) Section 505(e) of the Clean Water Act is amended by inserting "(1)" after "(e)" and by adding the following new paragraphs:

"(2) Nothing in this Act shall affect or modify in any way the liabilities of any person under other Federal statutes for damages caused by noncompliance with any requirement of this Act or any permit issued under this Act.

"(3) In any case involving the application of State common or statutory law to an instance where a discharge of pollutants arising in another State is alleged to have an adverse effect on the public health or welfare or the attainment of any water quality requirement of such State or municipality, a State or municipality shall be considered a citizen of such State for the purpose of filing an action in, or seeking removal to, a Federal district court to section 1332 of title 28, United States Code.".

(b) The amendments made by this section shall not apply in any dispute involving claims of interstate water pollution, wherein a State or municipality is the defending party, which is pending as of the enactment of this Act (or has been finally adjudicated), and on which the Supreme Court of the United States has rendered a decision.

AD VALOREM TAX DEDICATION

SEC. 120. For the purposes of complying with section 204(b)(1) of the Clean Water Act, the ad valorem tax user charge system of the Town of Hampton, New Hampshire, shall be deemed to have been dedicated as of December 27, 1977. The Administrator of the Environmental Protection Agency shall review such ad valorem tax user charge system for compliance with the remaining requirements of section 204(b)(1) and related regulations of the Agency.

LIMITATION ON DISCHARGE OF RAW SEWAGE BY NEW YORK CITY

SEC. 121. (a)(1) If the wastewater treatment plant identified in the consent decree as the North River plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1986, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any thirty-day period than an amount equal to thirty times the average daily amount of raw sewage discharged from such drainage area during the twelve-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1986 (as determined by the Administrator of the Environmental Protection Agency), except as provided in subsection (b).

(2) If the wastewater treatment plant identified in the consent decree as the Red Hook plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1987, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any thirty-day period than an amount equal to thirty times the average daily amount of raw sewage discharged from such drainage area during the twelve-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1987 (as determined by the Administrator of the Environmental Protection Agency), except as provided in subsection (b).

(b)(1) In the event of any significant interruption in the operation of the North River plant or the Red Hook plant caused by an event described in subparagraph (A), (B), or (C) of paragraph (5) occurring after the applicable deadline established under subsection (a), the Administrator of the Environmental Protection Agency shall waive the limitation of subsection (a) with respect to such plant, but only to such extent and for such limited period of time as may be reasonably necessary for the city of New York to resume operation of such plant.

(2) In the event that the volume of precipitation occurring after the applicable deadline established under subsection (a) causes the discharge of raw sewage to exceed the limitation under subsection (a), the Administrator of the Environmental Protection Agency shall waive the limitation of subsection (a) with respect to either or both such plants, but only to such extent and for such limited period of time as the Administrator determines to be necessary to take into account the increased discharge caused by such volume of precipitation.

(3) In the event that an increase in discharges from the North River drainage area constituting a violation of subsection (a)(1) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1986, is not responsible for such violation, the Administrator of the Environmental Protection Agency shall waive the limitation of subsection (a)(1), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(4) In the event that an increase in discharges from the Red Hook drainage area constituting a violation of subsection (a)(2) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1987, is not responsible for such violation, the Administrator of the Environmental Protection Agency shall waive the limitation of subsection (a)(2), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(5) The Administrator of the Environmental Protection Agency shall extend either deadline under paragraph (1) or (2) of subsection (a) to such extent and for such limited period of time as may be reasonably required to take into account any—

(A) act of war,

(B) unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight, or

(C) other circumstances beyond the control of the city of New York, such circumstances not to include (i) the unavailability of Federal funds under section 201 of the Federal Water Pollution Control Act, (ii) the unavailability of funds from the city of New York or the State of New York, or (iii) a policy decision made by the city of New York or the State of New York to delay the achievement of advanced preliminary treatment at the North River plant or Red Hook plant beyond the applicable deadline in subsection (a).

(c) Except as otherwise provided in subsection (b), any violation of subsection (a) shall be considered to be a violation of section 301 of the Federal Water Pollution Control Act, and all provisions of such Act relating to violations of such section 301 shall apply.

(d) For purposes of this section, the "consent decree" is the consent decree entered into by the Environmental Protection Agency, the city of New York, and the State of New York, on December 30, 1982, relating to construction and operation of the North River and Red Hook wastewater treatment plants.

(e) The Administrator of the Environmental Protection Agency shall work with the city of New York to eliminate the discharge of raw sewage by such city at the earliest practicable date.

(f) Nothing in this section shall be construed as modifying the terms of the consent decree.

(g) It is the sense of the Congress that the Administrator of the Environmental Protection Agency should not agree to any further modification of the consent decree with respect to the schedule for achieving advanced preliminary treatment.

(h)(1) The provisions of this section shall remain in effect with respect to the North River drainage area until such time as the North River plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(2) The provisions of this section shall remain in effect with respect to the Red Hook drainage area until such time as the Red Hook plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(i) The Administrator of the Environmental Protection Agency shall promptly establish and carry out a program for the monitoring activities which may be required under subsection (a). The Administrator of the Environmental Protection Agency shall establish the methodologies, data base, and any other information required for making determinations under subsection (b) for the North River drainage area (as defined in the consent decree) by July 31, 1986, unless the requirements of subsection (h)(1) have been satisfied, and for the Red Hook drainage area (as defined by the consent decree) by July 31, 1987, unless the requirements of subsection (h)(2) have been satisfied. In carrying out such program, if the Administrator finds that a violation of subsection (a) has occurred, the Administrator shall also determine, within thirty days after such finding, whether a provision of subsection (b) applies. If the Administrator requires information from the city of New York in order to determine whether a provision of subsection (b) applies, the Administrator shall request such information. If the city of New York does not supply the information requested by the Administrator, the Administrator shall determine that subsection (b) does not apply. The city of New York shall be responsible only for such expenses as are necessary to provide such requested information. Enforcement action pursuant to subsection (c) shall be commenced at the end of such thirty days unless a provision of subsection (b) applies.

CHESAPEAKE BAY

SEC. 122. Title I of the Clean Water Act is amended by adding at the end thereof the following new section:

"CHESAPEAKE BAY

"SEC. 117. (a) The Administrator shall continue the Chesapeake Bay Program and shall establish and maintain in the Environmental Protection Agency an Office, Division, or Branch of Chesapeake Bay Programs to—

"(1) collect and make available, through publications and other appropriate means, the results of and other information pertaining to research and other activities that address the environmental quality of the Chesapeake Bay (hereinafter 'the Bay');

"(2) coordinate all Federal research projects pertaining to the Bay;

"(3) conduct research to determine the impact of sediment deposition in the Bay and to identify the sources, rates, routes, and distribution patterns of such sediment deposition; and

"(4) conduct research on the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships between such changes. Particular emphasis shall be placed on researching the impact of pollutant loadings of nutrients, chlorine, acid precipitation, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals. Special attention shall be given to the impact of such changes on the striped bass.

"(b)(1) The Administrator shall, at the request of the Governor of a State affected by the interstate management plan developed pursuant to the Chesapeake Bay Program (hereinafter 'the plan'), make a grant for the purpose of implementing the management mechanisms contained in the plan if such State has, within one year after the date of enactment of the Clean Water Act Amendments of 1985, approved and committed to implement all or substantially all aspects of the plan. Payments for such purpose may be made to the States as hereinafter provided, subject to such terms and conditions as the Administrator considers appropriate.

"(2) A State or combination of States may elect to avail itself of the benefits of this subsection by submitting to the Administrator a comprehensive proposal to implement management mechanisms contained in the plan which shall include (A) a description of proposed abatement actions which the State commits to take within a specified time period to reduce pollution in the Bay and to meet applicable water quality standards, and (B) the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of this Act and will contribute to the achievement of the national goals set forth in section 101(a) of this Act he shall approve such proposal and shall finance the costs of implementing segments of such proposal; except that Federal grants under this subsection shall not exceed 55 per centum of

the costs of implementing the plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the plan during such fiscal year.

"(3) Administrative costs in the form of salaries, overhead or indirect costs for services provided and charged against programs or projects supported by funds made available under this subsection shall not exceed in any one fiscal year 10 per centum of the annual Federal grant made to a State under this subsection.

"(c) Any State or combination of States that receives a grant under subsection (b) shall, within eighteen months after the date of receipt of a Federal grant under subsection (b) and biennially thereafter, report in conjunction with the Administrator to the Congress on progress made in implementing the interstate management plan developed pursuant to the Chesapeake Bay Program.

"(d) There are hereby authorized to be appropriated the following sums, to remain available until expended, to carry out the purposes of this section:

"(1) $3,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, to carry out subsection (a); and

"(2) $10,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, to carry out subsection (b).".

GREAT LAKES

SEC. 123(a). Title I of the Clean Water Act is further amended by adding the following new section:

"GREAT LAKES

"SEC. 118. (a) DEFINITIONS.—For the purposes of this section, the term—

"(1) 'Agency' means the Environmental Protection Agency;

"(2) 'Great Lakes' means Lake Ontario, Lake Erie, Lake Huron (including Lake St. Clair), Lake Michigan, and Lake Superior, and the connecting channels (Saint Mary's River, Saint Clair River, Detroit River, Niagara River, and Saint Lawrence River to the Canadian Border);

"(3) 'Great Lakes System' means all the streams, rivers, lakes, and other bodies of water within the drainage basin of the Great Lakes;

"(4) 'Program Office' means the Great Lakes National Progam Office established by this section; and

"(5) 'Research Office' means the Great Lakes Research Office established by subsection (d).

"(b) GREAT LAKES NATIONAL PROGRAM OFFICE.—The Great Lakes National Program Office (previously established by the Administrator) is hereby established within the Agency. The Program Office shall be headed by a Director who, by reason of management experience and technical expertise relating to the Great Lakes, is highly qualified to direct the development of programs and plans on a variety of Great Lakes issues. The Great Lakes National Program Office shall be located in a Great Lakes State.

"(c) GREAT LAKES MANAGEMENT.—(1) The Program Office shall—

"(A) in cooperation with appropriate Federal, State, tribal, and international agencies, and in accordance with section 101(e) of this Act, develop and implement specific action plans to carry out the responsibilities of the United States under the Great Lake Waters Quality Agreement of 1978;

"(B) establish a Great Lakes system-wide surveillance network to monitor the water quality of the Great Lakes, with specific emphasis on the monitoring of toxic pollutants; and

"(C) serve as the liaison with, and provide information to, the Canadian members of the International Joint Commission and the Canadian counterpart to the Agency.

"(2) The Program Office shall develop, in consultation with the states, a five-year plan and program for reducing the amount of nutrients introduced into the Great Lakes. Such program shall incorporate any management program for reducing nutrient runoff from nonpoint sources established under section 319 of this Act and shall include a program for monitoring nutrient runoff into, and ambient levels in, the Great Lakes.

"(3) The Program Office shall carry out a five year study and demonstration projects relating to the control and removal of toxic pollutants in the Great Lakes, with emphasis on the removal of toxic pollutants from bottom sediments.

"(4) To the extent practicable, the Agency's annual budget submission to Congress, shall include a funding request for the Program Office as a separate budget line item.

"(5) Within ninety days after the end of each fiscal year, the Administrator shall submit to the Congress a comprehensive report which—

"(A) describes the achievements in the preceding fiscal year in implementing the Great Lakes Water Quality Agreement of 1978 and shows by categories (including judicial enforcement, research, State cooperative efforts, and general administration) initiatives in such preceding fiscal year;

"(B) describes the progress made in such preceding fiscal year in implementing the system of surveillance of the water quality in the Great Lakes system, including the monitoring of groundwater and sediment, with particular reference to toxic pollutants;

"(C) describes the long-term prospects for improving the condition of the Great Lakes; and

"(D) provides a comprehensive assessment of the planned efforts to be pursued in the succeeding fiscal year for implementing the Great Lakes Water Quality Agreement of 1978. The assessment shall show by categories the amount anticipated to be expended on Great Lakes water quality initiatives in the fiscal year to which the assessment relates. The assessment shall also include a report of current programs administered by other Federal agencies which make available resources to the Great Lakes management efforts.

"(d) GREAT LAKES RESEARCH.—

"(1) There is established within the National Oceanic and Atmospheric Administration the Great Lakes Research Office.

"(2) the Research Office shall identify issues relating to the Great Lakes resources on which research is needed. The Research Office shall submit a report on such issues prior to the end of each fiscal year which shall identify any changes in the Great Lakes system with respect to such issues.

"(3) The Research Office shall identify and inventory Federal, State, university, and tribal environmental research programs, and to the extent feasible, those of private organization and other nations, relating to the Great Lakes system, and shall update that inventory every four years.

"(4) The Research Office shall establish a Great Lakes research exchange for the purpose of facilitating the rapid identification, acquisition, retrieval, dissemination, and use of information concerning research projects which are on-going or completed and which affect the Great Lakes System.

"(5) The Research Office shall develop, in cooperation with the Program Office, a comprehensive environmental research program and data base for the Great Lakes System. The data base shall include, but not be limited to, data relating to water quality, fisheries, and biota.

"(6) The Research Office shall conduct, through the Great Lakes Environmental Research Laboratory, the National Sea Grant College Program, and other Federal laborites, and the private sector, appropriate research and monitoring activities which address priority issues and current needs relating to the Great Lakes.

"(7) The Great Lakes Research Office shall be located in a Great Lakes State.

"(e) RESEARCH AND MANAGEMENT COORDINATION.—

"(1) Prior to October 1 of each year, the Program Office and the Research Office shall prepare a joint research plan for the fiscal year which begins the following calendar year.

"(2) Each plan prepared under paragraph (1) shall—

"(A) identify all proposed research dedicated to activities conducted under the Great Lakes Water quality Agreement of 1978;

"(B) include the Agency's assessment of priorities for research needed to fulfill the terms of such agreement; and

"(C) identify all proposed research that may be used to develop a comprehensive environmental data base for the Great Lakes System and establish priorities for development of such data base.

"(f) INTERAGENCY COOPERATION.—The head of each department, agency, or other instrumentality of the Federal Government which is engaged in, is concerned with, or has authority over programs relating to research, monitoring, and planning to maintain, enhance, preserve, or rehabilitate the environmental quality and natural resources of the Great Lakes, including the Chief of Engineers of the Army, the Chief of the Soil Conservation Service, the Commandant of the Coast Guard, the Director of the Fish and Wildlife Service, and the Administrator of the National Oceanic and Atmospheric Administration shall submit an annual report to the Administrator with respect to the activities of that agency or office affecting compliance with the Great Lakes Water Quality Agreement of 1978.

"(g) RELATIONSHIP TO EXISTING FEDERAL AND STATE LAWS AND INTERNATIONAL TREATIES.—Nothing contained in this section shall be construed to affect the jurisdiction, powers, or prerogatives of any department, agency, or officer of the Federal Government or of any State government, or of any tribe, nor any powers, jurisdiction, or prerogatives of international bodies created by treaty with authority relating to the Great Lakes.

"(h) AUTHORIZATIONS OF GREAT LAKES APPROPRIATIONS.—There are authorized to be appropriated to carry out this section not to exceed $10,000,000 per fiscal year for the fiscal years 1986, 1987, 1988, 1989 and 1990. Of such amounts as are appropriated each fiscal year—

"(1) 50 per centum shall be used for the Great Lakes National Program Office demonstration projects on the feasibility of controlling and removing toxic pollutants;

"(2) 7 per centum shall be used for the Great Lakes National Program Office's program of nutrient monitoring; and

"(3) 30 per centum shall be used for the Great Lakes Research Offices.".

(b) Section 517 of the Clean Water Act is amended by inserting "118," immediately after "115".

CLEAN LAKES

SEC. 124. Section 314(a) of the Clean Water Act is amended to read as follows:

"(a)(1) Each State shall prepare a report on a biennial basis which shall include—

"(A) an identification and classification according to eutrophic condition of all publicly owned lakes in such State;

"(B) a list and description of those publicly owned lakes for which uses are known to be impaired, including those lakes which are known to not meet applicable water quality standards, or which require implementation of protection programs to maintain compliance with applicable standards; and

"(C) a description of the State programs and methods to control sources of pollution of lakes and protect the quality of lakes.

"(2) The report provided for in paragraph (1) shall be included in the report required under section 305(b) of this Act.

"(3) A State must submit a report in accord with paragraph (1) in order to receive a grant under this section.".

LAKE PEND OREILLE STUDY

SEC. 125. The Administrator shall conduct a comprehensive study of the causes of increasing pollution in Lake Pend Oreille and its tributaries. In such study, the Administrator shall attempt to identify any upstream or local permitted or other discharges and the source of such discharges. In conducting this study, the Administrator should take into account any previous studies that will assist in carrying out the provisions of this subsection, and report to Congress the findings and recommendations of the study.

CONSTRUCTION AND OPERATION OF LOG TRANSFER FACILITIES

SEC. 126. (a) Not later than October 12, 1985, the Administrator and the Secretary of the Army shall enter into an agreement to designate a lead agency and to process permits required under section 402 and section 404 of the Clean Water Act, where both such sections apply, for discharges associated with the construction and operation of log transfer facilities.

(b) The requirements of sections 301(a) and 402(a) of the Clean Water Act shall be stayed until October 12, 1985, or until an agreement is entered into under subsection (a), whichever is earlier, for discharges associated with such facilities, except discharges of dredged or fill material.

(c) Such agreement shall be developed to assure that, to the maximum extent practicable, duplication, needless paperwork and delay in the issuance of permits, and inequitable enforcement between and among facilities in different States, shall be eliminated.

(d) Where both sections 402 and 404 of that Act apply, log transfer facilities that have received a permit under section 404 of that Act prior to the date of enactment of this section shall not be required to submit a new application for a permit under section 402 of this Act. If the Administrator determines that the terms of an existing permit under section 404 of that Act satisfies the applicable requirements of sections 301, 302, 306, 307, 308, and 403 of that Act, a separate application for a permit under section 402 shall not be required. In any case where the Administrator demonstrates, after an opportunity for a hearing, that the terms of an existing, permit under section 404 of that Act do not satisfy the applicable requirements of sections 301, 302, 306, 307, 308, and 403 of that Act, modifications to the existing permit under section 404 of that Act to incorporate such applicable requirements shall be issued by the Administrator as an alternative to issuance of a separate new permit under section 402 of that Act.

(e) For the purpose of this section, the term "log transfer facility" means a facility which is constructed in whole or in part in waters of the United States, and which is utilized for the purpose of transferring commercially harvested logs to or from a vessel or log raft, including the formation of a log raft.

TITLE II—CONSTRUCTION GRANT AMENDMENTS

CONSTRUCTION GRANT AUTHORIZATION

SEC. 201. (a) Section 207 of the Clean Water Act is amended by striking out the period at the end thereof and adding the following: "; and to carry out this title, other than sections 206(e), 208, and 209, subject to such amounts as are provided in appropriation Acts, for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, not to exceed $2,400,000,000; and for each of the fiscal years ending September 30, 1989, and September 30, 1990, not to exceed $1,200,000,000.".

(b) Section 205(e) of the Clean Water Act is amended by striking, ", 1979, 1980, 1981, 1982, 1983, 1984, and 1985" in the first and second sentences and inserting in each place in lieu thereof "through 1994".

ALLOCATION

SEC. 202. Section 205(c) of the Clean Water Act is amended by adding the following new paragraphs:

"(3) Sums authorized to be appropriated pursuant to section 207 for the fiscal years 1986, 1987, and 1988 shall be allotted for each such year by the Administrator not later than the tenth day which begins after the date of enactment of the Clean Water Act Amendments of 1985. Sums authorized for such fiscal years shall be allotted in accordance with the following table:

States:

Alabama	.012442
Alaska	.007321
Arizona	.012442
Arkansas	.008002
California	.061966
Colorado	.009785
Connecticut	.012442

CHICAGO TUNNEL AND RESERVOIR PROJECT

SEC. 203. Section 201(g)(1) of the Clean Water Act is amended by adding the following sentence: "The Chicago tunnel and reservoir project may receive grants under the previous sentence without regard to the limitation contained therein, if the Administrator determines that such project meets the cost-effectiveness requirements of sections 217 and 218 without any redesign or reconstruction, and the Governor of the affected State demonstrates to the satisfaction of the Administrator the water quality benefits of such project.".

ELIGIBILITIES AFTER 1990

SEC. 204. (a) Section 202(a)(1) of the Clean Water Act is amended by striking out the period at the end thereof and adding the following: ", for any such grants made before October 1, 1990.".

(b) Section 204(c) of the Clean Water Act is amended by inserting "awarded a grant before October 1, 1990," after the words "such facility and interceptors".

(c) Section 205(g)(1) of the Clean Water Act is amended by striking "October 1, 1985" and inserting in lieu thereof "October 1, 1994".

DESIGN/BUILD PROJECTS

SEC. 205. Section 203 of the Clean Water Act is amended by adding at the end thereof the following new subsection:

"(f)(1) An applicant from a State allowing use of this subsection who proposes to construct waste water treatment works may enter into an agreement with the Administrator under this subsection providing for the preparation of construction plans and specifications and the erection of such treatment works, in lieu of proceeding under the other provisions of this section.

"(2) Agreements under this subsection shall be limited to projects which are, under an approved facility plan:

"(A) treatment works that have an estimated total cost of $8,000,000 or less; and

"(B) any of the following types of waste water treatment systems: aerated lagoons, trickling filters, stabilization ponds, land application systems, sand filters, and subsurface disposal systems.

"(3) An agreement entered into under this subsection shall—

"(A) set forth an amount agreed to as the maximum Federal contribution to the project, based upon a competitively bid document of basic design data and applicable standard construction specifications and a determination of the federally eligible costs of the project at the applicable Federal share under section 202 of this Act;

"(B) set forth dates for the start and completion of construction of the treatment works by the applicant and a schedule of payments of the Federal contribution to the project;

"(C) contain assurances by the applicant that (i) engineering and management assistance will be provided to manage the project; (ii) the proposed treatment works will be an operable unit and will meet all the requirements of this title; and (iii) not later than one year after the date specified as the date of completion of construction of the treatment works, the treatment works will be operating so as to meet the requirements of any applicable permit for such treatment works under section 402 of this Act;

"(D) require the applicant to obtain a bond from the contractor in an amount determined necessary by the Administrator to protect the Federal interest in the project; and

"(E) contain such other terms and conditions as are necessary to assure compliance with this title (except as provided in paragraph (4) of this subsection).

"(4) Subsections (a), (b), and (c) of this section shall not apply to grants made pursuant to this subsection.

"(5) The Administrator shall reserve a portion of the grant to assure contract compliance until final project approval as defined by the Administrator. If the amount agreed to under paragraph (3)(A) exceeds the cost of designing and constructing the treatment works, the Administrator shall reallot the amount of the excess to the State in which such treatment works are located for the fiscal year in which such audit is completed.

"(6) Not more than 25 percent of the amount allotted to a State for any fiscal year under section 205 of this Act shall be obligated for grants pursuant to this subsection.

"(7) The Administrator will determine an allowance for facilities planning for projects constructed under this subsection in accordance with section 201(l).

"(8) In any case in which the recipient of a grant made pursuant to this subsection does not comply with the terms of the agreement entered into under paragraph (3), the Administrator is authorized to take such action as may be necessary to recover the appropriate amount of the Federal contribution to the project.

"(9) A recipient of a grant made pursuant to this subsection shall not be eligible for any other grants under this title.".

INNOVATIVE AND ALTERNATIVE PROJECTS

SEC. 206. Section 205(i) of the Clean Water Act is amended to read as follows:

"(i) Not less than one-half of 1 per centum of funds allotted to a State for each of the fiscal years ending September 30, 1979, through September 30, 1990, under subsection (c) of this section shall be expended only for increasing the Federal share of grants for construction of treatment works utilizing innovative processes and techniques pursuant to section 202(a)(2) of this Act. Including the expenditures authorized by the preceding sentence, a total of 2 per centum of the funds allotted to a State for each of the fiscal years ending September 30, 1979, and September 30, 1980, and 3 per centum of the funds allotted to a State for the fiscal year ending September 30, 1981, under subsection (c) of this section shall be expended only for increasing grants for construction of treatment works pursuant to section 202(a)(2) of this Act. Including the expenditures authorized by the first sentence of this subsection, a total (as determined by the Governor of the State) of not less than 4 per centum nor more than 7½ per centum of the funds allotted to such State under subsection (c) of this section for each of the fiscal years ending September 30, 1982, through September 30, 1990, shall be expended only for increasing the Federal share of grants for construction of treatment works pursuant to section 202(a)(2) of this Act.".

MARINE CSO'S AND ESTUARIES

SEC. 207. Section 205 of the Clean Water Act is amended by adding the following new subsection:

"(l) The Administrator shall reserve each fiscal year beginning after September 30, 1985, 1 per centum (during fiscal years 1986, 1987, and 1988) or 1½ per centum (during fiscal years 1989 and 1990) of the sums appropriated under section 207, prior to allotment among the States under subsection (c) of this section. Of the sums reserved under this subsection, two-thirds shall be available to address water quality problems of marine bays and estuaries subject to lower levels of water quality due to the impacts of discharges from combined storm water and sanitary sewer overflows from adjacent urban complexes, and one-third shall be available for the implementation of section 320 of this Act. Sums so reserved shall be subject to the period of availability for obligation established under subsection (d) of this section.".

INDIAN TRIBES

SEC. 208. (a) Title II of the Clean Water Act is amended by adding the following new section:

"INDIAN TRIBES

"SEC. 220. (a) The Administrator, in cooperation with the Director of the Indian Health Service, shall assess the need for sewage treatment works to serve Indian tribes, the degree to which such needs will be met through funds allotted to States under section 205 of this Act and priority lists in accordance with section 216 of this Act, and any obstacles which prevent such needs from being met. The Administrator shall submit a report to the Congress for such assessment no later than one year after the enactment of the Clean Water Act Amendments of 1985.

"(b) Beginning with fiscal year 1987, the Administrator is authorized to reserve each fiscal year up to one-half of one per centum of the sums appropriated under section 207, prior to allotment among the States under section 205(e), based on the determination of unmet needs reported under subsection (a). Sums reserved under this subsection shall be available for grants to provide sewage treatment works to serve Indian tribes.

"(c) The Administrator is authorized to make special provision for the treatment of Indian tribes under this title, including the treatment of Indian tribes as States to the degree necessary to carry out the purposes of this section. Such special provision may include the direct provision of funds reserved under subsection (b) to the governing bodies of Indian tribes, and the determination of priorities by Indian tribes, where not determined by the Administrator in cooperation with the Director of the Indian Health Service. The Administrator is authorized to reduce the non-Federal share otherwise required under section 202 with respect to Indian tribes, as determined by the Administrator in cooperation with the Director of the Indian Health Service.".

(b) Section 502 of the Clean Water Act is amended by adding the following new paragraph:

"(20) the term 'Indian tribe' means any Indian tribe, band, nation, or other organized group or community (including any Alaska Native village, as defined in section

113(g), but not including any Alaska Native regional or village corporation) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.".

STATE WATER POLLUTION CONTROL REVOLVING FUNDS

SEC. 209. The Clean Water Act is amended by adding at the end thereof the following new title:

"TITLE VI—GRANTS FOR WATER POLLUTION CONTROL REVOLVING FUNDS

"AUTHORIZATION, ALLOTMENT, AWARD, AND PAYMENT

"SEC. 601. (a) There are hereby authorized to be appropriated the following sums to carry out the purposes of this title:

"(1) $1,200,000,000 per fiscal year for the fiscal years 1989 and 1990;

"(2) $2,400,000,000 for the fiscal year 1991;

"(3) $1,800,000,000 for the fiscal year 1992;

"(4) $1,200,000,000 for the fiscal year 1993; and

"(5) $600,000,000 for the fiscal year 1994.

"(b) For fiscal years 1989 and 1990, sums appropriated to carry out this title for each fiscal year shall be allotted by the Administrator in accordance with section 205(c) of this Act.

"(c) Sums allotted to the States for a fiscal year shall be available for a grant award under subsection (d) during the fiscal year for which authorized. The amount of any allotment not obligated by the end of such fiscal year shall be immediately reallotted by the Administrator on the basis of the same ratio as is applicable to sums allotted under title II of this Act for the next fiscal year, except that none of the funds reallotted by the Administrator will be allotted to any State which failed to obligate any of the funds being reallotted.

"(d) If a State has entered into a grant agreement with the Administrator as provided in section 602 of this title, the Administrator is authorized to make a capitalization grant to the State from funds available for obligation under this title.

"(e) From funds obligated for a given fiscal year pursuant to subsection (d) of this section, quarterly installment payments shall be made in accordance with the schedule of payments established under section 602(b)(2) of this title.

"(f) If the Administrator determines that a State has not complied with agreements under section 602, or requirements of this title, the Administrator shall notify the State of such noncompliance and the necessary corrective action. If the State does not take such corrective action by the sixtieth day after the date the State receives notice, the Administrator shall withhold additional payments to the State until the Administrator is satisfied that the State has taken the necessary corrective action.

"(g) If the Administrator is not satisfied that adequate corrective actions have been taken by the State within twelve months of the notice provided under subsection (f) of this section, the payments withheld by the Administrator shall be made available for reallotment under subsection (c) of this section.

"CAPITALIZATION GRANT AGREEMENTS WITH STATES

"SEC. 602. (a) To receive a capitalization grant under this title, a State shall enter into an agreement with the Administrator which shall include but not be limited to the specifications set forth in subsection (b) of this section.

"(b) The Administrator shall enter into an agreement with a State only after the State has established to the satisfaction of the Administrator that—

"(1) the State has established a Water Pollution Control Revolving Fund, as defined in section 603 of this title;

"(2) the State has agreed to accept grant payments under this title in accordance with a payment schedule established by the Administrator, and has agreed to deposit all such payments in the dedicated revolving fund;

"(3) the State has deposited in the fund or has agreed to deposit in the fund, from State moneys, an amount equal to at least 15 per centum of the total of all capitalization grants, so that such necessary matching deposits are made no later than the date of each grant payment under the provisions of paragraph (2) of this subsection;

"(4) the State has agreed to make binding loan commitments in an amount equal to 100 per centum of the amount of the grant payments within one year of the receipt of the quarterly payment of such funds;

"(5) the State has made adequate assurances through submission of an intended use report under section 604(c) of this title that (A) all funds available in the Water Pollution Control Revolving Fund will be committed in an expeditious and timely manner, (B) treatment works projects that are constructed in whole or in part prior to fiscal year 1995 with funds directly made available by capitalization grants under this title or section 205(m) to the State Water Pollution Control Revolving Fund will meet the same requirements applicable to grant projects funded under title II, and (C) such funds will first be used to assure maintenance of progress in the completion of all projects needed to meet the enforceable deadlines, goals, and requirements of this Act;

"(6) in addition to meeting the requirements of this title, the State has made assurances that it will commit or expend the payments so received in accordance with laws and procedures applicable to the commitment or expenditure of revenue of the State;

"(7) in carrying out the requirements of section 604 of this title, the State will use accounting, audit, and fiscal procedures conforming to generally accepted government accounting standards;

"(8) the State will require as a condition of making a loan that recipients will maintain project accounts in accordance with generally accepted government accounting standards; and

"(9) the State will make annual reports to the Administrator on the actual use of funds in accordance with section 604(d) of this title.

"STATE WATER POLLUTION CONTROL REVOLVING FUNDS

"SEC. 603. (a) To be eligible for an award of a grant under section 601 of this title, each State shall establish a Water Pollution Control Revolving Fund, administered by an instrumentality of the State with powers and limitations including those specified in subsections (b), (c), and (d) of this section.

"(b) The amounts of funds available to the Water Pollution Control Revolving Fund shall be dedicated solely to providing financial assistance (1) to any municipality, intermunicipal, interstate, or State agency for construction of publicly owned treatment works (as defined in section 212(2) of title II of this Act) and (2) for the implementation of management programs established under sections 319 and 320. The fund shall be established, maintained, and credited with repayments, and the fund balance shall be available in perpetuity for this purpose.

"(c) The instrumentality of the State administering the Water Pollution Control Revolving Fund shall be authorized to use the fund to make loans, on the condition that—

"(1) such loans are made at or below market interest rates, including interest free loans, at terms not to exceed twenty years;

"(2) annual principal payments shall commence not later than one year after completion of any project and all loans shall be fully amortized not later than twenty years after project completion;

"(3) the recipient of a loan shall establish a dedicated source of revenue for repayment of loans; and

"(4) the fund shall be credited with all repayment of principal and interest on all loans.

"(d) Except as otherwise limited by State law, a Water Pollution Control Revolving Fund may be used—

"(1) to buy or refinance the debt obligation of municipalities and intermunicipal and interstate agencies within the State at or below market rates, where such debt obligations were incurred after March 7, 1985;

"(2) to guarantee, or purchase insurance for, local obligations where such action would improve credit market access or reduce interest rates;

"(3) as a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the State if the proceeds of the sale of such bonds are deposited in the Water Pollution Control Revolving Fund;

"(4) to provide loan guarantees for similar revolving funds established by municipalities or intermunicipal agencies;

"(5) to earn interest on fund accounts; and

"(6) for the reasonable costs of administering the fund and conducting activities under this title provided that such amounts shall not exceed 4 per centum of all grant awards to such fund under section 601(d).

"AUDITS, REPORTS, AND FISCAL CONTROLS

"SEC. 604. (a) Each State electing to establish a Water Pollution Control Revolving Fund under this title shall establish fiscal controls and accounting procedures sufficient to assure proper accounting during appropriate accounting periods for—

"(1) payments received by the fund;

"(2) disbursements made by the fund; and

"(3) fund balances at the beginning and end of the accounting period.

"(b) The Administrator shall conduct, or require each State to have conducted, not less than annually, an independent audit to review the operations of each Water Pollution Control Revolving Fund. Such audits shall be conducted by an entity independent of the State, and in accordance with the Comptroller General's standards for auditing government organizations, programs, activities, and functions. An audit under this subsection shall be completed in such time and manner as deemed necessary or appropriate by the Administrator to carry out the purposes of this title.

"(c)(1) Each State shall, on an annual basis, prepare a plan on the intended uses of the amounts available to the fund. The plan shall include—

"(A) a description of the short and long term goals and objectives of the State's Water Pollution Control Revolving Fund;

"(B) information on the activities to be supported, including a description of project categories, discharge requirements under titles III and IV, terms of financial assistance, and communities served;

"(C) assurances and specific proposals for meeting the requirements of section 602(b)(4) and (5) of this title; and

"(D) the criteria and method established for the distribution of funds.

"(2) To meet the requirements of this subsection and to facilitate comments from interested local governments and persons on the use of funds, a State may adapt or use priority systems and lists developed under section 216 of this Act.

"(d) Beginning the first fiscal year after the receipt of payments under section 601(e) of this title, the State shall provide an annual report to the Administrator describing how the State has met the goals and objectives for the previous fiscal year as identified in the plan prepared for the previous fiscal year pursuant to subsection (c) of this section, including identification of loan recipients, loan amounts, and loan terms.

"(e) The Administrator shall conduct an annual review of each State plan and report prepared under subsections (c) and (d) of this section, and other such materials as are considered necessary and appropriate in carrying out the purposes of this title. After reasonable notice by the Administrator to the State or the recipient of a loan from a Water Pollution Control Revolving Fund, the State or loan recipient shall make available to the Administrator records the Administrator reasonably requires to review and determine compliance with this title.".

STATE-OPTION TO USE TITLE II FUNDS

SEC. 210. Section 205 is amended by adding a new subsection as follows:

"(m)(1) The Administrator is authorized to award from funds available for obligation during each fiscal year ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, September 30, 1990, September 30, 1991, September 30, 1992, September 30, 1993, and September 30, 1994, a capitalization grant to a State for the purpose of capitalizing a Water Pollution Control Revolving Fund established in compliance with title VI of this Act, where the Governor requests such action in accordance with paragraph (2) of this subsection.

"(2) No later than thirty days after the date of enactment of this Act with respect to funds available for obligation in the fiscal year beginning October 1, 1985, and not less than ninety days prior to the start of each of the fiscal years 1987, 1988, 1989, 1990, 1991, 1992, 1993, and 1994, a State shall provide notice of its intent to use all or a portion of the funds available for obligation in that fiscal year as a capitalization grant for a Water Pollution Control Revolving Fund under title VI of this Act.

"(3) Any sum made available to a State's Water Pollution Control Revolving Fund under this subsection shall be in addition to any funds otherwise allotted to that State under section 601(b) during any fiscal year.".

REPORT TO CONGRESS

SEC. 211. Section 516 of the Clean Water Act is amended by adding at the end thereof the following new subsection:

"(f) The Administrator shall submit to the Congress by February 10, 1990, a report on the financial status and operations of Water Pollution Control Revolving Funds established by the States in accordance with title VI of this Act. The Administrator, in cooperation with the States, including water pollution control agencies and other water pollution control planning and financing agencies, shall include in such report the following:

"(1) an inventory of the facilities that are in significant noncompliance with the enforceable requirements of this Act;

"(2) an estimate of the cost of construction for such facilities that require construction to meet such requirements;

"(3) an assessment of the availability of sources of funds for financing such needed construction, including an estimate of the amount of funds available for loans through September 30, 1999, from the Water Pollution Control Revolving Funds established by the States under title VI of this Act;

"(4) an assessment of the operations, loan portfolio and loan conditions of Water Pollution Control Revolving Funds established by the States under title VI of this Act;

"(5) an assessment of the effect on user charges of the assistance provided by Water Pollution Control Revolving Funds established by the States under title VI, compared to assistance under title II of this Act; and

"(6) an assessment of the efficiency of the operation and maintenance of treatment works constructed with financial assistance under titles II and VI of this Act.".

MOTION OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. HOWARD moves to strike out all after the enacting clause of the Senate bill, S. 1128, and to insert in lieu thereof the text of H.R. 8, as passed, as follows:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS; AMENDMENTS TO FEDERAL WATER POLLUTION CONTROL ACT; DEFINITION OF ADMINISTRATOR.

(a) SHORT TITLE.—This Act may be cited as the "Water Quality Renewal Act of 1985".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents; amendments to Federal Water Pollution Control Act; definition of Administrator.
Sec. 2. Authorizations of appropriations.
Sec. 3. Authorizations for construction grants.
Sec. 4. Compliance deadlines.
Sec. 5. Individual control strategies for toxic pollutants.
Sec. 6. Policy for control of nonpoint sources of pollution.
Sec. 7. Control of nonpoint sources of pollution.
Sec. 8. Lake restoration guidance manual.
Sec. 9. Small flows clearinghouse.
Sec. 10. Eligible categories of projects.
Sec. 11. Time limit on resolving certain disputes.
Sec. 12. Federal share.
Sec. 13. Agreement on eligible costs; grantee certification of treatment process; turnkey contracts.
Sec. 14. Grant conditions; user charges on low-income residential users.
Sec. 15. Allotment of construction grant funds.
Sec. 16. Grants to States for establishment of water pollution control revolving funds.
Sec. 17. Modification for nonconventional pollutants.
Sec. 18. Discharges into marine waters.
Sec. 19. Filing deadline for treatment works modification.
Sec. 20. Application for ocean discharge modifications.
Sec. 21. Innovative technology compliance deadlines for direct dischargers.
Sec. 22. Variances from the application of effluent limitations.
Sec. 23. Coal remining operations.
Sec. 24. Water quality criteria.
Sec. 25. Test procedures.
Sec. 26. Pretreatment standards.
Sec. 27. Inspection and entry.
Sec. 28. Criminal penalties.
Sec. 29. Civil penalties.
Sec. 30. Administrative penalties.
Sec. 31. Relationship to other laws.
Sec. 32. Marine sanitation devices.
Sec. 33. Clean lakes.
Sec. 34. NPDES permits.
Sec. 35. Audits.
Sec. 36. Commonwealth of the Northern Mariana Islands.
Sec. 37. Agricultural stormwater discharges.
Sec. 38. Citizen suits.
Sec. 39. Reports to Congress.
Sec. 40. Indian tribes.
Sec. 41. Definition of point source.
Sec. 42. Chesapeake and Narragansett Bays.
Sec. 43. New York and New Jersey harbor area.
Sec. 44. San Francisco Bay.
Sec. 45. Maintenance of water quality in estuaries.
Sec. 46. Research on effects of pollutants.
Sec. 47. Sewage sludge.
Sec. 48. Puget Sound.
Sec. 49. Ocean discharge research projects.
Sec. 50. Grants for replacement of contaminated groundwater.
Sec. 51. Unconsolidated quarternary aquifer.
Sec. 52. Grants for protecting groundwater quality.
Sec. 53. Demonstration program on acidified lakes.
Sec. 54. Newtown Creek, New York.
Sec. 55. San Diego, California.
Sec. 56. Naco, Arizona.
Sec. 57. Limitation on discharge of raw sewage by New York City.
Sec. 58. Deer Island treatment plant, Massachusetts.
Sec. 59. Great Lakes International Coordinating Office.
Sec. 60. Oakwood Beach and Red Hook projects, New York.
Sec. 61. Chippewa Township, Pennsylvania.
Sec. 62. Des Moines, Iowa.
Sec. 63. Wastewater reclamation demonstration.
Sec. 64. Boston Harbor and adjacent waters.
Sec. 65. Treatment works in Washington State.
Sec. 66. Improvement projects.
Sec. 67. Study of regulation of de minimis discharges.
Sec. 68. Study of effectiveness of innovative and alternative processes and techniques.
Sec. 69. Water quality improvement study.
Sec. 70. Study of testing procedures.
Sec. 71. Study of pretreatment of toxic pollutants.
Sec. 72. Studies of water pollution problems in aquifers.
Sec. 73. Great Lakes consumptive uses study.
Sec. 74. Sulfide corrosion study.
Sec. 75. Pulp mill study.
Sec. 76. Study of rainfall induced infiltra-

tion into sewer systems.
Sec. 77. Study of pH in discharges from mining operations.
Sec. 78. Study of pollution in Lake Pend Oreille, Idaho.
Sec. 79. Limitation on payments.
Sec. 80. Rights and liabilities under other Federal statutes.

(c) AMENDMENT OF FEDERAL WATER POLLUTION CONTROL ACT.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Water Pollution Control Act.

(d) DEFINITION.—For purposes of this Act, the term "Administrator" means the Administrator of the Environmental Protection Agency.

SEC. 2. AUTHORIZATIONS OF APPROPRIATIONS.

(a) RESEARCH AND INVESTIGATIONS.—Section 104(u) is amended—

(1) in clause (1) by inserting after "September 30, 1982," the following: "and not to exceed $22,770,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,";

(2) in clause (2) by striking out "and $3,000,000 for fiscal year 1982," and inserting in lieu thereof the following: "$3,000,000 for fiscal year 1982, and $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,"; and

(3) in clause (3) by striking out "and $1,500,000 for fiscal year 1982," and inserting in lieu thereof the following: "$1,500,000 for fiscal year 1982, and $1,500,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(b) GRANTS FOR PROGRAM ADMINISTRATION.—Section 106(a)(2) is amended by inserting after "1982" a comma and the following: "and $75,000,000 per fiscal year for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, and 1990".

(c) TRAINING GRANTS AND SCHOLARSHIPS.—Section 112(c) is amended by striking out "and $7,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof the following: "$7,000,000 for the fiscal year ending September 30, 1982, and $7,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(d) AREAWIDE PLANNING.—Section 208(f)(3) is amended by striking out "and" after "1974," and after "1980," and by inserting after "1982" the following: ", not to exceed $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and not to exceed $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990".

(e) RURAL CLEAN WATER.—Section 208(j)(9) is amended by striking out "and" after "1981," and by inserting after "1982," the following: "$100,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(f) INTERAGENCY AGREEMENTS.—Section 304(k)(3) is amended by striking out "1983" and inserting in lieu thereof "1985 and $50,000,000 per fiscal year for the fiscal years 1986 through 1990".

(g) CLEAN LAKES.—Section 314(c)(2) is amended by striking out "and $30,000,000 for fiscal year 1982" and inserting in lieu thereof the following: "$30,000,000 for fiscal year 1982, and $30,000,000 per fiscal year for each of the fiscal years 1983, 1984, 1985, 1986, 1987, 1988, 1989, and 1990".

(h) GENERAL AUTHORIZATION.—Section 517 is amended by striking out "and $161,000,000 for the fiscal year ending September 30, 1982" and inserting in lieu thereof "$161,000,000 for the fiscal year ending September 30, 1982, $160,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, and $110,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990".

SEC. 3. AUTHORIZATIONS FOR CONSTRUCTION GRANTS.

Section 207 is amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

SEC. 4. COMPLIANCE DEADLINES.

(a) PRIORITY TOXIC POLLUTANTS.—Section 301(b)(2)(C) is amended to read as follows:

"(C) for all toxic pollutants referred to in table 1 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives compliance with effluent limitations in accordance with subparagraph (A) of this paragraph as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established;".

(b) OTHER TOXIC POLLUTANTS.—Section 301(b)(2)(D) is amended by striking out "not later than three years after the date such limitations are established" and inserting in lieu thereof "as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established".

(c) CONVENTIONAL POLLUTANTS.—Section 301(b)(2)(E) is amended to read as follows:

"(E) for all pollutants identified pursuant to section 304(a)(4) of this Act compliance with effluent limitations for categories and classes of point sources, other than publicly owned treatment works, which shall require application of the best conventional pollutant control technology, as determined in accordance with regulations issued by the Administrator pursuant to section 304(a)(4) of this Act, as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established;".

(d) OTHER POLLUTANTS.—Section 301(b)(2)(F) is amended to read as follows:

"(F) for all pollutants (other than those subject to subparagraph (C), (D), or (E) of this paragraph) compliance with effluent limitations in accordance with subparagraph (A) of this paragraph as expeditiously as possible, but in no case later than three years and six months after the date such limitations are established.".

(e) DEADLINES FOR REGULATIONS FOR CERTAIN TOXIC POLLUTANTS.—The Administrator shall promulgate final regulations establishing effluent limitations in accordance with sections 301(b)(2)(A) and 307(b)(1) of the Federal Water Pollution Control Act for all toxic pollutants referred to in table 1 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives which are discharged from the categories of point sources in accordance with the following table:

Category	Date by which the final regulation shall be promulgated
Foundries	June 30, 1985.
Nonferrous metals forming.	June 30, 1985.
Organic chemicals and plastics and synthetic fibers.	March 31, 1986.
Pesticides	August 31, 1985.
Nonferrous metals (phase II).	July 31, 1985.

SEC. 5. INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.

(a) IN GENERAL.—Section 304 is amended by adding at the end thereof the following new subsection:

"(l) INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.—

"(1) STATE LIST OF NAVIGABLE WATERS.—Not later than one year after the date of the enactment of this subsection, each State shall submit to the Administrator for review, approval, and implementation under this subsection—

"(A) a list of all navigable waters in such State for which the State does not expect the applicable standard under section 303 of this Act will be achieved after the requirements of sections 301(b), 306, and 307(b) are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a);

"(B) for each segment of the navigable waters included on such list, a determination of the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source; and

"(C) for each such segment, an individual control strategy which the State determines will produce a reduction in the discharge of toxic pollutants from point sources identified by the State under this paragraph through the establishment of effluent limitations under section 302 of this Act and water quality standards under section 303(c)(4)(B) of this Act, which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of the establishment of such strategy.

"(2) APPROVAL OR DISAPPROVAL.—Not later than 120 days after the last day of the one-year period referred to in paragraph (1), the Administrator shall approve or disapprove

the control strategies submitted under paragraph (1) by any State.

"(3) ADMINISTRATOR'S LIST OF NAVIGABLE WATERS.—If a State fails to submit control strategies in accordance with paragraph (1) or the Administrator does not approve the control strategies submitted by such State in accordance with paragraph (1), then, not later than one year after the last day of the period referred to in paragraph (2), the Administrator, in cooperation with such State and after notice and opportunity for public comment, shall publish in the Federal Register a list of all navigable waters in such State for which the Administrator does not expect the applicable standard under section 303 of this Act will be achieved after the requirements of sections 301(b), 306, and 307(b) are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a). For each segment of the navigable waters included on such list, the Administrator shall determine the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source. At a minimum, the Administrator shall consider for listing under this subsection any navigable waters for which any person submits a petition to the Administrator for listing not later than 120 days after such last day.

"(4) ADMINISTRATOR'S DEVELOPMENT AND PUBLICATION.—Not later than one year after the date of publication of the list required by paragraph (3) of this subsection, the Administrator, in cooperation with the States, shall issue proposed regulations setting forth, for each segment of the navigable waters listed under paragraph (3), an individual control strategy. Each individual control strategy shall produce a reduction in the discharge of toxic pollutants from point sources identified by the Administrator under paragraph (3) through the establishment of effluent limitations under section 302 of this Act and water quality standards under section 303(c)(4)(B) of this Act, which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of promulgation of the final strategy. Not later than 180 days after issuing the proposed regulations, the Administrator shall promulgate each individual control strategy as a final regulation.

"(5) IMPLEMENTATION.—The Administrator shall implement each individual control strategy established or promulgated under this subsection by modifying or requiring the modification of permits under section 402 of this Act.".

(b) JUDICIAL REVIEW.—Section 509(b)(1) is amended by striking out "and (F)" and inserting in lieu thereof "(F)" and by inserting after "any permit under section 402," the following: "and (G) in promulgating any individual control strategy under section 304(l),".

SEC. 6. POLICY FOR CONTROL OF NONPOINT SOURCES OF POLLUTION.

Section 101(a) is amended by striking out "and" at the end of paragraph (5), by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding at the end thereof the following:

"(7) it is the national policy that plans for the control of nonpoint sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this Act to be met through the control of both point and nonpoint sources of pollution.".

SEC. 7. CONTROL OF NONPOINT SOURCES OF POLLUTION.

(a) IN GENERAL.—Title III is amended by adding at the end the following new section:

"SEC. 319. NONPOINT SOURCE CONTROL PROGRAMS.

"(a) STATE ASSESSMENT REPORTS.—

"(1) CONTENTS.—The Governor of each State shall prepare and submit to the Administrator for his approval, a report which—

"(A) identifies those portions of the navigable waters within the State which, as a result (in whole or in part) of pollution from nonpoint sources, are not meeting applicable water quality standards or the goals and requirements of this Act;

"(B) identifies those categories and subcategories of nonpoint sources which add significant pollution to each portion of the navigable waters identified under subparagraph (A) in amounts which contribute to such portion not meeting such water quality standards or such goals and requirements;

"(C) identifies and describes State and local programs for controlling pollution added from nonpoint sources to, and improving the quality of, each such portion of the navigable waters, including but not limited to those programs which are receiving Federal assistance under subsection (i); and

"(D) describes the process, including intergovernmental coordination and public participation, for identifying best management practices and measures to control each category and subcategory of nonpoint sources identified under subparagraph (B) and to reduce, to the maximum extent practicable, the level of pollution resulting from such category or subcategory.

"(2) INFORMATION USED IN PREPARATION.—Each report submitted under paragraph (1) shall be based on available information including, but not limited to, information available under sections 208, 303(e), 304(f), and 305(b) of this Act, and may include all or part of any water quality management program approved under section 208 or 303 of this Act.

"(b) STATE PLANS.—

"(1) IN GENERAL.—The Governor of each State shall prepare and submit to the Administrator for his approval—

"(A) a plan which such State proposes to implement in the first four fiscal years beginning after the date of submission of such plan for controlling pollution added from nonpoint sources to the navigable waters within the State and improving the quality of such waters; and

"(B) a report which (i) identifies each department, agency, or instrumentality of the United States and each department, agency, or instrumentality of the State which is likely to be engaging in, supporting, or providing financial assistance in each of such fiscal years for any activity or program in the State which, if carried out, would be inconsistent with implementation of such plan in such fiscal years, and (ii) recommends to the Administrator methods by which such Federal department, agency, or instrumentality could modify administration of such activity or program, and describes methods by which such State department, agency, or instrumentality intends to modify administration of such activity or program, so that such activity or program is consistent with, and assists the State in implementation of, such plan.

"(2) SPECIFIC CONTENTS.—Each plan proposed for implementation under this subsection shall specify—

"(A) from among those portions of navigable waters significantly affected by pollution added from nonpoint sources, each portion and land area contributing such pollution with respect to which the State plans to assist, encourage, or require implementation of best management practices and measures in the first four fiscal years beginning after the date of submission of such plan;

"(B) the order in which, and the schedule under which, the State plans to assist, encourage, or require implementation of such practices and measures in such fiscal years;

"(C) from among those categories and subcategories of nonpoint sources of pollution which contribute to each portion specified under subparagraph (A) not meeting applicable water quality standards or the goals and requirements of this Act, the categories and subcategories with respect to which the State plans to assist, encourage, or require implementation of such practices and measures in such fiscal years and the relative contribution of such pollution by category and subcategory of such sources;

"(D) the best management practices and measures the implementation of which the State plans to assist, encourage, or require in each of such fiscal years to reduce pollution resulting from nonpoint sources and to improve water quality;

"(E) the methods (including, but not limited to, demonstration, enforcement, technical assistance, education, training, and cost-sharing programs), by category and subcategory of such sources of pollution, which the State plans to use to encourage, assist, or require implementation of such practices and measures in such fiscal years; and

"(F) sources of Federal and other assistance (other than assistance provided under subsection (i)) which will be available in each of such fiscal years for supporting implementation of such practices and measures and the purposes for which such assistance will be used in each of such fiscal years.

"(3) CERTIFICATION OF LEGAL AUTHORITY.—Each plan submitted by a State under this subsection shall be accompanied by a certification of the attorney general of the State or the chief attorney of any State water pollution control agency which has independent legal counsel that the laws of the State provide adequate authority to implement such plan or, if there is not such adequate authority, a list of such additional authority which will be necessary to implement such plan.

"(4) IMPLEMENTATION SCHEDULE.—The schedule required by paragraph (2)(B) shall establish for each category and subcategory of nonpoint sources of pollution specified under paragraph (2)(C) an expeditious time period for implementation of best management practices and measures specified under paragraph (2)(D) and shall indicate the estimated dates for implementation of such practices and measures.

"(5) UTILIZATION OF LOCAL AND PRIVATE EXPERTS.—In developing and implementing a plan under this subsection, a State shall, to the maximum extent practicable, utilize local public and private agencies and organizations which have expertise in control of nonpoint sources of pollution.

"(6) DEVELOPMENT ON WATERSHED BASIS.—A State shall, to the maximum extent practicable, develop and implement a plan under this subsection on a watershed-by-watershed basis.

"(c) ADMINISTRATIVE PROVISIONS.—

"(1) COOPERATION REQUIREMENT.—Any report required by subsection (a) and any plan and report required by subsection (b) shall be developed in cooperation with local, regional, and interstate entities which are actively planning for the implementation of non-point source pollution controls and have either been certified by the Administrator in accordance with section 208, have worked jointly with the State on water quality management planning under section 205(j), or have been designated by the State legislative body or Governor as water quality management planning agencies for their geographic areas.

"(2) TIME PERIOD FOR SUBMISSION OF REPORTS AND PLANS.—Each report and plan shall be submitted to the Administrator during the 270-day period beginning on the date of the enactment of this section; except that upon request of the Governor, the Administrator shall extend such period for not to exceed an additional 270 days.

"(3) FAILURE OF STATE TO SUBMIT REPORT.—If a Governor of a State does not submit the report required by subsection (a) during such period, the Administrator shall prepare a report for such State which makes the identifications required by paragraphs (1)(A) and (1)(B) of subsection (a).

"(d) CONSOLIDATION OF RECOMMENDATIONS FOR UNITED STATES AGENCIES.—The Administrator shall consolidate recommendations for modifications of activities and programs submitted by the States under subsection (b)(1)(B) and submit such consolidated recommendations to the appropriate departments, agencies, and instrumentalities of the United States. Each such department, agency, or instrumentality, to the maximum extent practicable and consistent with existing law, shall accommodate such recommendations and shall carry out its own activities and programs in a manner which is consistent with, and will assist implementation of, the plan submitted by the State under subsection (b) and approved by the Administrator under this section.

"(e) APPROVAL OR DISAPPROVAL OF REPORTS AND PLANS.—

"(1) DEADLINE.—Subject to paragraph (2), not later than 180 days after the date of submission to the Administrator of any report or plan under this section (other than subsections (i) and (j)), the Administrator shall either approve or disapprove such report or plan, as the case may be. The Administrator may approve a portion of a plan under this subsection. If the Administrator does not disapprove a report, plan, or portion of a plan in such 180-day period, such report, plan, or portion shall be deemed approved for purposes of this section.

"(2) PROCEDURE FOR DISAPPROVAL.—If, after notice and opportunity for public comment and consultation with appropriate Federal and State agencies and other interested persons, the Administrator determines that a plan submitted under subsection (b) or any portion thereof is not likely to satisfy, in whole or in part, the goals and requirements of this Act, that adequate authority does not exist, or adequate resources are not available, to implement such plan or portion, that the schedule for implementing such plan or portion is not sufficiently expeditious, or that the practices and measures proposed in such plan or portion are not adequate to improve the quality of navigable waters in the State and to reduce the level of pollution in navigable waters in the State resulting from nonpoint sources, the Administrator shall disapprove the plan or portion thereof with respect to which the Administrator makes such determination. The Administrator shall notify the State of such disapproval and request specific revisions of such plan or portion necessary to obtain approval of such plan or portion. Not later than 90 days after the date of such notification, the State shall submit to the Administrator for his approval under this subsection its revisions of such plan or portion.

"(f) LOCAL PLANS; TECHNICAL ASSISTANCE.—If a State fails to submit a plan under subsection (b) or the Administrator does not approve such a plan, a local public agency or organization which has expertise in, and authority to, control water pollution resulting from nonpoint sources in any area of such State which the Administrator determines is of sufficient geographic size may, with approval of such State, request the Administrator to provide, and the Administrator shall provide, technical assistance to such agency or organization in developing for such area a plan which is described in subsection (b) and meets the requirements of subsection (e). After development of such plan, such agency or organization shall submit such plan to the Administrator for his approval. If the Administrator approves such plan, such agency or organization shall be eligible to receive financial assistance under subsection (i) for implementation of such plan as if such agency or organization were a State for which a report submitted under subsection (a) and a plan submitted under subsection (b) were approved under this section. Such financial assistance shall be subject to the same terms and conditions as assistance provided to a State under subsection (i).

"(g) TECHNICAL ASSISTANCE FOR STATES.—Upon request of a State, the Administrator may provide technical assistance to such State in developing a plan under subsection (b) for those portions of the navigable waters requested by such State.

"(h) INTERSTATE MANAGEMENT CONFERENCE.—

"(1) CONVENING OF CONFERENCE; NOTIFICATION; PURPOSE.—If any portion of the navigable waters in any State which is implementing a plan approved under this section is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or part, of pollution from nonpoint sources in another State, such State may petition the Administrator to convene, and the Administrator shall convene, a management conference of all States which contribute pollution resulting from nonpoint sources to such portion. If, on the basis of information available to him, the Administrator determines that a State is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or part, of pollution from nonpoint sources in another State, the Administrator shall notify such States. The Administrator may convene a management conference under this paragraph not later than 180 days after giving such notification, whether or not the State which is not meeting such standards requests such conference. The purpose of such conference shall be to develop an agreement among such States to reduce the level of pollution in such portion resulting from nonpoint sources and to improve the water quality of such portion.

"(2) STATE PLAN REQUIREMENT.—Each State which contributes significant pollution from nonpoint sources to the portion of navigable waters in amounts which contribute to such portion not meeting applicable water quality standards or the goals and requirements of this Act shall submit to the Administrator for his approval a plan referred to in subsection (b) to reduce the level of pollution in such portion resulting from nonpoint sources in such State and to improve the quality of such portion; except that if such State has an approved plan under subsection (b), such State shall revise such plan to reduce the level of pollution in such portion resulting from nonpoint sources in such State and to improve the water quality of such portion and submit such revised plan to the Administrator for his approval under this section. Such plan or revised plan shall be consistent with existing Federal and State law. After approval, the State shall implement such plan or revised plan.

"(i) GRANT PROGRAM.—

"(1) GRANTS FOR IMPLEMENTATION OF PLANS.—Upon application of a State for which a report submitted under subsection (a) and a plan submitted under subsection (b) is approved under this section, the Administrator shall make grants under this subsection to such State for the purpose of assisting the State in implementing such plan.

"(2) APPLICATIONS.—An application for a grant under this subsection in any fiscal year shall be in such form and shall contain such other information as the Administrator may require, including an identification and description of the best management practices and measures which the State proposes to assist, encourage, or require in such year with the Federal assistance to be provided under the grant.

"(3) FEDERAL SHARE.—

"(A) IN GENERAL.—The Federal share of the cost of each plan implemented with Federal assistance under this subsection in any fiscal year shall not exceed 50 percent of the cost incurred by the State in implementing such plan.

"(B) EXCEPTION.—The Federal share of those costs of any such plan which are attributable to a watershed area with respect to which the Administrator determines that a significant number of non-Federal, non-State interests of such area are willing and able to enter into agreements to participate in such year in nonpoint source pollution control measures under such plan shall be not less than 50 percent and not more than 60 percent of such cost.

"(C) LIMITATION ON ADMINISTRATIVE COSTS.—For purposes of this paragraph, administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against activities and programs carried out with a grant under this subsection shall not exceed in any fiscal year 10 percent of the amount of the grant in such year, except that costs of implementing enforcement and regulatory activities, education, training, technical assistance, demonstration projects, and technology transfer programs shall not be subject to this limitation.

"(4) MAINTENANCE OF EFFORT.—No grant may be made to a State under this subsection in any fiscal year unless such State enters into such agreements with the Administrator as the Administrator may require to ensure that such State will maintain its aggregate expenditures from all other sources for programs for controlling pollution added to the navigable waters in such State from nonpoint sources and improving the quality of such waters at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this subsection.

"(5) REPORTING AND OTHER REQUIREMENTS.—

"(A) REPORT.—Each State which receives a grant under this subsection in any fiscal year shall submit to the Administrator a written report which describes the activities and programs carried out in the State under such grant and the progress made by such State in meeting the schedule specified under subsection (b)(2)(B).

"(B) SATISFACTORY PROGRESS.—No grant may be made under this subsection in any fiscal year to a State which in the preceding fiscal year received a grant under this subsection unless the Administrator determines that such State made satisfactory progress in such preceding fiscal year in meeting the schedule specified by such State under subsection (b)(2)(B).

"(6) LIMITATION ON GRANT AMOUNTS.—Notwithstanding any other provision of this subsection, not more than 15 percent of the amount appropriated to carry out this subsection may be used to make grants to any one State, including any grants to any local public agency or organization with authority to control pollution from nonpoint sources in any area of such State.

"(7) PRIORITY FOR EFFECTIVE REGULATORY MECHANISMS.—For each fiscal year beginning after September 30, 1987, the Administrator may give priority in making grants under this subsection, and shall give consideration in determining the Federal share of any such grant, to any State which has included effective regulatory mechanisms in an approved State plan under this section and has implemented such mechanisms in the preceding fiscal year. Such mechanisms shall include, but are not limited to, deadlines for implementation of best management practices and enforcement procedures to ensure implementation of such plan.

"(8) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection not to exceed $150,000,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Sums appropriated to carry out this subsection shall remain available until expended.

"(j) REPORTS OF ADMINISTRATOR.—

"(1) ANNUAL REPORTS.—Not later than January 1, 1986, and each January 1 thereafter the Administrator shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a report for the preceding fiscal year on the activities and programs implemented under this section and the progress made in reducing pollution in the navigable waters resulting from nonpoint sources and improving the quality of such waters.

"(2) FINAL REPORT.—Not later than January 1, 1989, the Administrator shall transmit to Congress a final report on the activities carried out under this section. Such report, at a minimum, shall include—

"(A) an analysis of the effectiveness of plans carried out under this section and of the best management practices and measures utilized under those plans in controlling nonpoint sources of pollution;

"(B) an analysis of the level of State participation in implementing such plans; and

"(C) recommendations of the Administrator concerning future programs (including enforcement programs) for controlling pollution from nonpoint sources.

"(k) SET ASIDE FOR ADMINISTRATIVE PERSONNEL.—Not less than 5 percent of the funds appropriated to carry out subsection (i) for any fiscal year shall be available to the Administrator to maintain personnel levels at the Environmental Protection Agency at levels which are adequate to carry out this section in such year.".

(b) CONFORMING AMENDMENT.—Section 304(k)(1) of the Federal Water Pollution Control Act is amended by inserting "and 319" after "208".

SEC. 8. LAKE RESTORATION GUIDANCE MANUAL.

Section 104(h) is amended by inserting "(1)" after "(h)" and by adding at the end thereof the following:

"(2) The Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate not later than one year after the date of the enactment of this paragraph a lake restoration guidance manual establishing procedures to guide future State and local efforts to improve water quality in lakes.".

SEC. 9. SMALL FLOWS CLEARINGHOUSE.

Section 104(q) is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding section 205(d) of this Act, from amounts that are set aside for a fiscal year under section 205(i) of this Act and are not obligated by the end of the 24-month period of availability for such amounts under section 205(d), the Administrator shall make available $1,000,000 or such unobligated amount, whichever is less, to support a national clearinghouse within the Environmental Protection Agency to collect and disseminate information on small flows of sewage and innovative or alternative wastewater treatment processes and techniques, consistent with paragraph (3). This paragraph shall apply with respect to amounts set aside under section 205(i) for which the 24-month period of availability referred to in the preceding sentence ends on or after September 30, 1985.".

SEC. 10. ELIGIBLE CATEGORIES OF PROJECTS.

(a) COLLECTOR SEWERS AND COMBINED SEWER OVERFLOWS.—The second sentence of section 201(g)(1) is amended by striking out "appurtenances, and" and inserting in lieu thereof "appurtenances," and by striking out the period at the end of such sentence and inserting in lieu thereof the following: ", and projects to address water quality problems due to impacts of discharges from combined stormwater and sanitary sewer overflows.".

(b) NONPOINT SOURCES.—The last sentence of section 201(g)(1) is amended by—

(1) striking out "sentence," the first place it appears and inserting in lieu thereof "sentences,";

(2) inserting "(A)" after "October 1, 1984, for"; and

(3) inserting before "except that" the following: "and (B) any purpose for which a grant may be made under section 319(i) of this Act (including any innovative and alternative approaches for the control of nonpoint sources of pollution),".

SEC. 11. TIME LIMIT ON RESOLVING CERTAIN DISPUTES.

Section 201 is amended by adding at the end thereof the following new subsection:

"(p) TIME LIMIT ON RESOLVING CERTAIN DISPUTES.—In any case in which a dispute arises with respect to the awarding of a contract for construction of treatment works by a grantee of funds under this title and a party to such dispute files an appeal with the Administrator under this title for resolution of such dispute, the Administrator shall make a final decision on such appeal within 60 days of the filing of such appeal.".

SEC. 12. FEDERAL SHARE.

(a) COMBINED SEWER OVERFLOWS.—The last sentence of section 202(a)(1) is amended—

(1) by inserting after "correction" the first place it appears the following: "or a project to address water quality problems due to impacts of discharges from combined storm water and sanitary sewer overflows"; and

(2) by striking out "and" after "interceptors," and by inserting after "correction" the third place it appears the following: ", and project to address such problems".

(b) PROJECTS UNDER JUDICIAL INJUNCTION.—Section 202(a)(1) is amended by adding at the end thereof the following: "Notwithstanding the first sentence of this paragraph, in the case of a project for which an application for a grant under this title has been made to the Administrator before October 1, 1984, and which project is under judicial injunction on such date prohibiting its construction, such project shall be eligible for grants at 75 percent of the cost of construction thereof.".

(c) PROJECTS UNDER JUDICIAL ORDER.—Section 202(a)(1) is amended by adding at the end thereof the following: "Notwithstanding the first sentence of this paragraph, in the case of the Wyoming Valley Sanitary Authority project mandated by judicial order under a proceeding begun prior to October 1, 1984, such project shall be eligible for grants at 75 percent of the cost of construction thereof.".

(d) BIODISC EQUIPMENT.—Section 202(a)(3) is amended by inserting at the end thereof the following: "In addition, the Administrator is authorized to make a grant to fund all of the costs of the modification or replacement of biodisc equipment (rotating biological contractors) in any publicly owned treatment works if the Administrator finds that such equipment has failed to meet design performance specifications, unless such failure is attributable to negligence on the part of any person, and if such failure has significantly increased capital or operating and maintenance expenditures.".

(e) INNOVATIVE PROCESS.—The activated bio-filter feature of the project for treatment works of the city of Little Falls, Minnesota, shall be deemed to be an innovative wastewater process and technique for purposes of section 202(a)(2) of the Federal Water Pollution Control Act and the amount of any grant under such Act for such feature shall be 85 percent of the cost thereof.

(f) AVAILABILITY OF CERTAIN FUNDS FOR NON-FEDERAL SHARE.—Notwithstanding any other provision of law, Federal assistance made available by the Farmers Home Administration to any political subdivision of a State may be used to provide the non-Federal share of the cost of any construction project carried out under section 201 of the Federal Water Pollution Control Act.

SEC. 13. AGREEMENT ON ELIGIBLE COSTS; GRANTEE CERTIFICATION OF TREATMENT PROCESS; TURNKEY CONTRACTS.

(a) AGREEMENT ON ELIGIBLE COSTS; GRANTEE CERTIFICATION.—Section 203(a) is amended by inserting "(1)" after "(a)", by designating the last sentence as paragraph (4) and indenting such sentence as a paragraph, and by inserting before paragraph (4) as so designated the following:

"(2)(A) Before taking final action on any plans, specifications, and estimates submitted under this subsection, the Administrator shall enter into a written agreement with the applicant which establishes and specifies which items of the proposed project are eligible for Federal payments under this sec-

tion. The Administrator may not later modify such eligibility determinations unless they are found to have been made in violation of applicable Federal statutes and regulations.

"(B) Eligibility determinations under this paragraph shall not preclude the Administrator from auditing a project pursuant to section 501 of this Act, or other authority, or from withholding or recovering Federal funds for costs which are found to be unreasonable, unsupported by adequate documentation, or otherwise unallowable under applicable Federal cost principles, or which are incurred on a project which fails to meet the design specifications or effluent limitations contained in the grant agreement and permit pursuant to section 402 of this Act for such project.

"(3) The approval of construction plans and specifications by the Administrator under this section shall not include a determination or approval of the treatment work's unit processes, or the configuration of the treatment work's unit processes, which constitute the treatment technology. The Administrator shall not approve plans, specifications, and estimates for a project under this section unless the applicant certifies that the proposed unit processes and treatment technology are capable of meeting the effluent limitations for which such process and technology are designed.".

(b) TURNKEY CONTRACTS.—Section 203 is amended by adding at the end thereof the following new subsection:

"(f) TURNKEY CONTRACTS.—

"(1) GENERAL AUTHORITY FOR LOW COST PROJECTS.—After completion of an approved facility plan for construction of a treatment works which has an estimated total cost of $8,000,000 or less (as determined by the Administrator), the applicant proposing to construct such treatment works may, in lieu of proceeding under the other provisions of this section, enter into an agreement with the Administrator under this subsection for the preparation of construction plans and specifications and the building and erection of such treatment works.

"(2) REQUIRED TERMS AND CONDITIONS.—An agreement entered into under this subsection shall—

"(A) set forth an amount agreed to by the Administrator and the applicant as the maximum Federal contribution to the project, based upon a determination of the federally eligible costs of the project at the applicable Federal share under section 202 of this Act;

"(B) set forth a date for completion of construction of the treatment works by the applicant and a schedule of payments by the Administrator of the Federal contribution to the project;

"(C) contain such assurances by the applicant as the Administrator may require that (i) the proposed treatment works will be an operable unit and will meet all the requirements of this title (except as otherwise provided in paragraph (3) of this subsection), and (ii) not later than one year after the date specified as the date for completion of construction of the treatment works, the treatment works will be operating so as to meet the requirements of any applicable permit for such treatment works under section 402 of this Act;

"(D) require the applicant and any agent or contractor of the applicant to provide a bond in an amount determined necessary by the Administrator to protect the Federal interest in the project; and

"(E) contain such other terms and conditions as the Administrator deems necessary to ensure compliance with this title (except as provided in paragraph (3) of this subsection).

"(3) NONAPPLICABILITY OF CERTAIN STATUTORY REQUIREMENTS.—Sections 201(g)(3), 203 (other than this subsection and except with respect to the development and approval of a facility plan), 204(a)(5), 204(a)(6), and 204(d)(1) shall not apply to grants made pursuant to this subsection.

"(4) INTEREST-BEARING ACCOUNTS.—

"(A) DEPOSIT OF FEDERAL CONTRIBUTION.—Upon entering into an agreement under this subsection, the Administrator shall deposit, from amounts allotted to the State for such fiscal year under section 205 of this Act, the amount of the Federal contribution to the project agreed upon by the Administrator and the applicant into an interest-bearing account. Such amount shall be available only for making payments to the grantee in accordance with the schedule contained in the agreement.

"(B) LIMITATION ON USE OF EARNED INTEREST.—Interest earned on amounts in the account under subparagraph (A) shall be available for payments to the grantee. Such payments shall be made solely for the purpose of reducing the net interest costs incurred by the grantee on obligations issued by the grantee for construction of such treatment works. The amount of such payments shall be in addition to the Federal share of the project otherwise allowable. The amount of any such interest earned which exceeds the amount of such interest costs incurred shall be deposited in the general fund of the Treasury after the final audit of the project.

"(5) ADMINISTRATIVE PROVISIONS.—

"(A) RESERVATION UNTIL FINAL AUDIT.—The Administrator shall reserve a portion of the amount in the account under paragraph (4)(A) until the final audit of the project.

"(B) REALLOTMENT OF ANY EXCESS.—If the amount deposited into the account by the Administrator under paragraph (4)(A) exceeds the cost of preparing construction plans and specifications and the building and erection of the treatment works, the Administrator shall reallot the amount of the excess to the State in which such treatment works is located for the fiscal year in which such audit is completed.

"(6) PER STATE LIMITATION.—The Administrator shall not obligate more than 20 percent of the amount allotted to a State for a fiscal year under section 205 of this Act for grants pursuant to this subsection.

"(7) LIMITATION ON FEDERAL CONTRIBUTION.—In no event shall the Federal contribution for the cost of preparing construction plans and specifications and the building and erection of treatment works pursuant to this subsection exceed the amount agreed upon under paragraph (2), plus interest paid to the grantee under paragraph (4)(B).

"(8) NONCOMPLIANCE WITH AGREEMENT.—In any case in which the recipient of a grant made pursuant to this subsection does not comply with the terms of the agreement entered into under paragraph (2), the Administrator is authorized to take such action as may be necessary to recover the amount of the Federal contribution to the project.

"(9) LIMITATION ON ELIGIBILITY OF RECIPIENTS OF TURNKEY GRANTS.—A recipient of a grant made pursuant to this subsection shall not be eligible for any other grants under this title.".

SEC. 14. GRANT CONDITIONS; USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.

(a) INCLUSION OF PROJECT IN AREAWIDE PLAN.—Section 204(a)(1) is amended to read as follows:

"(1) that any required areawide waste treatment management plan under section 208 of this Act (A) is being implemented for such area and the proposed treatment works are included in such plan, or (B) is being developed for such area and reasonable progress is being made toward its implementation and the proposed treatment works will be included in such plan;".

(b) CONTINUING PLANNING PROCESS.—Section 204(a)(2) is amended to read as follows:

"(2) that (A) the State in which the project is to be located (i) is implementing any required plan under section 303(e) of this Act and the proposed treatment works are in conformity with such plan, or (ii) is developing such a plan and the proposed treatment works will be in conformity with such plan, and (B) such State is in compliance with section 305(b) of this Act;".

(c) USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.—Section 204(b)(1) is amended by adding at the end thereof the following: "A system of user charges which imposes a lower charge for low-income residential users (as defined by the Administrator) shall be deemed to be a user charge system meeting the requirements of clause (A) of this paragraph if the Administrator determines that such system was adopted after public notice and hearing.".

(d) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act, except that the amendments made by subsections (a) and (b) shall take effect on the last day of the two-year period beginning on such date of enactment.

SEC. 15. ALLOTMENT OF CONSTRUCTION GRANT FUNDS.

(a) FORMULA.—

(1) DATE OF ALLOTMENT.—Section 205(c)(2) is amended by inserting after the first sentence the following: "Sums authorized to be appropriated pursuant to section 207 for the fiscal years 1986, 1987, 1988, 1989, and 1990 shall be allotted for each such year by the Administrator not later than the tenth day which begins after the date of the enactment of the Water Quality Renewal Act of 1985.".

(2) EXTENSION.—Section 205(c)(2) is further amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(b) MINIMUM ALLOTMENT.—

(1) EXTENSION.—Section 205(e) is amended by striking out "and 1985" each place it appears and inserting in lieu thereof "1985, 1986, 1987, 1988, 1989, and 1990".

(2) TERRITORIES.—The first sentence of section 205(e) is amended—

(A) by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,";

(B) by striking out "thirty-three one-hundredths of 1 per centum" and inserting in lieu thereof "two-thirds of one percent"; and

(C) by striking out "four" and inserting in lieu thereof "five".

(c) COSTS OF ADMINISTRATION.—Section 205(g)(1) is amended by striking out "1985" and inserting in lieu thereof "1990" and by striking out the period after "4 per centum" and inserting in lieu thereof a comma.

(d) INTERSTATE SANITARY COMMISSION.—Section 205(g) is amended by adding at the end thereof the following new paragraph:

"(3) On October 1 of each fiscal year beginning after September 30, 1985, the States of New York, New Jersey, and Connecticut shall pay to the Interstate Sanitation Commission established by such States by inter-

state compact, or shall enter into a legally binding agreement with such Commission to pay to such Commission, $900,000 (in the case of New York and New Jersey) and $200,000 (in the case of Connecticut) to carry out the functions of such Commission under this Act. If any such State does not make a payment, or enter into a legally binding agreement with respect to a payment, in the amount required under the preceding sentence for a fiscal year, the Administrator shall reserve, from the sums available to such State under this subsection for such fiscal year, an amount equal to the difference between the amount required to be paid or committed by such sentence for such fiscal year and the amount paid or committed by such State for such fiscal year. Sums so reserved shall be used by the Administrator to make a grant for such fiscal year to such Commission to carry out such functions.".

(e) RURAL SET ASIDE.—

(1) INCREASE IN MANDATORY SET ASIDE FOR RURAL STATES.—The first sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "a total (as determined by the Governor of the State) of not less than four percent nor more than seven and one-half percent".

(2) INCREASE IN AUTHORIZED SET ASIDE FOR OTHER STATES.—The second sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "seven and one-half percent".

(f) SET ASIDE FOR INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES.—Section 205(i) is amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990,".

(g) ALLOCATION OF PLANNING FUNDS TO REGIONAL ORGANIZATIONS.—Section 205(j)(3) is amended by adding at the end thereof the following: "In giving such priority, the State shall allocate at least 50 percent of the amount granted to such State for a fiscal year under this subsection to regional and interstate public comprehensive planning organizations in such State, except in any fiscal year for which the Administrator, after consultation with the Governor of such State and such organizations, determines that allocation of at least 50 percent to such organizations will not significantly assist in encouraging participation by such organizations in the development of wastewater treatment programs and significantly assist in achieving the goals of this Act.".

(h) RESERVATION OF FUNDS FOR INVESTIGATIONS AND AUDITS.—Section 205 is amended by adding at the end thereof the following new subsection:

"(l) RESERVATION FOR INVESTIGATIONS AND AUDITS.—One-quarter of one percent of any amount appropriated under section 207 of this Act for any fiscal year beginning after September 30, 1985, shall be reserved by the Administrator for carrying out investigations and audits authorized by this Act of projects for which funds are made available under this title. Such sums shall be in addition to, and not in lieu of, any sums otherwise appropriated for or allocated to the Office of the Inspector General.".

SEC. 16. GRANTS TO STATES FOR ESTABLISHMENT OF WATER POLLUTION CONTROL REVOLVING FUNDS.

(a) IN GENERAL.—Title II is amended by adding at the end thereof the following new section:

"SEC. 220. GRANTS TO STATES FOR ESTABLISHMENT OF REVOLVING FUNDS.

"(a) GENERAL AUTHORITY; AMOUNT OF GRANT.—

"(1) GENERAL AUTHORITY; CONSTRUCTION ASSISTANCE.—Subject to the provisions of this section, the Administrator shall make grants to each State for the purpose of establishing a revolving fund for providing assistance to municipalities and intermunicipal and interstate agencies for construction of treatment works (as defined in section 212 of this Act) which are publicly owned.

"(2) AMOUNT OF GRANT.—The amount of a grant to a State under this section for any fiscal year shall equal the amount allotted to such State under this section for such fiscal year.

"(b) GENERAL GRANT REQUIREMENTS.—

"(1) DEPOSITS INTO REVOLVING FUNDS.—

"(A) MANDATORY DEPOSITS.—A grant shall not be made for a fiscal year to a State under this section unless the State has first deposited in the revolving fund established by the State under this section from non-Federal sources an amount equal to 20 percent of the amount allotted to the State under this section for such fiscal year.

"(B) DISCRETIONARY DEPOSITS.—In addition to any amounts deposited in such revolving fund under subparagraph (A), the Governor of the State may deposit not to exceed 20 percent of the amount allotted to the State under section 205 of this Act for any fiscal year beginning after September 30, 1985, if the State has first deposited in such fund from non-Federal sources an amount equal to 20 percent of the amount to be deposited from such allotment.

"(2) ANNUAL CERTIFICATION.—Each State shall submit to the Administrator annually a certification—

"(A) that upon completion of any project for treatments works for which financial assistance is made available from the revolving fund established by such State under this section, discharges from such treatment works will meet all applicable requirements necessary to achieve applicable State and Federal water quality standards; and

"(B) that such State will comply with all provisions of this section.

"(c) FORMS OF REVOLVING FUND ASSISTANCE.—Assistance described in subsection (a)(1) for construction of treatment works may only be provided from a revolving fund established under subsection (d)(1) in the form of a loan, loan guarantee, payment to reduce interest on a loan, bond interest subsidy, bond guarantee, or purchase of insurance for obligations. In addition, to the extent provided by State law, the State may issue revenue or general obligation bonds to finance projects for construction of treatment works described in subsection (a)(1) and on the State's priority list under section 216 using amounts in such fund as a source of revenue or security for the payment of interest and principal on such bonds, if the proceeds of the sale of such bonds are deposited in such fund.

"(d) STATE WATER POLLUTION CONTROL REVOLVING FUNDS.—

"(1) ESTABLISHMENT.—

"(A) PURPOSES.—Each State shall establish a Water Pollution Control Revolving Fund to provide assistance described in subsection (a)(1) for construction of treatment works.

"(B) STATE DEPOSITS.—The State shall deposit in such revolving fund any Federal funds allotted to the State under this section, any amounts received by the State for repayment of loans made by the State with amounts in such fund, any amounts required or authorized to be deposited in such fund under subsection (b)(1), and any additional funds (except for funds received under any other section of this title) which the State wishes to deposit in such fund.

"(2) ADMINISTRATIVE EXPENSES.—The State may use amounts in such revolving fund for the payment of expenses of administration of such fund; except that, in any fiscal year in which the State receives a grant under this section, the State may not use more than four percent of the amount of such grant for the payment of such expenses in such fiscal year.

"(3) INVESTMENTS.—The State may invest any portion of the funds in such revolving fund which is not currently needed for providing assistance described in subsection (a)(1) and for payment of administrative expenses under paragraph (2).

"(4) LIMITATION TO PREVENT DOUBLE BENEFITS.—If the State makes, from such revolving fund, a loan which will finance the cost of facility planning and the preparation of plans, specifications, and estimates for construction of publicly owned treatment works, the State shall ensure that if the recipient of such loan receives a grant under section 201(g) of this Act for construction of such treatment works and an allowance under section 201(l)(1) for non-Federal funds expended for such planning and preparation, such recipient will promptly repay such loan to the extent of such allowance.

"(5) ELIGIBILITY OF NON-FEDERAL PORTION OF CONSTRUCTION GRANT PROJECTS.—The State may provide assistance from such revolving fund to a municipality or intermunicipal or interstate agency with respect to the non-Federal share of the costs of a project for which such municipality or agency is receiving assistance from the Administrator under any other section of this title.

"(6) DEDICATED SOURCE OF REVENUE FOR LOAN REPAYMENT.—The State may only make a loan from such revolving fund to a municipality or intermunicipal or interstate agency if such municipality or agency first establishes a dedicated source of revenue for the repayment of such loan.

"(7) PRIORITY LIST REQUIREMENT.—The State may provide financial assistance from such revolving fund only with respect to a project for construction of a treatment works described in subsection (a)(1) if such project is on the State's priority list under section 216 of this Act. Such assistance may be provided regardless of the rank of such project on such list.

"(8) CONSISTENCY WITH PLANNING REQUIREMENTS.—The State may provide financial assistance from such revolving fund only with respect to a project which is consistent with plans, if any, developed under sections 205(j), 208, and 303(e) of this Act.

"(e) ADMINISTRATIVE PROVISIONS.—

"(1) STATE REPORTS.—Each State shall annually make a full and complete report to the Administrator concerning the use of funds deposited in the revolving fund established by such State under this section in such manner as the Administrator shall prescribe.

"(2) ANNUAL AUDITS.—The Administrator shall, at least on an annual basis, conduct or require each State to have independently conducted reviews and audits as may be deemed necessary or appropriate by the Administrator to carry out the objectives of this section. Audits of the use of funds deposited in the revolving fund established by such State shall be conducted in accordance with the auditing procedures of the General Accounting Office.

"(f) APPLICABILITY OF OTHER PROVISIONS.—Except to the extent provided in this section, the other provisions of this title shall not apply to grants under this section.

"(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $600,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1991, not to exceed $1,800,000,000 for the fiscal year ending September 30, 1992, not to exceed $1,200,000,000 for the fiscal year ending September 30, 1993, and not to exceed $600,000,000 for the fiscal year ending September 30, 1994.

"(h) ALLOTMENT OF FUNDS.—

"(1) SAME FORMULA AS CONSTRUCTION GRANT ALLOTMENT.—Sums authorized to be appropriated to carry out this section for any fiscal year shall be allotted by the Administrator in the same manner and in accordance with the same table as the funds which are authorized to be appropriated under section 207 of this Act are allotted for such fiscal year.

"(2) EXCEPTION.—For any fiscal year for which sums are authorized to be appropriated to carry out this section and for which sums are not authorized to be appropriated to carry out section 207, the sums authorized to be appropriated to carry out this section shall be allotted by the Administrator in the same manner and in accordance with the same table as the funds which were authorized to be appropriated under section 207 were allotted for the most recent fiscal year for which there was such an authorization under section 207.

"(3) RESERVATION OF FUNDS FOR PLANNING.—Each State shall reserve each fiscal year one percent of the sums allotted to such State under this section for such fiscal year, or $100,000, whichever amount is greater, to carry out planning under sections 205(j), 208, and 303(e) of this Act.

"(4) REALLOTMENT.—

"(A) EXPIRATION OF PERIOD OF AVAILABILITY.—Sums allotted to a State under this subsection for a fiscal year shall remain available for a grant to such State for the fiscal year for which authorized and for the following two fiscal years. Any funds remaining after the last day of such third fiscal year shall be reallotted among the other States.

"(B) UNUTILIZED FUNDS.—Any funds granted to a State for a fiscal year under this section which are not utilized by such State for providing assistance described in subsection (a)(1) for construction of treatment works during such fiscal year and the following two fiscal years shall be repaid to the Administrator for reallotment among the other States.".

(b) CONFORMING AMENDMENT.—Section 207 is amended by striking out "and 209," and inserting in lieu thereof the following: "209, and 220 (except as provided in section 220(b)(1)(B)),".

SEC. 17. MODIFICATION FOR NONCONVENTIONAL POLLUTANTS.

(a) IN GENERAL.—Section 301(g) is amended by redesignating paragraph (2) (and any references thereto) as paragraph (3) and by striking out all that precedes subparagraph (A) of paragraph (1) and inserting in lieu thereof the following:

"(g)(1) The Administrator, with the concurrence of the State, may modify the requirements of subsection (b)(2)(A) of this section with respect to the discharge from any point source of ammonia, chlorine, color, iron, and total phenols (4AAP) (when determined by the Administrator to be a pollutant covered by subsection (b)(2)(F)). The Administrator may—

"(A) add any pollutant to the list of pollutants for which modification under this section is authorized (except for pollutants identified pursuant to section 304(a)(4) of this Act, toxic pollutants subject to section 307(a) of this Act, and the thermal component of discharges), if the Administrator determines that there are; or

"(B) remove any pollutant from such list if the Administrator determines that there are no longer;

satisfactory test methods and data available to make the determination required by paragraph (2).

"(2) A modification under this subsection shall be granted only upon a showing by the owner or operator of such point source satisfactory to the Administrator that—".

(b) APPLICATION; LIMITATION ON EFFECT.—The amendment made by subsection (a) shall apply to all requests for modifications under section 301(g) of the Federal Water Pollution Control Act pending on the date of the enactment of the Water Quality Renewal Act of 1985, and shall not have the effect of extending the deadline established in section 301(j)(1)(B) of such Act.

SEC. 18. DISCHARGES INTO MARINE WATERS.

(a) CONSIDERATION OF OTHER SOURCES OF POLLUTANTS.—Section 301(h)(2) is amended by striking out "such modified requirements will not interfere" and inserting in lieu thereof the following: "the discharge of pollutants in accordance with such modified requirements will not interfere, alone or in combination with pollutants from other sources,".

(b) LIMITATION ON SCOPE OF MONITORING.—Section 301(h)(3) is amended by inserting before the semicolon at the end thereof the following: ", and the scope of such monitoring is limited to include only those scientific investigations which are necessary to study the effects of the proposed discharge".

(c) URBAN AREA PRETREATMENT PROGRAM.—Section 301(h) is amended by redesignating paragraphs (6) and (7), and any references thereto, as paragraphs (7) and (8), respectively, and by inserting after paragraph (5) the following new paragraph:

"(6) in the case of any treatment works serving a population of 50,000 or more, with respect to any toxic pollutant introduced into such works by an industrial discharger for which pollutant there is no applicable pretreatment requirement in effect, the applicant has in effect a pretreatment program which, in combination with the treatment of discharges from such works, removes the same amount of such pollutant as would be removed if such works were to apply secondary treatment to discharges and if such works had no pretreatment program with respect to such pollutant;".

(d) PRIMARY TREATMENT FOR EFFLUENT.—Section 301(h) is amended by striking out the period at the end of paragraph (8) (as redesignated by subsection (c) of this section) and inserting in lieu thereof a semicolon and by inserting after such paragraph (8) the following new paragraph:

"(9) no effluent will be discharged from such works which does not receive primary treatment by screening, sedimentation, and skimming, and treatment for disinfection where necessary, and which does not meet the criteria established under section 304(a)(1) after initial mixing in the waters surrounding or adjacent to the point at which such effluent is discharged and".

(e) URBAN AREA REMOVAL CREDITS.—Section 307(b)(1) is amended by adding at the end thereof the following: "In any case described in the preceding sentence in which the treatment works serves a population of 50,000 or more, such pretreatment standards shall be revised as provided in the preceding sentence if—

"(i) there exists an effluent limitation on such treatment works for the pollutant and the revised requirement will not result in the effluent violating such effluent limitations;

"(ii) the revised requirement will not result in interference with the method of disposal or reuse of sludge from the treatment works; and

"(iii) the revised requirement will not result in a pollutant interfering with the operation of such treatment works.".

(f) DISCHARGE OF POLLUTANT INTO MARINE WATERS DEFINED.—Section 301(h) is amended by striking out the second sentence and inserting in lieu thereof the following: "For the purposes of this subsection, the phrase 'the discharge of any pollutant into marine waters' refers to a discharge into deep waters of the territorial sea or the waters of the contiguous zone.".

(g) GRANDFATHER OF CERTAIN APPLICANTS.—The amendments made by subsections (a), (c), (d), and (f) of this section shall not apply to any person whose application for a permit under section 391(h) of the Federal Water Pollution Control Act has been tentatively or finally approved by the Administrator on or before the date of the enactment of this Act.

SEC. 19. FILING DEADLINE FOR TREATMENT WORKS MODIFICATION.

(a) ELIMINATION.—Section 301(i)(1) is amended by striking out the second sentence.

(b) APPLICABILITY.—The amendment made by subsection (a) shall not apply to those treatment works which are subject to a compliance schedule established before the date of the enactment of this Act by a court order or a final agency order.

SEC. 20. APPLICATION FOR OCEAN DISCHARGE MODIFICATIONS.

Section 301(j)(1)(A) is amended by inserting before the semicolon at the end thereof the following: ", except that a publicly owned treatment works which before December 31, 1982, had a contractual arrangement to use a portion of the capacity of an ocean outfall operated by another publicly owned treatment works which has applied for or received a modification under subsection (h) of this section, may apply for a modification of subsection (h) in its own right not later than 30 days after the date of the enactment of the Water Quality Renewal Act of 1985".

SEC. 21. INNOVATIVE TECHNOLOGY COMPLIANCE DEADLINES FOR DIRECT DISCHARGERS.

(a) EXTENSION OF DEADLINE.—Section 301(k) is amended by striking out "July 1, 1987," and inserting in lieu thereof "two years after the date for compliance with such effluent limitation which would otherwise be applicable under such subsection,".

(b) EXTENSION TO CONVENTIONAL POLLUTANTS.—Section 301(k) is amended by inserting "or (b)(2)(E)" after "(b)(2)(A)" each place it appears.

SEC. 22. VARIANCES FROM THE APPLICATION OF EFFLUENT LIMITATIONS AND PRETREATMENT STANDARDS.

(a) IN GENERAL.—Section 301 is amended by adding at the end thereof the following new subsection:

"(n) VARIANCES.—

"(1) FUNDAMENTALLY DIFFERENT FACTORS.—Upon application of any person who provides (or does not have a reasonable opportunity to provide) information to the Administrator in the rulemaking to establish or revise any effluent limitation under this section or section 304 of this Act or any national categorical pretreatment standard under section 307(b), the Administrator may grant a variance from the application of such limitation with respect to the discharge of any pollutant by such person or such standard with respect to the introduction of any pollutant by such person if the Administrator determines that factors relating to the facilities, equipment, and processes of such person or, in the case of such standard, factors relating to the facilities, equipment, and processes of the treatment works are fundamentally different than the factors considered in such rulemaking. An effluent limitation or pretreatment standard established under such variance may not be less stringent than is justified by the factors that are fundamentally different. A variance may not be granted under this subsection if it would produce a significantly adverse effect on the environment (other than on water quality).

"(2) TIME LIMIT FOR APPLICATIONS.—An application for a variance from the application of an effluent limitation or pretreatment standard under this subsection must be filed with the Administrator within 180 days after the date on which such limitation or standard is established or revised, as the case may be.

"(3) TIME LIMIT FOR DECISION.—The Administrator shall approve or deny any application filed under this subsection within 180 days after the date such application is filed with the Administrator.

"(4) LIMITATION ON APPLICABILITY.—This subsection shall only apply with respect to effluent limitations and pretreatment standards established or revised after the date of the enactment of this subsection.

"(5) EFFECT OF DENIAL OF APPLICATION.—If an application for a variance from the application of an effluent limitation or pretreatment standard under this subsection is denied by the Administrator, the applicant must comply with such limitation or standard as established or revised, as the case may be.

"(6) APPLICATION FEE.—The Administrator shall establish and collect a fee from each applicant for a variance under this subsection. Such fee shall be in an amount not more than an amount that reflects the reasonable administrative costs directly incurred in reviewing and processing applications for such variance. All amounts collected by the Administrator under this paragraph shall be deposited in the general fund of the Treasury.

"(7) REPORTS.—Every six months after the date of the enactment of this subsection, the Administrator shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives a report on the status of applications for variances from effluent limitations under section 301 or 304 of this Act or any national categorical pretreatment standard under section 307(b) of this Act filed before, on, or after such date of enactment.".

(b) SAVINGS CLAUSE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by subsection (a) shall not affect any procedures or requirements in effect before the date of the enactment of this Act with respect to the granting of variances from the application of effluent limitations and pretreatment standards established or revised on or before such date of enactment.

(2) EXCEPTIONS.—

(A) FACTOR TO BE CONSIDERED.—In deciding whether to deny or approve an application filed before the date of the enactment of this Act for a variance from an effluent limitation under section 301 or 304 of the Federal Water Pollution Control Act or any national categorical pretreatment standard under section 307(b) of such Act which has not been denied or approved on or before such date of enactment, the Administrator shall consider any requirements contained in effluent guidelines issued after the date of such filing.

(B) TIME LIMIT FOR DECISION.—The Administrator shall approve or deny any application referred to in subparagraph (A) within 180 days after such date of enactment; except that if the applicant amends such application to take into account any new effluent guidelines issued after the date of filing of such application, the Administrator shall deny or approve such amended application within 180 days after the date of such amendment.

SEC. 23. COAL REMINING OPERATIONS.

Section 301 is amended by adding at the end thereof the following:

"(o) MODIFIED PERMIT FOR COAL REMINING OPERATIONS.—

"(1) IN GENERAL.—Subject to paragraphs (2) through (4) of this subsection, the Administrator, or the State in any case which the State has an approved permit program under section 402(b), may issue a permit under section 402 which modifies the requirements of subsection (b)(2)(A) of this section with respect to the pH level of any pre-existing discharge, and with respect to pre-existing discharges of iron and manganese from the remined area of any coal remining operation or with respect to the pH level or level of iron or manganese in any pre-existing discharge affected by the remining operation. Such modified requirements shall apply the best available technology economically achieveable on a case-by-case basis, using best professional judgment, to set specific numerical effluent limitations in each permit.

"(2) LIMITATIONS.—The Administrator or the state may only issue a permit pursuant to paragraph (1) if the applicant demonstrates to the satisfaction of the Administrator or the State, as the case may be, that the coal remining operation will result in the potential for improved water quality from the remining operation but in no event shall such a permit allow the pH level of any discharge, and in no event shall such a permit allow the discharges of iron and manganese, to exceed the levels being discharged from the remined area before the coal remining operation begins. No discharge from, or affected by the remining operation shall exceed state water quality standards established under section 303 of this Act.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) the term 'coal remining operation' means a coal mining operation which begins after the date of enactment of this subsection at a site on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977;

"(B) the term 'remined area' means only that area of any coal remining operation on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977; and

"(C) the term 'pre-existing discharge' means any discharge at the time of permit application under this subsection.

"(4) APPLICABILITY OF STRIP MINING LAWS.—Nothing in this subsection shall affect the application of the Surface Mining Control and Reclamation Act of 1977 to any coal mining operation, including the application of such Act to suspended solids.".

SEC. 24. WATER QUALITY CRITERIA.

(a) IN GENERAL.—Section 304(a)(1) is amended by adding at the end thereof the following: "In developing, publishing, and revising criteria under this paragraph after the date of the enactment of this sentence, the Administrator shall consider, among other things, the effects on the ecosystem of (i) water hardness, (ii) pH, (iii) chemical and physical interactions, (iv) persistence of pollutants and the long-term effects of pollutants, (v) sedimentation from chemical reaction of pollutants, (vi) the absorptive properties of sediments, (vii) resuspension, and (viii) bio-uptake. New or revised criteria under this paragraph should be established so as to provide an ample margin of safety to protect human health and fish and wildlife resources. Whenever, in developing new or revised criteria under this paragraph with respect to a pollutant, the Administrator determines that a well-founded and significant difference of opinion exists as to the latest scientific and research knowledge on the matters referred to in the preceding sentence, the Administrator shall publish a description of such difference of opinion along with the publication of such criteria.".

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Administrator and the States, in developing, publishing, and revising water quality criteria under section 304(a)(1) of the Federal Water Pollution Control Act should—

(1) consider the economic effects of implementation of the proposed water quality criteria;

(2) consider cyclical charges in the climate and environment; and

(3) take into account the recommendation of the concerned States and the findings and result of site specific and areawide research, tests, experiments, and demonstration programs conducted by the concerned States.

SEC. 25. TEST PROCEDURES.

Section 304(h) is amended by striking out ", within one hundred and eighty days from the date of enactment of this title," and inserting in lieu thereof ", within ninety days from the date of the enactment of the Water Quality Renewal Act of 1985,".

SEC. 26. PRETREATMENT STANDARDS.

(a) EXTENSION OF STANDARDS BY POTW APPLYING INNOVATIVE SYSTEM.—Section 307 is amended by adding at the end the following:

"(e) COMPLIANCE DATE EXTENSION FOR INNOVATIVE PRETREATMENT SYSTEMS.—In the case of any new or existing facility that proposes to comply with the pretreatment standards of subsection (b) of this section by applying an innovative system that meets the requirements of section 301(k) of this Act, the owner or operator of the publicly owned treatment works receiving the treated effluent from such facility may extend the date for compliance with the applicable pretreat-

ment standard established under this section for a period not to exceed two years—

"(1) if the Administrator determines that the innovative system has the potential for industrywide application, and

"(2) if the Administrator (or the State, in any case in which the State has a pretreatment program approved by the Administrator)—

"(A) determines that the proposed extension will not cause the publicly owned treatment works to be in violation of its permit under section 402, and

"(B) concurs with the proposed extension.".

(b) INCREASE IN EPA EMPLOYEES.—The Administrator shall take such actions as may be necessary to increase the number of employees of the Environmental Protection Agency in order to effectively implement pretreatment requirements under section 307 of the Federal Water Pollution Control Act.

SEC. 27. INSPECTION AND ENTRY.

(a) IN GENERAL.—Section 308(b) is amended by striking out all that follows "Code" and inserting in lieu thereof a period and the following: "Any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) who knowingly or willfully publishes, divulges, discloses, or makes known in any manner or to any extent not authorized by law any information which is required to be considered confidential under this subsection shall be fined not more than $1,000 or imprisoned not more than one year, or both. Nothing in this subsection shall prohibit the Administrator or an authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports, or information to other officers, employees, or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.".

(b) CONFORMING AMENDMENT.—Section 308(a)(B) is amended by inserting "(including an authorized contractor acting as a representative of the Administrator)" after "or his authorized representative".

SEC. 28. CRIMINAL PENALTIES.

(a) IN GENERAL.—Section 309(c) is amended to read as follows:

"(c) CRIMINAL PENALTIES.—

"(1) NEGLIGENT VIOLATIONS.—Any person who—

"(A) negligently violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army, acting through the Chief of Engineers, or by a State; or

"(B) negligently introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which causes or may reasonably be anticipated to cause personal injury or property damage or which causes such treatment works to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than one year, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment of not more than two years, or by both.

"(2) KNOWING VIOLATIONS.—Any person who—

"(A) knowingly violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army, acting through the Chief of Engineers, or by a State; or

"(B) knowingly introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which causes or may reasonably be anticipated to cause personal injury or property damage or which causes such treatment works to violate any effluent limitation or condition in a permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than two years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $100,000 per day of violation, or by imprisonment of not more than four years, or by both.

"(3) KNOWING ENDANGERMENT.—(A) Any person who knowingly violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, and who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment of not more than fifteen years, or both. A defendant that is an organization shall, upon conviction of violating this subparagraph, be subject to a fine of not more than $1,000,000.

"(B) For the purpose of subparagraph (A) of this paragraph—

"(i) in determining whether a defendant who is an individual knew that his conduct placed another person in imminent danger of death or serious bodily injury—

"(I) the person is responsible only for actual awareness or actual belief that he possessed; and

"(II) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant;

except that in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information;

"(ii) it is an affirmative defense to prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—

"(I) an occupation, a business, or a profession; or

"(II) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent;

and such defense must be established by a preponderance of the evidence;

"(iii) the term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons; and

"(iv) the term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss of impairment of the function of a bodily member, organ, or mental faculty.

"(4) COMPLIANCE AS AFFIRMATIVE DEFENSE.—It shall be an affirmative defense under paragraphs (1)(B) and (2)(B) of this subsection that the introduction of any pollutant or hazardous substance into a sewer system or a publicly owned treatment works was in compliance with all applicable Federal, State, and local requirements which govern the introduction of a pollutant or hazardous substance into a sewer or publicly owned treatment works.

"(5) FALSE STATEMENTS.—Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this Act or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this Act, shall upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than two years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than four years, or by both.

"(6) RESPONSIBLE CORPORATE OFFICER AS 'PERSON'.—For the purpose of this subsection, the term 'person' means, in addition to the definition contained in section 502(5) of this Act, any responsible corporate officer.

"(7) HAZARDOUS SUBSTANCE DEFINED.—For the purpose of this subsection, the term 'hazardous substance' means (A) any substance designated pursuant to section 311(b)(2)(A) of this Act, (B) any element, compound, mixture, solution, or substance designated pursuant to section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act has been suspended by Act of Congress), (D) any toxic pollutant listed under section 307(a) of this Act, and (E) any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act.".

(b) CONFORMING AMENDMENT.—Section 404(s)(4) is repealed. Paragraph (5) of section 404(s) (and any references thereto) is redesignated as paragraph (4).

SEC. 29. CIVIL PENALTIES.

(a) INCREASE IN PENALTY.—Section 309(d) is amended by striking out "$10,000" and inserting in lieu thereof "$25,000".

(b) INCREASED PENALTIES NOT REQUIRED UNDER STATES PROGRAMS.—The Federal Water Pollution Control Act shall not be construed as requiring a State to have a civil penalty for violations described in such section 309(d) which has the same monetary amount as the civil penalty established by such section, as amended by subsection (a) of this section.

SEC. 30. ADMINISTRATIVE PENALTIES.

(a) IN GENERAL.—Section 309 is amended by adding at the end thereof the following:

"(g) ADMINISTRATIVE PENALTIES.—

"(1) IN GENERAL.—Whenever on the basis of any information available to him or her—

"(A) the Administrator finds that any person is in violation of section 301 (except as it relates to section 404 of this Act), 302, 306, 307, 318, or 405 of this Act, or is in violation of any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or

"(B) the Secretary of the Army, acting through the Chief of Engineers (hereinafter in this subsection referred to as the 'Secretary') finds that any person is in violation of section 301 of this Act (as it relates to section 404 of this Act) or is in violation of any permit condition or limitation implementing any of such sections in a permit issued under section 404 of this Act by the Secretary or by a State,

the Administrator or Secretary, as the case may be, may, after consultation with the State in which the violation occurs, assess a civil penalty of not more than $10,000 per day of violation, except that such penalty shall not exceed a total of $125,000. The Administrator or the Secretary may not assess a civil penalty under this subsection against any person with respect to a violation if the Administrator or Secretary, as the case may be, has assessed a civil penalty under this subsection against such person with respect to the same violation or a violation having substantially the same cause or arising out of substantially the same conditions.

"(2) ADMINISTRATIVE REQUIREMENTS.—

"(A) NOTICE AND OPPORTUNITY FOR HEARING.—A civil penalty shall be assessed under this subsection by the Administrator or Secretary, as the case may be, by an order made on the record after opportunity (provided in accordance with this subparagraph) for a hearing in accordance with section 554 of title 5, United States Code. Before issuing such an order, the Administrator or Secretary, as the case may be, shall—

"(i) give written notice to the person to be assessed a civil penalty under such order of the Administrator's or Secretary's proposal to issue such order and provide such person an opportunity to request, within 15 days of the date the notice is received by such person, such a hearing on the order; and

"(ii) provide public notice of and reasonable opportunity to comment on any proposed assessment.

"(B) NOTICE TO INTERESTED PERSONS.—Any person who comments on a proposed assessment shall be given notice of any hearing held under subparagraph (A) and any order assessing a penalty under this subsection. In any such hearing, such person shall have a reasonable opportunity to present evidence.

"(C) RIGHTS OF INTERESTED PERSONS TO A HEARING.—If no hearing is held before the issuance of an order assessing a penalty under this subsection, any person who commented on the proposed assessment may petition the Administrator or Secretary, as the case may be, to set aside such order and to provide a hearing on the penalty. The Administrator or Secretary shall set aside such order and provide such hearing in accordance with subparagraph (A) if the Administrator or Secretary determines that the evidence presented by the petitioner in support of the petition is material and was not considered in the issuance of the order. If the Administrator or Secretary denies a hearing under this subparagraph, the Administrator or Secretary shall provide to the petitioner, and publish in the Federal Register, notice of the reasons for such denial.

"(D) FACTORS TO CONSIDER IN DETERMINING AMOUNT OF PENALTY.—In determining the amount of a civil penalty, the Administrator or Secretary, as the case may be, shall take into account the nature, circumstances, extent, and gravity of the violation or violations and, with respect to the violator, ability to pay, effect on ability to continue to do business, any history of prior such violations, the degree of culpability, economic savings (if any) resulting from the violation, and such other matters as justice may require.

"(E) FINALITY OF ORDER.—An order issued under this subsection shall become final 30 days after its issuance unless a petition for judicial review is filed under paragraph (3) or a hearing is requested under subparagraph (C). If such a hearing is denied, such order shall become final 30 days after such denial.

"(3) RIGHT OF INTERESTED PERSON TO APPEAL.—Any person who requested in accordance with paragraph (2)(A) or (2)(C) a hearing respecting the assessment of a civil penalty and who is aggrieved by an order assessing a civil penalty may file a petition for judicial review of such order with the United States Court of Appeals for the District of Columbia Circuit or for any other circuit in which such person resides or transacts business. Such a petition may only be filed within the 30-day period beginning on the date the order making such assessment was issued.

"(4) RECOVERY OF UNPAID PENALTIES BY ATTORNEY GENERAL.—If any person fails to pay an assessment of a civil penalty—

"(A) after the order making the assessment has become a final order and if such person does not file a petition for judicial review of the order in accordance with paragraph (3), or

"(B) after a court in an action brought under paragraph (3) has entered a final judgment in favor of the Administrator or Secretary, as the case may be,

the Attorney General shall recover the amount assessed (plus interest at currently prevailing rates from the date of the expiration of the 30-day period referred to in paragraph (3) or the date of such final judgment, as the case may be) in an action brought in any appropriate district court of the United States. In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review. Any person who fails to pay on a timely basis the amount of an assessment of a civil penalty as described in the first sentence of this paragraph shall be required to pay, in addition to such amount and interest, attorneys fees and costs for collection proceedings and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 percent of the aggregate amount of such person's penalties and nonpayment penalties which are unpaid as of the beginning of such quarter.

"(5) SUBPOENAS.—The Administrator or Secretary, as the case may be, shall have the authority to issue subpoenas in connection with hearings under paragraph (2) of this subsection and may request the Attorney General to bring an action to enforce any subpoena under this subsection. The district courts shall have jurisdiction to enforce such subpoenas and impose sanctions.

"(6) EFFECT ON AUTHORITY OF ADMINISTRATOR.—Action taken by the Administrator or Secretary, as the case may be, pursuant to this subsection shall not affect or limit the Administrator's or Secretary's authority to enforce any provision of this Act, except that any violation with respect to which a civil penalty has been paid under this subsection shall not be subject to a civil penalty under section 309(d) or section 311(b) of this Act.

"(7) EFFECT OF STATE ENFORCEMENT ACTION.—When a State has proceeded with an enforcement action relating to a violation with respect to which the Administrator or Secretary is authorized to assess a civil penalty under this subsection, the Administrator or Secretary, as the case may be, are not authorized to take any action under this subsection if the State demonstrates that the State imposed penalty is appropriate.

"(8) EFFECT OF ADMINISTRATOR'S ACTION ON COMPLIANCE.—No action by the Administrator under this subsection shall affect any person's obligation to comply with any section of this Act or with the terms and conditions of any permit issued pursuant to section 402 or 404 of this Act.".

(b) CITIZEN SUITS.—Section 505(b)(1) is amended by striking out the period at the end of subparagraph (B) and inserting ", or" and by adding at the end the following:

"(C) if the Administrator or State has commenced and is diligently pursuing the assessment of a civil penalty for the alleged violation under section 309(g) of this Act or under a comparable State law, as the case may be.".

SEC. 31. RELATIONSHIP TO OTHER LAWS.

Section 311(r) is amended by adding at the end thereof the following: "Discharges from a deepwater port or from a vessel within a deepwater port safety zone which are subject to section 18 of the Deepwater Port Act of 1974 (33 U.S.C. 1517) shall not be subject to the liability and penalty provisions of this section.".

SEC. 32. MARINE SANITATION DEVICES.

Section 312(f)(1) of the Federal Water Pollution Control Act is amended by striking out "After" and inserting in lieu thereof "(A) Except as provided in subparagraph (B), after" and by adding at the end thereof the following:

"(B) A State may adopt or enforce a statute or regulation with respect to the design, manufacture, or installation or use of any marine sanitation device on a houseboat, if such statute or regulation is more stringent than the standards and regulations promulgated under this section. For purposes of this paragraph, the term 'houseboat' means a vessel which, for a period of time determined by the State in which the vessel is located, is used primarily as a residence and is not used primarily as a means of transportation.".

SEC. 33. CLEAN LAKES.

(a) APPLICATION OF PROGRAM TO SALINE LAKES.—Section 314(a)(1) is amended by striking out "fresh water".

(b) NONPOINT SOURCE GRANT PROGRAM; ANNUAL REPORT.—Section 314 is amended by adding at the end thereof the following new subsections:

"(d) PRIORITY PROJECTS FOR CONTROL OF NONPOINT SOURCES.—

"(1) GRANT PROGRAM.—The Administrator shall make grants to States for priority projects for control of nonpoint sources of pollution which are contributing to the degradation of water quality in lakes. The Administrator shall provide an equitable distribution of such sums to the States.

"(2) FEDERAL SHARE.—The amount granted to a State for a project under this subsection shall not exceed 70 per centum of the cost of such project.

"(3) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection not to exceed $50,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Sums appropriated shall remain available until expended.

"(e) ACIDITY MITIGATION PROGRAM.—

"(1) STATE SURVEYS AND PLANS.—Any State may prepare, and submit to the Administrator for his approval—

"(A) a survey of surface waters in such State in which water quality has deteriorated as a result of high acidity that may reasonably be due to acid deposition or acid mine drainage, and

"(B) methods and procedures that may be applied to mitigate the harmful effects of such acidity on such waters.

"(2) DESCRIPTION OF CERTAIN ELIGIBLE METHODS.—Methods which the Secretary may approve under this subsection may include, but are not limited to—

"(A) innovative methods of neutralizing and restoring buffering capacity of surface water, such as through the use of alkaline substances, that have become so acidic as to endanger game fish species, and

"(B) methods of removing from surface water toxic metals and other toxic substances mobilized by high acidity.

"(3) GRANTS.—The Administrator, in consultation with the Secretary of the Interior, shall make grants to States to carry out methods and procedures approved by the Administrator under this subsection.

"(4) FEDERAL SHARE.—The amount granted under this subsection to any State for any fiscal year shall not exceed 80 percent of the funds expended by such State in such year for carrying out approved methods and procedures under this subsection.

"(5) DISTRIBUTION OF FUNDS.—The Administrator shall provide for an equitable distribution of sums appropriated under this subsection among States with approved methods and procedures. Such distribution shall be based on the relative need of each such State for the mitigation of the harmful effects on surface waters of high acidity that may reasonably be due to acid deposition or acid mine drainage. The amount of any grant to a State under this subsection shall be in addition to, and not in lieu of, any other Federal financial assistance.

"(6) MONITORING AND ANNUAL REPORTS.—The Administrator and the Secretary of the Interior shall monitor and assess the effectiveness of the methods and procedures utilized by the States under this subsection and shall submit a report on such monitoring and assessment annually to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environmental and Public Works of the Senate.

"(7) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this subsection $25,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Amounts appropriated under this subsection shall remain available until expended.".

"(f) ANNUAL WATER QUALITY REPORT.—The Administrator shall submit annually to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the status and trend of water quality in lakes in the United States, including but not limited to, the nature and extent of pollution loading from point and nonpoint sources and the extent to which the use of lakes is impaired as a result of such pollution, particularly with respect to toxic pollution.".

(c) CONFORMING AMENDMENTS.—Section 314 is amended—

(1) in subsection (b), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (a) of this section";

(2) in subsection (c)(1), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section"; and

(3) in subsection (c)(2), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section".

(d) CLEAN LAKES PROJECTS.—

(1) LAKE HOUSTON, TEXAS.—

(A) STUDY; CONTROL MEASURES.—The Administrator shall, in cooperation with the State of Texas, study water quality problems in Lake Houston, Houston, Texas, and undertake such control measures as the Administrator and State determine are necessary to improve water quality. Such study shall include, but not be limited to, the evaluation of the feasibility of regional or consolidated waste treatment facilities and the development of recommendations for the cost-effective control of pollutants entering the Lake Houston watershed.

(B) REPORT.—The Administrator shall submit a report on the results of such study and identify such structural or nonstructural controls which were undertaken or are proposed, along with recommendations for further measures, to improve the water quality of Lake Houston, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate not later than one year after the date of the enactment of this Act.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $10,000,000 to carry out this paragraph, to remain available until expended.

(2) BEAVER LAKE, ARKANSAS.—

(A) STUDY.—The Administrator, in cooperation with the Secretary of the Army, acting through the Chief of Engineers, and in consultation with appropriate State and local agencies, shall conduct a one-year comprehensive study of the Beaver Lake, Arkansas, to identify measures which will optimize achievement of the purposes for which Beaver Dam was constructed while preserving and enhancing the quality of the reservoir's water.

(B) DEMONSTRATION PROJECT.—Upon completion of the study, the Administrator shall undertake a demonstration project at Beaver Lake to determine the effectiveness of measures identified in such study for preserving and enhancing the quality of the reservoir's water for current and future users.

(C) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report of such study and project, along with recommendations for further measures to improve the water quality of Beaver Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(D) AVAILABILITY OF FUNDS.—Funds appropriated under subsections (c), (d), and (e) of section 314 of the Federal Water Pollution Control Act and under section 36 of this Act, relating to maintenance of water quality in estuaries, shall be available to carry out this paragraph.

(3) GREENWOOD LAKE AND BELCHER CREEK, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt, stumps, and other obstructions from Greenwood Lake and Belcher Creek, New Jersey.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations for further measures to improve the water quality of Greenwood Lake and Belcher Creek, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 to carry out this paragraph.

(4) DEAL LAKE, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt and stumps from, and the control of pollution from nonpoint sources in, Deal Lake, Monmouth County, New Jersey.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations for further measures to improve the water quality of Deal Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $8,000,000 to carry out this paragraph.

(5) ALCYON LAKE, NEW JERSEY.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the restoration of Alcyon Lake, New Jersey, including removal and disposal of contaminated sediments in the lake.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Alcyon Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $3,500,000 to carry out this paragraph.

(6) SAUK LAKE, MINNESOTA.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project for the removal of silt and aquatic growth from Sauk Lake and its tributary

streams in the vicinity of Sauk Centre, Stearns County, Minnesota.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Sauk Lake, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 to carry out this paragraph.

(7) LAKE WORTH, TEXAS.—

(A) DEMONSTRATION PROJECT.—The Administrator shall undertake a demonstration project to remove silt and aquatic growth from Lake Worth, Tarrant County, Texas, including constructing silt traps and providing other devices or equipment to prevent and abate the further deposit of sediment in Lake Worth. Such project shall also provide for the use of dredged material in the reclamation of despoiled land. The Administrator may take such other actions as may be necessary to carry out such project.

(B) REPORT.—Upon completion of the demonstration project, the Administrator shall submit a report on such project, along with recommendations of further measures to improve the water quality of Lake Worth, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $1,750,000 to carry out this paragraph.

SEC. 34. NPDES PERMITS.

(a) PERMIT REQUIREMENTS.—

(1) TERMS.—Section 402(b)(1)(B) is amended to read as follows:

"(B) are for fixed terms not exceeding five years, or for a fixed term not exceeding ten years in any case in which the State determines (in accordance with regulations established by the Administrator) that the applicant has consistently complied with any permit held by such applicant under this section and that—

"(i) pollutants described in subparagraphs (C), (D), and (F) (except for any pollutant for which a modification is authorized under section 301(g) of this Act) of section 301(b)(2) are not detectable in the effluent to which the permit will apply; or

"(ii) such pollutants are present in such effluent only in trace amounts and are neither causing nor are likely to cause toxic effects, alone or in combination with pollutants from other sources;".

(2) COMPLIANCE WITH NEW TOXIC LIMITATIONS AND WATER QUALITY STANDARDS.—Section 402(b)(1) is amended by redesignating subparagraph (D) as subparagraph (F) and by inserting after subparagraph (C) the following:

"(D) in the case of any permit issued for a fixed term exceeding five years, must be modified promptly to ensure compliance with any new or revised effluent limitation under section 307(a) of this Act or any new or revised requirement pursuant to a standard under section 303 of this Act which limitation or requirement is more stringent than the existing effluent limitation or requirement in the permit or which controls a pollutant not controlled in the permit;

"(E) in the case of any permit issued for a fixed term exceeding 5 years, can be modified to ensure compliance with—

"(i) any new or revised effluent limitation under section 301, 302, or 304 of this Act,

"(ii) any new or revised pretreatment standard under section 307(b) of this Act,

"(iii) any new or revised guideline under section 403 of this Act, or

"(iv) any new or revised regulation governing the disposal of sewage sludge under section 405 of this Act,

which limitation, standard, guideline, or regulation is more stringent than the existing effluent limitation, pretreatment standard, guideline, or regulation in the permit or which controls a pollutant not controlled in the permit; and".

(b) EXEMPTION FROM PERMIT OF CERTAIN STORMWATER RUNOFF.—

(1) IN GENERAL.—Section 402(l) is amended by inserting "(1)" after "(l)" and by adding at the end thereof the following:

"(2) The Administrator shall not require a permit under this section, nor shall the Administrator directly or indirectly require any State to require such a permit, for discharges of stormwater runoff from mining operations or oil or gas exploration, production, processing, or treatment operations or transmission facilities, composed entirely of flows which are from conveyances or systems of conveyances (including but not limited to pipes, conduits, ditches, and channels) used for collecting and conveying precipitation runoff and which do not come into contact with any overburden, raw material, intermediate product, finished product, by-product, or waste product located on the site of such operations. Any person discharging stormwater runoff not described in the preceding sentence from mining operations or oil or gas exploration, production, processing, or treatment operations or transmission facilities shall monitor the quality of water in such flows and shall report not less often than annually to the Administrator, or at such intervals as the Administrator or the State deems appropriate.

"(3)(A) The Administrator shall not require a permit under this section, nor shall the Administrator directly or indirectly require any State to require such a permit for discharges composed entirely of stormwater runoff unless the Administrator determines, in the case of a class or category of such discharges, that such class or category may be a significant contributor of pollutants to the navigable waters or, in the case of a particular discharge, that such discharge violates a water quality standard or is a significant contributor of pollutants to the navigable waters.

"(B) This paragraph shall not apply to discharges referred to in paragraph (2) of this subsection, agricultural stormwater discharges, or to discharges from municipal separate storm sewers. A permit issued under this section may cover one or more than one municipal separate storm sewer.

"(C) Not later than one year after the date of the enactment of this paragraph, the Administrator shall promulgate interim final regulations identifying the classes and categories of industrial discharges for which permits are required in accordance with subparagraph (A), As soon as possible, but not later than six months, after completion of the study required by section 26(b)(2) of the Water Quality Renewal Act of 1985 (relating to NPDES permits), the Administrator shall issue such final regulations as necessary to take into account the results of such study.

"(D) Nothing in this paragraph shall effect any permit for a stormwater discharge in effect on the date of the enactment of this paragraph.

"(E) This paragraph shall apply during the period beginning on the date of the enactment of this paragraph and ending on December 31, 1989.".

(2) STUDY.—The Administrator shall study methods of regulating stormwater discharges. Such study shall include, but need not be limited to—

(A) an identification of the classes and categories of dischargers which have not been required to obtain permits under section 402(1)(3) of the Federal Water Pollution Control Act;

(B) a determination of the nature and extent of pollutants in the discharge of such dischargers; and

(C) a determination of procedures and methods to control such pollutants.

Not later than December 31, 1987, the Administrator shall submit to Congress a report on the results of such study along with recommendations on the most effective methods of regulating stormwater discharges.

(c) ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.—Section 402 is amended by adding at the end thereof the following new subsection:

"(m) ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.—To the extent a treatment works (as defined in section 212 of this Act) which is publicly owned is not meeting the requirements of a permit issued under this section for such treatment works as a result of inadequate design or operation of such treatment works, the Administrator, in issuing a permit under this section, shall not require pretreatment by a person introducing conventional pollutants identified pursuant to section 304(a)(4) of this Act into such treatment works other than pretreatment required to assure compliance with pretreatment standards under subsection (b)(8) of this section and section 307(b)(1) of this Act. Nothing in this subsection shall affect the Administrator's authority under sections 307 and 309 of this Act, affect State and local authority under sections 307(b)(4) and 510 of this Act, relieve such treatment works of its obligations to meet requirements established under this Act, or otherwise preclude such works from pursuing whatever feasible options are available to meet its responsibility to comply with its permit under this section.".

(d) PARTIAL PERMIT PROGRAM.—Section 402 is amended by adding at the end the following:

"(n) PARTIAL PERMIT PROGRAM.—

"(1) STATE SUBMISSION.—The Governor of a State may submit under subsection (b) of this section a permit program for a portion of the discharges into the navigable waters in such State.

"(2) MINIMUM COVERAGE.—A partial permit program under this subsection shall cover at a minimum administration of a major category of the discharges into the navigable waters of the State or a major component of the permit program required by subsection (b).

"(3) APPROVAL OF PARTIAL PERMIT PROGRAM.—The Administrator may approve a partial permit program covering administration of a major category of discharges under this subsection if—

"(A) such program represents a complete permit program and covers all of the discharges under the jurisdiction of a department or agency of the State; and

"(B) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b).

"(4) APPROVAL OF PARTIAL AND PHASED PERMIT PROGRAM.—The Administrator may approve under this subsection a partial and phased permit program covering administration of a major component (including discharge categories) of a State permit program required by subsection (b) if—

"(A) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b); and

"(B) the State submits, and the Administrator approves, a plan for the State to assume administration by phases of the remainder of the State program required by subsection (b) by a specified date not more than five years after submission of the partial program under this subsection and agrees to make all reasonable efforts to assume such administration by such date.".

(e) RETURN OF STATE PERMIT PROGRAM TO ADMINISTRATOR.—

(1) IN GENERAL.—Section 402(c) is amended by adding at the end thereof the following new paragraph:

"(4) A State may return administration of its permit program to the Administrator, and the Administrator may withdraw approval of a State permit program under paragraph (3) of this subsection—

"(A) in the case of any approval under subsection (n)(3), the entire permit program being administered by the State department or agency at the time of such return or withdrawal, as the case may be; or

"(B) in the case of any approval under subsection (n)(4), any phased component of the permit program approved at the time of such return or withdrawal, as the case may be.".

(2) TECHNICAL AMENDMENT.—Section 402(c)(1) is amended by striking out "as to those navigable waters" and inserting in lieu thereof "as to those discharges".

(f) LOG TRANSFER FACILITIES.—Section 402 is amended by adding at the end thereof the following new subsection:

(o) LOG TRANSFER FACILITIES.—

(1) GENERAL RULE.—A log transfer facility which is required (but for this subsection) to have a permit under both this section and section 404 and with respect to which a permit under section 404 has been issued shall not be required to submit a new application for a permit under section 402.

(2) DETERMINATION OF COMPLIANCE WITH 402 REQUIREMENTS.—The Administrator shall determine, after notice and an opportunity for a public hearing, whether a permit under section 404 with respect to a log transfer facility satisfies the applicable requirements of section 301, 302, 306, 307, 308, and 403 of this Act. If the Administrator determines that the terms of such permit satisfy such requirements, a separate application for a permit under this section shall not be required. If the Administrator determines that such terms fail to satisfy such requirements, the Administrator may propose to the Secretary of the Army modifications to such permit to incorporate such requirements. If such permit is not modified or issued to incorporate such requirements, the Administrator shall require issuance of a permit under this section for such facility.

"(3) DEFINITION.—For purposes of this subsection, the term 'log transfer facility' means a facility which is constructed, in whole or part, in waters of the United States and which is utilized for the purpose of transferring commercially harvested logs to or from a vessel or log raft.".

(g) ANTI-BACKSLIDING.—

(1) IN GENERAL.—Section 402 is amended by adding at the end thereof the following new subsection:

"(p) ANTI-BACKSLIDING.—

"(1) GENERAL PROHIBITION FOR BPJ AND WATER QUALITY BASED PERMITS.—Except as provided in paragraph (2)—

"(A) a permit issued under subsection (a)(1)(B) of this section which contains an effluent limitation applicable to a pollutant, and

"(B) a permit issued under this section which contains an effluent limitation applicable to a pollutant and established on the basis of section 301(b)(1)(C) or 303(d),

may not be renewed, reissued, or modified to contain a less stringent effluent limitation applicable to such pollutant.

"(2) EXCEPTION.—A permit described in paragraph (1) may be renewed, reissued, or modified to contain a less stringent effluent limitation applicable to a pollutant if—

"(A) material and substantial alterations or additions to the permitted facility or activity occurred after permit issuance which justify the application of a less stringent effluent limitation;

"(B) information is available which was not available at the time of permit issuance (other than revised regulations, guidance, or test methods) and which would have justified the applicaiton of a less stringent effluent application at the time of permit issuance;

"(C) good cause exists for a less stringent effluent limitation, such as an act of God, strike, flood, or materials shortage or other events over which the permittee has little or no control and for which there is no reasonably available remedy;

"(D) the permittee has filed a request for a variance under section 301(c), 301(g), 301(h), 301(i), 301(k), 301(n), or 316(a);

"(E) the permittee demonstrates that operation and maintenance costs of the permitted facility are totally disproportionate to the operation and maintenance costs considered in the development of effluent limitations promulgated after the issuance of the permit;

"(F) the Administrator determines that technical mistakes or mistaken interpretations of law were made in issuing the permit under subsection (a)(1)(B); or

"(G) the permittee has installed the equipment and facilities required to meet such effluent limitation and has properly operated and maintained such equipment and facilities and has not been able to achieve the effluent limitation.

"(3) LIMITATIONS.—In no event may a permit described in paragraph (1) be renewed, reissued, or modified to contain an effluent limitation which is less stringent than required by effluent guidelines in effect at the time the permit is renewed, reissued, or modified. In no event may a permit described in paragraph (1)(B) to discharge into waters be renewed, reissued, or modified to contain a less stringent effluent limitation if the implementation of such limitation would result in a violation of a water quality standard under section 303 applicable to such waters.

"(4) EFFECTIVE PERIOD.—This subsection shall be in effect during the period of two years and six months beginning on the date of the enactment of this subsection.".

(2) REPORT.—The Administrator shall study the extent to which States have reviewed, revised, and adopted water quality standards in accordance with section 24 of the Municipal Wastewater Treatment Construction Grant Amendments of 1981 and the extent to which modifications of permits issued under section 402(a)(1)(B) of the Federal Water Pollution Control Act to permit less stringent effluent limitations should be allowed. The Administrator shall submit a report of such study, together with recommendations to Congress not later than two years after the date of the enactment of this Act.

(3) CONFORMING AMENDMENT.—Section 402(a)(1) is amended by inserting "(A)" after "either " and by inserting "(B)" after "this act, or".

SEC. 35. AUDITS.

Section 501(d) is amended by inserting at the end thereof the following new sentences: "For the purpose of carrying out audits and examinations with respect to recipients of Federal assistance under this Act, the Administrator is authorized to enter into noncompetitive procurement contracts with State audit organizations. Such contracts may only be entered into to the extent and in such amounts as may be provided in advance in appropriation Acts.".

SEC. 36. COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS.

(a) DEFINED AS A STATE.—Section 502(3) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

(b) DEFINED AS PART OF UNITED STATES.—Section 311(a)(5) is amended by striking out "the Canal Zone," and inserting in lieu thereof "the Commonwealth of the Northern Mariana Islands,".

SEC. 37. AGRICULTURAL STORMWATER DISCHARGES.

Section 502(14) (relating to the definition of point source) is amended by inserting after "does not include" the following: "agricultural stormwater discharges and".

SEC. 38. CITIZEN SUITS.

Section 505(c) is amended by adding at the end thereof the following new paragraph:

"(3) Whenever any action is brought under this section in a court of the United States, the plaintiff shall serve a copy of the complaint on the Attorney General and the Administrator. No consent judgment shall be entered in an action in which the United States is not a party prior to forty-five days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator. No judgment in any action to which the United States is not a party shall have any binding effect upon the United States.".

SEC. 39. REPORTS TO CONGRESS.

Section 516 is amended by adding at the end thereof the following new subsections:

"(f) DAM DISCHARGE STUDY.—The Administrator, in cooperation with interested States and Federal agencies, shall study and monitor the effects on the quality of navigable waters attributable to the impoundment and discharge of water by dams. The results of such study, together with any recommendations for the control of such impoundment and discharge, shall be submitted to Congress not later than December 31, 1986.

"(g) STATE REVOLVING FUND REPORT.—

"(1) IN GENERAL.—Not later than February 10, 1990, the Administrator shall submit to Congress a report on the financial status and operations of Water Pollution Control Revolving Funds established by the States under section 220 of this Act. The Administrator shall prepare such report in cooperation with the States, including water pollution control agencies and other water pollution control planning and financing agencies.

"(2) CONTENTS.—The report under this subsection shall also include the following:

"(A) an inventory of the facilities that are in significant noncompliance with the enforceable requirements of this Act;

"(B) an estimate of the cost of construction necessary to bring such facilities into compliance with such requirements;

"(C) an assessment of the availability of sources of funds for financing such needed construction, including an estimate of the amount of funds available for providing assistance for such construction through September 30, 1999, from the Water Pollution Control Revolving Funds established by the States under section 220 of this Act;

"(D) an assessment of the operations, loan portfolio, and loan conditions of such Funds;

"(E) an assessment of the effect on user charges of the assistance provided by such Funds compared to the assistance provided with funds appropriated pursuant to section 207 of this Act; and

"(F) an assessment of the efficiency of the operation and maintenance of treatment works constructed with assistance provided by such Funds compared to the efficiency of the operation and maintenance of treatment works constructed with assistance provided under section 201 of this Act.".

SEC. 40. INDIAN TRIBES.

Title V is amended by redesignating section 518, and any references thereto, as section 519 and by inserting after section 517 the following:

"SEC. 518. INDIAN TRIBES.

"(a) ASSESSMENT OF SEWAGE TREATMENT NEEDS; REPORT.—The Administrator, in cooperation with the Director of the Indian Health Service, shall assess the need for sewage treatment works to serve Indian tribes, the degree to which such needs will be met through funds allotted to States under section 205 of this Act and priority lists under section 216 of this Act, and any obstacles which prevent such needs from being met. Not later than one year after the date of the enactment of this section, the Administrator shall submit a report to Congress on the assessment under this subsection, along with recommendations specifying (1) how the Administrator intends to provide assistance to Indian tribes to develop waste treatment management plans and to construct treatment works under this Act, and (2) methods by which the participation in and administration of programs under this Act by Indian tribes can be maximized.

"(b) RESERVATION OF FUNDS.—The Administrator shall reserve each fiscal year beginning after September 30, 1986, before allotments to the States under section 205(e), such amount as the Administrator determines appropriate based on the determination of unmet needs reported under subsection (a), but not less than one-half of one percent of the sums appropriated under section 207. Sums reserved under this subsection shall be available only for grants for the development of waste treatment management plans and for the construction of sewage treatment works to serve Indian tribes.

"(c) COOPERATIVE AGREEMENTS.—In order to ensure the consistent implementation of the requirements of this Act, an Indian tribe and the State or States in which the lands of such tribe are located may enter into a cooperative agreement, subject to the review and approval of the Administrator, to jointly plan and administer the requirements of this Act.

"(d) TREATMENT AS STATES.—The Administrator is authorized to treat an Indian tribe as a State for purposes of title II and sections 104, 106, 303, 305, 308, 309, 314, 319, 402, and 404 of this Act to the degree necessary to carry out the objectives of this section, but only if—

"(1) the Indian tribe has a governing body carrying out substantial governmental duties and powers;

"(2) the functions to be exercised by the Indian tribe pertain to the management and protection of water resources which are held by an Indian tribe, held by the United States in trust for Indians, held by a member of an Indian tribe if such property interest is subject to a trust restriction on alienation, or otherwise within the borders of an Indian reservation; and

"(3) the Indian tribe is reasonably expected to be capable, in the Administrator's judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this Act and of all applicable regulations. Such treatment as a State may include the direct provision of funds reserved under subsection (b) to the governing bodies of Indian tribes, and the determination of priorities by Indian tribes, where not determined by the Administrator in cooperation with the Director of the Indian Health Service. The Administrator, in cooperation with the Director of the Indian Health Service, is authorized to make grants under title II of this Act in an amount not to exceed 100 percent of the cost of a project. Not later than 18 months after the date of the enactment of this section, the Administrator shall, in consultation with Indian tribes, promulgate final regulations which specify how Indian tribes shall be treated as States for purposes of this Act. The Administrator shall, in promulgating such regulations, provide a mechansim for the resolution of any unreasonable consequences that may arise as a result of differing water quality standards that may be set by States and Indian Tribes located on common bodies of water. Such mechanism should provide for the avoidance of such unreasonable consequences in a manner consistent with the objective of the Act.

"(e) GRANTS FOR NONPOINT SOURCE PROGRAMS.—The Administrator shall make grants to an Indian tribe under section 319 of this Act as though such tribes were a State. Not more than one-third of one percent of the amount appropriated for any fiscal year under section 319 may be used to make grants under this subsection. In addition to the requirements of section 319, an Indian tribe shall be required to meet the requirements of paragraphs (1), (2), and (3) of subsection (d) of this section in order to receive such a grant.

"(f) DEFINITIONS.—For purposes of this section, the term—

"(1) 'Federal Indian reservation' means all land within the limits of any Indian reservation under the jurisdicition of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation; and

"(2) 'Indian tribe' means any Indian tribe, band, group, or community recognized by the Secretary of the Interior and exercising governmental authority over a Federal Indian reservation.".

SEC. 41. DEFINITION OF POINT SOURCE.

For purposes of the Federal Water Pollution Control Act, the term "point source" includes a landfill leachate collection system.

SEC. 42. CHESAPEAKE AND NARRAGANSETT BAYS.

(a) CHESAPEAKE BAY PROGRAM.—

(1) OFFICE.—The Administrator shall continue the Chesapeake Bay program and shall establish and maintain in the Environmental Protection Agency an office, division, or branch of Chesapeake Bay Programs to—

(A) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the Chesapeake Bay (hereinafter in this subsection referred to as the "Bay");

(B) coordinate Federal and State efforts to improve the water quality of the Bay;

(C) determine the impact of sediment deposition in the Bay and identify the sources, rates, routes, and distribution patterns of such sediment deposition; and

(D) determine the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings of nutrients, chlorine, acid precipitation, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals, and with special attention given to the impact of such changes on striped bass.

(2) INTERSTATE DEVELOPMENT PLAN GRANTS.—The Administrator shall, at the request of the Governor of a State affected by the interstate management plan developed pursuant to the Chesapeake Bay program (hereinafter in this subsection referred to as the "plan"), make a grant for the purpose of implementing the management mechanisms contained in the plan if such State has, within one year after the date of the enactment of this section, approved and committed to implement all or substantially all aspects of the plan. Such grants shall be made subject to such terms and conditions as the Administrator considers appropriate.

(3) SUBMISSION OF PROPOSAL.—A State or combination of States may elect to avail itself of the benefits of paragraph (2) by submitting to the Administrator a proposal including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal.

(4) FEDERAL SHARE.—Grants under paragraph (2) shall not exceed 50 percent of the costs of implementing the proposed plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the proposed plan during such fiscal year.

(5) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or projects supported by funds made available under paragraph (2) shall not exceed in any one fiscal year 10 percent of the annual grant made to a State under such paragraph.

(5) REPORTS.—Any State or combination of States that receives a grant under paragraph (2) shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the interstate management plan developed pursuant to the Chesapeake Bay program. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(b) NARRAGANSETT BAY PROGRAM.—

(1) GRANTS.—The Administrator shall, at the request of the Governor of an affected State and after consultation with the Administrator of the National Oceanic and Atmospheric Administration and other appropriate Federal and State agencies and interested persons, make a grant for purposes of assessing the principal factors having an adverse effect on the environmental quality of the Narragansett Bay (hereinafter in this subsection referred to as the "Bay"), a perceived by both scientists and users, in conjunction with developing and implementing a management program to improve the Bay's water quality. Payments for such purposes may be made to the States as hereinafter provided, subject to such terms and conditions as the Administrator considers appropriate.

(2) FEDERAL SHARE.—Grants under this paragraph shall not exceed 50 percent of the costs of implementing the plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the plan during such fiscal year.

(3) APPROVAL OF APPLICATIONS.—A State may elect to avail itself of the benefits of this subsection by submitting to the Administrator a full and complete description of the program it proposes to establish and administer under State law. The Administrator shall approve each such submitted program, within three months of receipt of such program, if the applicant demonstrates to the satisfaction of the Administrator that the applicant will—

(A) establish a committee of representatives from various units of Federal, State, and local governments, research and educational institutions, and groups and individuals concerned with problems of water quality in the Bay to provide advice on the design and implementation of a management program and to coordinate communication on issues affecting the Bay's water quality;

(B) review and coordinate Federal and State water pollution abatement efforts that will most efficiently address those principal factors having an adverse effect on the Bay's water quality;

(C) undertake, subsequent to an analysis of all environmental sampling data presently being collected on the Bay, methods for improving such data collection, particularly with respect to toxic pollutants;

(D) establish a continuing capacity for collecting, storing, analyzing, and disseminating such data;

(E) institute a sampling program where deficiencies are found to exist in present sampling programs; and

(F) develop and, as soon as practicable but not later than three years after the date of the enactment of this section, implement management practices and measures (including land use requirements) to reduce to the greatest extent feasible pollutant loadings in the Bay and to improve the Bay's water quality.

(4) STATE REPORTS.—Any State that avails itself of the benfits of this subsection shall, not later than two years after receipt of a Federal grant under this subsection and annually thereafter, report to the Administrator on progress made in implementing a management program to improve the water quality of the Bay.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated the following sums, to remain available until expended, to carry out the purposes of this section:

(1) $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989 to carry out subsection (a)(1);

(2) $10,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, for grants to States under subsection (a)(2); and

(3) $1,500,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, to carry out subsection (b).

SEC. 43. NEW YORK AND NEW JERSEY HARBOR AREA.

(a) CLEARINGHOUSE, COORDINATION, AND STUDY FUNCTIONS.—The Administrator shall—

(1) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the New York and New Jersey Harbor area (hereinafter in this subsection referred to at the "Harbor");

(2) coordinate Federal and State efforts to improve the water quality of the Harbor; and

(3) determine the impact of natural and man-induced environmental changes on the living resources of the Harbor and on adjacent coastal areas and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings of sewage, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals.

(b) GRANTS FOR IMPLEMENTATION OF INTERSTATE MANAGEMENT PLAN.—The Administrator shall, at the request of the Governor of a State affected by any interstate management plan relating to the Harbor developed pursuant to section 33 of this Act (hereinafter in this subsection referred to as the "plan"), make a grant for the purpose of implementing the management mechanisms contained in the plan in accordance with such section.

(c) SUBMISSION OF PROPOSAL.—An affected State or combination of States may, in addition, submit to the Administrator a proposal including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal.

(d) FEDERAL SHARE OF GRANTS.—Grants under this section shall not exceed 50 percent of the costs of implementing the proposal in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the proposal during such fiscal year.

(e) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or project supported by funds made available under this section shall not exceed in any one fiscal year 10 percent of the annual grant made to a State under this section.

(f) REPORTS.—Any State or combination of States that receives a grant under section 36 (relating to maintenance of water quality in estuaries) or this section shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the plan developed pursuant to such section 36 or this section. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(g) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989, to carry out this section.

SEC. 44. SAN FRANCISCO BAY.

(a) INITIATION OF PROGRAM.—The Administrator shall initiate a San Francisco Bay program to—

(1) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the San Francisco Bay (hereinafter in this section referred to as the "Bay");

(2) coordinate Federal, State and local efforts to improve the water quality of the Bay;

(3) establish a committee of representatives from various units of Federal, State, and local governments, research and education institutions, and groups and individuals concerned with problems of water quality in the Bay to provide advice on the development and implementation of such management program and to coordinate communication on issues affecting the Bay's water quality;

(4) determine the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings and toxic pollutants, including organic chemicals and heavy metals, and with special attention given to the impact of such changes on water quality and natural resources such as striped bass.

(5) develop a management plan that shall contain management practices and measures to reduce to the greatest extent feasible pollutant loadings in the Bay and to improve the Bay's water quality.

(b) GRANTS.—The Administrator shall, make a grant to the State of California for the purpose of implementing the management mechanisms contained in the management plan developed under subsection (a)(5), if such State has, within one year after the date of the enactment of this section, approved and committed to implement all or substantially all aspects of the plan. Such grants shall be made subject to such terms and conditions as the Administrator considers appropriate.

(c) SUBMISSION OF PROPOSAL.—The State of California may elect to avail itself of the benefits of this section by submitting to the Administrator a proposed plan including the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of the Federal Water Pollution Control Act and will contribute to the achievement of the national goals set forth in such section, he shall approve such proposal and shall finance the costs of implementing segments of such proposal; except that Federal grants under this section shall not exceed 50 percent of the cost of implementing the proposed plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the plan during such fiscal year.

(d) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs of projects supported by funds made available under this section shall not exceed in any one fiscal year 10 percent of the annual Federal grant made under this section.

(e) REPORTS.—The State of California shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the interstate management plan developed pursuant to the San Francisco Bay program. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

(f) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section, to remain available until expended, $3,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

SEC. 45. MAINTENANCE OF WATER QUALITY IN ESTUARIES.

(a) PURPOSES AND POLICIES.—

(1) FINDINGS.—Congress finds and declares that:

(A) the Nation's estuaries are of great importance for fish and wildlife resources and recreation and economic opportunity;

(B) maintaining the health and ecological integrity of these estuaries is in the national interest;

(C) increasing coastal population, development, and other direct and indirect uses of these estuaries threaten their health and ecological integrity;

(D) long-term planning and management will contribute to the continued productivity of these areas, and will maximize their utility to the Nation; and

(E) better coordination among Federal and State programs affecting estuaries will increase the effectiveness and efficiency of the national effort to protect, preserve, and restore these areas.

(2) PURPOSES.—The purposes of this section are to—

(A) identify nationally significant estuaries that are threatened by pollution, development, or overuse;

(B) promote comprehensive planning for, and conservation and management of, nationally significant estuaries;

(C) encourage the preparation of management plans for estuaries of national significance; and

(D) enhance the coordination of estuarine research.

(b) MANAGEMENT CONFERENCE.—

(1) NOMINATION OF ESTUARIES.—The Governor of any State may nominate to the Administrator an estuary lying in whole or in part within the State as an estuary of national significance and request a management conference to develop a comprehensive management plan for the estuary. The nomination shall document the need for the conference, the likelihood of success, and information relating to the factors in paragraph (2).

(2) CONVENING OF CONFERENCE.—

(A) IN GENERAL.—In any case where the Administrator, in consultation with the Secretary of Commerce, determines, on his own initiative or upon nomination of a State under paragraph (1), that the attainment or maintenance of that water quality in an estuary which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water, requires the control of point and nonpoint sources of pollution in more than one State, the Administrator shall select such estuary and convene a management conference.

(B) BASIS FOR SELECTION.—The selection of an estuary under subparagraph (A) shall be based upon—

(i) the ecological significance of the estuary;

(ii) the biological productivity of the estuary and its contribution to fish and wildlife resources of commercial and recreational significance;

(iii) the degree to which commercial, residential, recreational, or industrial activities within the estuary and its watershed have impaired or may impair the health and ecological integrity of the estuary; and

(iv) the degree to which comprehensive planning and management may contribute significantly to the wise use of the estuary and to its health and ecological integrity.

(C) PRIORITY CONSIDERATION.—The Administrator shall give priority consideration under this section to Long Island Sound; Buzzards Bay, Massachusetts; Delaware Bay, Delaware and New Jersey; Albemarle Sound, North Carolina; and Sarasota Bay, Florida.

(3) BOUNDARY DISPUTE EXCEPTION.—In any case in which a boundary between two States passes through an estuary and such boundary is disputed and is the subject of an action in any court, the Administrator shall not convene a management conference with respect to such estuary before a final adjudication has been made of such dispute.

(4) EXISTING MANAGEMENT PROGRAM EXCEPTION.—Notwithstanding any other provision of this section, the Administrator shall not convene a management conference with respect to an estuary if he determines that there exists a management program for the estuarine zone of such estuary with sufficient authority to achieve the purpose of this section.

(c) MEMBERS OF CONFERENCE; LEAD AGENCY.—The members of a conference under this section shall include the Administrator, the Administrator of the National Oceanic and Atmospheric Administration, a representative of each of those States which are located, in whole or in part, within the estuarine zone of the estuary for which the conference is convened, a representative of each interested Federal agency as determined appropriate by the Administrator, a representative of any interstate agency having jurisdiction over all or a significant part of the estuary, and representatives of local governments within the estuarine zone as deemed appropriate by the Administrator. In any case in which an interstate agency has jurisdiction over all or a significant part of the estuary, such agency shall be the lead agency for purposes of carrying out this section.

(d) PURPOSES OF CONFERENCE.—The purposes of any mangement conference convened with respect to an estuary under this subsection shall be—

(1) to develop a comprehensive master plan for such estuary in accordance with subsection (e) that will restore and maintain the health and ecological integrity of the estuary;

(2) to coordinate the implementation of the master plan by the States participating in the conference; and

(3) to monitor the estuary to determine the effectiveness of actions taken pursuant to the master plan.

(e) MASTER PLAN.—

(1) CONTENTS.—The master plan developed pursuant to paragraph (1) of subsection (d) shall be developed in coordination with any relevant special area management plan under the Coastal Zone Management Act. Such plan shall include priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems to the estuary's physical, chemical, and biological intergrity. Such actions may include, but need not be limited to any of the following standards and practices which are necessary for the attainment or maintenance of that water quality which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water:

(A) development of water quality standards for waters within the estuarine zone;

(B) development of toxicity-based standards for toxic pollutants;

(C) development of water quality based effluent standards for significant point sources of pollution;

(D) development of best management practices to control nonpoint sources of pollution; and

(E) other measures providing for the conservation and management of the living resources of the estuary.

(2) UTILIZATION OF EXISTING DATA.—In developing a master plan under this section, the management conference shall survey and utilize existing reports, data, and studies relating to the estuary that have been developed by or made available to Federal, interstate, State, or local agencies.

(f) PERIOD OF CONFERENCE.—A management conference convened under this section shall be convened for at least four years. Such conference may be extended by the Administrator, and if terminated after the initial four-year period, may be reconvened by the Administrator at any time thereafter, as may be necessary to meet the requirements of this section.

(g) GRANTS FOR IMPLEMENTATION OF MASTER PLAN.—The Administrator is authorized to make grants to States and interstate agencies participating in a management conference which has adopted a comprehensive master plan pursuant to this section for the estuary which is the subject of such conference. The amount of the grants to any State or interstate agency for a fiscal year shall, subject to such amounts as are provided in appropriation acts, be equal to 50 percent of that State's or agency's cost of implementing the master plan for such fiscal year.

(h) PLAN APPROVAL.—At the conclusion of a management conference, the Administrator, in consultation with the Secretary of Commerce, and each participating governor shall review the comprehensive management plan for the estuary to determine if it meets the requirements of this section and, if so, shall approve the plan.

(i) RESEARCH.—

(1) RESEARCH TO ASSIST IN DEVELOPMENT OF PLAN.—Upon convening a management conference under this section, the Secretary and the Administrator, in conjunction with State and local authorities, shall undertake to develop, compile, and make available information and research relating to the estuary that would assist in developing and implementing the comprehensive management plan.

(2) RESEARCH PLAN.—The management conference may develop a research plan, which

shall include research needs, priorities, and guidelines, to promote the coordination and utility of research relating to the estuary.

(3) ADVISORY COMMITTEES.—In developing a research plan under this subsection, the management conference shall establish advisory committees or other procedures to provide the interdiciplinary technical expertise necessary to address the range of issues requiring research.

(4) RESEARCH TO DETERMINE NEED FOR CONFERENCE.—The Secretary shall conduct such research as may be necessary to determine the need to convene a management conference under this section or as may be requested by a management conference. Such research shall comply with any applicable research plan under paragraph (2).

(j) DEFINITIONS.—For purposes of this section, the terms "estuary" and "estuarine zone" have the meanings such terms have in section 104(n)(4) of the Federal Water Pollution Control Act, except that the term "estuarine zone" shall also include those portions of tributaries draining into the estuary up to the historic height of migration of anadromous fish or the historic head of tidal influence, whichever is higher. For purposes of this section, the term "State" has the meaning such term has in section 502(3) of such Act.

(k) REPORT TO CONGRESS.—The Administrator, in consultation with the Secretary of Commerce, shall submit to Congress not later than January 1, 1987, and biennially thereafter a comprehensive report on the activities authorized under this section, which shall—

(1) list the priority monitoring and research needs for estuaries to meet the objectives of this section;

(2) assess the health of the Nation's estuaries evaluated under this section;

(3) discuss the pollution problems and trends that affect directly or indirectly the water quality, ecosystem, and existing or potential uses of each estuary evaluated under this section; and

(4) evaluate the effectiveness of pollution abatement activities and other management measures undertaken pursuant to this section.

(l) AUTHORIZATION OF APPROPRIATIONS.—

(1) GRANTS.—There is authorized to be appropriated to carry out this section not to exceed $13,060,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Amounts appropriated under this paragraph shall remain available until expended.

(2) OTHER EXPENSES.—There is authorized to be appropriated to the Administrator not to exceed $2,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990, for—

(A) expenses related to the administration of management conferences under this section;

(B) grants to State water pollution control agencies, State coastal zone management agencies, interstate agencies, other public or nonprofit private agencies, institutions, organizations, and individuals for research, surveys, studies, and modeling and other technical work necessary for the development of a comprehensive master plan under this section; and

(C) monitoring the implementation of a comprehensive master plan by the management conference or by the Administrator in any case in which the conference has been terminated.

SEC. 46. RESEARCH ON EFFECTS OF POLLUTANTS.

(a) MATTERS INCLUDED.—In carrying out the provisions of section 104(a) of the Federal Water Pollution Control Act, the Administrator shall conduct research on the harmful effects on the health and welfare of persons caused by pollutants in water, in conjunction with the United States Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, and other Federal, State, and interstate agencies carrying on such research. Such research shall include, and shall place special emphasis on, the effect that bioaccumulation of these pollutants in aquatic species has upon reducing the value of aquatic commerical and sport industries. Such research shall further study methods to reduce and remove these pollutants from the relevant affected aquatic species so as to restore and enhance these valuable resources.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out subsection (a) of this section not to exceed $2,500,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989.

SEC. 47. SEWAGE SLUDGE.

(a) IDENTIFICATION OF TOXIC POLLUTANTS.—

(1) SIX MONTHS.—Not later than six months after the date of the enactment of this Act, the Administrator shall identify those toxic pollutants which, on the basis of available information on their toxicity, persistence, concentration, mobility, or potential for exposure, may be present in sewage sludge in concentrations which may adversely affect human health or the environment.

(2) EIGHTEEN MONTHS.—Not later than 18 months after the date of the enactment of this Act, the Administrator shall identify those toxic pollutants not identified under paragraph (1) which may be present in sewage sludge in concentrations which may adversely affect public health or the environment.

(b) REGULATIONS.—

(1) FOR SIX-MONTH POLLUTANTS.—Not later than 18 months after the date of the enactment of this Act, the Administrator shall publish regulations specifying acceptable management practices for sewage sludge containing each toxic pollutant identified under subsection (a)(1) and establishing numerical limitations for each such pollutant for each use of or disposal technique for sludge identified by the Administrator. Such regulations shall require compliance no later than six months after their publication.

(2) FOR EIGHTEEN-MONTH POLLUTANTS.—Not later than 30 months after the date of the enactment of this Act, the Administrator shall publish regulations specifying acceptable management practices for sewage sludge containing each toxic pollutants identified under subsection (a)(2) and establishing numerical limitations for each such pollutant for each use of or disposal technique for sludge identified by the Administrator. Such management practices and numerical limitations shall be adequate to protect the public health and the environment from any reasonably anticipated adverse effects of such pollutants. Such regulations shall require compliance no later than six months after their publication.

(3) ALTERNATIVE STANDARDS.—For purposes of this subsection, if, in the judgment of the Administrator, it is not feasible to prescribe or enforce a numerical limitation for a pollutant identified under subsection (a), he may instead promulgate a design, equipment, management practice, or operational standard, or combination thereof, which in his judgment is adequate to protect public health and the environment from any reasonably anticipated adverse effects of such pollutant. In the event the Administrator promulgates a design or equipment standard under this subsection, he shall include as part of such standard such requirements as will assure the proper operation and maintenance of any such element of design or equipment.

(4) TREATMENT OF REGULATIONS.—Any regulation issued under this subsection shall be considered an "effluent standard or limitation" for purposes of section 308 or section 505 of the Federal Water Pollution Control Act.

(c) STUDIES AND PROJECTS.—The Administrator is authorized to conduct or initiate scientific studies, demonstration projects, and public information and education projects which are designed to promote the safe and beneficial use of sewage sludge for such purposes as aiding the restoration of abandoned mine sites, conditioning soil for parks and recreation areas, agricultural and horticultural uses, and other beneficial purposes. For the purposes of carrying out this subsection, the Administrator may make grants to State water pollution control agencies, other public or nonprofit agencies, institutions, organizations, and individuals. In cooperation with other Federal departments and agencies, other public and private agencies, institutions, and organizations, the Administrator is authorized to collect and disseminate information pertaining to the safe and beneficial use of sewage sludge.

(d) AUTHORIZATION OF APPROPRIATIONS.—For the purposes of carrying out the scientific studies, demonstration projects, and public information and education projects authorized in this section, there is authorized to be appropriated for fiscal years beginning after September 30, 1985, not to exceed $15,000,000.

SEC. 48. PUGET SOUND.

(a) MASTER PLAN; PRIORITY LIST; MONITORING PROGRAM.—The Administrator, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, a representative of any other interested Federal agency as determined appropriate by the Administrator, representatives of the State of Washington, and representatives of interested local governments as determined appropriate by the Administrator, shall—

(1) develop a comprehensive master plan for Puget Sound, Washington;

(2) recommend priority corrective actions and compliance schedules to address point and nonpoint sources of pollution posing the most serious problems to the water quality of such Sound; and

(3) monitor such sound to determine the effectiveness of actions taken pursuant to the master plan.

(b) CONTENTS OF MASTER PLAN.—The master plan developed pursuant to paragraph (1) of subsection (a) may include, but need not be limited to, any of the following standards and practices which are necessary for the attainment or maintenance of that water quality which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife and allows recreational activities in and on the water:

(1) development of water quality standards for waters within the estuarine zone of Puget Sound;

(2) development of toxicity-based standards for toxic pollutants;

(3) development of water quality based effluent standards for significant point sources of pollution; and

(4) development of best management practices to control nonpoint sources of pollution.

(c) USE OF EXISTING DATA.—In developing a master plan under this section, the Administrator shall survey and utilize existing reports, data, and studies relating to Puget Sound that have been developed by or made available to Federal, State, or local agencies.

(d) GRANTS.—The Administrator is authorized to make grants to the State of Washington if such State adopts a comprehensive master plan pursuant to this section for the Puget Sound. The amount of such grant for a fiscal year, shall, subject to such amounts as are provided in appropriation Acts, be equal to 50 percent of such State's cost of implementing the master plan for such fiscal year.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Administrator to carry out this section not to exceed $4,900,000 for the fiscal year ending September 30, 1986, $4,450,000 for the fiscal year ending September 30, 1987, and $2,400,000 for the fiscal year ending September 30, 1988. Amounts appropriated under this subsection shall remain available until expended.

SEC. 49. OCEAN DISCHARGE RESEARCH PROJECTS.

(a) IN GENERAL.—Notwithstanding any other provision of law, the Administrator is authorized to issue a research permit to the Orange County, California, Sanitation Districts for the discharge of preconditioned municipal sewage sludge into the ocean for the purpose of enabling research to be conducted in assessing and analyzing the effects of disposing of sewage sludge by pipeline into ocean waters, if the Administrator is satisfied that such local govenmental agency is actively pursuing long-term land-based options for the handling of its sludge with special emphasis on remote disposal alternatives set forth in the 1980 LA/OMA sludge management project and on reuse of sludge or use of recycled sludge and if the Administrator determines there is no likelihood of an unacceptable adverse effect on the environment as a result of issuance of such permit.

(b) PERMIT TERMS.—

(1) PERIOD.—Such permit for the discharge of sludge shall be for a period of five years.

(2) MONITORING.—Such permit shall provide for monitoring of permitted discharges and other discharges into the ocean in the same area and the effects of such discharge (including cumulative effects) in conformance with requirements established by the Administrator, after consultation with appropriate Federal and State agencies, and for the reporting of such monitoring to Congress and the Administrator every six months.

(3) VOLUME OF DISCHARGE.—Such permit shall provide that the volume of such local agency's sludge disposed of by such experimental pipeline shall be no more than one and one-half times that being disposed of by such remote disposal and alternatives for the reuse of sludge and the use of recycled sludge. In no event shall the agency dispose of more than 50 percent of its sludge by the pipeline.

(4) TERMINATION.—The permit shall provide for termination of the permit if the Administrator determines that the disposal of sewage sludge is resulting in an unacceptable adverse impact on fish, shellfish, and wildlife.

(c) REPORT.—Such districts shall report the results of the program and an analysis of such program to Congress under this section not later than four and one-half years after issuance of the permit.

SEC. 50. GRANTS FOR REPLACEMENT OF CONTAMINATED GROUNDWATER.

(a) GRANT RECIPIENTS.—The Administrator is authorized to make grants to—

(1) any person who owns or operates a public water system which, because of groundwater contamination, is unable to supply water which is fit for human consumption to some or all of the users of such system, and

(2) any unit of local government on behalf of individuals residing within the boundaries of such unit whose water is supplied from a source other than a public water system and is unfit for human consumption because of groundwater contamination.

(b) GRANT PURPOSE.—Grants under this section shall be for the purpose of providing alternative water supplies to such users and individuals on a temporary basis and providing permanent remedies for water supply problems resulting from groundwater contamination, including but not limited to the drilling of new wells and the installation of new pipes.

(c) APPLICATION.—An application for a grant under this section shall be in such form and shall contain such information as the Administrator may require. Each such application shall include—

(1) a description of the source and extent of groundwater contamination;

(2) information on the number of people who do not have water available to them because of such contamination; and

(3) a description of the measures the applicant proposes to undertake with the assistance to be provided under this section.

(d) FEDERAL SHARE.—The Federal share of the cost of measures undertaken with assistance under this section shall not exceed 50 percent.

(e) LIMITATIONS ON AMOUNT.—The maximum amount of a grant under this section to any applicant with respect to a particular source of groundwater contamination shall be $2,000,000 for each fiscal year. The maximum amount of grants under this section to applicants within one State shall be $10,000,000 for each fiscal year.

(f) ANNUAL REPORTS.—The Administrator shall report annually to Congress on grants made under this section. Each such report shall include—

(1) information on applicants for such grants, including the number of such applicants;

(2) information on the source and extent of groundwater contamination with respect to which applications are made under this section, including the average number of people affected by each source of groundwater contamination; and

(3) the average amount of such grants and the types of measures undertaken with such grants.

(g) DEFINITIONS.—For purposes of this section—

(1) the term "person" includes a State, a political subdivision of a State, and an agency or instrumentality of a State or political subdivision of a State;

(2) the term "public water system" means a system for the provision to the public of piped water for human consumption, if such system has at least 15 service connections or regularly serves at least 25 individuals; and

(3) the term "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas.

(h) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $150,000,000 per fiscal year for each of the fiscal years 1986, 1987, and 1988.

(i) JACKSONVILLE, ARKANSAS.—The Administrator shall make a grant under this section of $2,000,000 in each of fiscal years 1986, 1987, and 1988 to the city of Jacksonville, Arkansas, for the purpose of providing alternative water supply on a temporary basis and providing permanent remedies for water supply problems resulting from groundwater contamination.

SEC. 51. UNCONSOLIDATED QUARTERNARY AQUIFER.

Notwithstanding any other provision of law, no person may—

(1) locate or authorize the location of a landfill, surface impoundment, waste pile, injection well, or land treatment facility over the Unconsolidated Quarternary Aquifer, or the recharge zone or streamflow source zone of such aquifer, in the Rockaway River Basin, New Jersey (as such aquifer and zones are described in the Federal Register, January 24, 1984, pages 2946-2948); or

(2) place or authorize the placement of solid waste in a landfill, surface impoundment, waste pile, injection well, or land treatment facility over such aquifer or zone.

This section may be enforced under sections 309 (a) and (b) of the Federal Water Pollution Control Act. For purposes of section 309(c) of such Act, a violation of this section shall be considered a violation of section 301 of the Federal Water Pollution Control Act.

SEC. 52. GRANTS FOR PROTECTING GROUNDWATER QUALITY.

(a) ELIGIBLE APPLICANTS AND ACTIVITIES.—Upon application of a State for which a report submitted under subsection (a) of section 319 of the Federal Water Pollution Control Control Act, as added by section 7 of this Act, and a plan submitted under subsection (b) of such section is approved under such section, the Administrator shall make grants under this section to such State for the purpose of assisting such State in carrying out groundwater quality protection activities which the Administrator determines will advance the State toward implementation of a comprehensive nonpoint source pollution control program. Such activities shall include, but not be limited to, research, planning, groundwater assessments, demonstration programs, enforcement, technical assistance, education and training to protect the quality of groundwater and to prevent contamination of groundwater from nonpoint sources of pollution.

(b) APPLICATIONS.—An application for a grant under this section shall be in such form and shall contain such information as the Administrator may require.

(c) FEDERAL SHARE; MAXIMUM AMOUNT.—The Federal share of the cost of assisting a State in carrying out groundwater protection activities in any fiscal year under this section shall be 50 percent of the costs incurred by the State in carrying out such activities, except that the maximum amount of Federal assistance which any State may receive

under this section in any fiscal year shall not exceed $150,000.

(d) REPORT.—The Administrator shall include in each report transmitted under subsection (j) of section 319 of the Federal Water Pollution Control Act, as added by section 7 of this Act, a report on the activities and programs implemented under this section during the preceding fiscal year.

(e) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $7,500,000 per fiscal year for the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990.

SEC. 53. DEMONSTRATION PROGRAM ON ACIDIFIED LAKES.

(a) RESTORATION OF BIOLOGICAL INTEGRITY.—The Administrator, in conjunction with the United States Fish and Wildlife Service and the environmental agencies of the States, shall carry out a demonstration program to restore the biological integrity of acidified lakes and watersheds through liming. The Administrator, in coordination with the environmental agencies of the States, shall select sites to carry out such program which will enable the Administrator to demonstrate and determine the effectiveness of liming in reducing the acidity of lakes and watersheds and in restoring the biological integrity of acidified lakes and watersheds.

(b) REPORT.—Not later than 90 days after completion of the demonstration program and not later than three and six years after completion of the program, the Administrator shall submit to the appropriate Committees of Congress reports on the results of the demonstration program carried out under this section. Such reports shall include, but not be limited to, an analysis of the effectiveness of liming in reducing the acidity of lakes and watersheds and in restoring the biological integrity of acidified lakes and watersheds in the long-term and the short-term.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $10,000,000 for fiscal years beginning after September 30, 1985, to remain available until expended.

SEC. 54. NEWTOWN CREEK, NEW YORK.

(a) MODIFICATIONS TO TREATMENT PLANT.—The Administrator is authorized to make a grant to the city of New York to install such additional facilities in, and make such modifications to, the Newtown Creek sewage treatment plant as are necessary for the plant to provide secondary treatment. The Federal share of such project shall be 75 percent of the cost of installing such facilities and making such modifications.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated such sums as may be necessary to carry out this section for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 55. SAN DIEGO, CALIFORNIA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, surface water and public beaches, and water quality of the city of San Diego, California, and surrounding areas, which are endangered and are being polluted by raw sewage emanating from the city of Tijuana, Mexico.

(b) CONSTRUCTION GRANTS.—Upon approval of the necessary plans and specifications, the Administrator is authorized to make grants to the Secretary of State, acting through the American Section of the International Boundary and Water Commission (hereinafter in this section referred to as the "Commission"), or any other Federal agency or any other appropriate commission or entity designated by the President. Such grants shall be for construction of a project consisting of—

(1) treatment works in the city of San Diego, California, to provide primary or more advanced treatment of municipal sewage and industrial waste from the city of Tijuana, Mexico; and

(2) a publicly owned treatment works in such city to provide primary or more advanced treatment of such amount of municipal sewage and industrial waste for such city of San Diego as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

(c) FURTHER MEASURES.—As a further measure, the Administrator shall make grants to the Commission or such other agency, commission, or entity as may be designated under subsection (b) for the construction of defensive treatment works to protect residents of the city of San Diego and surrounding areas from pollution resulting from any inadequacies or breakdowns in wastewater treatment works and systems in Mexico. The Commission or such agency, commission, or entity is authorized to construct, operate, and maintain such defensive treatment works in order to accomplish the purposes of this section.

(d) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the Commission or such agency, commission, or entity, in consultation with the city of San Diego, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under section 201 of the Federal Water Pollution Control Act.

(e) CAPACITY OF PROJECT.—The project authorized by this section shall provide capacity to provide treatment of municipal sewage and industrial waste for the cities of Tijuana and San Diego.

(f) APPLICABILITY OF ACT.—All provisions of the Federal Water Pollution Control Act which are applicable to a grant made to a State, municipality, or intermunicipal or interstate agency under section 201(g) of such Act shall apply to a grant made to an agency, commission, or entity for construction of treatment works under subsection (b)(2) of this section, except that the non-Federal share of the costs of such construction shall be paid by the city of San Diego and other non-Federal interests.

(g) FEDERAL SHARE.—Construction of the treatment works under subsections (b)(1) and (c) of this section with respect to municipal sewage and industrial waste from the city of Tijuana shall be at full Federal expense less any costs paid by the State of California and less any costs paid by the Government of Mexico as a result of agreements negotiated with the United States.

(h) OCEAN OUTFALL PERMIT.—Upon application of the city of San Diego, the Administrator may issue a permit under section 402 of the Federal Water Pollution Control Act which modifies the requirements of section 301(b)(1)(B) of such Act to permit the discharge of pollutants for any ocean outfall constructed with Federal assistance under this Act if such pollutants have received primary or more advanced treatment. Any permit issued pursuant to this subsection shall not be effective after December 31, 1993.

(i) EXTRA CAPACITY.—If the treatment works constructed under this section to provide treatment for municipal sewage and industrial waste from the city of Tijuana has capacity which is no longer necessary to provide such treatment, such capacity may be used to provide treatment for municipal sewage and industrial waste for the city of San Diego.

(j) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(k) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, such sums as may be necessary to the Administrator to make grants under this section and such sums as may be necessary to the Commission or such other agency, commission, or entity as the President may designate under subsection (b), to carry out this section.

SEC. 56. NACO, ARIZONA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, and surface water and groundwater of the community of Naco, Arizona, which are endangered and are being polluted by raw sewage emanating from the city of Naco, Sonora, Mexico.

(b) CONSTRUCTION GRANTS.—Upon application of the county of Cochise, Arizona, the Administrator shall make grants to such county for construction of a project consisting of—

(1) a publicly owned treatment works in such community of Naco, Arizona, to provide primary or more advanced treatment of not less than 150,000 gallons of untreated sewage emanating from the city of Naco, Sonora, Mexico; and

(2) a publicly owned treatment works in such community of Naco, Arizona, to provide primary or more advanced treatment of such amount of municipal sewage and industrial waste per day for such community of Naco, Arizona, as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

(c) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the county of Cochise, Arizona, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under section 201 of the Federal Water Pollution Control Act.

(d) CAPACITY OF PROJECT.—The project authorized by this section shall provide capacity to provide treatment of municipal sewage and industrial waste for the city of Naco, Sonora, Mexico and the community of Naco, Arizona.

(e) APPLICABILITY OF ACT.—All provisions of the Federal Water Pollution Control Act which are applicable to grants made under section 201(g) of such Act shall apply to grants made under this section to provide treatment of municipal sewage and industrial waste for the community of Naco, Arizona.

(f) FEDERAL SHARE.—The Federal share of the cost of construction of the treatment works to provide treatment of municipal sewage and industrial waste for the city of Naco, Sonora, Mexico, shall be at full Feder-

al expense less any costs paid by the Government of Mexico as a result of agreements negotiated with the United States.

(g) EXTRA CAPACITY.—If the treatment works constructed under this section to provide treatment for municipal sewage and industrial waste for the city of Naco, Sonora, Mexico, has capacity which is no longer necessary to provide such treatment, such capacity may be used to provide treatment for municipal sewage and industrial waste for the community of Naco, Arizona.

(h) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(i) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Administrator $2,000,000 to make grants under this section for fiscal years beginning after September 30, 1985.

SEC. 57. LIMITATION ON DISCHARGE OF RAW SEWAGE BY NEW YORK CITY.

(a) IN GENERAL.—

(1) NORTH RIVER PLANT.—If the wastewater treatment plant identified in the consent decree as the North River plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1986, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1986 (as determined by the Administrator), except as provided in subsection (b).

(2) RED HOOK PLANT.—If the wastewater treatment plant identified in the consent decree as the Red Hook plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1987, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1987 (as determined by the Administrator), except as provided in subsection (b).

(b) WAIVERS.—

(1) INTERRUPTION OF PLANT OPERATION.—In the event of any significant interruption in the operation of the North River plant or the Red Hook plant caused by an event described in subparagraph (A), (B), or (C) of paragraph (5) occurring after the applicable deadline established under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to such plant, but only to such extent and for such limited period of time as may be reasonably necessary for the city of New York to resume operation of such plant.

(2) INCREASED PRECIPITATION.—In the event that the volume of precipitation occurring after the applicable deadline established under subsection (a) causes the discharge of raw sewage to exceed the limitation under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to either or both such plants, but only to such extent and for such limited period of time as the Administrator determines to be necessary to take into account the increased discharge caused by such volume of precipitation.

(3) VARIATIONS IN CERTAIN NORTH RIVER DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the North River drainage area constituting a violation of subsection (a)(1) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1986, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(1), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(4) VARIATIONS IN CERTAIN RED HOOK DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the Red Hook drainage area constituting a violation of subsection (a)(2) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1987, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(2), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(5) CIRCUMSTANCES BEYOND CITY'S CONTROL.—The Administrator shall extend either deadline under paragraph (1) or (2) of subsection (a) to such extent and for such limited period of time as may be reasonably required to take into account any—

(A) act of war,

(B) unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight, or

(C) other circumstances beyond the control of the city of New York, except such circumstances shall not include (i) the unavailability of Federal funds under section 201 of the Federal Water Pollution Control Act, (ii) the unavailability of funds from the city of New York or the State of New York, or (iii) a policy decision made by the city of New York or the State of New York to delay the achievement of advanced preliminary treatment at the North River plant or Red Hook plant beyond the applicable deadline set forth in subsection (a).

(c) PENALTIES.—Except as otherwise provided in subsection (b), any violation of subsection (a) shall be considered to be a violation of section 301 of the Federal Water Pollution Control Act, and all provisions of such Act relating to violations of such section 301 shall apply.

(d) CONSENT DECREE DEFINED.—For purposes of this section, the term "consent decree" means the consent decree entered into by the Environmental Protection Agency, the city of New York, and the State of New York, on December 30, 1982, relating to construction and operation of the North River and Red Hook wastewater treatment plants.

(e) COOPERATION.—The Administrator shall work with the city of New York to eliminate the discharge of raw sewage by such city at the earliest practicable date.

(f) SAVINGS CLAUSE.—Nothing in this section shall be construed as modifying the terms of the consent decree.

(g) SENSE OF CONGRESS.—It is the sense of Congress that the Administrator should not agree to any further modification of the consent decree with respect to the schedule for achieving advanced preliminary treatment.

(h) TERMINATION DATES.—

(1) NORTH RIVER PLANT.—The provisions of this section shall remain in effect with respect to the North River drainage area until such time as the North River plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(2) RED HOOK PLANT.—The provisions of this section shall remain in effect with respect to the Red Hook drainage area until such time as the Red Hook plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(i) MONITORING ACTIVITIES.—The Administrator shall establish and carry out a program within available funds to implement the monitoring activities which may be required under subsection (a) by December 1, 1984.

(j) ESTABLISHMENT OF METHODOLOGIES.—The Administrator shall establish the methodologies, data base, and any other information required for making determinations under subsection (b)—

(1) for the North River drainage area (as defined in the consent decree) by July 31, 1986, unless the requirements of subsection (h)(1) have been satisfied, and

(2) for the Red Hook drainage area (as defined by the consent decree) by July 31, 1987, unless the requirements of subsection (h)(2) have been satisfied.

(k) VIOLATIONS.—In carrying out this section, if the Administrator finds that a violation of subsection (a) has occurred, the Administrator shall also determine, within 30 days after such finding, whether a provision of subsection (b) applies. If the Administrator requires information from the city of New York in order to determine whether a provision of subsection (b) applies, the Administrator shall request such information. If the city of New York does not supply the information requested by the Administrator, the Administrator shall determine that subsection (b) does not apply. The city of New York shall be responsible only for such expenses as are necessary to provide such requested information. Enforcement action pursuant to subsection (c) shall be commenced at the end of such 30 days unless a provision of subsection (b) applies.

SEC. 58. DEER ISLAND TREATMENT PLANT, MASSACHUSETTS.

(a) EMERGENCY IMPROVEMENTS.—The Administrator is authorized and directed to make grants to the Metropolitan District Commission, Massachusetts, for a project to undertake emergency improvements at the Deer Island Waste Water Treatment Plant in Boston, Massachusetts. The Federal share of such project shall not exceed 75 percent of the cost of carrying out such improvements.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $10,000,000 per fiscal year for each of the fiscal years 1986, 1987, and 1988.

SEC. 59. GREAT LAKES INTERNATIONAL COORDINATION OFFICE.

(a) FINDINGS AND PURPOSE.—

(1) FINDINGS.—The Congress finds that—

(A) the Great Lakes are a valuable national resource, continuosuly serving the people of the United States and other nations as an important source of food, fresh water, recreation, beauty, and enjoyment;

(B) the United States should seek to attain the goals embodied in the Great Lakes Water Quality Agreement of 1978 with particular emphasis on goals related to toxic pollutants; and

(C) the Environmental Protection Agency (hereinafter in this section referred to as the "Agency") should take the lead in the effort to meet those goals, working with other Federal agencies and State and local authorities.

(2) PURPOSE.—It is the purpose of this section to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978 through improved organization and definition of mission on the part of the Agency, funding of State grants for pollution control in the Great Lakes area, and improved accountability for implementation of such agreement.

(b) ESTABLISHMENT.—The Great Lakes National Program Office of the Agency is hereby designated at the Great Lakes International Coordination Office (hereinafter in this section referred to as the "Office"). The head of the Office shall also serve as principal liaison person on Great Lakes matters to the International Joint Commission, United States and Canada (hereinafter in this section referred to as the "Commission").

(c) FUNCTIONS.—The Office shall—

(1) develop and implement specific action plans to carry out the responsibility of the United States under the Great Lakes Water Quality Agreement of 1978;

(2) carry out toxic pollutant control demonstration projects as Saginaw Bay, Michigan; Sheboygan Harbor, Wisconsin; Grand Calumet River, Indiana; Ashtabula River, Ohio; and Buffalo River, New York; and at other sites in the Great Lakes at which the Commission determines that sediments are heavily contaminated with toxic materials;

(3) coordinate actions of the Agency (including actions by headquarters and regional offices thereof) aimed at improving Great Lakes water quality;

(4) coordinate actions of the Agency with the actions of other Federal agencies and State and local authorities in developing water quality strategies and obtain the support of those agencies and authorities in achieving the objectives of such agreement;

(5) establish a Great Lakes system-wide surveillance network to monitor the water quality of the Great Lakes, with specific emphasis on the monitoring of toxic pollutants; and

(6) serve as the liaison with, and provide information to, the Canadian members of the Commission and the Canadian counterpart to the Agency.

(d) ADMINISTRATOR'S RESPONSIBILITY.—The Administrator shall ensure that the Office should enter into agreements with the various organizational elements of the Agency involved in Great Lakes activities and the appropriate State agencies spedifically delineating—

(1) the duties and responsibilities of each such element and the Agency with respect to the Great Lakes;

(2) the time periods for carrying out such duties and responsibilities; and

(3) the resources to be committed to such duties and responsibilities.

(e) BUDGET ITEM.—The Administrator shall, in the Agency's annual budget submission to Congress, include a funding request for the Office as a separate budget line item.

(f) REPORTS.—

(1) COMPREHENSIVE ASSESSMENT.—Within 120 days after the date of the enactment of this Act, and at the beginning of each fiscal year thereafter, the Administrator shall submit to Congress a comprehensive assessment of the planned efforts to be pursued in the succeeding fiscal year for implementing the Great Lakes Water Quality Agreement of 1978. The assessment shall show by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amounts anticipated to be expended on Great Lakes water quality initiatives in the fiscal year to which the assessment relates. The assessment shall also include a report of current programs administered by other Federal agencies which make available resources to Great Lakes water quality efforts.

(2) COMPREHENSIVE REPORT.—Within 150 days after the end of each fiscal year, the Administrator shall submit to Congress a comprehensive report which—

(A) describes the achievements in the preceding fiscal year in implementing such agreement and shows by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amounts expended on Great Lakes water quality initiatives in such preceding fiscal year;

(B) describes the progress made in such preceding fiscal year in implementing the system of surveillance of the water quality of the Great Lakes, with particular reference to toxic pollutanis; and

(C) describes the long-term prospects for improving the water quality of the Great Lakes.

(g) GREAT LAKES RESEARCH.—

(1) ESTABLISHMENT OF RESEARCH OFFICE.—There is established within the National Oceanic and Atmospheric Administration the Great Lakes Research Office (hereinafter in this section referred to as the "Research Office.").

(2) IDENTIFICATION OF ISSUES.—The Research Office shall identify issues relating to the Great Lakes resources on which research is needed. The Research Office shall submit a report to Congress on such issues before the end of each fiscal year which shall indentify any changes in the Great Lakes with respect to such issues.

(3) INVENTORY.—The Reserach Office shall identify and inventory Federal, State, university, and tribal environmental research programs (and, to the extent feasible, those of private organizations and other nations) relating to the Great Lakes System, and shall update that inventory every four years.

(4) RESEARCH EXCHANGE.—The Research Office shall establish a Great Lakes research exchange for the purpose of facilitating the rapid identification, acquisition, retrieval, dissemination, and the use of information concerning research projects which are ongoing or completed and which affect the Great Lakes system.

(5) RESEARCH PROGRAM.—The Research Office shall develop, in cooperation with the Coordination Office, a comprehensive environmental research program and data base for the Great Lakes system. The data base shall include, but not be limited to, data relating to water quality, fisheries, and biota.

(6) MONITORING.—The Research Office shall conduct, through the Great Lakes Enviromental Research Laboratory, the National Sea Grant College program, other Federal laboratories, and the private sector, appropriate research and monitoring activities which address priority issues and current needs relating to the Great Lakes.

(h) RESEARCH AND MANAGEMENT CONDITION.—

(1) JOINT PLAN.—Before October 1 of each year, the Coordination Office and the Research Office shall prepare a joint research plan for the fiscal year which begins the following calendar year.

(2) CONTENTS OF PLAN.—Each plan prepared under paragraph (1) shall—

(A) identify all proposed research dedicated to activities conducted under the Great Lakes Water Quality Agreement of 1978;

(B) include the Agency's assessment of priorities for research needed to fulfill the terms of such Agreement; and

(C) identify all proposed research that may be used to develop a comprehensive environmental data base for the Great Lakes system and establish priorities for development of such data base.

(i) AUTHORIZATIONS OF APPROPRIATIONS.—

(1) FOR THE OFFICE.—There are authorized to be appropriated for the purposes of carrying out subsections (b), (c), and (d) and for the purpose of carrying out the functions, powers, and duties of the Office not to exceed—

(A) $8,000,000 for fiscal year 1986, of which $1,500,000 shall be available only to carry out subsection (c)(2);

(B) $9,000,000 for fiscal year 1987, of which $2,500,000 shall be available only to carry out subsection (c)(2);

(C) $10,000,000 for fiscal year 1988, of which $3,500,000 shall be available only to carry out subsection (c)(2);

(D) $12,000,000 for fiscal year 1989, of which $5,000,000 shall be available only to carry out subsection (c)(2); and

(E) $13,000,000 for fiscal year 1990, of which $5,000,000 shall be available only to carry out subsection (c)(2).

(2) FOR GREAT LAKES STUDIES.—For the purpose of carrying out section 104(f) of the Federal Water Pollution Control Act there is authorized to be appropriated $10,000,000 for fiscal year 1986. Such funds shall be in addition to and not in lieu of any funds authorized to be appropriated under section 104(u) of such Act.

(3) FOR GREAT LAKES RESEARCH.—There are authorized to be appropriated for purposes of carrying out subsections (g) and (h) not to exceed—

(A) $2,000,000 per fiscal year for fiscal years 1986 and 1987; and

(B) $3,000,000 per fiscal year for fiscal years 1988, 1989, and 1990.

SEC. 60. OAKWOOD BEACH AND RED HOOK PROJECTS, NEW YORK.

(a) RELOCATION OF NATURAL GAS FACILITIES.—Notwithstanding any provision of the Federal Water Pollution Control Act, the Administrator shall pay, to the extent provided in appropriation Acts, in the same proportion as the Federal share of other project costs, all expenses for the relocation of facilities for the distribution of natural gas with respect to the entire wastewater treatment works known as the Oakwood Beach (EPA Grant Numbered 360392) and Red Hook (EPA Grant Numbered 360394) projects, New York.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, not to exceed $9,000,000 to carry out this section.

SEC. 61. CHIPPEWA TOWNSHIP, PENNSYLVANIA.

In order to protect the public health, environment, and water quality endangered by the destruction of the Chippewa Township, Pennsylvania, sewage treatment facility and the resultant raw sewage discharge into Brady's Run and the Beaver River, Pennsyl-

vania, the Administrator is directed to remove such raw sewage.

SEC. 62. DES MOINES, IOWA.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make a grant to the city of Des Moines, Iowa, for construction of the Central Sewage Treatment Plant component of the Des Moines, Iowa, metropolitan area project. The Federal share of such project shall be 75 percent of the cost of construction.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $85,000,000 for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 63. WASTEWATER RECLAMATION DEMONSTRATION.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make a grant to the San Diego Water Reclamation Agency, California, to demonstrate and field test for public use innovative processes which advance the technology of wastewater reclamation and which promote the use of reclaimed wastewater.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated not to exceed $3,000,000 to carry out this section for fiscal years beginning after September 30, 1985.

SEC. 64. BOSTON HARBOR AND ADJACENT WATERS.

(a) GRANTS.—The Administrator shall make grants to the Massachusetts Water Resource Authority for purposes of—

(1) assessing the principal factors having an adverse effect on the environmental quality of Boston Harbor and its adjacent waters;

(2) developing and implementing a management program to improve the water quality of such Harbor and waters; and

(3) constructing necessary waste water treatment works for providing secondary treatment for the areas served by such authority.

(b) FEDERAL SHARE.—The Federal share of projects described in subsection (a) shall not exceed 75 percent of the cost of construction thereof.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $20,000,000 per fiscal year for each of the fiscal years ending September 30, 1986, September 30, 1987, September 30, 1988, September 30, 1989, and September 30, 1990. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 65. TREATMENT WORKS IN WASHINGTON STATE.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make grants to the sewage treatment authorities discharging into Puget Sound and adjacent marine waters, including the Strait of Juan de Fuca and Bellingham Bay, to construct necessary treatment works for providing secondary treatment for the areas served by such authorities. The Federal share of such projects shall not exceed 75 percent of the cost of construction thereof.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $250,000,000 to carry out this section for fiscal years beginning after September 30, 1985. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 66. IMPROVEMENT PROJECTS.

(a) AVALON, CALIFORNIA.—The Administrator shall make a grant of $3,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal year 1986 to the city of Avalon, California, for improvements to the publicly owned treatment works of such city.

(b) WALKER AND SMITHFIELD TOWNSHIPS, PENNSYLVANIA.—The Administrator shall make grants from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Pennsylvania for fiscal year 1986—

(1) to Walker Township, Pennsylvania, for developing a collector system and connecting its wastewater treatment system into the Huntingdon Borough, Pennsylvania, sewage treatment plant, and

(2) to Smithfield Township, Pennsylvania, for rehabilitating and extending its collector system.

(c) TAYLOR MILL, KENTUCKY.—Notwithstanding section 201(g)(1) of the Federal Water Pollution Control Act or any other provision of law, the Administrator shall make a grant of $250,000 from funds allotted under section 205 of such Act to the State of Kentucky for fiscal year 1986 to the city of Taylor Mill, Kentucky, for the repair and reconstruction, as necessary, of the publicly owned treatment works of such city.

(d) WATSONVILLE, CALIFORNIA.—The Administrator shall make a grant of $27,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal years beginning after September 30, 1985, to the city of Watsonville, California, for improvements to the wastewater treatment and disposal facilities of such city.

(e) NEVADA COUNTY, CALIFORNIA.—The Administrator is authorized to make a grant from funds allotted to the State of California for fiscal years beginning after September 30, 1985, for the construction of a collection system serving the Glenshire/Devonshire area of Nevada County, California, to deliver waste to the Tahoe-Truckee Sanitary District's regional wastewater treatment facility.

(f) TREATMENT WORKS FOR WANAQUE, NEW JERSEY.—The Administrator shall make grants to the Wanaque Valley Regional Sewerage Authority, New Jersey, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of New Jersey, for fiscal years beginning after September 30, 1985, for the construction of treatment works with a total treatment capacity of 1,050,000 gallons per day (including a treatment module with a treatment capacity of 350,000 gallons per day). Notwithstanding section 202 of the Federal Water Pollution Control Act, the Federal share of the cost of construction of such treatment works shall be 75 percent.

(g) TREATMENT WORKS FOR LENA, ILLINOIS.—The Administrator shall make grants to the village of Lena, Illinois, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Illinois, for fiscal years beginning after September 30, 1985, for the construction of a replacement moving bed filter press for the treatment works of such village. Notwithstanding section 202 of the Federal Water Pollution Control Act, the Federal share of the cost of construction of such project shall be 75 percent.

(h) PRIORITY FOR COURT ORDERED PROJECTS.—The Commonwealth of Pennsylvania, from the sums allocated to it under this Act, shall give first priority to the Wyoming valley Sanitary Authority Secondary Treatment project mandated under federal court order, regardless of the date of start of construction made pursuant to the court order.

SEC. 67. STUDY OF REGULATION OF DE MINIMIS DISCHARGES.

(a) STUDY.—The Administrator shall study the feasibility and desirability of eliminating the regulation of discharges of pollutants into the navigable waters in amounts which, in terms of volume, concentration, and type of pollutant, are not significant.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit a report on the results of such study along with recommendations to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 68. STUDY OF EFFECTIVENESS OF INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES.

(a) EFFECTIVENESS STUDY.—The Administrator shall study the effectiveness on waste treatment of innovative and alternative wastewater treatment processes and techniques referred to in section 201(g)(5) of the Federal Water Pollution Control Act which have been utilized in treatment works constructed under such Act. In conducting such study, the Administrator shall compile information, by State, on the types of such processes and techniques utilized, on the number of facilities constructed with such processes and techniques, and a description of such processes and techniques which have not performed to design standards. The Administrator shall also determine which States have not obligated the full amount set aside under section 205(i) of such Act for such processes and techniques and the reasons for each such State's failure to make such obligations.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for providing more effective incentives for innovative and alternative wastewater treatment processes and techniques.

SEC. 69. WATER QUALITY IMPROVEMENT STUDY.

(a) STUDY.—The Administrator shall study the water quality improvements which have been achieved by application of best available technology economically achievable pursuant to section 301(b)(2) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the effectiveness of, and the costs and benefits associated with, application of best available technology economically achievable pursuant to such section and an analysis of the effectiveness of the water quality program under such Act and methods of improving such program, including site specific levels of treatment which will achieve the water quality goals of such Act in a cost-effective manner.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under subsection (a) together with recommendations for improving the water quality program and its effectiveness to the Committee on Public Works and Transportation of the

House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 70. STUDY OF TESTING PROCEDURES.

(a) STUDY.—The Administrator shall study the testing procedures for analysis of pollutants established under section 304(h) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the adequacy and standardization of such procedures. In conducting the analysis of the standardization of such procedures, the Administrator shall consider the extent to which such procedures are consistent with comparable procedures established under other Federal laws.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under this subsection, together with recommendations for modifying the test procedures referred to in subsection (a) to improve their effectiveness, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(c) BIENNIAL REVIEWS.—Biennially after the date of submission of the report under subsection (b), the Administrator shall conduct a state-of-the-art review of the test procedures for the analysis of pollutants referred to in subsection (a) for the purpose of determining the adequacy and effectiveness of such procedures and shall, based on the results of such review, submit to the committees referred to in subsection (b) recommendations for modifying such procedures to improve their effectiveness.

SEC. 71. STUDY OF PRETREATMENT OF TOXIC POLLUTANTS.

(a) STUDY.—The Administrator shall study—

(1) the adequacy of data on environmental impacts of toxic industrial pollutants discharged from publicly owned treatment works;

(2) the extent to which secondary treatment at publicly owned treatment works removes toxic pollutants;

(3) the capability of publicly owned treatment works to revise pretreatment requirements under section 307(b)(1) of the Federal Water Pollution Control Act;

(4) possible alternative regulatory strategies for protecting the operations of publicly owned treatment works from industrial discharges, and shall evaluate the extent to which each such strategy identified may be expected to achieve the goals of this Act; and

(5) the adequacy of Federal, State, and local resources to establish, implement, and enforce multiple pretreatment limits for toxic pollutants for each such alternative strategy.

(b) REPORT.—Not later than two years after the date of the enactment of this Act, the Administrator shall submit a report on the results of such study along with recommendations for improving the effectiveness of pretreatment requirements to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 72. STUDIES OF WATER POLLUTION PROBLEMS IN AQUIFERS.

(a) STUDIES.—The Administrator, in conjunction with State and local agencies and after providing an opportunity for full public participation, shall conduct studies for the purpose of identifying existing and potential point and nonpoint sources of pollution, and of identifying measures and practices necessary to control such sources of pollution, in the following groundwater systems and aquifers.

(1) the groundwater system of the Upper Sante Cruz Basin and the Avra-Altar Basin of Pima, Pinal, and Santa Cruz Counties, Arizona;

(2) the Spokane-Rathdrum Valley Aquifer, Washington and Idaho;

(3) the Nassau and Suffolk Counties Aquifer, New York;

(4) the Whidbey Island Aquifer, Washington;

(5) the Unconsolidated Quaternary Aquifer, Rockaway River area, New Jersey; and

(6) the Sparta Aquifer, Arkansas.

(b) PROPOSED MANAGEMENT PLANS.—After completion of each study under subsection (a), the Administrator, in conjunction with State and local agencies and after providing an opportunity for full public participation, shall prepare a proposed management plan describing methods of implementing the measures and practices identified for each groundwater system and aquifer under subsection (a).

(c) REPORTS.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress an interim report of the studies and proposed management plans under this section. Not later than two years after such date of enactment, the Administrator shall complete such studies and plans and submit to Congress a final report of such studies and plans.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $10,000,000 for fiscal years beginning after September 30, 1985, to carry out this section.

SEC. 73. GREAT LAKES CONSUMPTIVE USES STUDY.

(a) STUDY OF CONTROL MEASURES.—In recognition of the serious impacts that are expected to occur to the Great Lakes environment as a result of a projected fivefold increase in consumption of Great Lakes water, including loss of wetlands and reduction of fish spawning and habitat areas, as well as serious economic losses to vital Great Lakes industries, and in recognition of the national goal to provide environmental protection and preservation of our natural resources while allowing for continued economic growth, the Administrator, in cooperation with other interested departments, agencies, and instrumentalities of the United States and the eight Great Lakes States and their political subdivisions, is authorized to conduct a study of control measures which can be implemented to reduce the quantity of Great Lakes water consumed without adversely affecting projected economic growth of the Great Lakes region.

(b) MATTERS INCLUDED.—The study authorized by this section shall include an analysis of both existing and new technology which is likely to be feasible in the foreseeable future and shall at a minimum include the following:

(1) a review of the methodologies used to forecast Great Lakes consumptive uses, including an analysis of the sensitivity of key variables affecting such uses;

(2) an analysis of the effect that enforcement of provisions of the Federal Water Pollution Control Act relating to thermal discharges has had on consumption of Great Lakes water;

(3) an analysis of the effect of laws, regulations, and national policy objectives on consumptive uses of Great Lakes water used in manufacturing;

(4) an analysis of the economic effects on a consuming industry and other Great Lakes interests associated with a particular consumptive use control strategy;

(5) an analysis of associated environmental impacts, both singularly and in combination with other consumptive use control strategies; and

(6) a summary discussion containing recommendations for methods of controlling consumptive uses which methods maximize benefits to the Great Lakes ecosystem and also provide for continued full economic growth for consuming industries as well as other industries which depend on the use of Great Lakes water.

(c) GREAT LAKES STATES DEFINED.—For purposes of this section, the term "Great Lakes States" means Minnesota, Wisconsin, Illinois, Ohio, Michigan, Indiana, Pennsylvania, and New York.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1985, $4,500,000 to carry out this section. Sums appropriated under this section shall remain available until expended.

SEC. 74. SULFIDE CORROSION STUDY.

(a) STUDY.—The Administrator shall conduct a study of the corrosive effects of sulfides in collection and treatment systems, the extent to which the uniform imposition of categorical pretreatment standards will exacerbate such effects, and the range of available options to deal with such effects.

(b) CONSULTATION.—The study required by this section shall be conducted in consultation with the Los Angeles City and County sanitation agencies.

(c) REPORT.—Not later than one year of the date of the enactment of this Act, the Administrator shall submit a report on the results of the study, together with recommendations for measures to reduce the corrosion of treatment works, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 to carry out this section for fiscal years beginning after September 30, 1985.

SEC. 75. PULP MILL STUDY.

(a) FEASIBILITY STUDY.—The Administrator, in consultation with the State of Alaska, shall conduct a study to determine the feasibility of resolving the air pollution control, solid waste disposal, water quality standards compliance, and energy impacts associated with the achievement of best practicable technology under section 301 of the Federal Water Pollution Control Act with respect to the Alaska Lumber and Pulp Company, located at Sitka, Alaska (NPDES permit numbered AK000053-1).

(b) REPORT.—Not later than 180 days after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under subsection (a) to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 76. STUDY OF RAINFALL INDUCED INFILTRATION INTO SEWER SYSTEMS.

(a) STUDY.—The Administrator shall study problems associated with rainfall induced infiltration into wastewater treatment sewer systems. As part of such study, the Administrator shall study appropriate methods of regulating rainfall induced infiltration into the sewer system of the East Bay Municipal Utility District, California.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of such study, along with recommendations on reasonable methods to reduce such infiltration and on regulatory mechanisms to address special problems associated with increased flows from such systems resulting from such infiltration.

SEC. 77. STUDY OF pH IN DISCHARGES FROM MINING OPERATIONS.

(a) STUDY.—The Administrator shall study effluent limitations as they relate to pH in discharges from mining operations.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of such study along with the recommendations as to the feasibility of permitting modifications of such effluent limitations to permit lower pH in such discharges than is otherwise required.

SEC. 78. STUDY OF POLLUTION IN LAKE PEND OREILLE, IDAHO.

(a) COMPREHENSIVE STUDY.—The Administrator shall conduct a comprehensive study of the sources of pollution in Lake Pend Oreille, Idaho, and the Clark Fork River and its tributaries, Idaho, Montana, and Washington, for the purpose of identifying the sources of such pollution. In carrying out this subsection, the Administrator shall consider existing studies, surveys, and test results concerning such pollution.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of the study conducted under this section together with any recommendations of the Administrator.

(c) EDUCATION PROGRAM.—The Administrator shall make the report under subsection (b) available to the public and shall carry out such education programs as the Administrator deems appropriate for the purpose of making the public aware of the results of the study conducted under subsection (a) and the recommendations contained in such report.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section for fiscal years beginning after September 30, 1985, such sums as may be necessary.

SEC. 79. LIMITATION ON PAYMENTS.

No payments may be made under this Act except to the extent provided in advance in appropriation Acts.

SEC. 80. RIGHTS AND LIABILITIES UNDER OTHER FEDERAL STATUTES.

Section 505 of the Federal Water Pollution Control Act is amended by inserting the following new subsection (f) and by designating the succeeding subsections accordingly:

"(f) Nothing in this Act shall affect or modify the rights or liabilities of any person under other Federal statutes with respect to damages caused by noncompliance with any requirement of this Act or any permit issued under this Act.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "An Act to amend the Federal Water Pollution Control Act to provide for the renewal of the quality of the Nation's waters, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 8) was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REPORT ON RESOLUTION PROVIDING SPECIAL BUDGET PROCEDURES FOR THE FISCAL YEAR 1986 CONGRESSIONAL BUDGET PROCESS

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 99-217) on the resolution (H. Res. 231) providing special budget procedures for the fiscal year 1986 congressional budget process, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3037, AGRICULTURAL, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS FOR FISCAL YEAR 1986

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 99-218) on the resolution (H. Res. 232) waiving certain points of order against consideration of the bill (H.R. 3037), making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1986, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3038, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—INDEPENDENT AGENCIES APPROPRIATIONS, 1986

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 99-219) on the resolution (H. Res. 233), waiving certain points of order against consideration of the bill (H.R. 3038), making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes, which was referred to the House Calendar and ordered to be printed.

MISSING CHILDREN, SETTING THE RECORD STRAIGHT

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. COATS. Mr. Speaker, missing children is a topic that many of us in Congress have been justifiably concerned about. Many of you, like me, have both sponsored missing children legislation and applauded those who have donated advertising space to pictures and information on missing children.

While none of us wants to diminish the importance and tragic consequences of an abducted child, I would like to today add some perspective to this issue that perhaps can alleviate some of the fears of parents and children.

The most frequently used numbers—1.5 million children missing each year/50,000 child abductions—are erroneous. The FBI estimates that about 32,000—not 1.5 million—children are missing each year, and that 67 children—not 50,000—were reported as abducted in 1984. Among the 32,000 missing, up to 90 percent are children who have run away of their own volition, and nearly 90 percent of the remaining number are children not abducted by strangers but taken by one parent from another as the result of a family dispute over custody.

These statistics do not mean that missing children is not an important issue. They simply mean that the remedies for these problems must vary, and that Congress needs to have an accurate understanding of the causes and extent of the missing children problem as we examine possible means of dealing with this problem. Hopefully, these more encouraging numbers will also help relieve some of the unnecessary anxiety and fears of parents for the safety of their children.

I would like to submit for the RECORD a recent article which appeared in the Washington Post written by Ellen Goodman entitled: "Missing Children: Facts and Fears," which speaks to this issue.

[From the Washington Post, July 10, 1985]

MISSING CHILDREN: FACTS AND FEARS

BOSTON—In a supermarket in Maine there is a poster of a girl. It says that she is missing. There are other such faces: boys and girls, 3 years old, 11 years old, 8 years old, hanging like "the most wanted" in public places. Some are on the highway toll gates, others on the Chicago subways, milk cartons and gas bills. All of them are missing.

In New Jersey last winter, they began fingerprinting 44,000 school children. At Tufts University, they developed a technique for toothprints. These are in case, just in case, children are ever missing.

Over the past year or more, the alarm about the abduction of children has been raised everywhere: a television special or

two, a talk show or a hundred, a hotline (Dial 800-THE-LOST). Congress declared a National Missing Children's Day. The media rounded up the usual statistics: 1.5 million children missing, 50,000 a year abducted.

It has taken all this time for the facts to catch up with our bleakest fears.

Now, just now, we hear that there are not 50,000 children a year abducted by strangers. Child Find in New York has altered their estimate to 600 such kidnappings, and the FBI says 67 were reported in 1984. Nor are there 1.5 million missing children in this country. The FBI estimates, rather, 32,000.

Among the missing, the overwhelming majority—two-thirds, three-quarters, 90 percent (there are different figures from different people)—are runways and, as they say now, throwaways. Of the rest, perhaps as many as 90 percent have been taken by one parent from another in a distintegrating family.

Are those children all at risk? Absolutely. But this is not the fear that grips most parents who let a child walk to school for the first time, who leave the children alone in the house, who lose a preschooler in the shopping center, who wait for a child to come home * * *. It is the strangers that we fear.

It is impossible to exaggerate the pain of those parents who have lost a child. It is incalculable, inconsolable. But it is easy to exaggerate the risk, and in these months, the fear has been fanned out of all proportion to the reality.

I think it's worth asking why. Why, now, is there such a receptive audience for this primal anxiety? It isn't just the misused statistics that causes an epidemic of concern. There must be some particular vulnerability in parents today.

The terror of losing a child is a staple of mythology as well as nightmares. Village folklore was full of stories about strangers who stole children. Gypsies were the vagrants and suspects. In those days, communities were tight enough that the only strangers were rootless outsiders.

Today, more and more of us are outsiders, strangers on our own streets. The cities are bigger, neighborhoods less stable. The ratio of strangers to friends, strangers to families has changed dramatically. This is, I think, at the root of our insecurity.

In this same world, we routinely place our children in the hands of people we hardly know. The doctor at the clinic, the teacher at school, the swimming counselor, the bus driver. It is not a coincidence that the fear of child abduction is heightened at a time when more of us leave small children in day care outside their home and family than ever before.

When we tell our children—as we must—to beware of strangers, the number of people wearing that label is much larger than it once was. The more time they spend away from us, the more unknown their world, the more easily our anxiety can be tapped.

The victims of abduction deserve their priority, deserve all the sophisticated methods of discovery in our arsenal. But the victims of hysteria should wonder about the strangeness of our lives. Fear grows irrationally in a world without communities where we know the names of children only when they appear on a milk carton, on a toll booth or on a poster at a supermarket.

A "BARE BONES" DEFENSE BUDGET?

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WEISS. Mr. Speaker, I have here a digital wristwatch with which to time my remarks. It tells the time in hours, minutes, and seconds; it also gives the date and month. Like many such watches, it was made in Hong Kong. Unlike most watches, it has "US Army" printed on its face.

This watch belongs to one of my constituents. She received it as a free gift from the Army. In order to get this watch, she didn't have to enlist. she didn't have to take an Army skills test. She didn't even have to visit a recruiting office. All she had to do was to request information about the Army by filling out a card like this.

These cards have been sent, unsolicited, to people throughout my district. They have even been mailed to senior citizens. Today I am asking the Secretary of Defense for an accounting of this recruiting campaign.

Secretary Weinberger has told us that he submitted a barebones defense budget. Army giveaways like this one make me wonder just who is being picked clean.

Check out the opportunities: College aid; top skill training; personal challenge—be all you can be in an Army of Excellence.

This digital wrist watch gives hour, minute and second readings, plus day and month. It's yours free when you mail this card at the right.

Yours free . . . if you act within seven days!

You must be 16 or older to receive your free gift. To be sure to receive it, you must complete all blanks. Offer expires June 30, 1985.

Don't miss out! Get full details on choice of Active Army/Army Reserve opportunities. Mail card today for info and free gift. No obligation.——U.S. Army——U.S. Army Reserve——Both.

Send me the Digital Wrist Watch.

The information you voluntarily provide, to include social security number, will be used for recruiting purposes only. Your social security number will be used to analyze individual response to this mailing (Authority: 10 USC 503).

Hon. CASPAR WEINBERGER,
Secretary of Defense, The Pentagon, Washington, DC.

DEAR MR. SECRETARY: I am writing to inquire about a recruiting campaign that is currently being conducted by the U.S. Army. This campaign was brought to my attention by one of my constituents, who received an unsolicited mailing from Col. Donald F. Border.

Col. Borden's letter described opportunities in the U.S. Army and invited my constituent to fill out a card requesting further information. In return for mailing this card, she was promised a free U S. Army digital wristwatch.

My constituent, who is well past the usual age for military service, was appalled to discover that the U.S. Army is indiscriminately offering free wristwatches to anyone whose name happens to find its way onto the Army's mailing list. The sole criterion for obtaining this "free gift" is that the recipient must be at least sixteen years old.

I share my constituent's concern about this recruiting campaign. Gifts like this wristwatch may be "free" to the recipient, but their cost must be borne by the American taxpayer. At a time when both defense spending and the federal deficit have reached record highs, it is difficult to see how this could possibly be a prudent and responsible use of our nation's resources. I am also troubled by the fact that these "US Army" watches are actually manufactured in Hong Kong.

I would therefore appreciate any information you can send me concerning this recruiting campaign. In particular, I would like to know the answers to the following questions:

(1) How long has this campaign been going on, and when is it scheduled to end?

(2) Is the Army running this campaign itself, or has it been contracted to a private agency?

(3) What is the cost of this campaign, and how much does the Army pay for each wristwatch?

(4) How many people have been given watches? How many of these people have subsequently enlisted?

(5) What other items are being given away to people who request information about service in the Army? Are these items also manufactured abroad?

(6) How does the Army obtain its mailing lists? What fraction of those who receive this offer are even eligible for military service?

(7) Are the other branches of the armed forces conducting similar campaigns?

For your information, I am enclosing a copy of Col. Boardman's letter and the materials that accompanied it. Thank you for your prompt attention to this matter.

Sincerely,

TED WEISS,
Member of Congress.

RUSSIAN SPIES IN THE UNITED STATES

(Mr. DARDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DARDEN. Mr. Speaker, Sunday on "This Week with David Brinkley," Stańislaŷ Levcheńko, a Soviet master spy who defected to the West, estimated that as many as 40 percent of Soviet diplomats and tourists in the United States are principally engaged in spying.

Clearly, recent events, including this startling estimate, call for action on our behalf. Almost casually, many of us have said that Soviet espionage jeopardizes our national security. Let us put it a little more bluntly. When the Soviet Union obtains top secret information about our military forces it places millions of lives—the lives of our families, friends, and constituents—at greater risk. Espionage is serious and deadly business.

We recently enacted stiff penalties for military saboteurs in the Defense

Authorization bill. But we also need to take preventive measures. Soon, I will be introducing legislation urging the President to limit the number of Soviet diplomats allowed in the United States to the number which we are allowed in the Soviet Union. I urge my colleagues to join me in cosponsoring this legislation.

Mr. Speaker, I include for the RECORD an article from the "Atlanta Constitution" detailing Mr. Levchenko's comments:

[From the Atlanta Constitution, July 22, 1985]

40% OF RUSSIANS IN U.S. ARE SPIES, DEFECTOR CLAIMS

WASHINGTON.—A Russian master spy who defected to the West estimated Sunday that as many as 40 percent of Soviet diplomats and tourists traveling in the United States are intelligence officials.

To curtail such activities, said former KGB officer Stanislav Levchenko, the number of Soviet workers and visitors in the United States should be cut to the same number accepted by the Soviet Union.

"I think the act of making the number of U.S. diplomats and Soviet diplomats in Moscow and Washington equal can be a great help for reducing the scale of Soviet espionage," Levchenko said on ABC's "This Week With David Brinkley."

"I would say from 35 to 40 percent of the Soviet officials, travelers, tourists in this country are intelligence officers," he said.

Levchenko, filmed in shadows so his face could not be seen, said the KGB has been trying to kill him since he defected to the United States after a job recruiting Soviet spies in Japan.

Sen. Patrick Leahy (D-Vt.), vice chairman of the Senate Select Committee on Intelligence, said on the program: "I find when I'm giving speeches about the fact there's a lot of spies over here—a thousand KGB agents in this country, more than that actually—people think you're talking about some fantasy out of the '50s.

"Well it's not. We all say we've got to watch out for spies, but not one really does take it seriously."

Leahy urged House and presidential approval of a Senate amendment equalizing the U.S.-Soviet diplomatic corps in Washington and Moscow. "It doesn't mean you're going to stop spying; there's no way you can pass a law to stop Soviet spying. It simply means reducing the number in the diplomatic community and giving the FBI a fighting chance."

According to the Federal Bureau of Investigation, the number of Soviet diplomats, trade officials and personnel based in the United States totals about 1,000—or more than three times the figure of about 300 American personnel stationed in the Soviet Union.

Since the arrest of former Navy Warrant Officer John Walker, his son, Michael, and two alleged accomplices charged with selling secrets to the Soviets, Leahy and other members of Congress have called for tougher penalties against convicted agents.

SECTION 302 BUDGET ALLOCATIONS

(Mr. GRAY of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GRAY of Pennsylvania. Mr. Speaker, in compliance with the resolution reported from the Committee on Rules I am submitting for the RECORD the allocation by House committee of budget authority, outlays, and entitlement authority for fiscal year 1986, and a revised allocation for fiscal year 1985. These two allocations are based upon, and entirely consistent with, the budget resolution (H. Con. Res. 152) passed by the House on May 23. These allocations are made pursuant to section 302(a) of the Congressional Budget Act, and are submitted now because the above cited resolution deems the House-passed budget resolution to be a conference agreement for the purposes of the Budget Act.

FISCAL YEAR 1985 ALLOCATION OF SPENDING RESPONSIBILITY TO HOUSE COMMITTEES PURSUANT TO SEC. 302(a) OF THE CONGRESSIONAL BUDGET ACT

[In millions of dollars]

House committee	Budget authority	Outlays	New entitlement authority
Appropriations	570,840	540,727	
Agriculture	7,449	17,891	
Armed Services	37,185	25,318	
Banking, Finance, and Urban Affairs	15,505	13,134

PROVIDING FOR DISMISSAL OF THE ELECTION CONTEST AGAINST BEN BLAZ

Mr. JONES of Tennessee, from the Committee on House Administration,

submitted a privileged report (Rept. No. 99-220) on the resolution (H. Res. 229), dismissing the election contest against Ben Blaz, which was referred to the House Calendar and ordered to be printed.

A BIG THANK YOU TO BOSSIER CITY

(Mr. ECKART of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART of Ohio. Mr. Speaker, I rise today to express my deep appreciation to the people of Bossier City, LA, which is represented by my colleague, BUDDY ROEMER. Recently, they displayed generosity to the those in northeast Ohio who were devastated by tornadoes a few weeks ago. In the aftermath of those tornadoes money and supplies were needed to help families rebuild their homes and their lives. The citizens of this Louisiana community responded with kindness. They collected donations for a large truck load of furniture, clothing, appliances, and building materials, and drove 1,200 miles to Niles, OH, one of the hardest hit areas. They also gave some extra money to further help with the rebuilding process. These donations will go a long way for the families who were left with nothing after the tornadoes struck.

Bossier City is no stranger to tragedy. In 1978 that community was ravaged by a hurricane. This unselfish effort was a way of celebrating their recovery from that hurricane.

It is often said that giving honors the giver and the people of Bossier city, LA, have indeed honored themselves. On behalf of the people of northeast Ohio I would like to offer our sincere thanks.

PERMISSION FOR SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES OF THE COMMITTEE ON GOVERNMENT OPERATIONS TO SIT DURING THE 5-MINUTE RULE ON TOMORROW AND THURSDAY, JULY 25, 1985

Mr. WEISS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Intergovernmental Relations and Human Resources of the Committee on Government Operations be permitted to meet tomorrow and on Thursday during the 5-minute rule.

I have cleared this matter with my ranking minority member, the gentleman from Pennsylvania [Mr. WALKER].

The SPEAKER pro tempore (Mr. LAFALCE). Is there objection to the request of the gentleman from New York?

Mr. SOLOMON. Mr. Speaker, reserving the right to object, I will not object, but would the gentleman repeat the last part of his statement? Did he say he had cleared it with the minority?

Mr. WEISS. I did, indeed. I spoke to Mr. WALKER, and he has no objection.

Mr. SOLOMON. Mr. Speaker, I withdraw my objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PRAISE FOR NEWPORT NAVAL HOSPITAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island [Mr. ST GERMAIN] is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, we live in an imperfect world. It's no big revelation. It's just imperfect. Things go wrong every day. And if for any reason we forget about the world's imperfections, we have news anchormen who remind us each night at 7 o'clock that we have problems. Big problems.

The true beauty of a not-so-perfect world lies in the possibility for things to go right; for a job well done. Little attention would be paid to a great accomplishment in a perfect world.

I would like to take this opportunity to share with my colleagues a great accomplishment that is happening at this very minute. It also happened yesterday, and it most likely will happen again tomorrow, and the next day. It regards the superb work being done by the U.S. Naval Hospital in Newport, RI.

In a time when unflattering news is being publicized about some medical facilities, I am pleased to read the positive constituent mail I have been receiving regarding Newport's Naval Hospital.

One constituent wrote me last week to tell me about the experience his wife had with the hospital. She was brought to the emergency room where doctors discovered a life-threatening brain tumor.

The patient's husband believes that the quick-thinking care and attention provided by the hospital's staff is responsible for his wife being alive today.

Hospitals are no picnic. Patients are not there because they wish to be there. This often creates many unhappy attitudes, all armed with an arsenal of complaints

Receiving mail from constituents who wish to praise the work of a hospital is special. It says something. It says that something is going right even if the world does have its flaws at times.●

PAY EQUITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. ARMEY] is recognized for 60 minutes.

Mr. ARMEY. Mr. Speaker, this evening I would like to discuss the whole question of pay equity within the context of a free enterprise market economy.

This is an old question that has been addressed many times, by many people, and one that has currently popped up again within the context of a new legislative initiative offered by Congresswoman OAKAR, from Ohio.

This legislation that is proposed addresses the issue of pay equity, or comparable worth, and raises a great many questions about the fundamental fairness of the methods and procedures and outcomes of pay and income distribution within our market.

I would like to go back and look at the history of this. If we can go back for a minute to 1776, and look at an important work that was written at that time by Adam Smith, "An Inquiry Into the Nature and the Causes of the Wealth of Nations."

Adam Smith, with this important work, brought for the first time a formal, systematic analysis of economic behavior, and he related to what he called man's natural tendency to truck and barter, and identified in that that there is a natural tendency for human beings to recognize in themselves and in the resources that they have commanded, particularly within the context of a private property ethic, a unique specialization of productive capability; that each and every individual had his unique skills; men and women alike; their talents, their abilities, and some jobs they could perform better than others.

The resources they had at their command were often better suited for some forms of production than for others, and there are all forms of geographic and demographic and biological and physiological characteristics that went into that; but nevertheless, human beings have that inherent capability of recognizing that area which Adam Smith called comparative advantage.

The sum and substance of that is that some of us are capable of doing some jobs better than others, and we recognize that capability. For example, I might find myself to be 250 pounds and 6 foot 7 and be able to run an extremely fast 40-yard dash and be very strong and I even perhaps am a little bit mean, in which case I might find myself uniquely qualified to be a defensive end for the Minnesota Vikings.

In which case, if I were very productive at the activities required of defensive ends, and if indeed the public continued to pay a tremendous price for the tickets to observe defensive ends in action, I might very well find myself paid at a rate which was higher than

that, say, of a college professor who some might consider to be a person who offers a great deal more in value to the community and to the society; but nevertheless the market does not reveal any willingness on the part of people to express that subjective valuation in the form of a price. I myself have lectured in the university campus for 20 years and I have not yet had anybody exhibit a willingness to pay $10.75 to come and watch me lecture for 2½ hours as they did for example on many occasions, to watch Carl Eller beat up on quarterbacks.

So indeed there is an objective criteria by which the valuation of that specialized effort can be worked out within a market context, as people devote themselves, by their choice, to that area in which they are most productive relative to other people.

This is a very important point. In a market circumstance, we make the free choice. There are very many things that we would evaluate in our determination of a free choice, and the market has a tendency to sort these choices out, to sort out the supply of people available for different occupations, and to juxtapose that rather sensationally against the demand that is out there for people in these various occupations, and indeed assign, then, a price that is competitive in such a way as the quantity of services offered at that competing market price will be equal just to that quantity demanded.

□ 1750

Indeed, in a wonderfully miraculous way, the market clears in such a way as to avoid either a shortage of those necessary services or a surplus of those services.

That is a wonderful thing that we often refer to as the miracle of the market, allocating resources to those areas in which they are most productive and away from areas in which they are less productive and rewarding those resources employed in those most productive alternative uses in a manner commensurate with the extent to which society values that productive activity by exhibiting in turn a willingness to go out and purchase that commodity in deference to other commodities that they might purchase.

Nevertheless, despite the fact that the market has worked well for centuries and was very well described by Adam Smith in 1776, people continue to question the validity of the market, the validity of this free choosing, freely initiating private enterprise system, and to raise questions and reservations. Indeed, John Stuart Mill wrote in the middle 1840's and up until 1869, and expressed the confidence that somehow or another the economic community as a whole, through a political process, in total disregard to the manner in which it allocated its resources and maximized the efficient utilization of those resources to the maximum total product for its community, could make then a separate decision with respect to how those commodities produced would be distributed among its population. I think Mill committed a fundamental error there in suggesting that somehow there could be a fundamental separation between the allocation of resources to alternative production tasks and the resultant reallocation of the fruits of that labor back to those that performed the labor. But he broke the ice then by way of suggesting that somehow or another there could be a governmental decision regarding the division of labor, the division of output, that might indeed result in a more desirable outcome than that natural outcome that would come from the fragmented but free decisions of the individuals in the community to express their preference, their desires and their demands.

Karl Marx took this up at a later time, beginning with a notion that was really, frankly, lacking in substance, the notion that was called the labor theory of value, where he argued that what determines the value of a commodity is the number of labor hours that go into that commodity and the number of labor hours alone would be the determinant of the value of that commodity, looking at it only from the supply side.

He went on then to argue that, therefore, only workers can create value, and since, as he observed the world in which he lived, only workers were where that value was distributed to, that is to say, the value was distributed not only to owners of labor but to owners of capital, Marx thought he saw a fundamental inequity in the system, and he postulated the problem that he perceived. I think he set the stage for the debate that would follow for years and years to come when he argued that under capitalism we take from each in accordance with their ability and give to each in accordance with their contribution.

Now, Karl Marx thought this was fundamentally unfair. By way of contrast, this concept of distribution tied to contribution to production is what is characteristic of the value system that is the heritage of Western civilization. In the United States we would argue in favor of an ethic governing income distribution, which would take from each in accordance with their ability and reward to each in accordance to their contribution. Indeed, if we find ourselves working alongside a person who contributes less than we do, we may very well resent that person's equal share to our own and do I think a rather obvious thing, which is to contribute less ourselves, in order to bring about a parity between the relationship between our share of output and our contribution as compared to the others.

An important aspect of this equity is that you have a built-in incentive, then, for each to contribute in accordance with their ability. If indeed I know clearly that the greater my contribution, the greater my reward, that if indeed I take the initiative, put my shoulder to the grindstone, work harder, that that will be rewarded by a greater share of the total output, I have then a natural incentive to give that greater contribution.

But Marx saw the possibility for a more fair world, a world that he described in the most general terms, and indeed was able to describe, quite frankly, with the most minimal discussion by way of a contrast to this historic capitalist formula for income distribution.

Marx envisioned a world that was a greater world, a world in which we would take from each in accordance with their ability and give to each in accordance with their needs. Somehow he felt this was a more fair formula, a more fair equation, but he totally overlooked the question how would we in such a context of distribution inspire people to give that greater share commensurate with a greater ability. If indeed you and I realized that we will get the same reward irrespective of disparate contributions, neither one of us has an incentive to contribute more than the other fellow.

Karl Marx totally ignored that, and he went on, frankly, I think with his head in the clouds total disregarding human nature. The fact of the matter is, Mr. Speaker, when we work we work first and foremost for ourselves and the people that we love, and we work harder if we find that our harder work does bring a greater gain to those people we love.

But that set off, then, a stage of attack against the capitalist free enterprise system, the recurring thundeous rejoinder generation after generation, each and every generation would produce a new champion of equity, fairness, equality, that would argue that capitalism in its free market workings, where indeed people were given equal pay for equal work, was not a fair system.

The most recent purveyor of the kinds of thinking that we have generating along these lines, which I will call the communal ethic in contrast to the individualistic ethic, where each contributes in accordance with their ability and takes in accordance with their contribution, this I call the individualistic ethic, the ethic that is often described as quid pro quo, this for that. The contrast is often called the need ethic or the communal ethic and is one indeed that many groups have argued against. Why should somebody receive more because it is subjectively

perceived that they need more, even though they may not have made the contribution? The most recent proponent of the need ethic, of formulas administered by the State to serve some localized idea of fairness, is John Kenneth Galbraith. Mr. Galbraith, of course, has been a very important influence in our time and a person who has an enormous flair for what I might call rhetorical innovation, and he has made enormous contributions to all kinds of false assumptions and false thinking regarding the area of income distribution.

So the assault was on, and it is carried on today. Marx had to be answered. It is a rather interesting thing, because in a search for an answer to Karl Marx's critique of capitalism, we developed a whole new school of economic thought, a whole approach to the subject which is often called the Austrian School of Economic Thought, and within that Austrian school, staffed primarily by Austrian economists, there emerged the first great American economic theorist, the first American economist to achieve international acclaim, John Bates Clark, who lived from 1847 to 1938 and wrote in the late 1800's, and answered Karl Marx in 1886 with a whole new perception of the theory of value as it relates to compensation of people contributing to output.

□ 1800

A very difficult analysis to follow, and one that is not popular among students of economics by virtue of its difficulty.

John Bates Clark pointed out that as you examine different occupations in a world of work, you find that each separate occupation has its different dimensions and characteristics. Something that I have taken the liberty to call "Obnoxiousness Factors."

The first thing we have to understand is that they call it work; they do not call it play. It is not something we do because we enjoy. Certainly, some of us are fortunate in that we are able to pursue what we call the self-actualizing occupations and get a certain satisfaction from our work. But the average worker in any industrial community must first come to terms with the fact that what you are doing is sacrificing a certain amount of leisure time which is almost always more enjoyable for time on the job, which is almost always less enjoyable, and that your objectives in doing so are to provision yourself and your family as best you can given the talents and the skills that you have.

Each and every one of us have an enormous range of choice. I am always amused by friends and colleagues who argue, well, I have no choice; this is the only job I can get. That is rarely the case. If you say this is the best job I can get, I will believe you. I would suppose that anybody would occupy themselves in the best job they can get given their talents and their skills and the things they value in life.

For example, I spent 20 years of my life as a college professor. It was not the only job I could get, but it was certainly the best job I could get. I could have shoveled coal as I did when I was a young man. I could have gone out and climbed poles for the power company as I did when I was a young man.

I could have worked as a store clerk. I could have done any number of hundreds of different occupations. But I chose this one because given my skills, my talents, my ability, this was the best I could do. That is where we find ourselves. We tend often to ignore that.

It is a basic and fundamental human characteristic that I find fascinating to study. Virtually everybody I know believes themselves to be overworked and undercompensated. I do not know anybody in the most privileged occupations, who does not have that self perception. Quite often you have the housewife who feels overworked and underappreciated. In the whole juxtaposition of the man and woman with respect to the division of housework, it is a fascinating thing to watch the discussions that are carried on when each party is enormously aware of all they do by way of the tasks around the house, and are seemingly unaware of what is done by the other party. It is a fundamental human characteristic.

That is, of course, the tendency that we have, but we must always remember that it is our choice and this is one of the difficult things that we have. Nobody makes the choice for us, we make the choice. We have to make a distinction between being free to choose and having free choices. You cannot have something without giving something up. If you are going to choose to drop out of high school and get an immediate job, then you give up the high school diploma. But it is your choice. The opportunity to continue is there.

If you are going to choose to take a job inside, out of the heat, out of the realm of heavy lifting, that is a choice you will make, and you will give up then, perhaps, the higher pay.

So as we look at these jobs that are arrayed in front of us, and we look at ourselves and the skills that we have available to us and we think of the things we value, many things, obviously we value, the material goods that can be bought with the wages we might earn in the alternative occupations, and consequently wage becomes very important as an incentive to us in making these different choices. To a large extent, we will tend to choose then that occupation for which we are qualified that pays the higher salary.

But that is not all we value. We value our leisure time. We value our time with our family. We value the opportunity to do what we prefer to do rather than what we must do. We value the opportunity to be our own boss. This Nation has millions of small farmers who continue to stay on the small farm despite the fact they do not earn the income they could earn if they give up their farm and go someplace else. Why do they do that? Because they like being their boss; they like that independence, that autonomy.

There are many factors that go into our choice. The one thing, again, I would like to remind you, is that we have the freedom to make that choice; we are not compelled down one route or another. We make these choices as we go on to our education and determine if we should do this major or if we should do that major. Should we study this subject or should we study another line of subjects? We prepare ourselves then for some future occupation, and, hopefully, we will guess correctly.

Now, looking then at any occupation you might choose, let us take a job, for example, as a garbage collector. It is a rather obnoxious job; it is a dirty job. You are picking up other peoples' trash; you are working in the hot sun; you are working hours that are not particularly desirable. You work under conditions that are generally not very satisfactory and I think probably can be generally described as pretty obnoxious conditions.

As you might guess, there are very few people willing to make the choice to be a garbage collector. As a consequence of that we find then a low supply of garbage collectors. Similarly, truckdrivers. If you were to choose to be a truckdriver, you would have to accept many hours and days perhaps on the road, away from your family. You would have to accept the trials and tribulations of being on the road, moving your vehicle, quite often a very heavy, cumbersome vehicle, through heavy traffic and strange communities, finding locations that are a dot on the map, and then when you are arriving there with this great big 18-wheeler, having the obnoxious task of turning it and backing it into a space that is barely big enough to put, it seems, sometimes, a Porche. A very obnoxious job.

As you might guess, there is a tremendous aversion to that occupation. On the other hand, you may find yourself prepared and fit for a position in a nice air-conditioned office doing light work with a congenial environment. Friendly coworkers, convenient to downtown and some of the things that you enjoy most. You may very well find the obnoxiousness factor of that being minimal. A supply curve there exhibiting the fact that

great numbers of people prefer that job.

Now, it is a fundamental fact in all economic analyses, the greater the supply, the lower will be the price. If the supply increases, this will tend to drive the price down simply because there are so many more people available for that occupation.

On the other hand, there is always a demand expressed for an occupation. This is a fascinating part of the analysis that John Bates Clark gave us. Why does a businessman demand a worker? They demand a worker for the value of output that worker can generate, and that value of output is determined by two things. One, the physical contribution that that worker makes to increase total product. We call this the marginal physical product. What if I bring another worker onto my work force, what will that worker contribute to the product that I have on line here? If he produces 10 other units of output, then he is worth whatever I can sell 10 units of output for. The other component being then the price of the output.

The price of your product reflects what society believes to be the value of this commodity relative to all the other commodities on which they could spent their income. I always understand that whenever I go into a grocery store and freely and voluntarily choose to buy brand X, I give up not only all other brands of that product on which I could have spent that money, but all the other products on which I could have spent that money. I make that choice.

□ 1810

I make that choice. It is a choice that I do not often relish and it is a choice that in itself can be an obnoxious choice, but indeed, the freedom of choice that we have within this market setting is phenomenal and we make these choices all the time.

So then the manufacturer offering his commodity on one hand, and trying to hire the number of workers here so that he can eventually produce just the right amount of output that he can sell over here, takes that piece of information from the goods market, called the price of the output, combines that with the piece of information from the resource market, called the productivity of the labor component in that productive activity, puts them together and determines what he can pay for that worker. He cannot pay more, because to do so, he would lose money. If he tries to pay less, somebody else will come and bid those workers away.

So he is really caught in a situation where he must make a very careful resolution of this two-market problem, getting then the appropriate amount hired to produce the appropriate amount of output.

That is a wonderful working out of the marketplace, is extremely complex and is extremely difficult. What happens here is that we find here then within the context of our economy a host of jobs, all of which will pay different wages but all of which will have different characteristics with respect to work environment. Then we put that within the context of the family life, and particularly, if you will, and frankly, Mr. Speaker, I am a little disconcerted at the extent to which people will ignore or pretend to be irrelevant thousands of years of family life traditions, but the fact of the matter is historically, and quite frankly, again, if you go back to years of a more primitive technology, for very good physical reasons, reasons having to do with size and strength and biological characteristics, there evolved over the years a tradition of a division of labor within the home.

Historically, there was a technological imperative to that tradition, but as you know, science and technology always moves faster than social adjustment and change. Even though we have the science and technology today that may free us from traditional household occupational roles, the traditions that we grew up with will move more slowly.

So there became then a traditional tendency for certain occupations to have a greater attraction for men than for women because they imposed greater demands on physical strength, greater demands on size, they required working out in the hot sun, lifting, suffering risk and danger in many cases, in many cases requiring a physical ability to defend oneself, as for example in the case of police work.

There became on the other side a host of occupations that women were quite frankly more fit for than men by way of their understanding of their role in the community. Some people choose to call that social conditioning. I do not want to put a label on it. The fact of the matter is, tradition has had a tremendous amount of influence over this. We tend not to give that up. One of the things I tried to tell my students, little girls tend to emulate big women; little boys tend to emulate big men. They learned these roles, but technology will free us from the requirement that we have these roles, and in recent years, technologies have meant a great deal.

Nevertheless, we see a tradition and a tendency historically for people to gravitate to different kinds of job applications based upon technologically different constraints.

We find, of course, that some of these occupations pay more than others, for two reasons: One, because they are so obnoxious in the physical demands that they make, and the characteristics of temperature and heavy lifting and danger that are characteristic of them, and perhaps sometimes esoteric technical skills. I would not want to discount the kind of technical understanding that is necessary to unplug a stopped drain. It is not always something that people can do. Indeed, I know many Ph.D.'s who cannot unplug a stopped drain. So the skills and the peculiar work understanding that you might find in a plumber, working again also often under rather difficult circumstances and obnoxious circumstances will tend then to give us a reduced supply of workers willing to work in that occupation, that reduced supply tending to raise the price that we would pay to get people to come into that occupation.

Other occupations are rather pleasant, nice working hours, nice working conditions, no heavy work. Indeed, one Member of Congress is reputed to have said that the reason he stayed in Congress was because he managed to avoid working outside with heavy lifting. I can well appreciate that point of view. That will tend to cause people to gravitate to that occupation, and the pay will be different but the rewards in terms of all that we value will still be sufficient enough to get someone to move here rather than there.

Also, often I have known people who will tell me, "I have a lousy job. This is a terrible job. I wish I could have a better job. I hate this job." The solution is very simple. If your job is not the best job for you, given your ability, then take another job. There is another job you can have, but you cannot give up this job and take that job without sacrificing something. Maybe it would be the higher pay. Maybe it would be the number of leisure hours that you have. But there is an alternative that you can take. The choice is yours.

Again, I find a rather interesting phenomenon on the part of individuals. We tend not only to consider ourselves always to be overworked and underpaid, overworked and under appreciated, but we tend always to try to find a way to avoid responsibility for where we are in our life. We are always looking for someplace where we can get off the hook, where somebody else is reponsible for where I am.

It is amazing to me how often we might seek to present the guise of helplessness. The reason we do that is, decisions are hard to make. It is difficult for each and every one of us to take our life into our hands and to make changes perhaps that are nonconventional, maybe nontradition, perhaps might be disapproved of by friends and peers and family. But because we want something else for ourselves, and do not indeed have the sense of personal autonomy to go grab that because that is what we want, and instead defer to what we expect

others might think we should have, we tend to feign helplessness a lot and that kind of goes into the argument that says in the final analysis, "Since I have now this job where I am not being paid fairly, I request the intervention of some strong third party to come to my rescue. Relieve me of the obligation of changing jobs, relieve me of the obligation of accepting that where I am is a consequence of my own decisions, and give me an instant, magic reprieve from the injustice that I perceive from having been asked to give too much work at too little pay," without perceiving that everybody perceives himself to suffer that same injustice.

This has brought us in recent days to the comparable pay or equity movement, but let us go back. The fact of the matter is, John Bates Clark proved that these market forces, working as they do, ended up where workers by and large, and with very few exceptions, got a wage which was equal to their value of marginal product.

□ 1820

So that a worker brought into a factory that contributed 100 units of additional output to that factory, if the output would sell for $1 a unit, was getting $100. And indeed he got that paid in direct accordance with his contribution. That was the normal, the natural, and the predictable outcome of the free exchange of labor in a capitalist system of markets. And if there was indeed a need for more workers over here, the market would show that with an increase in demand, that would raise the price and people would go from here to there, and they exercised their voluntary choice to move from one job to a better job. It worked well.

Now, indeed, unfortunately, you cannot operate an economy outside of a social setting, and indeed there are people within communities that have a certain mean-spiritedness, a certain narrowmindedness, and historically we have a troubled time with this because in fact quite often what we found was that people would tend to preclude others from an equal opportunity to get the work, quite often on the most capricious of grounds, because of race or sex, quite often because of creed.

From a market point of view, this is not an efficient way to conduct business. It always amazed me that any businessman could think he could afford the luxury of prejudice. Why would I dare to not hire the most qualified person, knowing that I risk the possibility that that person may go to work for my competitor and indeed may go over there and drive me out of business? But, unfortunately, it happened.

So we had a rising cry in this country that began with the civil rights movements in the 1960's and proceeded through the equal rights movement. It was not a cry that said, "Let's restructure the fundamental economic system under which we work," but it said, "Let's reevaluate the social pressures and the social mores and the demonstrations of bald-faced prejudice that we live with in this community by passing laws which say that everybody is entitled to equal employment opportunity with everybody else, that somebody is not free to preclude another person from work, for extraneous reasons having to do with sex or national origin or religious creed."

Now, this is not acceptable to us within the ethics by which we govern our Nation. It is not acceptable social behavior, and we will not allow it.

Then also the movement went on to say, "Let's make sure that everybody gets what the market would give them if the market had been operated free from social prejudice and what would be efficient for the community as a whole if the market were operated freely. Let's see to it that everybody has a right to equal pay for equal work, that you cannot differentiate in the pay of two people doing the same job because of extraneous considerations having to do with race or sex." And we made enormous progress in this country.

I always used to point out that when you start looking at the tradition of the market evaluated, you should look into those areas where you can get the greatest and the most precise measure of marginal product.

I remember when I was a lad, I used to go out and pick potatoes. When we picked potatoes, we were given 10 cents a bushel. That was the contract. We had men picking potatoes, we had women picking potatoes, and we had Catholics, we had Protestants, we had Hispanics, and we had whites picking potatoes. And it did not matter, race, sex, or creed. It did not matter because each and every person could count the number of bushels they picked, and that was the agreement. There was no room for prejudice. And that adherence then to that formula, that "we will pay each of you in direct accordance with what you produce," resulted in those people who worked the hardest, who picked the greatest number of bushels, getting more pay, irrespective of sex or color or any other consideration. The only consideration was, what did you produce?

How did they arrive at the figure of 10 cents a bushel? That was directly related to what they could sell the potatoes for. If the price of potatoes had gone up, they could have paid us 11 cents a bushel, and in some years they did.

Let us take a look, for example, at two rather interesting occupations. Let us take professional athletics, and let us take professional entertainment. In these two professions years before the civil rights movements of the 1960's we found that race barriers broke down. Not only was there a greater equality of opportunity for employment, but there was a greater equality in earnings.

Now, why was that? No. 1, because the talent and the skill was something you could not affort to preclude. The fact of the matter was that there were many black athletes that were better than the white athletes. Jackie Robinson was better, and professional baseball could not afford not to have this talent. And Willie Mays. What would baseball have been without Willie Mays?

The talent was there. We had to admit it or we lost something in the quality of our product.

And then there is the pay equity. I dare say that everybody in the city of Washington can tell you the productivity of the athletes with the Washington Redskins. Some of us in Dallas can even tell you something of the productivity of the Washington Redskins, and quite frankly some of us in Dallas think it is too high. But we have got it measured, and then when contracts come around, those statistics and that measurement go on the table.

We know the box office score of entertainers. We know how many tickets they sell, and when it comes time to negotiate contract terms to bring an entertainer in, you cannot, if you want to have the best product available, discriminate. You cannot say, "I won't have Sammy Davis, Jr., in here," because you will lose money if you bring in somebody who has less public appeal than he does. So you have to give him that opportunity to work, and you pay him what he can get, because if you do not pay him that in Washington, he will be booked into Baltimore.

So these barriers have broken down. It has not been altogether easy, and there has been some struggle. I do not want to diminish that. On the contrary, I think, Mr. Speaker, we ought to recognize the progress that has been made by people who have said consistently and constantly, "Give us what we should have within a free-enterprise, democratic community—equal employment opportunities and equal pay for equal work."

The Nation responded to that. Change is coming about. And what do we have? We have changing occupational patterns. We have opened the lines. We have taken away any ability on the part of any person to close the door on another out of considerations that we consider to be unethical and unacceptable, and as we have taken that away and as there has been a new awareness of the technology that makes it possible for us to do jobs that perhaps earlier we could not do, as we have explored alternatives to old tradi-

tions, we have seen amazing patterns of change in the world of work. Consequently, in the world in which we live and in our home lives as well we have blacks moving into nontraditional occupations.

Many years ago we pointed out that we did not resolve the problem of mistreatment of black Americans by raising the wage of redcaps. We resolved the problems by removing barriers to entry and recognizing that all American citizens are equally deserving with all others of the fundamental rights of equality to opportunity that this Nation promises all Americans.

We find women going into nontraditional jobs. I was driving through the city of Dallas the other day on an enormously hot day, a day on which quite frankly I was happy to be driving in my air-conditioned automobile, and I looked out the window and I saw a young woman moving steel, heavy angle iron, for a foundation.

□ 1830

I had to look twice, because quite frankly she had been out there in that hot Sun obviously all day. She had her heavy work boots on. She had her heavy work gloves on. She had a heavy work shirt and heavy jeans, a bandana tied around her neck. It was obviously not a job one would prefer to do.

I wondered why would that person, why would that woman choose that job. It must be awfully hard for her. She did not seem to have the size and I suppose she did not have the physical strength of a lot of the men that were working out there. Why do you suppose she chose that?

One was the new awakening that I have a right to and I have the ability to and I will go out and I will take this nontraditional occupation.

The other was nobody could present a barrier to her doing that. Of course, probably most important of all, she made more money doing that than what she might have made in some traditional occupation, so what we find is these changing patterns.

If I can now, let me focus attention, because one of the wonderful things is to see how the market accommodates. Once we broke that certain stranglehold that prejudicial social traditions had, once we passed the legislation that said we could no longer arbitrarily and capriciously foreclose these opportunities from American citizens as a matter of social policy, the economy responded. When women went out and applied for the nontraditional jobs, they were hired and they were paid in accordance with the work that they did and we saw this enormous change, the breakdown of traditional occupations. We see it today, but still at the same time, the change will only proceed as fast as the people make the new choices.

The fact is that the average American woman still today prefers those safer, those more comfortable, those more traditional occupational choices and they make the decisions to move in that direction, quite ofter because they are encouraged by their parents and family members to do that, to be a nurse instead of a doctor, but also because they have other things that they want to do with their lives.

One of the things that I acknowledged after considerable study on this subject and discussions with my own wife was that as a boy it never occurred to me that I had any choice other than to grow up and to accept that occupation by which I could first fulfill the responsibility to suppot my family. I always had rather a singular objective as I went through my educational years and so forth to prepare myself to be the primary breadwinner, because that is what I have seen all my life.

Women very often, quite frankly, realize and understand from the time they are a little girl that they never need to accept that responsibility, or they do not plan on accepting that responsibility of being the primary breadwinner and they prepare themselves for other activities as well, in addition to being a breadwinner, to have employment.

They also understand and accept the responsibility to the family that generally on a day-to-day basis in terms of the time required is something different than what the husband accepts. That is nobody's fault that they accept that. They are free to choose and, quite frankly, let me tell you something, Mr. Speaker, I am tired of people who tacitly project to me their assumption that the women of America are too stupid to make other choices, that they are unaware of who they are and what they value in the life that they prefer for themselves that they allow themselves to be programmed and manipulated as if they did not have a brain in their head. I am tired of that.

I have seen too many able-bodied, strong-willed, independent-thinking, hard-working, intelligent women doing something that is nontraditional, doing something that is exceptional.

For example, I have run seven marathons, that is 26 miles, and there has not yet been a marathon I have run that I have not followed several women.

I have had women in my classes. I have been in classes with women. I have been on the job with women.

Look at the women we have in this House of Representatives. Would anybody here deign to suggest that somehow or another they are suffering from a lack of intellectual parity with us men? Of course not; but time after time when we come back for these protective scenarios where we are trying to plead the case for some deviation from the traditional decisionmaking process and the freedom of choice that have governed so many lives, where the majority indeed have gone with tradition by choice, we tacitly suggest they make these choices because they do not know any better.

I am insulted by that. It is incredible to me to suggest that they do not know any better. They know what they value. They value their leisure time as I value my leisure time. They value time with their children as I value mine and they value doing quite often what they prefer to do, rather than what they must do.

Men quite often, on the other hand, value the same things, but have a sense of compelling force that I must make decisions where indeed I may be compelled to take a job less than what I would most prefer in a job because my primary responsibility is to achieve the highest money income for my family; so we see consistent patterns.

Men typically work more hours than women in a week. They stay on the job longer without interruption. They put their time in on the occupational ladder, working their way up from promotion to promotion, putting their time in the trenches and looking forward to that promotion. They do not interrupt their work years. They work more overtime hours.

When they get higher credentials, men typically translate those increased credentials into more hours on the job. Women typically translate increased credentials into fewer hours on the job.

To a large extent, women work for an advanced degree, and advanced certification, so that they can achieve a higher paying job and work fewer hours at it and leave the income level the same.

Now, those are free choices made by intelligent discriminating people and there is no reason for us to believe for one moment that the women making such choices are somehow less intelligent than the men or that somehow they are more amenable to social pressures than the men and less able to gain control of their own lives and to make their own decisions.

As I said before, I consider that an affront. Yet this is the undercurrent of dialog and rhetoric and analysis.

John Kenneth Galbraith, I mentioned earlier, the crypto servant he invented in one of his most recent works. In this work Mr. Galbraith argued that the American housewife is a crypto servant who is manipulated by the convenient social ethic—which he does not define—into making a decision which is totally contrary to her well-being by placing herself into a life of voluntary servitude where she will spend a lifetime working as a crypto slave with no compensation.

Mr. Galbraith obviously has a very low idea of the intelligence of the average American housewife if he thinks she does not know what he does. He obviously has very little awareness of the pleasures and the satisfactions that we gain from caring for our children and the fact that many, many women choose to be a housewife because they would rather be a housewife. It is not something they do because they are too dumb to do anything else or they are too unaware to know that the convenient social ethic has got them by their alter ego or superego or whatever else you might invent.

They are intelligent, rational people, living a full, productive, and responsible life.

Are they compensated? Yes. They do not get a paycheck. I would be the first to admit that the paycheck syndrome is very real. When I receive my paycheck, it is a validation, and a housewife misses that and her awareness of that lack of validation is something very real. Many, many women continue, though, to accept that because they find so rewarding what they are doing.

□ 1840

Sometimes they feel compelled to stay home with the children because they are concerned and their love for the children is so great. But they make the choice and they are not idiots. And Mr. Galbraith and some of the people who continue to give us the folklore of dissent by which they wrap these scenarios around free and intelligent people, and paying for them, a conspiracy theory in which it is alleged they have no choice, and they are helpless anyway because they are too dumb to know any better, ought to pay a greater respect to the women of America.

By the same token, it is an intelligent woman who knows what she values and pursues what she prefers by way of a lifestyle and a combination of homemaking and working that will so often choose the traditional occupation. She is making that choice and is she not fortunate that she lives in a Nation which has such a strong and prosperous market economy that is so adept at allocating the scarce resources and moving those resources to the jobs where we'd get the maximum production, that indeed we can afford for people to have that freedom of choice, to work part time, to take a job at a lower skill level in order to spend more with the family, or to upgrade your skills and your credentials in order to get a higher rate of pay and work fewer hours and spend more time with your family. All of these choices are available to us.

I would add, Mr. Speaker, that if you have not spent any time talking to the women of America, and if you have not talked to the wives and the mothers of America, and if you have not discovered that a great many of them find that they are indeed very richly rewarded for the productive activity that they carry out, then I believe you have missed something in your research.

Now what we have is the gentlewoman from Ohio, Ms. OAKAR, who rides in to describe a whole new concept that says that the system is corrupt, the system is punitive, the system is unfair because what we have here is different people in different occupations receiving different rates of pay. Is that news to us? Have we not perceived that before? Did you not when you decided to go on to the university and choose this major instead of that major, when you decided to go to that trade school and choose this trade instead of that trade, did you not know that there were different rates of pay for different jobs? Was that not part of the thinking that you employed when you made those choices to take those different jobs, to employ yourself for those different jobs?

But to Ms. OAKAR, it comes as a new revelation. Amazing. Different occupations receive different rates of pay.

And would you believe that in those occupations where there are no requirements for heavy lifting, where you are not asked to be out working in the hot Sun, or in the cold winter air, where you are in a comfortable, safe environment, can you imagine that the pay is less in some of those occupations than it is in others? The market must obviously be working improperly.

Can you imagine that we have situations in America today where people with college degrees, working in an office that is air-conditioned, with a white collar, are making less money than truck drivers who do nothing but spend 4 or 5 days a week, every week, away from their family, traveling 10 and 12 hours a day in a truck, finding a place in San Francisco they never heard of before, and parking that truck so it can be unloaded? Can you imagine the market is screwed up so badly that it is paying those people more to do that?

I remember when I was at the university that the college professors were always mad, and angry and upset. Can you imagine the football coach got more than some of the professors? And he was not producing a product of any value such as 18th century British literature. He was producing football. Can you imagine that this guy who works three or four times as many hours a week as the average college professor, who works out in the hot Sun, who took those students that the average college professor said I cannot teach, can you imagine how much more complex is a playbook for a football team than a U.S. history book? All of these elaborate things with red dog and blitz and all of the different kinds of esoteric concepts? I have seen football playbooks with little footprints in them, graphs that have 12 dimensions to them as opposed to the simple 2-dimensional graphs that I have seen in textbooks.

Can you imagine that that guy who takes those students, those young people that are told or are said to be unteachable in the classroom, that he teaches them what that playbook is, and also how to execute it.

PROTECTIONISM IS OUR DUTY IN TODAY'S TRADE WAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 30 minutes.

Mr. GAYDOS. Mr. Speaker, almost immediately after my first being elected to Congress in 1967, I began urging this body to look closely at the flow of foreign goods into this country. For nearly 18 years, I have been an outspoken proponent of limits—quotas, if you will—on goods that unfairly compete with American products in the domestic market.

Over the years that I have served in this body, I have been an eyewitness to the extinction and near extinction of many American industries that have been buffeted by foreign competitors—rivals that have thrived on subsidies from their home governments, rivals that have been and are wholly or substantially owned by their governments, and rivals who have shipped and sold their products here below what the cost of manufacturing was just in order to get a toehold, and then a foothold, and then the lion's share of the American marketplace.

And, because of my stand on limiting, on setting quotas on the amount of imports to this country as a means of assisting American business, American economic growth and American workers and their jobs, I have been labeled a "protectionist."

Well, Mr. Speaker, I take great pride in being tagged with that label.

In the early 1940's, when I volunteered to put on the uniform of this country's Armed Forces, I was sent to the South Pacific to "protect and defend" American ideals and beliefs. I believed in that cause and I was proud to be called a "protectionist."

Well, we are at war today, too. It may not be a shooting war, like that of the 1940's, but it is no less a war. And we are losing.

Just look at what is happening. For the first time since World War I, the United States is a debtor Nation. We have to depend on foreign governments and foreign investors to finance our debt—and that means our economic future is in the hands of other na-

tions and, if we don't turn it around, we'll have to dance to someone else's tune.

We have a merchandise trade deficit that is going out of sight. Last year, our merchandise trade deficit hit the all-time record mark of $123.3 billion. This year, the monthly deficits are even higher and the projected year-end deficit is between $140 and $160 billion.

What does that mean for America? It means that we are importing more goods than we are exporting. It means that these imported goods are taking a larger share of the American market—more than 25 percent of the American steel market, some 70 percent of the shoe market, more than 60 percent of the television sets and radios, and nearly 30 percent of the automotive market.

But it's more pervasive than that. Those are just foreign-made goods. What about the American manufacturers who have moved manufacturing facilities offshore or who import components for products that are sold here?

Two-thirds of every IBM personal computer is made in Japan or Singapore. Half of the components of all American machine tools are manufactured overseas. The Eastman Kodak Co. sells copiers made by Japan's Canon Corp. under the Kodak name.

General Motors and Chrysler will be building cars jointly with Japanese and Korean manufacturers. The assembly work will be here, but the parts will be imported. The list goes on and on.

And it costs us. It costs us jobs, good-paying jobs for American men and women. For every billion dollars of the trade deficit, we lose or fail to create 25,000 jobs. That means that in 1984, we lost or did not create about 3 million jobs. And, if the projections for the merchandise trade deficit for 1985 hold true, we will lose or not create between 3½ and 4 million jobs.

The components of the huge trade deficit, too, require some study. Nearly one-quarter of the 1984 trade deficit was with one country, Japan. And the picture for 1985 isn't getting any better.

For the first 3 months of 1985—January through March—our deficit with Japan worsened. Yes, it is true our exports to Japan increased overall by nearly 10 percent. But, at the same time, our imports from Japan increased by nearly 30 percent as compared to the first quarter of 1984.

What is even more disconcerting is that in April 1985, for the first time ever, Japan showed a surplus in invisibles, such items as shipping expenditures, interest and dividend payments, and licensing fees. Some are saying the $98 million surplus in these invisibles is a drop in the bucket compared to Japan's $3.3 billion merchandise trade surplus, but it's only the beginning, I fear.

The big reason for the turnaround is a surge in foreign interest income that has built up as Japanese companies send profits overseas in search of high interest rates.

And that means the United States. Japanese investors' net purchases of foreign bonds, mainly United States Government obligations, doubled from 1982 to 1983, and doubled again last year to $26.8 billion.

I am happy to say that more Members of Congress are at long last recognizing the problem. Last week, we won three new converts to the battle. Senator LLOYD BENTSEN and Congressmen DAN ROSTENKOWSKI and DICK GEPHARDT joined our ranks when they, along with a host of others, introduced legislation that would tack a 25-percent surcharge on certain goods from countries that have excessively high trade surpluses with the United States.

This legislation is intended to show the world that the Congress is seriously concerned and ready to act if the countries don't take steps to reduce those trade surpluses with us.

I want to welcome these new supporters. I am delighted that they have finally seen the light and see the danger to this country. I only wonder what took them so long to realize that our future is up to us, that we cannot wait for others to act.

The reaction to the legislation filed by these three newcomers has been predictable. The administration has labeled them "protectionist." According to newspaper quotes, this bill has been called "protectionist legislation of the rankest kind," and has been described as "patently anticonsumer, undermines the international trading system, and invites retaliation that would cost jobs."

We have heard a lot in these past few months about Japan's efforts to open its markets to our goods. Well, anyone who has followed the trade issue knows that the Japanese Government leaders have made these kinds of statements before, but that nothing has changed except in a cosmetic way.

We are still waiting for access to the Japanese market and I think we'll have to wait a lot longer unless we give a couple of big sticks to our trade people. Maybe then the Japanese and other nations will take heed of our interest.

There is another facet to our trade problem and it's more serious because it's coming from inside the country. We have those at home who oppose any limits on imports. They claim to speak for the consumers and the right of consumers to choose from a variety of both domestic and foreign goods and to select on the basis of price. And they talk about retaliation by foreign governments who will impose restrictions on American goods if we set limits on their goods.

These enemies, traitors if you will, are the ones who label us as "protectionists," using the term in a negative sense as if we are the enemy.

They are the ones who don't see the real problem. They are the ones who fail to understand that to have consumers, you have to have people with spendable income, that you have to have people who are employed.

The enemies of protectionism say that we can retrain workers who have lost their jobs. I wonder what we will train them for. The high tech industry is beginning to feel the pinch from imports just as the steel, copper, textile, automobile, and shoe industries have, so the potential jobs in that field are going to be limited.

The service industries? Sure, there will be jobs there. But service industries can't stand alone. They too, depend on manufacturing jobs as well. This country cannot survive solely on service industries.

The antiprotectionists say that the reason American goods cannot compete is because the dollar is too high as compared to the currencies of other countries and that when the dollar drops, American goods will become more competitive abroad so our trade deficit will come down.

The value of the dollar is a factor, but even the Commerce Department says it will take a minimum of 1 year for the impact of a falling dollar to reflect itself in fewer imports, more exports and recovery for American industry.

And what happens in the meantime? Are we to stand idly by and watch more jobs go down the drain, watch more American men and women, who want to work, unable to get work, even if they participate in the many job-training programs available?

Isn't it more cost-productive for us to keep the jobs we have than to spend billions to train men and women who have lost their jobs because of imports for new and other jobs that don't exist?

Shortly after I was first elected, and after each subsequent election, Mr. Speaker, I have stood here and have sworn to "support and defend the Constitution of the United States against all enemies, foreign and domestic." That phrase is part of the congressional oath of office.

I take my responsibility seriously. My remarks may sound jingoistic, but, Mr. Speaker, we are trying to be reasonable.

None of us accused of being "protectionist" has ever said that no foreign goods should be sold in this country. All we are saying is that for certain industries that we have determined to be vital to our national welfare, we want

to set some reasonable limits on how much of the American market we should give away.

After all, it's not as if we are doing anything different than what the rest of the world is and has been doing for years. In fact, whether we like it or not and no matter how much we try, other nations do have barriers to American goods.

Oh, they may say that our manufacturers don't cater to their foreign audience, but that sounds like just so much verbiage to me. If they feel that's true, then just open up the market and let us compete.

Frankly, I think we get a lot of lip service from other nations when it comes to open markets or opening markets. We hear a lot of words, but there just isn't any action.

I, Mr. Speaker, am a protectionist. I am proud to be one. I fully believe in what John C. Calhoun told the Congress on December 12, 1811. He said that "protection and patriotism are reciprocal. This is the road that all great nations have trod."

I agree with him. I don't know why we are so afraid of it. I am especially surprised that this administration, which seems to have made a point of its patriotic flavor, has failed, like so many others, to act to protect American industry and American jobs. This administration has squandered any number of opportunities to act forcefully to "protect" this country.

We have voluntary agreements on steel that may work, only because we have the force of the administration behind them. If that fails, then the agreements will fail as well.

We have seen that forceful, straightforward action—such as quotas on imports—work. Just a few short years ago, when the specialty steel industry was suffering, a package which included quotas and tariffs was adopted to deal with the problems.

Well, we see the results. Firms handling the specialty steel items on which quotas were imposed, are seeing marked improvement, while those firms handling items on which tariffs were imposed are not getting any better.

We who have been elected to serve our Nation have a responsibility to that Nation and its people. We have taken a solemn oath to do that. And if someone wants to call me a "protectionist" because I believe I am fulfilling the duties I have sworn to do, then so be it.

I am a "protectionist" and proud of it.

I yield to my colleague from Wisconsin.

Mr. ROTH. I thank the gentleman for yielding, because I know he has worked long and hard on this matter. We appreciate his diligence. The issue that the gentleman is addressing is one that I think all the American people are very much concerned about, and rightly so. I think there is no one in the Congress more dedicated to this issue than the gentleman is. I would like to ask him, because of the budget impasse we are having, does he feel if we would make a bigger dent in cutting the budget deficit that we would have, if not an advantage, certainly more of what we call a level playingfield in our trade policy with Japan and especially the Pacific rim? Because it seems to me the strength of the dollar is what is giving us a great headache right now as far as our trade imbalance is concerned. Last year, we had a $123 billion trade imbalance, possibly $150 billion this year. This is cause for great concern. That is why I appreciate the energy that the gentleman is putting into this issue.

Mr. GAYDOS. I think that the gentleman makes a viable remark and his position is sound. I can go back to the Nixon administration when the dollar was left to float at that time. I think my friend recognized it because, as he indicated, he has a sincere personal interest in this very, very important problem. At that time, since the floating of the dollar internationally, we have had these foreign nationals and foreign countries, Japan and others, but particularly Japan has been the biggest violator. Every time the American dollar has started to drop and we get a reasonable comparison, they start buying it up, all with the specific intent to make sure that the American dollar stays high, because when it stays high imports are cheap. I think the gentleman lays out before the House in the official RECORD here one of the most sensitive and complicated problems. That is the strength of the American dollar, how it works along with the deficits that we have.

I agree with the gentleman. I think he takes a very studious and well-reasoned approach when he says that the deficit is so important. We have to attack it tooth and nail.

I join him on the floor. I know he is conservative in that area and I join him at any time to help reduce that deficit, because I think in turn the natural consequences would flow and the American dollar would go down to where it should be.

Mr. ROTH. If the gentleman will yield further, I would like to say that of the 435 Members of this body we have at least 2 that are thinking along the correct lines. Now all we have to do is get 433 more. That should not be too difficult, should it?

Mr. GAYDOS. I want to compliment the gentleman. It is self serving on his part and on my part. However, I think in these onerous times it is most important to be selfserving. I think we should do more of it.

As I said when I started my remarks today on the special orders, I unabashedly said that I admit that I am a protectionist. At one time that was bad.

So I join my colleague in the selfserving declaration that at least two of us know what we are doing. I hope that we can attract others and their support.

I am very happy to say that more Members of Congress joined us in recognizing the problems.

□ 1900

Mr. ROTH. I appreciate the gentleman for yielding further.

Mr. Speaker, now we are citing ancient history, but I think you make a good point. As the gentleman knows, the gentleman is a very powerful Member of this body. Could you not prevail on TIP O'NEILL and Budget Committee Chairman GRAY to arrive at an agreement with Members of the Senate so that we could have a balanced budget and move forward. Then we would not have to go the route of protectionism; we would not have to take that avenue. I think if we did that, many of these problems would solve themselves.

Now the gentleman and I have an obligation; yes, but the gentleman with all the clout he has in this body, and with all the powers of persuasion you have, and as much leverage as you have over our Speaker, Mr. O'NEILL, and the budget chairman, it would seem to me that if you exerted a little pressure, friendly persuasion let us call it; why, with inside of a couple weeks, we would have a balanced budget, or be going in that direction.

Many of these problems would solve themselves and the gentleman and I would not have to be worried about protectionism, because you do not want protectionism, and neither do I. We realize we are going in that direction because of other problems, but it would seem to me a man with your clout could use another avenue to try to make some of these corrections.

Mr. GAYDOS. Let me respond to my good friend. I feel so good that the accolades extended to me: to have so much clout with the Speaker, and maybe Mr. ROSTENKOWSKI, and other places in this very complicated legislative body that we serve in.

If I had those powers, I would be like an Emerson. I would use those powers, with no hesitation, but unfortunately, as the situation exists, I am just one Member in the Democratic caucus. Yes, it is spoken of but probably has not been responded to because as it works in this democratic fashion, everybody has their problems; everybody takes their positions.

Should I have the power that has been attributed to me by my good friend, who I think is supportive in my position; I would exercise it, but I must, alas, in all sincerity respond to him: I do not have those powers, or I

would have done it 10 years ago, 20 years ago.

Mr. ROTH. Will the gentleman yield further?

Mr. GAYDOS. I yield to the gentleman.

Mr. ROTH. I think that humility is always a virtue, but I think the gentleman is selling himself short. I have seen the gentleman operate on this floor, and I do not believe that a man like you could not bring a lot of leverage to bear on Speaker O'NEILL and Chairman GRAY.

I think I have more confidence in you, and there are many Members of your side of the aisle, the majority side, who would follow you, and I think that is somewhat incumbent on you to take a harsher approach.

Mr. GAYDOS. Let me conclude by telling the gentleman that again, I would have no hesitation, and the record will show and substantiate that I have asked and I have pleaded to Members on both sides of the aisle, my case and my cause; I have tried to show statistics; spent many, many hours with my staff putting together facts, collecting the facts; overseas, locally, domestically, trying to formulate the problem, as such, and to show them in clear logic and based on the facts as they exist that they should be supporting me and the Steel caucus in our endeavor to at least effect a rational approach to this great dilemma we find ourselves in; and that is that this country is losing, if it has not already lost, the battle of international trade.

It is unfair to this country for anybody that has even half a smidgeon of understanding of the complicated international trade situation, for any of them, to say that we are not in danger; that it is not important to pass this legislation; that we can close our eyes and wear blinders and the problem will go away. That is not true

□ 1910

ETHIOPIA

The SPEAKER pro tempore (Mr. LAFALCE). Under a previous order of the House, the gentleman from Wisconsin [Mr. ROTH] is recognized for 60 minutes.

GENERAL LEAVE

Mr. ROTH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ROTH. Mr. Speaker, we had an adage when I was a student at the University of Wisconsin in Madison, "Let the people know the truth and all will be well."

This evening I wish I would not have to take this special order, but I think it is imperative that the people hear both sides of the story as to what is happening in Ethiopia.

All of us are saddened by the 7 to 8 million people that are dying of starvation in Ethiopia. The famine in Africa is touching all of us, and the real tragedy is that it could have been averted.

The Economist, July 30, 1985, a publication we all find instructive, said this: "Famine is unlike other disaster. Earthquakes and floods, which strike suddenly, need emergency assistance. Famine, which can be seen coming a long way off, should not. It signals its appearance with unmistakable clarity. At first, food prices rise. Then, livestock farmers begin to sell their herds first expendable sheep and goats, then more important and expensive cattle. Meat prices fall. Then whole villages begin to move in search of food."

I again take this time in a special order to speak about the tragedy in Ethiopia because I think it is important that we address this issue forthrightly, honestly, and candidly.

This tragedy had been brought on by drought, yes; but it has also been brought on by political failures.

What are the causes of this tragedy? The drought is one reason, but it is only one factor. There is a holocaust taking place in Ethiopia today because of Government actions—forced resettlements and a deliberate policy of forced starvation. Already 400,000 people have been forcefully resettled from the northern part of Ethiopia to the southern part. The Government intends to "resettle" another million people by the end of this year. The No. 1 priority of the Ethiopian Government is not to feed the starving but to resettle its people—at gunpoint if necessary. And this has become very evident.

Life did an article that is heartrending, and I encourage Americans who are interested in what is taking place in Ethiopia to read the May 1985 issue of Life. It is called "Cry, the Pitiless Land: Ethiopia's Ruthless Regime Uses Famine As a Cruel Weapon." It tells us of the horror stories that are taking place in that unfortunate country.

We have some 7 to 8 million people starving, but we also have some 60,000 tons of food rotting on one of the docks in Ethiopia because the transportation that is supposed to take the food to the various parts of Ethiopia is being used to forcibly resettle Ethiopians from northern areas that are not favorable to the Government to the southern part which the Government controls.

□ 1920

How does this happen? The Ethiopian Government uses the feeding camps to entice people from the hills. Then they round up the men who have come for food for their families, leaving women, children, the sick, and the elderly behind to fend for themselves. Why are they doing this? It is to depopulate the areas that are presently held by rebel groups.

These so-called resettled persons—transported some 400 to 600 miles to the southern part of the country—are taken from the hill country to the low country, and are extremely susceptible to diseases. So what happens is that many of the people there die because of exposure to diseases, especially cholera.

The Ethiopian Government has undertaken little or no planning in this resettlement. Many times when they come to the southern part of the country there are no plows, no seeds, and it is causing untold hardships.

The United States has donated over 2 million tons of food since this tragedy began. The European countries have donated some 1.3 million tons of food. We want to help, but we have to have the cooperation of the Ethiopian Government or at least ask the Government to get out of the way. In March, some of our people from the State Department met with the members of the Mengistu government, the Ethiopian Government, and we asked them to at least quit interferring as we try to get this food not only to certain sections of the country, but to all sections of the country. And it is not an easy job because the infrastructure is not the best, to say the least, in Ethiopia. So it takes a great deal of effort.

On April 28, the Mengistu government gave us their answer, because on that day, they came into a feeding center at Ibnet where we had some 60,000 people. In one morning, they dispersed all 60,000 people—burning the camp to the ground. Thirty thousand are still unaccounted for, and many were killed that day.

The United States donated tents for some 20,000 Ethiopians and what was Chairman Mengistu's response? His army came by, took the tents, and of course left the people without shelter.

The 10th anniversary of the Government. While millions were starving, the Government spent some $200 million on the 10th anniversary celebration of the Marxist-Leninist regime of Mengistu coming to power. For that celebration, some 480,000 bottles of scotch were purchased for the ruling elite.

What are some other examples of Mengistu's priorities? Some $35 million was recently spent on color television sets for the ruling elite, while millions are starving. While the Mengistu government is a satellite of the Soviet Union, the Soviet Union has only given 3,500 tons of rice, and the Ethiopians do not eat rice. So we see that

the Soviets again are not helping a client state, but only using them.

What are the priorities of the Soviet Union? They quite frankly are making out like bandits. They have donated 300 trucks—used not to distribute food but to forcibly resettle its people. But with each truck comes three drivers. And each driver is paid a hefty per diem. While at the same time on our side, as we donate food and ship it to Ethiopia, for every ton of food we ship, we have to pay $12.60 for port entry fees. Money that is used to pay for the Soviet drivers.

I think that it will be to our everlasting credit that not only we in this country, but the entire West, is concerned and our heart goes out to the men, women, and children who are dying of starvation in Ethiopia. Because no matter what government is in power, we want to respond and to help the unfortunate people.

Now, the response from our side has been terrific. I was very happy today to meet Bob Geldof, who was responsible for the Live Aid Rock Concert and raised some $70 million. I think it shows that people in the West are concerned, but I think it also makes it incumbent on us to see that the aid that we have donated goes to the people that we want to help.

As I have mentioned, since December, we have donated 400,000 tons of grains and food, but it is going to be of little avail if the people of Ethiopia do not receive this aid. What kind of a government are we dealing with in Ethiopia? One would say how is it possible that the Ethiopian Government will stand in the way? Let me give you an example.

Last Thursday, the Wall Street Journal had, I thought, a very good article that talks about new leaders in Africa and trying to right the wrongs, and they talk about Chairman Mengistu, the present ruler of Ethiopia. I just want to quote one sentence. They said that:

> Ethiopia's current ruler, Mengistu, cut short a Cabinet debate by pulling a pistol from under the table and shooting an argumentative minister in the head.

So we can see that we are dealing with a ruler that is not always going to listen to reason. I think it is important for us to continue to help, but I think we have to have follow-through, so that we help the people and the money gets to the people we want to help. So that it is not diverted to others. That means that we have to speak out forcefully and frequently. We need to take action that rivets world attention to the true story behind Ethiopia's tragedy, and we need to take actions that call on the people of the world to throw the weight of world opinion on the side of the people of Ethiopia, and not on the side of the people of the Government that is exploiting the people.

I think there are a number of steps, a number of actions that are called for if we are going to be true to our conscience in the West. The first is that we should ask for an immediate cease-fire in Ethiopia. Because there is a revolution going on in Ethiopia, and if we are going to help the people, and we have asked this in many areas of the world, in many countries of the world, we have asked for a cease-fire, and I think we should ask for a cease-fire in this situation. Because certainly this is a tragedy that has gone beyond all reasonable bounds.

I think we should march on the Ethiopian Embassy here in Washington and throughout the world, and to let the Ethiopian Government know that we do care and that we want this aid to go to the Ethiopians, to the people that are starving, and that we are concerned about so much of the money being diverted to Government uses.

□ 1930

For example, the 10th anniversary, as we had mentioned before, $200 million being spent on an anniversary while millions of people are starving. I think that we should rise up in righteous anger to let the world know that we are concerned. I think letters to Congressmen are important, because when the Congressmen feel that the people back home are concerned, they are going to be concerned. I think it is important, as I said before, that we give and continue to give help to the Ethiopian people, but by the same token, I do not think that it is our obligation to feed the military regime of Chairman Mengistu. I think that we should give food to the people, but we should starve the dictatorship.

I think we should have hearings on Capitol Hill. We have not had any hearings, any real hearings, on what is taking place in Ethiopia. We have this disaster and this tragedy has been unfolding for months. We have not had hearings, in our Subcommittee on Africa, on Ethiopia, and I think it is high time that we have hearings. If the chairman of the subcommittee will not call hearings, then I would ask that we set up an ad hoc committee to hold hearings on the tragedy that is taking place in Ethiopia so the full story is known to the American people and to the people throughout the world.

I think the Live Aid organizers, and I am happy to say I think many of them, including Bob Geldof, are going to pursue this, are going to have real follow-through so that the food, the money that is donated, goes to the people who we want to help.

I think the United Nations also has an obligation to speak out. They have been totally silent on the holocaust that is taking place in Ethiopia. I think that this is inexcusable.

Here in Congress we rise up every day and we speak of human rights violations. There is an outcry when we feel that human rights have been violated, but we have had no outcry when it comes to the genocide that is taking place in Ethiopia. I think it is only right that we have an outcry of the human rights violations, especially in Ethiopia.

The next time we have Members come to the floor and talk about human rights violations, let us remember Ethiopia, and when we have our friends on the other side of the aisle talk about human rights violations, let us refer back to Ethiopia, because we cannot have a double standard in this Chamber. I think we have to have and can have only one standard, and that is to speak out for what is right and to look at the facts and the truth as we see it.

So I ask that people who are concerned contact their Congressmen; that they speak out; that they look at what is taking place, for example, as we had mentioned before, in the Ibnet Center, where we talked about the 60,000 being dispersed, where the shelter was deprived, where the tents that we had donated were denied by the Ethiopian Army, by Mengistu's army, that the equipment that we donated to dig wells has been taken from the people by the army. In Ethiopia water is very important. In order for the people to have unpolluted water, they have to have wells. We have donated the equipment, but the army has expropriated the equipment, as they have the tents.

So I think it is important for us to speak out. I have been told and have read in many of the newspapers, for example, that we have some 200 Ethiopians perish every day near the capital. I think if this would be happening in a country in Europe or in Central America there would be a huge outcry, but yet nothing is said, and I have to wonder why, and that is why I have asked for this special order. I think it is important that we focus on the truth and focus on all issues of this particular case and not only what is favorable to our liberal friends.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield?

Mr. ROTH. Yes; I am happy to yield to my friend, the gentleman from Georgia.

Mr. GINGRICH. I appreciate very much the gentleman from Wisconsin taking this special order, and I wanted to rise to join him in it and to mention two recent articles that I think are of some help in understanding what the problem is.

One is by George Ayittey, who is a native of Ghana, a black African who is an assistant professor of economics at Bloomsburg University in Pennsylvania, entitled "A Double Standard In

Black and White," which is from the Wall Street Journal of Monday, and the other is an article recently by Irving Kristol entitled "International Law and International Lies."

The two, I think, explain a little bit of the framework of the double standard which seems to afflict American liberals, but also to some extent, I think, the entire Western world. Ayittey, speaking as a black African, I think raises the point. He says, and I quote:

> There are 16 million oppressed blacks in South Africa. But 400 million people live in black Africa, a majority under despotic rule. Why so little attention to their plight?

He goes on to say:

> The U.N. does not condemn despotism in black Africa for fear of "interfering in the domestic affairs of sovereign nations." South Africa is not a sovereign nation, it might be argued—its government is illegitimate and unrepresentative of its people. But what black African government is legitimate and representative? Virulent condemnation of apartheid without parallel denunciations of tyranny in black African countries only serves to perpetuate the myth of black inferiority. Applying a lower standard of morality to black Africa betrays an insulting double standard against blacks.

The point Ayittey makes is that if there was any place else in the world this kind of vicious brutality was going on that we are living through in Ethiopia, if the Mengistu government existed anywhere in South America, particularly if it was pro-American, can you imagine the outrages, the picketing, the sitins on the campuses, the marches, the demonstrations, the television specials if a pro-American government were as vicious, as beastly, as uncaring as the Mengistu regime? But apparently as a pro-Soviet, Marxist dictatorship it gets a special standard, there is a blind eye cast. People may die, but it somehow does not matter. I think this goes back in part to a point that Irvin Kristol made in his essay on "International Law and International Lies." He ascribes it as being largely a function of Woodrow Wilson's vision of the world, what he called liberal internationalism, and I would like to quote about 3 paragraphs of it, because I think he really begins to frame the challenge to our generation. He says, and I quote:

> This new version of international law, and the liberal internationalist foreign policy associated with it, has played out its string. The senselessness of its assumptions becomes more apparent with every passing day. The American people see this—witness the popularity of any American ambassador to the U.N. who vigorously asserts American interests and values *against* that organization. Many higher officials in the State Department understand it well enough—but they are prisoners of what is by now a powerful conventional rhetoric, a set of intellectual habits that pervade the media, academia and public discourse on foreign affairs.
>
> The sad fact of the matter is that we do not have available, in the American political tradition, a mode of thinking about foreign policy that is appropriate to our condition today. The older nationalist-isolationism is clearly irrelevant to our condition as a great power that aims to shape a world congruent with our ideals, while confronting another world power, a militant world power, with the same aim but contradictory ideals. Theodore Roosevelt's combination of nationalism and internationalism seemed to offer promise of an interesting alternative, until it foundered on a foolish mimicry of European imperialism. Liberal internationalism, because it is incarnate in a host of international treaties and organizations, still predominates—but it is a theory both empty of substance and at war with reality.
>
> A new way of looking at and thinking about American foreign policy will eventually emerge. What one may call "reality therapy" will see to it. Meanwhile, however, we shall have to rely on our common sense and moral intuition to cope with the challenges of the near future.

The point I want to make, when you talk about commonsense and moral intuition and apply it to Ethiopia, it raises the most profoundly troubling questions. How can anyone have respect for a United Nations in which the current Ethiopian dictatorship is allowed to vote. How can anyone have respect for the whole fabric of the Organization of African States in which they pretend that the current Ethiopian Government makes any sense at all as a regime by any moral standards anywhere on this planet. How should the civilized world react to a government which, as I believe the gentleman has pointed out on several occasions, in the midst of desperate starvation imports champagne; in the midst of people dying in the streets, holds a huge, grotesque celebration, diverts its money away from saving the people and when others try to save the people, forces those who would be saviors to bribe the government in order that those trying to save the people can get the food to the starving.

□ 1940

The point I was simply asking the gentleman is that it seems to me that Ethiopia may symbolize for the next generation a Third Reich of the Third World, that it is as horrible an example in the modern African context as Nazi Germany was. And yet the question I would ask as a moral question is, What should we do? Is it the obligation of civilized nations to impose force?, Is it the obligation of civilized nations to impose everything short of force? What should we be saying now to Mengistu to be sure that people do not starve to death because of his political dictatorship?

I think it is a very profoundly disturbing question, and I want to thank the gentleman from Wisconsin for having the courage to raise an issue which, frankly, most of our friends on the left would like to just sort of shove under the rug and to talk about a situation that all too many of our friends in the news media would rather not think about.

Mr. ROTH. Mr. Speaker, I thank the gentleman for his contribution. As always, it is extremely insightful and very well done.

I think, as I look at it, that many of the people in this body and many of the people in the Western World are, as has been called by the gentleman, "ostriches." They stick their heads in the sand and hope the problem will go away. Well, the problem will not go away.

How often on the floor do we find Members asking, "How is it possible that we allowed the Holocaust to take place in the 1930's and 1940's?"

Well, take a look at what is happening in the world today. We have a holocaust taking place in Ethiopia today, and no one is saying a word. Take a look at the holocaust that took place only a few years ago in Cambodia involving 1 to 3 million Cambodians, and yet nobody gets up on the floor and speaks about human rights in Kampuchea.

Sometimes I feel that we do have a racial policy, that if it is something that is happening in the West or something that happens in North America, we speak out, but if other people are dying, we say nothing. May it be to the everlasting credit, however, of Kurt Janssen at the United Nations that he has, and I would like to inform the gentleman from Georgia that he has spoken out. He has spoken out very forcefully, but I will admit that he is the only one.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield again to me?

Mr. ROTH. I am happy to yield to the gentleman from Georgia.

Mr. GINGRICH. Mr. Speaker, I just want to focus on the gentleman's point about the holocaust in Ethiopia and make the case that if we were to talk explicitly about a black holocaust, a holocaust that was as horrible in its Ethiopian context as the attempt made by Hitler to exterminate not only European Jews but also to kill many other people, including Poles, French, Russians, Ukrainians, and others, the challenge that would then be made, I think, to our friends, particularly the "ostriches" on the left, is that in the case of the Third Reich it is clear it was not an accident, it was not bad weather, it was not that things were not going well, it was a deliberate, systematic, vicious effort by Adolph Hitler and his puppets to exterminate human beings for racial reasons. Now, the challenge, I think, is to raise the issue of Mengistu and his regime and ask, is this purely random behavior? Is it just bad luck? As the gentleman has said earlier, are 200 people a day dying near the capital just because of bad weather, or in fact is the Mengistu regime, a Marxist dictatorship, in terms of some of its provinces, deliberately blocking the supply

of food in order to insure that it wins a political guerrilla war by starving the rebels and starving their children and starving their families?

Is this a regime that is deliberately blocking the delivery of food so that it can extort more money from the West in order to pay both the Russians and its own military?

I think that is the question. If this is actually a deliberate—and I think in large part it clearly is—a deliberate series of actions on the part of the Mengistu government in Ethiopia, then I think we do face exactly the challenge the gentleman from Wisconsin raised, and that is for all those who ask in retrospect, what should we have done about the Holocaust in the late 1930's and early 1940's, we need to raise the question: We are living now in the beginning of an era of a black holocaust in Ethiopia, and what is it we should do beyond simply sending food, sending food to rot on the docks while we try to bribe the regime to help its own people?

Mr. Speaker, I thank the gentleman again for yielding.

Mr. ROTH. Mr. Speaker, I thank the gentleman again for his very constructive remarks.

I referred to the May issue of Life magazine before, and this is one of the periodicals I was reading that really, I think, we focused on the tragedy that is taking place. I just want to quote one short paragraph from this article, because when I read this, I said to myself, "Someone has to say something." Here is what the author says:

> The government denies both the reports and the eyewitness accounts of foreign relief workers who have seen hundreds herded at gunpoint into Soviet-built aircraft and trucks bound for resettlement areas 400 to 600 miles away. "They showed no mercy," says a Catholic nun who witnessed families in Tigre being separated, and pregnant and nursing women forced against their will into the waiting transport. In one case four famine victims who resisted were shot to death in the northern town of Adigrat in front of several hundred witnesses. Mengistu's officials dismiss these facts as "propaganda" spread by the CIA and other foreign agents to discredit the government. But dissidents and foreign observers charge that the famine has provided Mengistu with an excuse and a weapon more potent than the $3 to $4 billion he has in Soviet-supplied arms or Ethiopia's 270,000-man military force. He has denied ulterior political motives. "What we are doing is really praiseworthy," Mengistu told CBC-TV. "We have two courses of action open to us. Either we take these people and provide them all the opportunity to produce, or simply leave them there to their fate and perhaps to annihilate themselves."

I think when one sees the facts of what is taking place in Ethiopia today, the conclusion one comes to is that, yes, you want to help the people that really need help, these poor, starving people. But, by the same token, you have an obligation to see to it that the donated food and the donated help goes to those people.

Second, someone must speak out about what is taking place, because if we do not speak out and we know the facts, then are we, too, not partners in this genocide?

● Mr. DORNAN of California. Mr. Speaker, I rise to join in this special order with my good friend and colleague Mr. ROTH, and commend him for his efforts in bringing this to the House floor.

Mr. Speaker, Ethiopia is today probably the worst short-term tragedy the world has seen in recent years. In terms of loss of life it is catastrophic. In terms of a decent respect for the opinions of mankind, it is even worse.

I went to Ethiopia last month alone to see for myself the situation there. I was inspired by television documentaries and especially the ABC "20/20" broadcast of our distinguished colleague from New York, Mr. ACKERMAN, on his Valentines' Day trip to Ethiopia with a group of New York students.

I had the picture in my mind of Congressman ACKERMAN singing with the Ethiopian children, a moving moment when he and they chanted back and forth, and at the same time it struck me that people were—and are—dying in Ethiopia at the same rate as the victims of the Nazi Holocaust. Through the miracle of jet travel it only takes a day or a little more to get to Ethiopia. I went to see for myself how the Marxist government of Colonel Mengistu was handling this situation.

I went out to two of the camps, to Ibnat and another site not far from Addis Ababa. I have never seen more beautiful children in my life, or more filled with love. Five or six will hold your hand at the same time, rubbing their heads against you, looking up at you with their big eyes begging for help. I talked to some of the young American nurses there. One child had lost its whole upper lip. I asked the young Canadian nurse there if this was a birth deformity and before she could begin to answer me, her throat closed and she began to cry. When she regained her composure, she told us that the little child had come in with an infection in one corner of its mouth, the infection turned to gangrene, and before they could help it, it spread, and the child's whole upper lip fell off. Now only plastic surgery can help her, if she can ever receive such treatment.

In stark, almost obscene contrast, was life at a major chain hotel in Addis Ababa. It has the largest swimming pool I have ever seen at a hotel, along with several restaurants—open pit barbecues and even a pizzeria. No one at that hotel eats less than well. Yet, just a 20-minute plane ride away, 90 minutes by car, are people dying of starvation. Just a stone's throw away from this hotel with its abundance of excellent food, people are dying from prolonged starvation and malnutrition.

The market in Addis Ababa is well stocked with goods not available even in Moscow or Leningrad, basically black market. The Mengistu government seems quite willing to avert its eyes from the thriving, free enterprise black market.

One would think that with millions of Ethiopians hungry unto death, and the capital city full of food, that there would be a steady stream of desperate folk into the city. Not so; the armed troops of Colonel Mengistu prevent any such movements.

If that sounds draconian, then the other practice of the Mengistu regime should be clearly understood. The Communist government of Colonel Mengistu is actually seeking to profit from the catastrophic famine which has stricken Ethiopia. It seeks political advantage by using food relief, donated by other nations, as bait to lure resisting peoples of Eritrea and Tigre into camps where they can be forceably relocated. It uses gift food selectively and contrary to the intent of donors by feeding its military first, and paying its militia with food. Volunteers with different private voluntary groups report terrible accounts of forced resettlement, deliberate withholding of vaccinations, and threats of expulsion from the country if they do not accept the inhuman rules under which they must operate.

The mindset behind these draconian measures is perhaps more understandable when we recall that much of the starvation in Ethiopia is attributable to the doctrinaire agricultural policies imposed by the Mengistu regime. Drought is in the short run not the fault of policy planners. Famine is more clearly their responsibility. And Ethiopia's collectivized agriculture was crippled even before the rains failed. State farms and compulsory cooperatives have been Mengistu's style, with the predictable result that agriculture was doomed to fail. Despite massive investment in Soviet-inspired state farms, productivity plunged.

Why has no one really taken note of this? Is it because Mengistu and his henchmen are self-proclaimed Marxists? I propose an axiom of political behavior: when a gang of thugs takes over a government at gunpoint, executing a thousand of the opposition in the process, they have to establish their legitimacy in the eyes of the world. The simplest way to legitimize totalitarian rule is to label it Marxist. The Mengistu clique didn't even have to read Marx, Lenin, or Engels. They simply put up big posters in the town square. They never have to have an election again. They gain a certain respect, even from some Congressmen, not to mention from Western Europe-

ans. Instead of elections, they rule by the gun. They pick up their Mercedes-Benzes and start driving around.

These Marxist thugs certainly eat well—they are part of Ethiopia's nomenklatura—and they do not let the starvation gripping their countryside get in the way of their own comfort.

Just as the famine was increasing last fall, Mengistu's government celebrated the 10th anniversary of their revolution—at a cost reported by some to be upward of $250 million. The Ethiopians imported at that time such necessities as a color television system for Addis Ababa at a cost of $45 million. Other necessities included 500,000 bottles of Scotch, costing almost $2 million. As a part of their anniversary pageant they erected statues of Marx and Lenin costing around $10 million.

The economic as well as the moral bankruptcy of the Mengistu regime is so real and desperate that the colonel and his henchmen are actually charging $12.60 a ton for docking charges on gift food, as well as $165 a ton for transportation and handling. This official extortion will probably raise some $15 million for the Ethiopian Government this year. That will not even pay the interest on their indebtedness to the Soviet Union for weapons—perhaps as much as $4 billion. United States and Western European food assistance has been massive, with the United States by far the largest donor. At that, the absorptive capacity of the Ethiopian Government has been overtaken—tons of food are rotting at the docks as a result of inability to store it or to move it where it is needed.

It is ironic that the Italian language was once forced on the Ethiopian people. When Colonel Mengistu's henchmen put up their propaganda signs around the cities, the signs are in English. Presumably the Ethiopians are grateful to the English for having liberated them from the fascism of Mussolini. But English, the language of freedom, is the language they must use to explain to the world that they are Marxists, and therefore do not have to have elections, and can rule by the gun.

Those beautiful children in Ethiopia, and their mothers and fathers, must be fed. We will continue to feed them. But the Communist government in Addis Abbaba is not only morally bankrupt but criminally incompetent as well as criminal in its policies toward its own people. It must get out of the way, or forfeit any legitimacy it may retain.●

● Mr. SOLOMON. Mr. Speaker, may I begin by congratulating the gentleman from Wisconsin [Mr. ROTH] for his initiative and leadership in calling this special order and for being the chief sponsor of House Joint Resolution 324. Today, we will be setting forth before the American people the other side of the story concerning the Ethiopian famine—the side of the story the news media has been reluctant to tell.

You know, we spend a lot of time as Members of Congress passing resolutions about past calamities, including genocide. I sadly fear that 50 or 60 years from now our successors in this House will be compelled to pass a resolution commemorating the Ethiopian genocide of the 1980's. Let it never be said that those of us who lived during the 1980's were silent. And I hope that this special order today will serve to call public attention to the monstrous crimes committed by the Mengistu regime against the Ethiopian people.

Mr. Speaker, the political use of famine is a device that has been employed by Communist dictatorships as a way of consolidating the tyranny of the state. What better way to get rid of dissenters and opponents than by starving them to death? The methodology of planned famines was perfected by Joseph Stalin. Millions of Ukrainians in the 1920's and 1930's were the first victims of this perverted science. And now the proud people of Ethiopia, the guardians of a rich and ancient culture, have fallen prey to this evil.

I was part of a congressional delegation that visited Ethiopia in August 1983. The concerns I expressed at that time, particularly in the dissenting views I published in the trip report document, are still valid today. There is no substantive evidence that the Mengistu regime desires better relations with the United States or that the regime holds any other outlook on world affairs than that which is directed by the Kremlin.

I remain convinced, as I was in 1983, that our country has a moral responsibility to help alleviate the suffering in Ethiopia. The Ethiopian people are a dignified and beautiful people, and they desire the friendship of the American people. The assistance we give them must be channeled through the private relief agencies that are permitted to operate in Ethiopia. Only then can we be reasonably sure that the assistance we try to provide has a chance of reaching the people who really need it.

In the dissenting views that I filed after the trip in 1983, I also made this statement:

> The ruling clique in Addis Ababa has made its priority clear: To maintain itself in absolute power, even at the cost of $2 billion in arms purchases, thereby mortgaging the country's meager export earnings for many years to come and at an untold cost in human suffering as the Ethiopian people are forced to fend for themselves against a virulently repressive regime and the devastation wrought by drought.

That statement remains true today, although I must say that the most recent estimates are that the Mengistu regime has now purchased over $4 billion worth of arms from the Soviet Union—arms that are used to defend the regime against the Ethiopian people. Let me try to convey some sense of the dimensions of the problem.

When Colonel Mengistu and his henchmen seized power in Ethiopia in 1974, they inherited the responsibility for fighting against a guerrilla insurgency in the northern province of Eritrea. A rebellion in the Province of Tigray was in an incipient stage at the same time. Today, the Provinces of Eritrea and Tigray are in full rebellion. The Oromo people, who represent the largest single ethnic group in the country, have taken up armed resistance across the central provinces. All told, 12 of the 14 provinces in Ethiopia now have armed insurgencies fighting against the tyranny of the Mengistu regime.

The problems the regime faces in Eritrea provide a good illustration of how the Mengistu regime's brutality has fanned the fires of rebellion.

During the last years of Emperor Haile Selassie's reign in the early 1970's, the government had 25,000 regular troops stationed in Eritrea. Troop strength of that number was sufficient to maintain effective control over 80 to 85 percent of Eritrea's land area. Today, the Mengistu regime has 150,000 troops in Eritrea—and they manage to control no more than 15 percent of the province. In the last 10 years, the Mengistu regime has increased the size of the Ethiopian Armed Forces to the point that they are now the largest in Africa. Ethiopia now has a larger standing army than either Egypt or South Africa. And the supreme irony is that these armed forces are used principally to defend the regime against the people.

It must be noted that there is one segment of the Ethiopian population that is conspicuously absent from the relief camps and the other scenes that are reported by the media. Nor was this group anywhere in evidence at the places our delegation visited in 1983. I am speaking of able-bodied men and teen-aged boys. These are the people who are trying to escape the regime's policy of forced conscription, Ethiopians who do not want to be forced into taking up arms against their own countrymen. So they try to make good their escape by fleeing over the border or into secure areas of the country away from military control.

Think of this tragedy. The Mengistu regime, which governs one of the most impoverished countries on Earth, has spent $4 billion in arms in less than 10 years. When we consider that, even in a good year, Ethiopia earns no more than $400 million in export sales, primarily of coffee, we can see that the Mengistu regime has literally bankrupted the country in order to purchase arms from the Soviet Union.

51-059 O-86-7 (Pt. 15)

Last year, the national budget of Ethiopia allocated 45 percent of its available resources to the military. About 10 percent of the budget went into the celebrations in September that celebrated the establishment of a Communist Party in Ethiopia. A grand total of 3 percent of the budget was used for famine relief. Such are the priorities of Colonel Mengistu and his thugs.

In June 1984 the 10th ministerial meeting of the World Food Council of the United Nations was held in Addis Ababa. Ministers of Agriculture and other officials from around the world were in attendance. What a golden opportunity for the Mengistu regime, as host of the conference, to make Ethiopia's famine known to the world. Did those people who attended the conference have any opportunity to see what was happening in Ethiopia? Of course not. And the conference itself spent time discussing such topics as apartheid, disarmament, the new international economic order, and the import quota of Nicaraguan sugar in the United States. Small wonder that an increasing number of Americans, including many in this House, view the United Nations as an organization that is being consumed by its own irrelevance.

The Mengistu regime still had arms purchases to make and a $200 million political festival to celebrate the establishment of a Communist Party before it could reveal to the world the extent of the famine. This should come as no surprise. The Mengistu regime is drenched in blood—at least 30,000 Ethiopians—including 5,000 innocent children—have been massacred by the regime in pursuit of Colonel Mengistu's brave new world. Any inquiries by Amnesty International and other human rights organizations about conditions in Ethiopia are dismissed out of hand by the regime. Our delegation was given the same treatment in 1983 when we asked about human rights. Moreover, Colonel Mengistu took advantage of the occasion to revile our Government as terrorists, exporters of revolution, and imperialist aggressors.

It is interesting that he would mention revolution. Soviet communism is always interested in sponsoring revolution against everything except communism itself, which, ironically, is the most reactionary theory of political and social development ever devised. And Colonel Mengistu himself is a particularly striking example of a Communist tyrant who is afraid of the very people that he ostensibly liberated.

Would such a regime use famine as a political tool? It most certainly would. Especially because its own survival is at stake and the regime has already demonstrated that it isn't exactly squeamish about bloodshed.

Mr. Speaker, the famine in Ethiopia is part of a larger tragedy, a human catastrophe so devastating and overwhelming that the mind can scarcely even imagine it. And let us not be under any illusions, the tragedy of famine in Ethiopia will continue for a very long time to come. What we have thus far witnessed may only be the dress rehearsal. As Americans and as free men and women, we have a moral obligation to help feed the hungry and alleviate the suffering. We also have a moral obligation to address the larger issue, which in Ethiopia means addressing the problem of tyranny, the sadistic despotism that preys on innocent people and consigns them to a lifetime, however abbreviated it may be, of starvation, disease, and degradation.

The generosity of the American people and of free people everywhere cannot have any permanent effect in Ethiopia so long as the regime there pursues other priorities—namely, the preservation of its own power regardless of the cost in human suffering that the maintenance of such power entails.

Let us continue to aid the victims of the Mengistu regime's crimes, but let us also see that regime for what it truly is, speak the truth without hesitation, and seek to isolate that regime from the human family so long as its criminal behavior continues.●

Mr. ROTH. Mr. Speaker, I yield back the balance of my time.

CARGO PREFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska [Mr. BEREUTER] is recognized for 60 minutes.

Mr. BEREUTER. Mr. Speaker, it is indeed a coincidence that the special order I have taken is very much related in many ways to the subject just covered by the gentleman from Wisconsin [Mr. ROTH].

Since January of this year, there have been a number of controversial subjects which have occupied considerable time and attention in the Congress: the Federal deficit, the economic plight of American farmers and the 1985 farm bill, and the famine situation in Africa.

There is, however, a subject which certainly affects all three of these issues, and that is a subject called cargo preference.

Cargo preference is a 1954 law that requires one-half of all U.S. food aid shipments be transported on U.S.-flag vessels. On the surface, it seems like a patriotic and sensible gesture on the part of the U.S. Government to support the U.S. maritime fleet. In reality, however, cargo preference is a deceptive hoax that has guaranteed the U.S. maritime industry a captive shipping market and permitted absolutely flagrant price-gouging on the part of U.S. shippers. Cargo preference has in reality ripped off millions of dollars—in fact, it is hundreds of millions of dollars—from the Federal Government and the American taxpayer, stolen food from the mouths of thousands of starving and malnourished people, and caused the loss of hundreds of millions of dollars of commercial grain sales overseas and hurt American farmers.

As I was waiting for my time to arrive for a special order this evening, at 7:17 p.m. eastern daylight time, on the CBS Evening News, I heard Bill Moyers talk about the need to rise above the politics of famine.

□ 1950

As we saw those faces of starving Africans, adults, and children, graphically seared on our minds by so many accounts this year, by so many films, by so many TV programs, he also asked the final question, "If we are able, and more importantly, willing to snatch these children from the valley of the shadow of death."

I think it is time, therefore, that the American people and the Congress put a halt to that disgraceful government subsidy which benefits a handful of maritime shipping industries at the expense of hundreds of thousands of U.S. farmers and millions of hungry people around the world.

Cargo preference is certainly not a new issue. For over 30 years cargo preference has been an albatross hanging around the neck of agriculture. Now, however, it is also threatening thousands of people in Africa and other parts of the world who are faced with starvation.

As food aid shipments to Africa have increased during this past year, so have the freight rates charged by U.S. maritime shippers to all food aid shipments. During 1985, approximately $109 million in cargo preference subsidies will be divided among fewer than 30 U.S. maritime shipping companies to haul Public Law 480, the Food for Peace Program, title I bulk grain shipments, and that is just one part of the Food for Peace Program and only one part of the subsidy, $109 million in extra differential transportation costs for the bulk grain elements alone.

If this was divided out, it would translate into approximately $85,000 in subsidy for each of the nearly 1,300 merchant manning those 22 U.S. bulk carrier ships. It is not to say they receive it. That is what it averages out.

More disturbing is the fact that U.S. maritime shippers absolutely are taking advantage of America's stepped up famine efforts for the drought ravaged continent of Africa. From August 1984 through April of this year, the U.S. Department of Agriculture shipped on bulk vessels 548,000 metric tons of U.S. commodities under title II

of the Food for Peace Program to Ethiopia, Kenya, Mauritania, Mozambique, and the Sudan.

U.S.-flag vessels have carried 336,500 metric tons of the title II commodities at an average cost of $95.92 per metric ton, while foreign-flag vessels carried 222,000 metric tons at only $40.97 per metric ton. You see the cost is over twice as much for the U.S. vessels.

The subsidy to the U.S. fleet averaged therefore $54.95 per ton and so far has totaled $18.5 million. That is just for this emergency aid program for those five countries.

Thus, in shipments to just five drought stricken African nations alone, the USDA has been forced to subsidize in differential transportation costs the merchant marine by amounts sufficient to donate to those same five nations enough wheat and enough soybean oil to give more than 470,000 people 1 pound of wheat and an ounce of soybean oil per day for every day of the year.

In fiscal year 1985 the Department of Agriculture expects to pay out $155 million in ocean freight differential to U.S.-flag shipping companies to ship half of the commodities exported under both title I and title II of the Food for Peace Program. This amount is what the U.S.-flag shipping firms will earn in excess of the rate charged by foreign vessels and it is enough money to buy in the United States and ship to the Sudan or Ethiopia an additional 815,000 metric tons of wheat to provide 1 pound of wheat per day for over 1 year to 4.9 million people. That is what is not being bought because of the differential in cost between foreign- and U.S.-flag shipping.

A recent article in the Philadelphia Inquirer, May 26 of this year, illustrates what this means in terms of famine relief when American-flag vessels are used to deliver U.S. food aid.

To quote from the Inquirer:

> Even the extra cost of carrying a single famine relief cargo aboard American ships can substract more than $1 million from the budget of the food relief program, one ship, over 41 million in differential.

For example, a foreign ship operator bid $30.30 a ton, or a total of $757,000 total cost to transport a cargo of sorghum from Houston, TX, to the Sudan this year. Instead, the American ship, *Spirit of Liberty*, made the trip charging $107 a ton for a total of $2.69 million—two million six hundred ninety thousand dollars. That amounts to an indirect subsidy of $1,930,000 from the U.S. famine relief funds for the American ship on one voyage, enough money to buy 14,296 tons of corn, with the potential for feeding 54,000 Africans for 1 year.

To cite further from the Philadelphia Inquirer:

> Over the last 17 months, a period when world shipping costs have been in decline, American ship operators have increased their fees to carry the emergency famine relief cargo by $6 million, enough money again to feed 170 million starving people in Africa for a full year. Those rate increases when added to the already extraordinary costs of using American ships have required the government to spend $34 million more in transportation of African food aid than would have been needed if foreign vessels had been used, an Inquirer review of shipping records indicates. If that money had not been diverted to American ship operators, it could have been used to purchase and transport enough corn to Africa to feed 960,000 starving Africans for a total year.

American ship owners and operators say that higher unloading fees and delays at African ports have increased their costs of carrying famine relief cargoes.

But rates charged by foreign vessels to carry relief cargoes between the United States and African ports have not climbed even though the foreign ship owners face the same problems.

And critics charge that American shippers have been able to increase their rates at a time when world shipping charges are in decline because they have a monopoly on a portion of the famine relief trade, and they are exactly right.

"I am unhappy to confirm that it is true," said a spokesman for the World Food Program in Rome, the United Nations agency that distributes American relief grain.

"I am unhappy to confirm that some American ship operators have increased their rates on certain routes to Africa."

U.S. law requires that at least one-half of all government sponsored cargoes be carried in American ships, a measure designed to assure a strong merchant marine for commercial and national security purposes, yet a Philadelphia Inquirer review of government ship records and cost data show that vessels supported by this cargo preference legislation frequently are of very limited national security value and are so commercially uncompetitive that rates charged by U.S. bulk cargo carriers generally are double world rates and frequently triple.

The higher American shipping charges have helped push the transportation budget for the emergency relief efforts of the Federal Food for Peace Program up from 30 percent of the total emergency relief budget in 1984 to a projected 41 percent of the 1985 budget. That is to say 41 percent of our emergency food costs go for shipping and a part of that is due to the excessive differential between American and foreign shipping.

"Staggering," said Stephen Kearns, a vice president of Daniel F. Young, Inc., a New York freight forwarder that books many relief cargoes, when asked about the increasing difference between U.S. and foreign rates. He said:

> I believe it is due mostly to the decrease in foreign rates, but some of the American rates have increased. American lines are aware that there is a cargo preference program which requires the use of American flag vessels when they fix their rates. There is no doubt about it.

Some critics say that the reason for mounting American ship costs in the famine relief trade can be found in this country, not Africa.

"We have seen the difference in U.S. and foreign flag shipping rates rising from $11 per ton—that is the difference—to $37 a ton in 1 year on a type of ship called a liner, that is a type of cargo vessel, said John Baize, a representative of the American Soybean Association. The association represents, of course, U.S. soybean producers who see themselves, rightly so, certainly the case, losing income from sales of that commodity because of the high shipping rates and the food that is not purchased for our Food for Peace and our Famine Relief programs."

□ 2000

Quoting again Mr. Baize, "I am trying to think of a different phrase than price gouging, but I cannot think of one," he said.

A little earlier we heard reference to the possibility, a very real possibility, unfortunately, of a black holocaust, and about policies that contribute towards that black holocaust. I hope my colleagues think about what is happening because of price gouging that is taking place by the U.S. maritime industry today and the food that is not being delivered. I think, I hope that every Member of this body concerned about starving people in Africa, and I assume that means every one of us, and I hope especially the Black Caucus thinks about what cargo preference is doing to emergency relief programs today.

Let us hope that it is not racially oriented. Let us give them the benefit of the doubt and simply say it is good old fashioned price gouging to an outrageous degree.

U.S. Lines has increased its rates to South Africa, where some relief cargos are shipped for other points in Africa from $62.50 per metric ton in 1984 to $120 per metric ton this year following the bankruptcy of a competitor and the surge of relief cargos, according to officials of the World Food Program.

Despite the rate increase, a U.S. Lines spokesman said that the company was not charging excessively high rates for relief cargos, and competition assured that could not happen. Well, that is not the case.

But Agriculture and State Department officials say that the competition often works the other way with many shippers chasing, that is to say those agencies looking to meet the 50-percent requirement, chasing a few American flag ships that are available

to meet the cargo preference requirements.

Now AID officials said "We are sweating blood this year finding American carriers." Most of the Nation's cargo preference bulk fleet is composed of tanker and dry bulk carriers. Our 1984 Congressional Budget Office review of militarily useful vessels reports "Large tankers and dry bulk carriers are among the least useful ship types for military support."

A large number of America's lines are container vessels, commercially useful, but the Budget Office study said "From a military standpoint, an old fashioned, break-bulk freighter, with its loading booms and cargo nets, is usually more useful than a commercially efficient modern container ship that depends upon special port facilities for loading and offloading."

Moreover, some of the American ships chartered under the Government cargo preference program are very old. Others are rated poorly.

For example, the three ships, the *Spirit of Liberty, Cove Trader,* and the *Golden Endeavor,* have been given a 1 rating, the least favorable by the Guide for Selection of Tankers, a respected publication used by the oil industry to rate the reliability of oil tankers. The best rating is 5.

The ship called the *Inger,* a World War II era tanker, was converted and enlarged in 1962 to carry bulk grain. This ship is of the same type and age as the *Marine Electric,* which sank in 1983 off the Virginia coast, killing 31 crew members. And it is a near relative to the old converted World War II troop ship, *Poet,* which sank in 1980 killing 34 crew members.

The *Inger, Spirit of Liberty, Golden Endeavor,* and *Cove Trader* carried famine cargos this year and last at costs that, combined, were $9.45 million above prevailing world rates, enough money to buy a pound of corn each day for 260,000 people for 1 year.

Coast Guard records show that the *Inger* reported difficulties in November 1984 "after explosion of main turbine and generator."

Reynolds Metal Co., the ship's owner, performed those repairs and did extensive work on the ship's rusted hull, and the *Inger* was cleared by the Coast Guard to carry grain to Kenya in February at a cost of $102 a ton, just short of triple the cost of a foreign bid of $34.75 a ton to carry the same cargo.

Now we have a recent controversy or uproar among farm interests and maritime interests over cargo preference. What is the cause of this recent controversy?

It really relates to a February 21 court decision by U.S. District Court Judge June Green, who held that the USDA-Blended Credit Program was also covered by cargo preference requirements. The Blended Credit Program was and I underline was, a multimillion dollar commercial export promotion program until that February court decision. In response to the decision, the Secretary of Agriculture suspended $500 million worth of grain sales rather than attempt to comply with the cargo preference requirements that were newly placed upon that Blended Credit Program. The cost of compliance alone would be approximately $50 million.

If nearly $700 million of something called the GSM-102 program is added, and it probably could be under the same logic June Green followed, but it was simply not a part of that suit, then we are talking, of course, about staggering costs. Thus, this problem or recent controversey was created by the maritime interests, not by the farm population, although they certainly have desperate conditions and might appropriately be looking at what cargo preference is costing them in the loss of sold food and grain products.

Cargo preference requirements have had an immediate impact for agriculture and for my farm constituents in Nebraska. As a result of the court decision, U.S. farmers have lost $500 million worth of grain sales to Egypt, Iraq, Morocco and Tunisia. Thus, what was once an effective export promotion program has, for the time being, been effectively gutted by this cargo preference decision.

Worse, it appears that these customers are now turning to other sources such as France and Canada for their grain purchases, and it appears that these markets may be permanently lost, or lost for a substantial period of time.

Now what are the maritime interests saying about cargo preference, and how much validity is there in what they are saying?

Well in a letter addressed to myself as a result of some of my concerns, I have heard the following kinds of comments:

They are saying that the court decision is not really an expansion of cargo preference. But they are wrong. It is. Cargo preference has never been applied to USDA's commercial export credit programs in the past. Even grain shipped under direct export subsidies some years ago was not subject to cargo preference.

No. 2, they are also saying an attack on cargo preference is an attack on the maritime industry which cannot benefit farmers. Well, that is not quite right either, of course. The court's cargo preference ruling certainly has hurt farmers. The USDA has been forced to suspend the Blended Credit Program because of it, and that is costing American farmers export sales. It is also costing, of course, a lot of food processors and transportation people within the United States itself. So rolling back that court decision certainly can help farmers.

No. 3, they will say and do say that blended credit could go on if only USDA would let it go on. After all, the Government could simply pick up the cargo preference tab.

Now let us be honest. The extra shipping costs from cargo preference will be passed on to either one, the overseas customer, in which case the blended credit will simply cease to be of interest to our customers since they will be able to buy cheaper elsewhere; or No. 2, the U.S. taxpayer. The cost of paying cargo preference costs for 1985 for the Blended Credit Program, and if the GSM-102 Program is added, that is a credit guarantee program which is threatened by the court ruling, it would come to nearly $700 million.

Given our present deficits, asking the American taxpayer to cough up an extra $700 million a year just to accommodate the whims of a Federal judge is neither defensible nor realistically achievable. This argument has no merit whatsoever.

No. 4, they say eliminating cargo preference will not increase America's farm exports. Again they are wrong. Blended credit was a $500 million program in fiscal year 1984. If cargo preference applies, it will be a zero dollar program because the added shipping costs will make its credit terms unattractive. Preserving this and other export programs from cargo preference, then, certainly will allow the United States to export more farm products. That becomes even more clear when you look at the $5 billion GSM-102 Program, a credit guarantee program, whose freedom from cargo preference the court ruling put in jeopardy.

No. 5, the supporters of cargo preference are also saying that their maritime subsidies are good for national security. Well if they are, why is the cost being budgeted to the U.S. Agriculture Department? The last time I looked, we had a Defense Department to guard our national security and a Transportation Department to look after the maritime industry and other transportation-related industries. But for some reason, the cargo preference advocates prefer to keep the cost of their program hidden in the USDA budget.

□ 2010

Finally, some maritime advocates urge that we not promote one segment of the economy by undermining another. I heartily agree. But that is just what an expansion of cargo preference would do. It would reduce agricultural exports and food assistance to Africa, simply to benefit the maritime industry, simply to accommodate not only

their interests but extraordinary price gouging that is going on today.

Mr. Speaker, the General Accounting Office completed a report on Public Law 480 Commodity Program and the transportation costs related thereto in June of this year. At a later time this week I expect to make the recommendations of the GAO known to my colleagues in the responses from DOT and USDA to those recommendations.

Furthermore, I would hope to cover some of the impact of the political action contributions of maritime firms and maritime unions on the willingness and ability of this body to face up to the price gouging and to the obsolete subsidies that the Washington Post in its editorial referred to just yesterday, a kind of massive array of subsidies that are obsolete, that could be addressed in better fashion at best, that have been the subject of recent extensive series in the Philadelphia Inquirer and the Washington Post to name only two national publications which have focused on this extraordinary, expensive, egregious subsidy program that we have today. I will be taking, as I said, my comments on these and other subjects later this week.

Mr. BEREUTER. Mr. Speaker, I yield back the balance of my time.

STARVATION IN ETHIOPIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. RITTER] is recognized for 60 minutes.

Mr. RITTER. Mr. Speaker, earlier this evening a number of my colleagues took to the floor to describe the situation in Ethiopia and to bring to light perhaps a different story on why Ethiopia is starving. What are some of the factors behind starvation in Ethiopia that perhaps have not been brought as fully to light as they should be?

Millions of people, perhaps as many as a billion-plus people recently witnessed a concert called "Live Aid." This concert was put on by a man named Bob Geldof and some of the leading rock and pop performers of our era.

I guess, I believe that that concert satisfied a need. It satisfied a need to provide financial support for food aid to starving millions in Ethiopia.

I would have preferred in addition to the consciousness-raising brought about by that concert about the problem of hunger and starvation in Ethiopia and in Africa in general, I would have hoped that in the course of this televised spectacular the subject of what was going on in Ethiopia would have been more fully addressed.

The moral suasion, the power of that audience was phenomenal. Had that audience access to some of the facts that my colleague from Wisconsin, Congressman ROTH, and other colleagues had brought earlier this evening, I believe that that would have had tremendous impact on the Government of Ethiopia.

When a billion people understand what a particular government is doing against its own people and how a particular government is aiding and abetting in the starvation of its people, there exists a tremendous moral force. Hopefully, Mr. Geldof and his colleagues can take this message into Ethiopia when they are on the scene to monitor the delivery of the food to those who need it inside Ethiopia.

Why is Ethiopia starving today? Is it solely because of a drought that is sweeping Africa? Is it even primarily because of a drought that is sweeping Africa?

Well, there have been droughts before but never has the calamity resulted that is as intense and as exacerbated as the calamity that has resulted from this drought. Unfortunately Ethiopia is starving because of natural causes and because of man-made causes. I would like to quote from an article in the May 1985 Reader's Digest. It says:

WHY ETHIOPIA IS STARVING

I. ANATOMY OF A FAMINE

Like the rest of sub-Saharan Africa, Ethiopia has suffered droughts before. It was struggling through a three-year drought in the northern provinces when, in 1974, its 2,000-year-old monarchy disintegrated. Out of a bloody struggle for power emerged an artillery colonel, Mengistu Haile Mariam, who is now the Soviet-backed dictator of Ethiopia.

Since taking power, and consolidating it with a machine-gun bloodbath in 1977-78, Mengistu has infected Ethiopia with the most virulent strain of socialist "planning" that plagues much of Africa. In 1962, the continent fed itself. But over the next 20 years, as proliferating Marxist regimes imposed "scientific socialism" on agriculture, Africa gained the grotesque distinction of being the only region on earth where per-capita food production consistently declined. Today, although it holds only 15 percent of the underdeveloped world's population, Africa receives *60 percent* of world food aid.

Agriculture expert D. Gale Johnson, professor of economics at the University of Chicago, calls this plummet in African food production "shocking." Says Johnson: "The decline is due not to a lack of resources, but primarily to political factors resulting in the exploitation of farmers."

Ethiopia stands as a particularly exquisite example of this failure. To be sure, drought has affected much of east Africa for the past three years. But this drought translated into agonizing famine only when combined with the egregious doctrinaire incompetence of Ethiopia's Marxist rulers.

In a recent editorial, June 15 in the Washington Post, I would like to take a quote from their comment on this famine.

First, I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Speaker, I thank my friend from Pennsylvania for yielding. I want to compliment him for speaking out. I think, as he has mentioned often before, his conscience urges him to speak out and let the people know what is taking place. I want the gentleman to know that I had a chance to talk to Bob Geldof this morning and he is concerned about this aid and food getting to all the people of Ethiopia. I think that it is very reassuring. It was very reassuring for me to hear him say that because the people who donated the money, the people who are helping in the cause I think ought to know that he is concerned and he is going to follow through.

I think getting food and money to Ethiopia is only half a step; we have to go the full step, we have to make sure that it gets to the people who truly need the help.

□ 2020

Mr. RITTER. Indeed, that is a very important point, and I am gratified that Mr. Geldorf is aware of this situation; that food could be delivered in far greater volumes, only to rot on the docks and not be delivered to those places that need the food the most.

I think the gentleman is correct; it is the two halves of the step forward, getting the food and then getting it delivered.

I think there is another step, though, and I hope Mr. Geldorf and people around the world who watched the Live Aid concert would be aware of that, and that is, it is not possible for Ethiopian agriculture, the way it is set up; along ideological, Marxist lines, collectivized on the Soviet model.

It is not possible for Ethiopian agriculture to feed the Ethiopian people. The real tragedy is, that with the coming of rains and with the coming of changed conditions in the meteorology of the region, the Ethiopian people will be consigned to further famines unless they deal with the rehabilitation of their agriculture.

As long as the state controls what farmers plant and how much seed they can have and how much they must sell to the Government and to the army and it controls the distribution of food, they will fail.

The greater tragedy may be that out of this experience that the world has had with the Ethiopian famine that the message of what needs to be done in the future to avoid recurrence of this famine does not get out to the people of the world, and therefore the pressure is not on the Ethiopian Government to change.

The Soviet system of agriculture has not worked in Ethiopia, but that is nothing new. It has not worked in any of the Marxist economies which have adopted that system of agriculture

from the East bloc to Southeast Asia to Cuba; it is a failure.

The horror is that perhaps the people of the world do not know about this failure, and that while providing immediate assistance to take care of the problem at the moment, the long-range problem will continue to fester with the Ethiopian people being the tragic, tragic victims.

Let me return to the comments from the Washington Post editorial entitled "Free Ethiopia's Farmers". They say:

For years, especially in the north, both the Ethiopian armed forces and their assorted challengers have ravaged the countryside, either forcibly recruiting peasants to take part in military campaigns or treating them and their fields as the enemy. Meanwhile, the government by enforced collectivization, price manipulation and other administrative means destroyed the country's agriculture.

The use of food as a weapon, as a political weapon, is not new. Some 50 years ago—and we recently commemorated in this House and around the world—an event not well known to most of the people of this world, and that is the great famine that occurred in the Ukraine in the early 1930's.

There, there was a conflict of collectivizing Ukraine under Soviet domination. Some of the farmers in Ukraine resisted collectivization. The Soviet Union cordoned off this vast region, population today of approximately 50-plus million people; cordoned off this region and proceeded to keep all food supplies from coming in, and to ship all food supplies out.

The combination of this enforced famine was the death of some 7 million people. In a 2-year period, more people were killed by the forcible use of famine and the use of food as a political weapon, that 2 years, than the Jews in 5 years in Hitler's concentration camps.

So, my colleagues and to the people that we are speaking with tonight, do not underestimate the power of the food weapon and the power of the Ethiopian Government to use this food weapon as it sees fit to enforce its dominance over those who would resist marxism and communism in Ethiopia.

We are talking about millions of people in the northern provinces, particularly in Eritrea and Tigre; these millions are on the verge of starvation, and there are many articles that have brought this sorry fact to the fore.

The Deputy Commissioner for Food Relief at the United Nations is very distinctly aware of the cynicism and the use of food as a weapon against the resisting people of Ethiopia by the Mengistu government.

There is this question that was raised earlier which I would just like to refer to once again. It is the question of a double standard.

We have heard a great deal about South Africa in this term in Congress, and well we should. The Subcommittee on Africa has held five hearings on the situation in South Africa, and has produced four resolutions.

The subcommittee chairman has made the comment that, and I paraphrase this, made the comment that:

The Ethiopian situation has concerned this Congress over the last several years as no other situation in Africa.

Well, I would respectfully request, how is it that the Subcommittee on Africa has not held hearings on Ethiopia? Where are the hearings on the famine and the response of the Ethiopian Government to the famine?

□ 2030

Why has not this Congress looked beyond the provision of immediate aid in terms of food supply to the root causes of what could contain this famine indefinitely? I think the American people should write to their congressional representatives and ask them to ask the Subcommittee on Africa to please open up this situation to the light of debate so that perhaps we can have some influence on the future of the potential for Ethiopia to feed itself or to begin feeding itself.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. RITTER. I yield to my colleague, the gentleman from Wisconsin.

Mr. ROTH. I thank my friend from Pennsylvania for yielding, because I would like to underscore what he has mentioned about the people of this country I think have an obligation, too, to speak out and to contact their Congressmen. I have sent a note to a number of Congressmen to join us on the floor, and one of the Congressman is the chairman of the subcommittee dealing with Africa. And here is what the gentleman said on the floor. He said: "Let me say, first of all, that there is no issue that has commanded greater attention to the Subcommittee on Africa and Foreign Affairs Committee over the past couple of years than the subject of starvation in Ethiopia and, more broadly, of course, the famine throughout the breadth of Africa."

Now, I serve on the Foreign Affairs Committee, and that is just not so. In truth, the last time the Africa Subcommittee held a hearing on Ethiopia was in August 1984, at the instigation of the Human Rights Subcommittee. This was the only hearing on Ethiopia during the entire 98th Congress. The hearing focused on the entire Horn of Africa, principally, Uganda.

Mr. RITTER. Has there been a hearing yet in the 99th Congress on this subject of the forced resettlements and deliberate starvation policies in Ethiopia?

Mr. ROTH. No, no, there has not. That is precisely why I asked the chairman of the subcommittee to join us this evening in this special order.

Mr. RITTER. Does this amount to some shyness on behalf of our Members of Congress to criticize the system and the government in Ethiopia?

Mr. ROTH. Well, maybe it is a reflection that you and myself and others have not spoken out forcefully enough. We have spoken out. For example, in the Africa Subcommittee we have held five hearings on South Africa, and rightly so, and we passed four resolutions on South Africa, rightly so, during the 98th Congress. But nothing as it relates to Ethiopia. And when you talk about a double standard, I think that is evident.

When I had an amendment on Ethiopia, one of the Members on the floor asked me not to introduce the amendment because the Ethiopian Government was so cruel and it was difficult to surmise what the Ethiopian Government would do to its own people if we spoke out. It reminded me of something that Eric Hoffer wrote, a philosopher I know the gentleman from Pennsylvania has often quoted and has read. Eric Hoffer said that people never rebel or speak out against the cruelty of a government, only against a weak government. And he has gone through history and has cited when there have been revolutions it has never been against an evil government, only against a government that has become weak. And I hope that we would not be so timid in this body—you, myself, others—and be intimidated from speaking out on this very important issue.

So I compliment the gentleman in the well for speaking out because this is something that has to be done.

Mr. RITTER. I would congratulate the gentleman from Wisconsin for his leadership on this issue. He is a distinguished Member of the House Foreign Affairs Committee. I think we can thank God that somebody in this Congress who is right at the core of the congressional action in this regard has taken the responsibility upon himself and to bring others like myself and many others into the debate, to call attention to what is going on. I think there is a double standard. I think if Ethiopia had a military junta which was basically capitalist and friendly to the United States of America, these kinds of inhuman transgressions, these egregious violations of basic human rights and dignity would be thrashed all over the floor of this House, as well it should. If this Government was a Latin American government that was friendly to the United States, I think we would have had demonstrations against this Government bordering on violent demonstrations, and perhaps that is the way it should be. But where are the demonstrations against the Ethiopian Government's inhumanity against their own people? Where are the demon-

strations against a failed Marxist system of agriculture imposed upon the people of Ethiopia by people who know less about agriculture than the Ethiopian Marxists?

I think the American people should be concerned about the deafening silence on the part of those who should know better to not only be concerned with bringing the immediate food aid into Ethiopia, but to try to right the structural political inherent wrongs that are going to make this famine continue on into the future.

I have a document here, which is translated from a language spoken in Ethiopia called Amharic, and I would like to just quote a little bit from this document. It is a document of the Provisional Military Government of Socialist Ethiopia, Ministry of Information and National Guidance. It is entitled, "The Anti-Revolutionary Nature of Religion," and it had on it a "top secret" classification.

Let me just mention a couple of actions to be taken in the campaign against Christian churches:

In several of the important churches and monasteries old and priceless altar and priestly vestments and other works of art are to be found. Their public display in church services and ceremonies is a calculated insult to the oppressed masses. Except the bare minimum needed to celebrate Mass all such items should be collected and be sent for safe-keeping to friendly countries or, where this is not feasible, destroyed.

That was item 3. I will just quote for you item 6:

Regular church goers should be identified by a network of informers and systematically discouraged from further attendance by a combination of the following measures: direct offer of monetary incentive, the threat of withdrawal of food ration permits, and jobs.

Let me quote item 10:

Priests, monks and other religious workers should be manipulated not only to be accommodative of the revolution but, where it is feasible, should be used to further the revolution's objective.

There is a connection between the oppression of freedom and religion and the oppression of the Ethopian people, whether it is political oppression or the oppression of the freedom of their farmers to produce food for their people. I think it is indicative, it is symbolic of the kind of government that we are dealing with in Ethiopa.

I will include in the RECORD at the end of my comments part I, the 12 actions to be taken in the campaign against Christian churches, and part II, actions contemplated against mosques.

The signature on the bottom of this document is not an individual. It simply says, "Down with Feudo-Bourgeois Order. Victory to the oppressed masses."

I would like once again to thank the gentleman from Wisconsin [Mr. ROTH] for putting this special order together and providing many of us with significant data resources to help in carrying out the special order. His leadership in this area is significant, and I am very pleased to have had an opportunity to take part in this special order.

I would hope that the American people who have had the opportunity to watch this special order tonight concerning the famine in Ethiopia would take the time to correspond with their Representatives and let those Representatives know that they are concerned about the situation in Ethiopia, they are concerned about the famine, they are also very concerned about putting an end to the famine by allowing the Ethiopia people to do what they need to do to feed themselves.

PART I. ACTIONS TO BE TAKEN IN THE CAMPAIGN AGAINST CHRISTIAN CHURCHES

1. The more important historical monasteries and churches should gradually be converted into museums from which the oppressed masses could draw valuable lessons. The list should notably include the monasteries and churches of Axum, Debra Damo, Lalibrella, Debre Libanos, Zuqualla and the principal monasteries in Gojam, Gondar, Wollo and important churches in Addis Ababa.

2. Several important collections of religious books exist in a number of churches and monasteries. Among them are to be found the Books of the Kings, the Book of Mirak, the Book of Music of Yared, Senksar, Tsome Digua, The Lives of the Saints, etc. For the most part these books support an ideology which made feudal exploitation possible. All such books should be confiscated.

3. In several of the important churches and monasteries old and priceless alter and priestly vestments and other works of art are to be found. Their public display in church services and ceremonies is a calculated insult to the oppressed masses. Except the bare minimum needed to celebrate Mass all such items should be collected and be sent for safe-keeping to friendly countries or, where this is not feasible, destroyed.

4. The present Patriarch of the Ethiopian Orthodox Church comes from the oppressed class. His educational background is limited. He can therefore be skillfully manipulated to become an unwitting instrument for the anti-religious compaign. He has already declared in one sermon that Christ himself had propagated socialism. He should be encouraged to elaborate and spread this theme. Priests and church workers who can be counted to spread the illusion of compatability between Christianity and Communism should be carefully selected and placed as close to the Patriarch as possible.

5. In addition to measures calculated at weakening the church's independent sources of income, steps should be taken to restrict the availability and then gradually remove from the market those materials, such as wax candles and raisins (used for the making of the sacramental wine) required in church services and rituals.

6. Regular church goers should be identified by a network of informers and systematically discouraged from further attendance by a combination of the following measures: direct offer of monetary incentive, the threat of withdrawal of food ration permits, and jobs.

7. A carefully orchestrated media campaign should be undertaken as a matter of priority. The propaganda line should emphasize the following: (a) that the world we live in is a world of concrete reality and material tasks and not of spirit as the deceptive backward-looking reactionaries would want us to believe, (b) that religion is always an obstacle to the liberation of oppressed people.

In order to deprive the churches of potential recruits for the clergy, especially the young ones from serving as deacons and lay helpers, a calculated effort should be made to detract such elements from pursuing a religious vocation by offering them attractive incentives in other careers.

8. The uprooting of the feudo-bourgois social and economic order has thrown the bourgois and the petit-bourgois classes into a state of fright. As if the churches would spare them the wrath of the working-class, these elements are flocking to them in great numbers. Religion has also fortified their spirit which was once thought to have been broken. This revival is fast becoming ground for counter-revolution.

It is therefore necessary to identify those individuals with strong religious attachment and target them for special treatment. (Translator's note: the Amharic word used literally means "hit them", which may also be taken as a euphemism for liquidation.)

9. One reason for the extraordinary hold of religion on the masses is that in their organized expressions they overawe them with rituals, mystery and piety. These curtains should be lifted from their eyes, and that the awe, respect and moral authority that the church and the clergy inspire should be methodically undermined. Several ploys could be used to that end. For example, women political cadres in the guise of nuns could be infiltrated into churches and monasteries with instructions to entrap priests and monks in sexually compromising situations or to frame-up scandals.

10. Priests, monks and other religious workers should be manipulated not only to be accommodative of the revolution but, where it is feasible, should be used to further the revolution's objective.

One way of doing that is to bring from friendly countries political cadres to pose as clergy from their respective churches in order to give Ethiopian priests and monks subtle indoctrination. Books and pamphlets in Amharic produced by the same sources could similarly be used to the same end. (Translator's note: the reference is to the Russian Orthodox and other Eastern Orthodox Churches in eastern European countries).

11. By nature the Ethiopian clergy is suspicious. The need for subtlety in disguising the final objective and the tactical targets of the anti-religious campaign cannot be overemphasized.

12. The effort already underway for creating dissension and divisions among the monks in the Ethiopian monastery of Jerusalem should be continued and intensified. With that in view, the number of agent-provocateurs infiltrating the ranks of the yearly pilgrims to the Holy Land should be increased.

PART II. ACTIONS CONTEMPLATED AGAINST MOSQUES

Potentially Islam is as much a danger to the revolution as Christianity. The growing Arab oil wealth has given it a new lease on life and renewed vigor. Even though Moslems on the whole are fewer in numbers

than other oppressed elements, Islam, like Christianity has always imposed a crushing blow on its oppressed followers. Moreover, no less than Christianity, Islam provides another banner under which the forces of reaction and counter-reaction are rallying today.

However, in the prosecution of the religious campaign certain realities should be recognized and tactical adjustment should accordingly be made. The revolution has come in today under increasing Imperialist conspiracy. It cannot now afford to create anxiety in certain quarters. It is thus recommended that the campaign against Islam should be postponed to another stage of the revolution when fear of antagonizing Moslems in radical Arab countries will no longer be a significant factor.

In the meantime, however, no effort should be spared in creating divisions between the two camps that are gathering under their respective banners.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HEFNER (at the request of Mr. WRIGHT), through August 2, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. RITTER, for 60 minutes, today.

(The following Members (at the request of Mr. GROTBERG) to revise and extend their remarks and include extraneous material:)

Mr. LATTA, for 30 minutes, today.

Mr. BEREUTER, for 60 minutes, today.

Mr. BEREUTER, for 60 minutes, on July 25.

Mr. KINDNESS, for 60 minutes, on July 30.

Mr. PORTER, for 10 minutes, on July 26.

Mr. PORTER, for 60 minutes, on July 30.

(The following Members (at the request of Mr. WEISS) to revise and extend their remarks and include extraneous material:)

Mr. ST GERMAIN, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GEPHARDT, for 60 minutes, on July 24.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. RAHALL, prior to the vote on the Howard amendments to H.R. 8, Water Quality Renewal Act of 1985, in the Committee of the Whole, today.

Mr. GILMAN, following remarks of Mr. HOWARD on the Howard amendments to H.R. 8 in the Committee of the Whole, today.

Mr. MOAKLEY, on the amendment offered by the gentleman from Massachusetts, [Mr. CONTE] in the Committee of the Whole, today.

(The following Members (at the request of Mr. GROTBERG) and to include extraneous matter:)

Mr. COURTER.
Mr. MORRISON of Washington.
Mr. BILIRAKIS.
Mr. CONTE.
Mr. MILLER of Ohio in three instances.
Mr. MYERS of Indiana.
Mr. BROOMFIELD.
Mr. GALLO.
Mr. BLILEY.
Mr. HYDE in two instances.
Mr. MARLENEE.
Mr. COUGHLIN.
Mr. CRANE in four instances.
Mr. LOWERY of California.
Mr. LAGOMARSINO.
Mr. KEMP.
Mr. BARTLETT.
Mr. BURTON of Indiana.
Mr. EMERSON in two instances.
Mr. HAMMERSCHMIDT in two instances.

(The following Members (at the request of Mr. WEISS) and to include extraneous matter:)

Mr. BARNES in two instances.
Mrs. LLOYD.
Mr. FAUNTROY in two instances.
Mr. FLORIO.
Mr. NOWAK.
Mr. VENTO.
Mr. BEILENSON.
Mr. LANTOS in two instances.
Mr. FUSTER.
Mr. MANTON.
Mr. TRAFICANT in two instances.
Ms. OAKAR.
Mr. STALLINGS.
Mr. SHELBY.
Mr. MRAZEK.
Mr. FEIGHAN.
Mr. WEISS in two instances.
Mr. SCHUMER.
Mr. MARKEY.
Mr. LUKEN.
Mr. HUBBARD.
Mr. LOWRY of Washington in two instances.
Mr. FORD of Michigan.
Mr. HAWKINS.
Mr. STARK.
Mr. CONYERS.
Mr. SHARP.
Mr. EDWARDS of California.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 51. Joint resolution to designate the week beginning November 24, 1985, as "National Adoption Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 145. Joint resolution designating November 1985 as "National Diabetes Month"; to the Committee on Post Office and Civil Service.

S.J. Res. 147. Joint resolution to designate a calendar week in 1985 as "National Infection Control Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 160. Joint resolution designating the week beginning November 10, 1985, as "National Disabled Veterans Week"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 106. Joint resolution designating August 1985 as "Polish American Heritage Month."

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on July 19, 1985 present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 342. Joint resolution making an urgent supplemental appropriation for the fiscal year ending September 30, 1985, for the Department of Agriculture.

ADJOURNMENT

Mr. RITTER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 40 minutes p.m.) the House adjourned until tomorrow, Wednesday, July 24, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1725. A letter from the Secretary of Defense, transmitting a report of the Department's plans for the conduct of mobilization exercises, pursuant to Public Law 98-525; to the Committee on Armed Services.

1726. A letter from the Secretary of Education, transmitting a report on programs and activities assisted under the Women's Educational Equity Act of 1978, pursuant to 20 U.S.C. 3347(a); to the Committee on Education and Labor.

1727. A letter from the Secretary of Health and Human Services, transmitting the 11th annual report of the Department on the status of handicapped children in Head Start Programs, pursuant to Public Law 97-35, section 640(d); to the Committee on Education and Labor.

1728. A letter from the Director, Office of Legislative Affairs, Agency for International Development, transmitting notice of justification for an increase in the funding level of the proposed fiscal year 1985 program in Swaziland, pursuant to 22 U.S.C. 2413(b); to the Committee on Foreign Affairs.

1729. A letter from the Director, Office of Legislative Affairs, Agency for International Development, transmitting notice of justifi-

cation for an increase in the funding level of the proposed fiscal year 1985 program in Senegal, pursuant to 22 U.S.C. 2413(b); to the Committee on Foreign Affairs.

1730. A letter from the Acting Assistant Secretary of Health, Public Health Service, Department of Health and Human Services, transmitting notice of a new system of records, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1731. A letter from the Administrator, Health Care Financing Administration, Department of Health and Human Services, transmitting a report of a new system of records, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1732. A letter from the Chief, Insurance and Employee Benefits, Air Force Welfare Board, transmitting the annual report of the Air Force nonappropriated fund retirement plan for civilian employees, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

1733. A letter from the Secretary of Agriculture, transmitting notice of a revised system of records, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1734. A letter from the Secretary of Labor, transmitting notification that it is in the public interest to award a particular contract, pursuant to 41 U.S.C. 253(c)(7)(b); to the Committee on Government Operations.

1735. A letter from the Chairman, Administrative Conference of the United States, transmitting the annual report on fees and other expenses awarded each fiscal year under 5 U.S.C. 504, pursuant to 5 U.S.C. 504(e); to the Committee on the Judiciary.

1736. A letter from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting a report on the allocation among foreign nations of the total allowable level of foreign fishing permitted under the Fishery Conservation and Management Act of 1976, pursuant to 16 U.S.C. 1821(f); to the Committee on Merchant Marine and Fisheries.

1737. A letter from the Executive Secretary, Office of the Secretary of Defense, transmitting the report on Department of Defense procurement from small and other business firms for October 1984 through April 1985, pursuant to 15 U.S.C. 639(d); to the Committee on Small Business.

1738. A letter from the Secretary of Labor, transmitting a report on foreign industrial targeting, specifically, case studies on trade and employment effects, pursuant to Public Law 98-573, section 625 (98 Stat. 3042); to the Committee on Ways and Means.

1739. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to repeal that paragraph of the act of March 4, 1913, as amended, that designates 10 percent of all national forest receipts for the construction of roads and trails on the national forests; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

1740. A letter from the Under Secretary of Agriculture for International Affairs and Commodity Programs, transmitting the annual report on Public Law 480 activities for fiscal year 1984; jointly, to the Committees on Agriculture and Foreign Affairs.

1741. A letter from the Comptroller General of the United States, transmitting a report entitled: "Use of Unaudited Hospital Cost Data Resulted in Overstatement of Medicare's Prospective Payment System Rates"; jointly, to the Committees on Government Operations and Ways and Means.

1742. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation introducing the "Unified Budget Act of 1985"; jointly, to the Committees on Government Operations and Rules.

1743. A letter from the Comptroller General of the United States, transmitting a report entitled: "The Nuclear Regulatory Commission Should Report on Progress in Implementing Lessons Learned From the Three Mile Island Accident"; jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DERRICK: Committee on Rules. House Resolution 231. Resolution providing special budget procedures for fiscal year 1986 congressional budget process (Rept. No. 99-217). Referred to the House Calendar.

Mr. BONIOR: Committee on Rules. House Resolution 232. Resolution waiving certain points of order against H.R. 3037, a bill making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-218). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 233. Resolution waiving certain points of order against consideration of H.R. 3038, a bill making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1986, and for other purposes (Rept. No. 99-219). Referred to the House Calendar.

Mr. JONES of Tennessee: Committee on House Administration. House Resolution 229. Resolution dismissing the election contest against Ben Blaz (Rept. No. 99-220). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ADDABBO:

H.R. 3056. A bill to amend the Small Business Act to restrict the authority of the Small Business Administration to deny financial assistance to small business concerns solely because the primary business operations of such concerns relate to the communication of ideas; to the Committee on Small Business.

By Mr. CRANE (for himself, Mr. SILJANDER, Mr. KASICH, Mr. BARTON of Texas, Mr. RUDD, Mr. DORNAN of California, Mr. BLILEY, Mr. LIVINGSTON, and Mr. GROTBERG):

H.R. 3057. A bill to repeal the provisions of law under which the denial of nondiscriminatory treatment (most-favored-nation treatment) to nonmarket economy countries under title IV of the Trade Act of 1974 may be waived; to the Committee on Ways and Means.

By Mr. DUNCAN (by request):

H.R. 3058. A bill to provide for the recovery by the U.S. Customs Service of the cost of customs processing and for other purposes; to the Committee on Ways and Means.

By Mr. MORRISON of Washington (for himself, Mr. MADIGAN, Mr. EMERSON, Mrs. ROUKEMA, Mr. EVANS of Iowa, Mr. DICKS, Mrs. COLLINS, Mr. WORTLEY, Mr. CROCKETT, Mr. LELAND, Mr. WHITEHURST, Mr. MILLER of Washington, Mr. ROBERTS, Mr. GARCIA, Mr. GILMAN, Mr. FAZIO, Mr. ARMEY, Mr. WHITTAKER, Mrs. BURTON of California, Mr. BEREUTER, Mr. KOLTER, and Mr. BEDELL):

H.R. 3059. A bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for contributions of certain agricultural products to certain tax-exempt organizations; to the Committee on Ways and Means.

By Mr. PEASE:

H.R. 3060. A bill to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation; to the Committee on Foreign Affairs.

By Mr. PEPPER:

H.R. 3061. A bill to test a change in payment amounts for outpatient lens implantation procedures; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. RAHALL.

H.R. 3062. A bill to amend title XIX of the Social Security Act to require States to provide for payment for reservation of nursing home beds under the Medicaid Program; to the Committee on Energy and Commerce.

By Mr. SOLOMON:

H.R. 3063. A bill to amend the Federal Property and Administrative Services Act of 1949 to allow volunteer fire departments and emergency rescue squads to receive donations of Federal surplus personal property; to the Committee on Government Operations.

By Mr. TAUKE (for himself, Mr. HEFTEL of Hawaii, Mr. ROYBAL, Mr. REGULA, and Mr. SHUMWAY):

H.R. 3064. A bill to amend the Internal Revenue Code of 1954 to impose an excise tax of 16 cents an ounce on smokeless tobacco and to provide that the revenue from such tax shall be used to assist in financing the Medicaid Program under title XIX of the Social Security Act; to the Committee on Ways and Means.

By Mr. ROSTENKOWSKI:

H.J. Res. 343. Joint resolution to approve the "Compact of Free Association," and for other purposes; jointly, to the Committees on Interior and Insular Affairs, Foreign Affairs, and Ways and Means.

By Mr. UDALL (for himself, Mr. FASCELL, Mr. SEIBERLING, Mr. SOLARZ, Mr. JONES of North Carolina, Mr. ASPIN, Mr. YOUNG of Alaska, Mr. LENT, Mr. LAGOMARSINO, Mr. LEACH of Iowa, Mr. DE LUGO, Mr. DYMALLY, Mr. SUNIA, and Mr. RICHARDSON):

H.J. Res. 344. Joint resolution to approve the "Compact of Free Association," and for other purposes; jointly, to the Committees on Foreign Affairs, Interior and Insular Affairs, and Ways and Means.

By Mr. AKAKA (for himself, Mr. JEFFORDS, Mr. COELHO, Mr. LEACH of Iowa, Mr. MATSUI, Mrs. BURTON of California, Mr. ERDREICH, Mr. BROY-

HILL, Mr. FAZIO, and Mr. ST GERMAIN):

H.J. Res. 345. Joint resolution to designate March 1986 as "Music in Our Schools Month"; to the Committee on Post Office and Civil Service.

By Mr. ARMEY:

H.J. Res. 346. Joint resolution to amend the joint resolution designating Captive Nations Week to recognize the status of Russia as a captive nation, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. COUGHLIN (for himself, Mr. BORSKI, Mr. EDGAR, Mr. FOGLIETTA, and Mr. KOSTMAYER):

H.J. Res. 347. Joint resolution to designate November 18, 1985, as "Eugene Ormandy Appreciation Day"; to the Committee on Post Office and Civil Service.

By Mr. HALL of Ohio (for himself and Mr. KEMP):

H.J. Res. 348. Joint resolution to designate 1986 as the "Year of Thanksgiving"; to the Committee on Post Office and Civil Service.

By Mr. HUTTO:

H.J. Res. 349. Joint resolution to direct the Postmaster General to issue a commemorative stamp honoring the 75th anniversary of U.S. naval aviation; to the Committee on Post Office and Civil Service.

By Mr. FOLEY (for himself and Mr. LOTT):

H. Res. 230. Resolution providing that for the remainder of the 1st session of the 99th Congress there should be a substantially verbatim account of House proceedings in the CONGRESSIONAL RECORD which should be clearly distinguishable by different typeface from remarks not spoken but inserted under leave to extend; to the Committee on House Administration.

By Mr. CRANE (for himself, Mr. DWYER of New Jersey, Mr. BARTON of Texas, Mr. WORTLEY, Mr. LAGOMARSINO, Mr. BOULTER, Mr. SILJANDER, Mr. KASICH, Mr. RUDD, Mr. DORNAN of California, Mr. ARMEY, Mr. HYDE, Mr. BLILEY, Mr. LIVINGSTON, Mr. SCHULZE, Mr. GROTBERG, Mrs. BENTLEY, and Mr. DANNEMEYER):

H. Res. 234. Resolution disapproving the President's recommendation to extend certain waiver authority under the Trade Act of 1974 with respect to Romania; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

210. By the SPEAKER: Memorial of the Legislature of the State of Kentucky, relative to land mines in Central America; to the Committee on Foreign Affairs.

211. Also, memorial of the Legislature of the State of Delaware, relative to Social Security; to the Committee on Post Office and Civil Service.

212. Also, memorial of the Legislature of the State of Illinois, relative to the KILnGAS commercial module; to the Committee on Science and Technology.

213. Also, memorial of the Legislature of the State of Kentucky, relative to the GI bill; to the Committee on Veterans' Affairs.

214. Also, memorial of the Legislature of the State of Florida, relative to the Social Security Act; to the Committee on Ways and Means.

215. Also, memorial of the Legislature of the State of Texas, relative to oil; to the Committee on Ways and Means.

216. Also, memorial of the Legislature of the State of Texas, relative to health and welfare; jointly, to the Committees on Education and Labor and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1409

By Mr. UDALL:

—Page 71, after line 9, insert the following:

SEC. 819. LAND CONVEYANCE, DAVIS-MONTHAN AIR FORCE BASE, TUSCON, ARIZONA.

(a) AUTHORITY TO CONVEY.—Subject to subsection (b), the Secretary of the Air Force (hereinafter in this section referred to as the "Secretary") is authorized to convey to the city of Tuscon, Arizona (hereinafter in this section referred to as the "City") all right, title, and interest of the United States in and to approximately sixty one acres of real property adjacent to Golf Links/Craycroft Intersection, Davis-Monthan Air Force Base, Tucson, Arizona.

(b) CONSIDERATION.—(1) In consideration for the conveyance, the city shall extend the existing lease with the Air Force covering 4,348.81 acres of real property owned by the city at Davis-Monthan Air Force Base for an additional fifty years commencing in 2002 at the existing rental rate of $773 per year.

(2) The total value of the consideration received by the United States shall be at least equal to the fair market value of the real property conveyed under subsection (a), as determined by the Secretary.

(c) LEGAL DESCRIPTION OF LAND.—The exact acreage and legal descriptions of the real property to be conveyed under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of such surveys shall be borne by the city.

(d) CONDITION.—(1) The conveyance to the city under this section shall be subject to the condition that the real property to be conveyed shall be used for public park purposes or other purposes agreed upon by the Secretary and the city which are consistent with the primary mission of Davis-Monthan Air Force Base.

(2) If the real property is used for any purpose other than a purpose described in paragraph (1), title to the real property shall revert to the United States.

(e) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require such additional terms and conditions with respect to the conveyance made under this section as the Secretary considers appropriate to protect the interests of the United States.

H.R. 3011

By Mr. FRENZEL:

—On page 72, after line 7, insert the following new section:

SEC. . Notwithstanding any other provision of this Act, each amount appropriated by this Act not required to be appropriated by previously enacted law is hereby reduced by 1.7 percent.

H.R. 3036

By Mr. JACOBS:

—Page 31, line 1, strike out "$1,151,000" and insert in lieu thereof "$278,600".

H.R. 3038

By Mr. WORTLEY:

—Page 35, line 20, strike out "$516,160,000," and insert in lieu thereof "$524,060,000,".

EXTENSIONS OF REMARKS

THE DEATH OF AN AFGHANI FREEDOM FIGHTER

HON. WM. S. BROOMFIELD
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BROOMFIELD. Mr. Speaker, as the massive Russian war machine tightens the noose around Afghanistan, the outnumbered Afghani Freedom Fighters are put under increasing pressure. Among these lightly equipped brave fighters was a brave Afghani named Allah Berdi. His recent death in a remote mountain village is testimony to the bravery and toughness of the Afghani people who are determined to keep that country free. It is curious to note that Mr. Berdi's family had fled from the Soviet Union to Afghanistan when the Russians suppressed Islamic nationalism in southern Russia in the 1920's. I am certain that Mr. Berdi knew the family stories of how brutal their Soviet masters were when they set out to crush the ethnic groups in the Soviet Union.

As we sit back and enjoy the good life which this great and free country has given us, we should all pause and realize that at this very moment, a once independent country is being slowly absorbed into the Soviet empire.

Let us remember that at this very moment, there are freedom-loving men and women who are willingly laying down their lives in the struggle against communism. With these concerns in mind, I recommend the following New York Times article on the death of a Freedom Fighter to all of my colleagues in the House. By any standard, he is a hero.

[From the New York Times, July 14, 1985]

A Rebel Named 'God's Blessing' Dies

Balkhab, Afghanistan.—His name was Allah Berdi. Freely translated, it means "God's Blessing."

He was huddled over and shivering in a corner near the stove of a teahouse where a column of Afghan rebel fighters had stopped for lunch and a rest one day in late April.

The man, in his early 20's, had the smooth skin, long face and narrow eyes of a Central Asian. Now, his eyes were glazed and barely open, and he was apparently suffering from malaria.

A foreigner traveling with the rebel group gave him the four chloroquine tablets that a doctor in Pakistan, before the Afghan trip began, said should be given to anyone with obvious symptoms of malaria—fevers and chills.

In the next 10 days, Allah Berdi could be seen leaning back against a tree, sheltered behind a large rock on a steep slope, or sitting motionless among his group as they joked and cleaned their weapons.

Usually he could be found toward the center of the march. One day, the rebel commander at the rear of the convoy prodding stragglers forward saw Allah Berdi sitting under a tree, barely able to walk.

HE MOUNTS, THEN DISMOUNTS

He ordered someone to dismount from a horse so Allah Berdi could ride. Less than half an hour later, the young man had dismounted and was walking again, saying he was feeling much better.

On the morning of May 1, the rebels were in the village of Balkhab, in north central Afghanistan. Someone happened to dial a small radio to an English-language program. It was the Moscow radio. The announcer told of preparations for the May Day parade and of the Soviet Union's contributions to world peace. He spoke of peaceful coexistence and noninterference in the affairs of other nations.

The march began about 7 A.M. The advance unit had gone only a short distance when shots from back in Balkhab signaled a halt. Allah Berdi had died.

The column returned, the pack animals were unloaded, and the men scattered to the rooms where they had spent the previous night.

Allah Berdi's body was wrapped in a cloth and placed on a narrow wooden bier with two handles at each end and two at each side so that it could be shouldered by eight men. At about 9 A.M., there was a shuffling and tramping of feet through the bazaar that lines the main street of Balkhab. The body was carried to a mosque on a side street with the men walking quickly and silently behind in a small group, changing places frequently so that many could share in carrying the burden.

The mosque was wide but not deep, and most of the men had to stand outside on the steps. The priest intoned "Allah Akhbar," or "God is great," three times with short intervals in between.

BURIAL ON A ROCKY HILL

In less than a minute the bier was picked up again and hurried back through the bazaar, down a steep gully and up the other side to a bare rocky hill where the grave was still being dug.

The digging ended as the men sat watching, chatting quietly. The body was taken from the bier and the outer cloth removed. The body was lowered into the grave, and large flat stones were removed from forgotten graves strewn over the hillside and placed on top of the body. Smaller stones were filled in, and finally all was covered with a packing of mud.

The men now gathered around, taking turns shoveling earth into the grave or pushing the dirt in with their hands. Someone had brought a branch. Green cloth was tied to one end of the branch. The other end was put in the ground at the head of the grave and held upright by the packed earth.

As water was poured on the filled grave and it was stamped into a smooth mound, a priest intoned a long prayer. Finally stones were put at the head and feet and a string was tied lengthwise between them. It was about 10:30 A.M.

The men walked back to there rooms, talking, showing no emotion. They were told that the march would resume after lunch and the noon prayer.

FOREBEARS FLED SOVIET

The men were grouped according to the language they spoke and their village areas. Allah Berdi was with a group from a region of Balkh Province just across the Amu Darya River from Soviet Uzbekistan, near Soviet Turkmenistan. His unit leader, Lal Mohammed Khan, a tall, solemn man with long black chin whiskers, talked about Allah Berdi.

He said Allah Berdi's grandparents fled to Afghanistan from Turkmenistan when the Russians were suppressing Islamic nationalism in the 1920's. His parents were dead and so was his only brother.

About a year ago, the unit leader said, Allah Berdi was seized in one of the regular sweeps that the Russians make of rural areas to press men into the Afghan Army. Unwilling recruits are usually sent to a region where a different language is spoken, to make it more difficult for them to defect or leave the army.

Allah Berdi was sent far south to the besieged garrison at Samkani, in Paktia Province, only a few miles from the Pakistani border. After about six months, the rebel said, he managed to escape, taking with him two Kalashnikov rifles and a full-sized machine gun.

The local rebel fighters gave him the equivalent of $50 for the weapons and guided him to Pakistan. The real value of the weapons on the open market was about $5,000, the rebels said.

WANTED TO FIGHT RUSSIANS

"He wanted to be a mujahedeen," to fight with the forces opposing the Soviet-Afghan Government forces, said Lal Mohammad Khan. "He was happy when he was with us in our camp in Pakistan. He said he had no parents and no relatives except a cousin and we were his real relatives. He said he wanted to be with us and fight the Russians and the Communists."

Asked about the time Allah Berdi got off the horse, Lal Mohammed said: "He was ashamed. He said that was not the mujahedeen way. He said if he rode he would remain weak, and he wanted to be strong to fight."

His friends said Allah Berdi had not eaten for four days. The closest approximation to a doctor in Balkhab, the rebels said, was a man who had been sent to Iran for six months' training. The night before, he had given Allah Berdi a pain-killing injection.

Allah Berdi had stirred when the call came to resume the march. He even sat up, but fell back and died as the men set out.

At 12:30 P.M., the march resumed. None of the rebels looked across the gully to the distant mound on the hillside, where a limp green pennant marked the grave of the man known as God's Blessing.●

ROY J. WARD, DEDICATED CITIZEN

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BLILEY. Mr. Speaker, I would like to place into the CONGRESSIONAL RECORD a commendation for the great work which has been done by one of my constituents on behalf of handicapped citizens of this Nation. Mr. Roy J. Ward has, for the last 44 years, been an example of leadership and dedication which have enriched the lives of countless thousands through his work at the New York Lighthouse, Maryland School for the Blind, and in the State of Virginia.

His special contribution to Virginia's visually handicapped citizens for 26 years has been heartwarming and invaluable. His cane walking, home and yard navigation, and his techniques for using public transportation have been models of performance.

The fact that he has made these great contributions in spite of the fact that he is blind has been all the more an inspiration to the many people whose lives he has touched over the years.

It is with great personal pride that I thank Mr. Roy J. Ward on behalf of all Virginians for 26 years of caring and sharing his love and skills.

Best wishes for a retirement rich with personal satisfaction.●

D.C. BLACK MEN AND WOMEN IN BLUE CELEBRATE 50TH ANNIVERSARY

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FAUNTROY. Mr. Speaker, over the years, black men and women have served with distinction in the D.C. Police and Fire Departments.

On Saturday, July 13, 1985, active and retired firefighters and police officers constituting the "50th Anniversary Committee" will host a salute and celebration honoring D.C. black men and women in blue.

As part of the celebration, the history of the D.C. Police and Fire Departments will be reconstructed, with special attention being paid to the vital and important role black men and women have played.

Public safety is an essential element in any community. The protection of life and property against the hazards of fire and those with criminal designs is a major responsibility. In the District of Columbia, such responsibility carries additional and special burdens. Not only are the police and fire departments charged with protecting local residents, but they must also protect the many visitors and tourists from across the United States as well as the foreign dignitaries who visit or make their homes here. They also protect Federal installations and personnel here. They are indeed America's guardians.

For more than 50 years, black men and women have served as D.C. police and fire persons. With dedication, perserverance and unusual determination, they have overcome many obstacles and great odds to help fill the ranks, and in most recent years to lead the ranks of the men and women in blue.

Racial discrimination, hazardous duty, strict public scrutiny and all manner of exposure has not discouraged these men and women in their appointed task.

It is most appropriate therefore that we pause to honor and recognize their efforts.●

LIQUIDATING U.S. ASSETS

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BEILENSON. Mr. Speaker, I would like to call my colleagues' attention to some provocative and intriguing suggestions by my cousin Laurence Beilenson, a distinguished lawyer and historian, and Robert Poole, Jr., the president of the Reason Foundation, for cutting the Federal deficit. In the following article from the Wall Street Journal, Mr. Beilenson and Mr. Poole argue that the U.S. Government ought to consider liquidating some of its assets as one way to increase revenues without raising taxes. I hope that my colleagues will take the time to read these recommendations for dealing with the budget deficit crisis:

TIME TO THINK AGAIN ABOUT LIQUIDATING U.S. ASSETS

(By Laurence W. Beilenson and Robert W. Poole Jr.)

President Reagan supports a constitutional amendment mandating a balanced budget, but continues to send Congress budget proposals with massive, built-in deficits. And his agreement last week to allow inflation-adjusted increases for both Social Security and defense throws the prospects for any serious package of budget savings into jeopardy.

While certainly worthwhile, a balanced-budget amendment lacks credibility at a time of unending, huge annual deficits. Those who wish their advocacy of such a measure to be taken seriously have an obligation to show how the budget can be balanced without large tax increases.

One method would be to borrow a leaf from the book of any struggling corporation and begin selling off assets. There are additional precedents, both in theory (Adam Smith) and U.S. history. As was done with the accumulated deficits from the Revolution and the War of 1812, much or all of the government's debt can be paid off by selling the lands and other assets owned by the government and putting the proceeds into a trust fund devoted solely to that purpose.

The architect of the original debt retirement was Albert Gallatin, treasury secretary under Thomas Jefferson and James Madison. Gallatin started a sinking fund in 1817 to accelerate repayment of what he rightly called "the national curse of growing and perpetual debt." All federal revenues from land sales, tariffs and other charges (except for $10 million a year to cover the government's then-current expenses) went into the fund. By 1835 the U.S. was out of debt.

Congress then went on a spending spree. To avoid a repetition, every dollar raised by selling government assets should go into a sinking fund, and we should pass a rigid balanced-budget amendment. Such an amendment sounds like pie in the sky today, but would be quite credible if accompanied by liquidation of the national debt and budget cutting.

The U.S. government owns sufficient assets to pay off most or all of the $1.5 trillion national debt. This assertion will astonish most people, because conventional "balance sheets" for the federal government show liabilities far in excess of assets. But that is because most government assets are carried on the books at far less than their market values.

A start at correcting this misperception has been made by economists Robert Eisner and Paul J. Pieper. Their work on restating federal balance sheets shows the government moving from a negative net worth at the end of World War II to a positive net worth by the early 1960s, which continued increasing through 1980. Messrs. Eisner and Pieper have converted all government securities from par to market values, revalued gold reserves from the official $42 an ounce to market value, and revalued government buildings (but not land) to their replacement costs rather than their acquisition costs. The result for 1980 was asset values estimated at $1.4 trillion vs. liabilities of $1.15 trillion, for a net worth of about $250 billion.

The figures have changed somewhat since 1980, to be sure. The official "public debt" has increased to more than $1.5 trillion, while the price of gold has slumped. On the other hand, Messrs. Eisner and Pieper's estimate of federal land holdings at only $119.5 billion is grossly understated. It is based on revisions of revisions of an estimate made in 1950 by J. E. Reeve for the National Bureau of Economic Research. Mr. Reeve's figure for nonmilitary land—two-thirds of the total value—is based on a poorly justified statistical adjustment of original acquisition costs to 1946 market values. All subsequent federal land value estimates are simply updates and adjustments to these questionable numbers, rather than present-day market-value appraisals.

The federal government owns one-third of all U.S. land and a vast treasure-trove of mineral resources. Out of total federal landholdings of 729.8 million acres, only a bit more than 10% is in park-type land. The majority is in commercial use as timber or grazing land. There is no accurate inventory of what the lands alone might be worth in their highest and best use. Several years ago an aide to then-Sen. Charles Percy estimated that a selected 10 million of the some 300 million acres managed by the Bureau of Land Management would be worth $200 billion if sold. Economists Michael J. Boskin

and Marc S. Robinson have estimated that the value of just federal oil and gas rights—onshore and offshore—exceeded $800 billion as of 1981.

Of course, there will be naysayers at the idea of selling federal assets. They will dub it simplistic, but most good ideas are simple. It goes without saying that we will not sell off national parks and the like. Nor will we harm the environment. It's a common misperception that private ownership equates to environmental destruction while public ownership equals preservation. In fact, just the reverse is true. Private ownership provides incentives for the long-term stewardship of resources such as forests or erodible lands. While there are environmental tradeoffs in moving from public to private ownership, more sophisticated environmentalists are coming to realize that today more damage is associated with the Bureau of Reclamation, the Corps of Engineers and the BLM than with private timber and mining companies that own their own land and have a long-term stake in preserving its value.

Of course, in disposing of public lands, there are values at stake other than economic. Where certain types of use are deemed important (e.g., recreational uses in addition to timber sales), they can be assured by deed restrictions in the original grant from the government as part of the divestiture process. The deed could include a right of reversion to the original owner in case a defined misuse occurs. Sales can also be regulated so that ownership of the lands sold will not be concentrated in a few hands. The support of communities close to proposed land sales can be won if residents are given an advantage or discount in the sale or bidding. We would not be selling our birthright for a mess of pottage.

Sales of physical assets were discussed briefly during President Reagan's first year in office, but haven't drawn much attention since. This half of the federal balance sheet isn't limited to real property, however, and there has been movement in one area by an unexpected player. Sen. Daniel P. Moynihan (D., N.Y.) proposed in March that the government sell its entire $280 billion loan portfolio to private investors—realizing at least $150 billion in proceeds that could reduce in the deficit.

It is time to begin. Because government creaks along, Mr. Reagan should put the plan into operation at once, without the delay of a commission or task force. After all, liquidating the public debt and shrinking the role of the government are merely an extention of his own philosophy. But the plan also agrees with his critics that deficits are a menace to our economic health. We can grow our way out of our fiscal morass, but not without some pruning first.●

ABANDON ABORTION RULE

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. HYDE. Mr. Speaker, not very much of the major media views the issue of abortion as seriously—and hence as correctly—as does the Chicago Sun Times. In an insightful editorial on July 18, they once again expressed sound judgment and common sense about this most troubling of issues and I would like to share these views with my colleagues:

ABANDON ABORTION RULE

The Reagan administration has been firm and consistent in its opposition to abortion. It has attempted, without success, to persuade the Supreme Court to relax or modify some of the inflexibility of the landmark 1973 ruling that established abortion as a woman's constitutional right. It is, therefore, right in now seeking to have the 1973 ruling reversed in toto rather than just dealing with the problem piecemeal.

Abortion opponents need not go overboard with joy, however. It is one thing for an administration sympathetic to their cause to take such a step. It is quite another to have the plea succeed.

After all, just two years ago the court had the opportunity to grant, in another case, much of what the administration is asking now. It rejected the request with a forceful disdain usually displayed by a teacher when a student has the temerity to suggest in open classroom that maybe the teacher had been wrong on something important and ought to correct the situation.

Justice Lewis F. Powell Jr. asserted, in effect, that precedent was more important than common sense. Adherence to precedent, he declared in the majority opinion, "is a doctrine that demands respect in a society governed by the rule of law."

It does, indeed. Provided the precedent itself is sound. In the case of Roe vs. Wade, the 1973 case, the Supreme Court left the high road of the Constitution and turned into the alley of legislating social fancy and factional passion. It has been stuck there even since. And the lower courts, in no position to comment on the lack of judicial garb on the Supreme Court justices, have not only embraced the fatally flawed decision in its entirety, they have also given it new—and unjustified—interpretations.

That is what adherence to precedent does, if done blindly.

The Sun-Times believes strongly, with the administration, that "the textual, doctrinal and historical basis for Roe vs. Wade is so . . . flawed" that the Supreme Court should abandon it.

And if the justices are still bothered by the question of precedent, they might want to consider another precedent: In 1954, the government asked, and the court agreed, to overturn a ruling that had supported the constitutionality of the "separate but equal" system of schooling for whites and blacks.

If sound education was important enough to warrant the Supreme Court to abandon precedent, surely a question involving life and death, literally, is at least as important.●

YOU NEVER MISS THE OIL UNTIL THE WELL RUNS DRY

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mrs. LLOYD. Mr. Speaker, the public and the Congress are apparently no longer concerned about energy supplies. The gasoline lines are 10 years behind us. One would almost believe that the world has more oil today than it had 10 years ago. But that's impossible, isn't it? I also want to remind my colleagues that estimates of the U.S. oil reserves made just 4 short years ago were grossly over optimistic.

In 1981, the Department of the Interior estimated that 27 billion barrels of oil and 167.2 trillion cubic feet of natural gas lay buried off the shores of the United States. But on May 9, 1985, the Interior Department released new estimates which indicate 12.2 billion barrels of oil and 90.5 trillion cubic feet of natural gas, a far cry from their previous figures which helped convince the public that the energy crisis was over.

In 1981, the U.S. Geological Survey had estimated 12.2 billion barrels of oil off Alaska alone. The current estimate is a mere 3.3 billion barrels. That is 73 percent less than originally expected. At the same time, the estimated natural gas resources are only 13.8 trillion cubic feet, not the 64.6 trillion cubic feet that had been expected.

The disappointment in the Atlantic coast deposits has been even greater. Four years ago, the U.S. Geological Survey estimated 5.4 million barrels of oil. Now the estimates, which are based on more complete data from the private sector, indicate a somewhat meager 680,000 barrels, or 87 percent less than expected. If you question estimates, as we all do, ask yourself, "how many oil rigs do I see off the Atlantic coast?"

The Office of Technology Assessment recently reported that "exploration in the Atlantic has been disappointing." Two continental offshore stratigraphic test wells and eight exploratory wells turned up dry in the North Atlantic while two test wells and 32 exploratory wells found only uneconomic amounts of natural gas in the mid-Atlantic.

The Federal portion of Cook Inlet has had similar disappointing results when one test well and nine exploratory wells failed to reveal any deposits.

Mr. Speaker, isn't it time for the Congress to exercise some wisdom and think long-range enough to alleviate future problems? Isn't it time to recognize that we need to maintain a rational and stable long-term energy research program in order to prevent a future energy crisis? Or, is Congress to join forces with those who want the United States to go out of the energy R&D business on the basis that it is cheaper in the short-term to sell the store?●

KILLING POPULATION AID

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BARNES. Mr. Speaker, I would like to share with my colleagues an editorial that appeared in the Washington Post on July 19, 1985, which correctly states that: "It would be nothing less than a tragedy if the United States, for more than a generation the world's principal sponsor of population aid for developing countries, ended its support." As a strong supporter of U.S. funding for family planning programs, I fear that the steps taken by the House and the Senate to curtail U.S. funding to organizations like UNFPA and IPPF are indeed tragic and will result in more suffering and death for thousands in the developing world.

As chairman of the Subcommittee on Western Hemisphere Affairs I have come to appreciate the important role that international population organizations like IPPF and UNFPA play in promoting the welfare of millions throughout Latin America and the Caribbean. During the current debate we have heard much about one country, China, but very little about the rest of the world, where birthrates are soaring and the need for family planning programs is great.

In Latin America alone the demographic trend is alarming. The population in Latin America has almost doubled during the last 25 years. From 218 million in 1960 to 397 million in 1984. The region's birthrates are double those of the developed nations. By the end of the century, Latin America will have a population of 562 million. The high birthrates and the lack of access to population programs and family planning services translate into high levels of infant and maternal mortality. Latin American infants on the average are seven times more likely to die before their first birthday than infants in the United States. Up to 40 percent of the Latin American children under 5 suffer from severe malnutrition. Family planning can reduce infant and maternal mortality by half by providing couples with access to family planning services and thus helping them to space births. But in Latin America, less than 50 percent of couples have access to family planning services.

IPPF and UNFPA are recognized as the two organizations that have done the most to provide family planning services in Latin America and the Caribbean. The IPPF represents 24 national family planning associations in the region, including in countries where the United States has no bilateral assistance programs such as Mexico and Colombia. IPPF represents a worldwide network of 119 indigenous family planning associations. In some countries, IPPF affiliates are the major or sole provider of contraceptive information and services. The most important contribution that IPPF makes to the region is in terms of institution building. I have been informed that in the case of Guatemala, AID's bilateral population assistance is essentially turned over by the Government to the Guatemalan Family Planning Association to operate a national program. In addition to this IPPF network, UNFPA provides support for population programs in 32 Latin American countries. In contrast, the Agency for International Development has bilateral population programs in only 11 countries in the region.

I understand and share the concerns expressed by my colleagues about forced abortions and infanticide that occur in China. But it is important to look very closely at the larger picture and the effects that a cutoff of population programs like UNFPA and IPPF will have on the health and welfare of children, mothers, and families throughout the Third World. It is clear that the impact of the elimination of U.S. funding for these organizations is likely to be a rise in birthrates, a rise in infant mortality rates, and a rise in illegal abortions. Most of these illegal abortions are botched abortions which have become the largest killer of women in Latin America and the Caribbean.

I trust that this House will have an opportunity to once again analyze this issue and rectify the erroneous decisions of the past. The editorial follows:

KILLING POPULATION AID

Representative David Obey, chairman of the House subcommittee dealing with foreign aid appropriations, says he won't recommend any money for international family planning programs next year until Congress decides what if any policy it wants to pursue. Mr. Obey is no foe of these programs. But, he points out, amendments added to other bills, together with new restrictive administration regulations, may have put most family planning programs out of business already. As a result, the need for continued funding is unclear.

It would be nothing less than a tragedy if the United States, for more than a generation the world's principal sponsor of population aid for developing countries, ended its support. No small element of the tragedy would be the increases in infanticide, abortion and infant mortality that would inevitably result. But Congress cannot go on pretending to respond to widespread public support for voluntary family planning programs while also making it impossible for those programs to operate.

U.S. family planning aid has always operated on the premise that deference should be paid to local laws and customs and personal preferences. Channeling aid through voluntary and multilateral organizations has been the preferred approach to avoid the appearance or the reality of interference by the U.S government. Developing a trustworthy network of service providers in impoverished and remote areas has not been easy. But the cooperation of church groups, voluntary organizations and local governments has produced significant progress in recent years.

No U.S. money—for that matter, no United Nations money—is used for legal abortions, much less for coerced abortions or infanticide. The Reagan administration itself has investigated and certified that. Nonetheless, in the name of combating alleged coercive practices in China, both Houses have adopted amendments to a supplemental appropriations bill and to the foreign aid authorization bill that may make it impossible for many family planning programs to operate.

The Agency for International Development, moreover, having already cut off aid to the International Planned Parenthood Federation, the major operator of programs in developing countries, has now issued rules giving favored treatment to programs that counsel sexual abstinence as the only method of birth control. The new rules also require all other local agencies to stop dealing with doctors, hospitals and other medical service providers that perform legal abortions.

The most vocal groups advocating these restrictions make no bones about the fact that they oppose all "artificial" birth control. That's not a position that would win much support among U.S. families and certainly not one that Congress should be imposing on people in other countries, directly or indirectly. If Congress doesn't believe the Chinese government's assurances that it opposes infanticide and other abuses, it should deal with that issue head on instead of using it as an excuse to obliterate an immensely valuable world program.●

A TRIBUTE TO ROBERT S. FOERSTER

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MYERS of Indiana. Mr. Speaker, on Friday, July 19, Vice President George Bush announced the winner of the first teacher in space competition, Mrs. Sharon K. McAuliffe. I congratulate Mrs. McAuliffe on her high honor, and I also commend 1 of the 10 finalists, Mr. Robert S. Foerster, an outstanding young man from the Seventh District of Indiana. Bob Foerster teaches math and science at West Lafayette's Cumberland Elementary School.

Mr. Foerster was one of the original 40,000 applicants who jumped at the opportunity to fly when the President first announced last August that a teacher would be the first private citizen in space. Not only did Mr. Foerster undergo extensive interview sessions to earn the honor of being West Lafayette's candidate for the first teacher in space but he also flew on a KC-135 to experience the sensation of weightlessness at high altitudes.

Mr. Foerster was in Washington last week for the final interviews and to anticipate the countdown of Friday

afternoon's announcement. I had the opportunity to congratulate this fine young man when I hosted an informal luncheon in his honor on Wednesday, July 18. Mr. Foerster is a bright, articulate person who represented the State of Indiana with pride.

Mr. Foerster has always had a special place in his heart for flight since he watched the early Apollo launches as a fifth grader. He believes his computer background—he does consulting for several school districts—helped him become a finalist.

Mr. Foerster and his wife, Lee, also a teacher at Lafayette's Washington Elementary School, have two daughters, Lisa, 14, and Lorijane, 9.

Mr. Foerster is expected to work closely with NASA officials throughout the upcoming year to plan lectures, teacher workshops, curriculum guides and other educational programs to share his knowledge of the space program with as many schools as possible.

Today let us congratulate the 10 finalists; each has proven to be unique and talented individuals. But I especially salute Mr. Bob Foerster—he has made all of Indiana proud.●

OUR RELATIONS WITH ISRAEL

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. COURTER. Mr. Speaker, about 1 month ago, when the TWA highjacking was newly before us, I told this House of my belief that the crime was a political act, aimed at weakening the United States-Israeli alliance and poisoning America-Israeli friendship. During the subsequent 2 weeks, the terrorists and their masters must have taken satisfaction in all of the following:

Headline, June 21: "Strains Between Israel, U.S. Surface in Crisis."

Item: A concern in Israel that the United States is playing "A strange game" with its ally over the matter of the 700 Shiite prisoners.

Item: A spokesman for American hostages calls on Israel to surrender the 700, which he calls "hostages."

Poll results: Fourty-nine percent of Americans questioned say Israel has not done enough to resolve the crisis.

Poll results, only 2 days later: Fifty-eight percent now hold that view.

Item: Rumors and deficient interview tape cause Israelis to believe that a German-born American employee of TWA airlines helped separate Jews from the other passengers.

Headline: "Poll Finds Rising Sentiment for Distancing United States from Israel." Results widely publicized in Israel and America show 42 percent of Americans surveyed want to reduce United States ties to Israel to protect us from terrorist acts.

Headline, July 1: "Crisis Boosts Assad and Berri; Clouds U.S.-Israeli Alliance."

Mr. Speaker, we cannot yet know how severe the damage has been. Presumably, some ill-will does remain beneath the surface, in both nations. But both democracies have too much in common, have been attacked by terrorists for such similar reasons, and stand for too many of the same good things, to let this base crime remain. Terrorism is a war for public opinion. It is not the sort of war democratic nations can afford to lose.●

TURKISH INVASION OF CYPRUS

HON. MICHAEL BILIRAKIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BILIRAKIS. Mr. Speaker, I would like to take a moment to reflect upon an anniversary. Unlike most anniversaries, however, this is, unfortunately, not one to be celebrated. Rather, it is one to be solemnly acknowledged and remembered, for it marks a tragedy that continues to this day.

Mr. Speaker, July 20 marked the end of yet another year in the tragedy that has plagued and afflicted the Republic of Cyprus for the last 11 years. Yes, July 20, 1974, was the day that Turkish troops undertook the fateful invasion that resulted in the occupation and colonization of 40 percent of the previously independent Republic's territory. Today, 11 years after the invasion, approximately 30,000 Turkish troops and more than 50,000 settlers from Turkey are illegally occupying and exploiting the properties of 200,000 displayed Greek-Cypriots who have become refugees in the land of their birth.

To make matters even worse, Turkey and the Turkish-Cypriot leadership, in direct violation of relevant U.N. resolutions, have taken a series of actions, subsequent to the 1974 invasion, which are aimed at consolidating the occupation and division of that small Mediterranean Republic. For example, as recently as 1983, there was even an illegal attempt to create a new Turkish political entity in the occupied areas. This unprecedented secessionist action was, fortunately, promptly labeled as illegal and unacceptable by the international community and received the condemnation that it so well deserved. As a matter of fact, the Reagan administration not only refused to recognize this unlawful action, but rightly called upon other governments not to extend recognition as well. Interestingly enough, of all the countries in the world, Turkey was the only one to recognize the existence of the pseudo-state.

There can be no question that resolution of the Cyprus issue must come soon, not only for the sake of the people of Cyprus, but also for the peace and stability of the Eastern Mediterranean as a whole. Initiatives at peace have been undertaken by various parties throughout the years, but experience has proven that the single most important issue that prevents any progress on Cyprus is Turkey's insistence on maintaining a military presence in the Republic of Cyprus, even after a settlement is reached. Turkey and the Turkish-Cypriot leadership must be made to realize that this unacceptable posture has ruined several initiatives to resolve the Cyprus problem in the past and threatens to do the same to the current U.N. initiatives at a time when the Secretary-General has declared that he remains "convinced that an agreement is within reach."

On June 11, 1985, U.N. Secretary General de Cuellar reported to the Security Council that, following extensive consultations, he has prepared a "consolidated draft agreement" that he believes "represents the formula most likely to lead to a just and lasting solution to the Cyprus problem." He further stated that the Greek-Cypriot community has already given an affirmative reply to his proposal.

This progress would certainly constitute encouraging news, were it not for the Turkish side's discordant and unconciliatory stand. The unfortunate facts are that not only has the Turkish-Cypriot side yet to reply to the Secretary General's proposals, but they have publicly expressed positions that are contrary to Mr. de Cuellar's dedicated efforts and are introducing new measures that further the partition of Cyprus. Discordant attitudes and unacceptable actions such as these can do nothing but undermine the road to peace.

Mr. Speaker, we are currently within grasp of an opportunity to resolve the complex issue of Cyprus peacefully. It is an opportunity that cannot, and must not, be lost. The Turkish-Cypriot leadership must be convinced that they will have to make concessions for the sake of peace, just like those that the Greek-Cypriot community has already demonstrated, and Turkey must accept the fact that the presence of her occupation troops in Cyprus is unacceptable. Finally, both Turkey and the Turkish-Cypriot leadership must be effectively persuaded to accept the new proposals put forth by the Secretary General in order to reunify the country and bring freedom and peace to all its people.

Mr. Speaker, divided countries spell trouble and, for the sake of everyone involved, the division of Cyprus must

not be allowed to continue. The Republic of Cyprus has been a good friend to the United States. It has extended assistance whenever we have needed it, such as in the case of the tragedy of our marines in Lebanon and in the recent hijacking of TWA flight 847. It is now time for us to do our part to help Cyprus. Let us, therefore, stand ready to help and join efforts to end this tragedy that has been allowed to fester so long.●

"NO" TO NORFOLK SOUTHERN

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. ECKART of Ohio. Mr. Speaker, the proposed sale of Conrail by the Federal Government continues to be one of the most important issues facing the Congress as well as rail employees and shippers in numerous States.

The proposed sale of Conrail to the Norfolk Southern Corp. has raised several serious questions which remain unanswered, including: Anticompetitive effects, increases in unemployment, inadequate return to American taxpayers, and increased shipping costs. The Cleveland Plain Dealer published an editorial last Saturday, July 13, which eloquently discusses several of these issues. The article follows:

[From the Cleveland Plain Dealer, July 13, 1985]

"NO" TO NORFOLK SOUTHERN

The word in some quarters around Capitol Hill is that the proposed sale of Conrail to the Norfolk Southern Corp. is, if you'll pardon the transported metaphor, dead in the water. If so, its demise should be cause for some rejoicing among nearly every interest dependent upon rail transportation in the Northeast United States. The proposal, put forward last winter by Transportation Secretary Elizabeth Dole, does not properly serve Ohio, the region or the nation. Although it would meet the well-intended congressional mandate to remove the federal government from the railroad business, the sale amounts to a giveaway of a very valuable property. It could serve only to limit competition severly—and thus prove unnecessarily costly to those industries dependent on rail freight transport.

The transaction's complexities are keeping legions of accountants busy trying to determine its ramifications. But the more that congressional calculators tally the tax benefits the sale would give Norfolk Southern, the more the announced $1.2 billion purchase price shrinks in its true return to the federal treasury. Granted, no sale, proposed or conceived, would recover anywhere near the $7 billion that taxpayers have provided to seed and cultivate the system's return to competitive excellence. Yet the tax write-offs the acquisition could provide for Norfolk Southern—estimated by one congressman to approach the full purchase price—could amount to a handsome payment to Paul by a deficit-ridden Peter.

The worst feature of the proposal is the potential it has to destroy the competitive balance of rail freight in the northeastern United States. Although Norfolk Southern and the Justice Department say that competition would be maintained through a complicated series of divestitutes, such does not appear to be the case. Opponents say that Justice used a non-standard antitrust yearstick to measure the sale, one that underestimated the competitive problems and overestimated the efficacy of divestiture. Indeed, the two regional railroads most often mentioned as recipients of the shed lines—Guilford Transportation Industries and the Pittsburgh & Lake Erie Railroad—already operate on restricted budgets. How they would be expected to take over and use the Conrail castoffs is beyond the ken of many analysts. The weight of the added trackage might well be more than either could bear, and would mean the end of whatever competition they might afford. Shippers then would be left to the questionable mercies of Norfolk Southern's rate-setters. Congressional staffs are re-examining the Justice study.

Finally, the sale would mean the loss of jobs in Ohio—not only for the 300 employees of Cleveland's Collinwood Yards whose work would be transferred to Bellevue, O., but for hundreds and perhaps thousands of others whose livelihoods are wrapped in services that the merged lines would not use. And the loss of jobs is the last thing Ohio needs.

If Conrail's future does not lie in absorption by Norfolk Southern, then what should be done with it? Some, Sen. Howard Metzenbaum among them, say Conrail is a money-making proposition that the government should retain indefinitely. The inference is that it should be sold only if it started to lose money. But then, who would want it?

More and more, the proper course seems to be some form of public stock offering along the lines of that proposed by the banking firm of Morgan Stanley & Co., Inc. That proposal would see the investment house buy the railroad for cash and tax revenues—the combined values of which it places at about $1.8 billion—then return ownership to the private sector through a series of stock sales. Conrail then would be left to fend for itself in the marketplace—a situation that its management, led by L. Stanley Crane, says it eagerly anticipates. Secretary Dole has opposed the public offer concept as unworkable and too time-consuming; in selecting the Norfolk Southern bid she said she wanted the system to go to a railroad company with pockets deep enough to carry it through projected income troughs and keep it off the dole.

But a public offering—whether Morgan Stanley's or one set up by the government itself—seems workable. Supporters point to the recent public sale of the $8 billion British Telecom by Reagan soulmate Prime Minister Margaret Thatcher as proof that a giant government entity can be privatized successfully in a timely fashion. And, as far as pocket depth and dedication are concerned, Norfolk Southern Chairman Robert B. Claytor told the House Transportation subcommittee last month that, should the tax advantages be stripped (he places them at less than $100 million) or the deal delayed past December, his company would reconsider its offer. *Sic semper* perseverance.

Congress is indicating it will not be hurried into a decision on Conrail's fate. It should not be. Too many questions, too many dollars and too many jobs are involved to yield to Secretary Dole's desire for a quick Conrail fix—especially one that might ultimately cripple the region's transportation system. If Norfolk Southern can't wait, too bad. The nation can—and should.●

JOB, HOME, FAMILY

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. NOWAK. Mr. Speaker, as part of "Helen Keller Deaf-Blind Awareness Week," the Buffalo News published an article on July 26 describing the success story of Eileen Wuest, both deaf and blind. Eileen despite her handicaps leads a surprisingly normal life. She holds a job, runs her household and with her husband Marvin Wuest, Eileen raised their two children, Christopher and Charleen.

Recognition must also be given to the Blind Association of Western New York, an organization that both employs and counsels Eileen. The Blind Association of Western New York has helped integrate Eileen as a capable and working member to our society.

I am bringing to your attention this article entitled, "Job, Home, Family," in assurance that Eileen Wuest's story will inspire others in realizing that the blind and the deaf can assimilate effectively into our community. Eileen Wuest is an inspiration for us all and her story should support observance of "Helen Keller Deaf-Blind Awareness Week."

JOB, HOME, FAMILY

(By Paula Voell)

Quickly and unerringly, Eileen Wuest guides the edges of a washcloth under a sewing machine needle, controlling the speed with a foot pedal, stitching each side to keep it from raveling.

As she finishes, she tosses the washcloths into a large cardboard box. Throughout the day they are removed to be shipped for use in New York State hospitals. By the end of her 6½-hour shift, Mrs. Wuest (rhymes with east) will have thrown 90 dozen washcloths, with a few misses, into that box.

After her work day at the Blind Association of Western New York, where she works in a sheltered workshop, she cooks supper, vacuums, does laundry, knits or reads the New York Times or a spicy detective novel.

Her active life is possible with several adaptive aids, with help from her husband, Marvin; her daughter, Charleen, 21; and her son, Christopher, 19; but mostly because she refuses to give in to deafness and blindness.

Deaf since birth Mrs. Wuest started at St. Mary's School for the Deaf at 4. She met her future husband there; in seventh grade they became good friends, by their junior year, they were dating.

Wuest, a letter sorting machine operator, who wears a hearing aid and has a residual amount of hearing, can converse by reading lips and has speech that can be understood with careful attention.

Because she is deaf, Mrs. Wuest gave up her girlhood dream of being a nurse. Instead, she had jobs as a dishwasher and cleaning lady. She was trained and hired as

a keypunch operator but lost that job within an hour because her sight was beginning to fail.

She started to lose her vision in 1969 and became blind in 1981 as a result of Usher Syndrome, an inherited disease that causes hearing loss and retinitis pigmentosa, a degeneration of the retina.

She became one of 40,000 Americans deprived of both sight and hearing, a group being recognized this week, "Helen Keller Deaf-Blind Awareness Week."

Asked which handicap has been harder to live with, Mrs. Wuest replied: "Being blind is harder, but being deaf and blind is much harder. It was very hard to accept blindness, but I had to do it. I had to adapt or die."

Mrs. Wuest sat next to her husband while being interviewed, cupping her left hand over his right to "read" the gestures, motions and movements of his hands and fingers. She responded to questions in sign language interpreted by Wuest and their children, a frustrating and time-consuming process. Neither of the children is deaf.

It's difficult for Mrs. Wuest because she has to rely on a translator to keep her in touch with what's going on, and frustrating for those who want to talk with her but don't know how.

As her sight deteriorated, her family urged her to attend a rehabilitation program at the Blind Association to learn techniques for keeping house and how to get around, but she resisted, saying she was depressed and ashamed.

In February of 1979 she overcame her fear and enrolled in the program. Since then she's convinced others to go through the program and worked with a deaf-blind woman in her home.

In rehabilitation she learned to read Braille and use a printer; how to wash and vacuum a floor in sections (warning everyone to get their socks off the floor before she vacuums); how to slice bread and meat using a knife with a guide; and how to handle a double spatula that operates like tongs.

She marks canned goods with Braille magnets and uses only one brand of cake mix because she knows the temperature and other ingredients.

Her son thinks she's clever to have devised these systems and he has a strong opinion about the finished product: "She makes the world's best chicken and stuffing," said Chris, a freshman in fine arts at Villa Maria College. "Hands down, the best."

Mrs. Wuest attaches a metal tag marked in Braille to each piece of clothing so her clothes are coordinated and she can sort the laundry.

The family has worked out a system for her to get back and forth to work. Each morning Chris walks her to the bus stop and keeps her company until she's on the bus. While traveling, she wears a sign to let people know she is deaf and blind. When she leaves work, a staff member accompanies her to the bus stop where she carries a sign that reads "Please touch me on the shoulder when bus 13 comes."

Drivers discharge her in a specific place near her home so she doesn't have to cross the street.

Mrs. Wuest uses many aids to get her through a world she can neither see nor hear. She has a Braille watch, a cane and a Mowat sensor (a sensing device the size of a transistor radio that sends vibrations to signal her when she is near an object). She subscribes to monthly magazines and each week gets a condensed version of the New York Times in Braille.

"She always saying, 'Why didn't you tell me this happened?' " Chris said.

With the family's diverse schedules (Charleen works in the office of Western New York Services for the Hearing Impaired and Chris works part time while attending college), Mrs. Wuest is often home alone.

Two years ago they applied for a Telecommunication Braille Device, a $5,000 instrument that allows deaf-blind people to communicate with others on a Braille printer over telephone wires. Until recently funding for such aids was restricted to job-related devices, but legislation now allows for the latest technology for home use. The device would give everyone in the family a secure feeling when Mrs. Wuest is alone, Wuest said, but they still haven't received it.

Mrs. Wuest takes camping trips in the couple's motor home; she bowls, and she attends the national deaf-blind convention each year. One year she flew alone; this year she is going with a friend who is driving.

When the family is in public, Chris said they get all sorts of reactions, from "rubberneckers" to "little old ladies who come up after church and say 'God bless you' " to an unhearing Mrs. Wuest.

Chris said some people come up and speak very distinctly and slowly, as if that will help. Mostly, though, they don't know quite what to do, he said. At work, some people spell in her hand, a few have learned sign language.

"It's fun going through a crowd with her," he said. "When we were in Las Vegas I just yelled 'blind person coming through.' "If that doesn't work we start swinging the cane."

As he was being interviewed, his mother and father were conversing and the gestures became more animated. "You're right in the middle of a family squabble," he explained. "Mom wants to go out to lunch and Dad wants to get back to work," he said. Last seen, they were heading for Burger King.

Chris said his mother has always been the family disciplinarian. "She has a wicked right hook," he joked. When asked if that was true, Mrs. Wuest smiled and held up a fist, an easily recognized word in sign language.

"You don't get much past her," he said. "I have a friend she's not fond of and she didn't want him in the house. Once she followed right after him and cornered him in the bathroom. Sometimes I think she can still see."

When he and Charleen were youngsters, they went to St. Mary's School for the Deaf for kindergarten so they could learn sign language. Charleen has been tested and found not to have Usher Syndrome nor to be a carrier. Both know that it can show up on subsequent generations.

As they talked about growing up in unusual circumstances, Charleen said it seemed normal to her because it was all she knew.

The frustrations are there always—the inability to talk to others, to see the beauty of the outdoors, the knowledge that there is no cure for a world in darkness without sound.

There is a conquering spirit, however, in this family that shows itself in humor and affection, not pity or dismay.

"I really enjoy myself," Mrs. Wuest wrote in response to a series of questions. "I appreciate God for putting light in my life. I still help people who need help . . . We raised two lovely children."●

CATHOLIC CHURCH IN PARAGUAY CONDEMNS PRACTICE OF TORTURE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BARNES. Mr. Speaker, the House recently adopted language in the foreign aid authorization bill conditioning the provision of IMET funds to Paraguay on a certification by the President that the Government of Paraguay has ended the practice of torture and the abuse of individuals held in detention by its military and security forces and has instituted procedures to ensure that those arrested are promptly charged and brought to trial.

The official paper of the Catholic Archdiocese of Paraguay recently carried an editorial addressing the issue of torture in Paraguay, stating that:

We cannot be silent on the subject because until now in our country, police reports based on statements extracted under duress, despite the fact that all legal systems expressly forbid this practice, are used to initiate court procedings. We speak of torture because, although many cases have been reported and proven, we do not know of any perpetrators having been sentenced. In some cases, the authorities involved merely issued communiques denying the accusations. In other cases, court procedings were initiated and then dropped . . . It should also be made clear that nothing is gained by hiding this evil or by not admitting its existence. Consequently, we gain nothing by denying the existence of torture in our country, because it does exist.

As we go to conference on the foreign aid bill, I hope and trust that the House will stand firm on its language.

The complete text of the editorial follows:

WHY WE SPEAK OF TORTURE

We feel the need and obligation to speak of torture because cases of illegal mistreatment in police precincts have come to light in recent weeks. There have even been some deaths. The reports, including evidence of physical mistreatment, are a deplorable testimony that this debasing and criminal practice continues.

We have to speak of torture because the national constitution is not being strictly complied with, as it should be. The Constitution says: "No one will be subjected to torture or cruel and inhuman treatment." The many specific norms of international law, which repeatedly condemn this practice, are also not respected.

We have to talk about torture because we cannot be content to listen to hollow condemnations or official denials, and because we want to actively participate in the eradication of this social scourge so that the word torture will be no more than a sad remnant of the past.

We cannot be silent on the subject because until now in our country, police reports based on statements extracted under duress, despite the fact that all legal systems expressly forbid this practice, are used

to initiate court proceedings. We speak of torture because, although many cases have been reported and proven, we do not know of any perpetrators having been sentenced. In some cases, the authorities involved merely issued communiques denying the accusations. In other cases, court proceedings were initiated and then dropped. Once and for all, we must admit that remaining silent, "playing dumb," "looking the other way," and taking no interest in this matter are just forms of complicity with this degrading practice.

It should also be made clear that nothing is gained by hiding this evil or by not admitting its existence. Consequently, we gain nothing by denying the existence of torture in our country, because it does exist. We are duty-bound to firmly and straightforwardly denounce the existence of torture so that this practice can be eliminated through the investigation of all reported cases and the punishment of those responsible.

The national and international laws clearly stipulate that torture cannot be justified. An individual cannot be tortured for reasons of national security, or by orders from the government or legally constituted authority, or "from the top." An individual cannot be tortured on behalf of "Western and Christian civilization." Therefore, nobody is under any obligation to torture or to obey orders from anyone to do so.

Today's torturer is equivalent to the pirate or slave trader of the past. He is an enemy of mankind. He is also a cowardly criminal, because he perpetrates the crime against a totally defenseless individual by abusing power.

Today we also speak of torture because our Christian conscience is aroused by indignation. Man is the son of God and, therefore, his body is a living temple of the Holy Ghost and part of Christ's mystical body. All this elevates the dignity of the human being even more. Catholics clearly understand that whoever attacks man, attacks God; whoever injures, mutilates, or destroys a man's body is indeed injuring, mutilating, or destroying a creature of God. The Second Vatican Council clearly stated: "Anything that attacks human life, anything that violates its integrity, such as mutilations, moral or physical tortures, or similar practices are in themselves shameful, degrading to human civilization, disgrace the perpetrator more than his victim, and are detrimental to the honor due to the Creator."

There is no alternative but to eliminate torture as the most terrible of evils. Its perpetrators, instigators, abettors, and accomplices must be brought to justice and punished on behalf of the highest interests of humanity in general and our society in particular.

This is a challenge for the entire national community, but it is a more direct challenge for the state branches, the executive and the judicial powers, which must comply with and enforce the law lest they ignore their duties and become passive accomplices of such acts of perversion.●

JUSTICE DEPARTMENT REVEALS ITS ANALYSIS OF CONRAIL DIVESTITURES WILL TAKE UNTIL YEAR END

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FLORIO. Mr. Speaker, in February, the Department of Transportation recommended the sale of Conrail to the Norfolk Southern Corp. The Subcommittee on Commerce, Transportation and Tourism, which I chair, has been expeditiously evaluating this proposal, along with other options.

Because the proposed sale to Norfolk Southern would violate the antitrust laws, the Justice Department has required the divestiture of certain rail lines to other railroads, subject to a review of the actual proposed divestitures to ensure that the carriers acquiring the divested lines would be viable competitors with a combined Conrail-Norfolk Southern.

However, the following article from Traffic World reveals that, because of lack of information, the Justice Department does not anticipate completion of its review until the end of the year. Despite this delay from the administration, the subcommittee will continue to expeditiously review the sale options. The article follows:

[From Traffic World, June 24, 1985]

JUSTICE ANTITRUST REVIEW OF NS DIVESTITURE PLANS WILL TAKE UNTIL YEAREND

The antitrust division of the Department of Justice will not allow third parties to impose deadlines on its review of the divestiture proposed as part of Norfolk Southern Corp.'s bid for Conrail, according to an agency official, who added that the review process would take at least until the end of the year.

James Weiss, the assistant director of the transportation section of the antitrust office, said at a luncheon in Washington June 14 that his agency "hasn't received anything yet" except the agreements themselves from Norfolk Southern, Guilford Transportation Industries or Pittsburgh & Lake Erie Railroad.

Under terms of those agreements, NS would sell certain segments of rail line to Guilford and P & LE to satisfy potential antitrust objections to its proposed acquisition of the government's 85-percent interest in Conrail. The two smaller rail lines would also gain the rights to operate over the trackage of NS and Conrail.

"We are sending (the agreements) out now to the states involved," Mr. Weiss said at a meeting of the Transportation Table in the National Press Club. "We have very detailed letters of inquiry out to NS, Conrail, P & LE and Guilford. We will be meeting with all the states' people and local shippers. Once they start responding, I would anticipate it would take us a while because of the volume of the material. We will make a more detailed assessment based on the facilities and financial circumstances later."

The agency is now hiring consultants to conduct that detailed study, he said.

"I wouldn't anticipate we'd be done with that before the end of the year," Mr. Weiss said, adding that "the sale cannot go through until we are completed. That's assuming that NS is going to make the offer. It could be Morgan Stanley, in which case we're out of it," he added, referring to the alternative bid to purchase Conrail proposed by investors led by the Morgan Stanley & Co. (T.W., June 17, p. 37).

Asked if NS was aware of the agency's time frame, he responded, "we've said under a number of circumstances that we can't be tied down to a time frame because we don't have the information" which has been requested.

Mr. Weiss added that his office would be looking at the recently announced plan of Texas Air Corp. to acquire Trans World Airlines. He indicated that route overlaps could raise a number of potential objections.

Mr. Weiss was responding to reporters' questions after a brief talk on antitrust aspects of intrastate rate regulation of motor carriers. He predicted that state-approved bureaus would disappear eventually despite the Supreme Court's *Southern Motor Carrier Rate Conference* decision, which allowed the bureaus to continue under certain circumstances (T.W., Apr. 1, p. 5).

Mr. Weiss argued that market forces would draw motor carriers away from the rate conferences since the "pressure to go along on prices" could compel certain carriers to accept rates that were higher than those they could otherwise offer. "Carriers are thus compelled to act against their own interest—not by pricing below cost but by pricing above it," Mr. Weiss said.

He indicated that the agency would continue ongoing oversight of the rate conferences and hold them to the traditional tests Justice has established for such entities.●

FENTON HIGH SCHOOL: DIVERSITY IN DuPAGE COUNTY

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. HYDE. Mr. Speaker, the June 1985 issue of Illinois Issues included a very informative and insightful article about Fenton High School in Bensenville, IL, which is in my congressional district. The community of Bensenville is most fortunate to have an excellent high school with a challenging and diverse curriculum offering a wide range of choices for all of its students. Fenton is also known for its first-rate faculty and an outstanding superintendent, Carl Herren.

I am very pleased to share this excellent article with my colleagues:

FENTON HIGH SCHOOL: DIVERSITY IN DUPAGE COUNTY

(By Richard J. Shereikis)

If the students at Fenton High School in Bensenville learn nothing else during their stay at the northwest suburban school, they will learn to make choices. Fenton, located in the northeast corner of affluent DuPage County, has the ways and means to offer something for nearly everyone. The school's 1,500 students can choose from over 200 course offerings, including traditional

courses in English, foreign languages, the sciences and industrial arts, as well as unusual offerings like Comedy and Satire, Cartooning, Fashion Illustration and Foreign Foods.

They may choose among 18 different sports (nine each for girls and boys) which are contested at 54 different levels. (Football, for example, is played at six levels: Freshman A, Freshman B, Sophomore A, Sophomore B, Junior Varsity and Varsity.) They may choose to join any of nearly 20 extracurricular organizations or activities, including clubs for students interested in skiing, chess, angling and community service.

In a month like April 1985, which included the school's spring break, they could choose among 154 different athletic events, at the various levels, where they could cheer their Bison on to victory.

The options, among other things, make school attendance attractive. "We have an average daily attendance of 96 percent," says Carl Herren, Fenton's superintendent. "That compares to an absence rate of 40 percent or more in some Illinois schools. Our dropout rate is only 1.86 percent. And we're not talking about some exclusively college-prep kind of student body. About 50 percent of our graduates plan to attend college, while the other half are planning careers right out of high school. That's pretty unusual for a suburban school, but we're proud of it." The average ACT score of Fenton students is just over 19, which compares favorably to the state average of around 18, according to Herren.

Fenton has no rigid, ability-grouping program, but teachers and counselors "try to keep close track of every student," says Herren. "If they want to get into college-prep courses at the start, that's OK. But if they start getting D's and F's in those, a counselor will call them in, maybe with their parents, to talk about it and see if it's realistic for them to plan that way. We try to offer enough options so that the students who want to learn about specific careers will have a chance to get a good start here."

Robert Varney is one of those on the Fenton staff who takes a special interest in students' vocational interests. He is the chairman of the eight-member business education department which offers over 27 courses, from Shorthand and Typing to Accounting and Marketing and Distribution, from Today's Consumer to Salesmanship. Every freshman is required to take a course in Keyboarding/Computer Literacy, and the school has 80 computer terminals to make this possible. "At least 700 of our students will take business education courses each year," says Varney, "and the school and community are very supportive of our programs, partly because so many of our students get work right out of school at the industrial park. We're very proud of what we do."

The presence of that industrial park is also one of the reasons why Fenton can offer so many choices. The substantial taxes they pay increase the school's budget, so that Bensenville's essentially middle-class home owners do not have to bear the entire burden of financing their children's education (the estimated median household income for 1984 was $31,573). "Our tax base, including what the industrial park generates, allows us to spend around $4,800 per student each year," says Herren, "and only about 5 percent of that comes from the state. So we have a budget of around $6.5 to $7 million a year to work with. That lets us do a lot of things for the wide range of students we have here."

Herren points with pride to the diverse accomplishments of Fenton's athletic and speech teams as an illustration of the school's ability to offer activities to students from disparate socioeconomic backgrounds. "We won state in wrestling in 1973, and we've remained very competitive in wrestling over the years. We just won the girls' state bowling championship. We've won three state championships in speech and been second a couple of times. How's that for balance? State championships in bowling and speech?"

Fenton's exceptional facilities provide the opportunities for the excellence and balance. The school has five different gymnasiums, not including a large wrestling gym that permits numerous bouts and practice drills to take place simultaneously. The former main gym, spacious and well-equipped, is used now exclusively for girls' sports. (Girls can compete in badminton, basketball, bowling, cross-country, gymnastics, softball, tennis, track and volleyball.) There is also a large new gym, featuring an 11-lap running track and a seating capacity of 4,000, which makes Fenton an attractive site for basketball and wrestling tournaments. Most of the boys' indoor sports are contested here. (Boys may choose among baseball, basketball, cross-country, football, golf, soccer, tennis, track and wrestling.)

The facilities also permit Fenton's athletic teams to accommodate large numbers of students. "We've got about 800 kids out for sports each year, probably 500 different ones, since a lot will go out for two sports," says Pete George, Fenton's athletic director for the past 10 years. "We'll have as many as 120 out for the six different levels of football; maybe 80 to 100 playing boys basketball. There are 30 different teams among the nine girls' sports, so most girls who want to compete have some chance in one of the interscholastic programs."

George has a yearly budget of around $70,000 for supplies, entry fees, officials and upkeep. Coaches' salaries and travel expenses are funded from other sources, and his operation includes 56 different coaching positions, 10 of them for football alone. George, who came to Fenton after serving as wrestling coach at MacMurray College in Jacksonville, is proud of the many athletic opportunities his department can offer. "At a school like this, you understand, we're competing with music, speech, theater, for some students' time. We do all we can to let kids do both, if they want. And with the various levels for each sport, we give kids a chance to develop."

Opportunities abound within the curriculum, too, for both the college- and career-bound students at Fenton. The 14-member English Department regularly offers over 25 courses in writing, literature, speech and theater. At various points in their careers, students may take Journalism or Mass Media if they are interested in communications. Others may take courses in Acting and Stagecraft/Design, and get practical experience in the 750-seat theater which is used for student productions and other events. College-bound students can take traditional survey courses in British and American literature, as well as electives like Pre-College Composition and Advanced Placement courses in English and American literatures. Creative Writing, Film Making and Science Fiction are also available.

Neither the department's course offerings not its stated philosophy makes any mention of the study of traditional grammar, which suggests the department's enlightened approach. Research for years has shown that there is no correlation—except possibly a negative one—between the study of formal grammar and improvement in writing, and the English department operates accordingly. "We try to reach all students through the various offerings, which also include English as a Second Language and Developmental Reading," says Angela Durkin, a member of the department since 1977. "We teach writing by having students write, not by memorizing rules." In the past four years Fenton students have won five awards in the national writing contests sponsored by the National Council of Teachers of English. "Those were advanced students, of course," says Durkin, "but we try to give everyone, college-bound or not, a lot of chances to write."

College-bound or not, all Fenton students are served by the office of Pupil Personnel Services, headed by Gloria Harrington. Harrington's staff includes five counselors, a social worker, a nurse and a full-time psychologist. Their facilities include a Guidance Information System, from which students can gain essential information about specific colleges and careers. "They can punch a career into the computer, for example, and get a reading of the starting salaries, educational prerequisites, long-range potential and other factors," says Harrington. "Or they can get a printout on any of hundreds of colleges and find out immediately about financial aid, admissions standards, deadlines for applications and things like that. Next year, we'll be subscribing to a more sophisticated system that will cost a bit more. But then a student will be able to punch in her anticipated financial picture, her test scores, interests, even the kind of climate she'd like, and then get printouts of the schools that fit her requirements."

Harrington's staff also supervises students who take part in the programs offered by the DuPage Area Vocational Education Authority (DAVEA), a 15-district consortium that provides students in the region with more sophisticated opportunities for vocational education than they can find in their own buildings. DAVEA programs include courses like Dental Assisting, Ornamental Horticultural, Data Entry Occupations and Aviation Maintenance Technology.

Using funds from a recent grant for the education of gifted students, Harrington has planned a series of enrichment programs which began in the 1985 spring semester. During that term 69 of the students identified as gifted at Fenton chose to participate in a program on the performing arts. They met a couple of times each week. They made field trips to important cultural locations, like the Goodman Theater in Chicago, where they saw a play and then went backstage to talk with actors and others involved in the production. Members of a dance troupe came to the Fenton campus for demonstrations and discussions, and the students also met musicians from the Chicago Symphony. "In the fall, we'll have a bit different clientele because the general topic will be math and science. Next spring the subject will be Chicago. A lot of these students, believe it or not, never get into the city. They have all kinds of stereotypes about it and don't even think of it as a place to look for work. We plan to travel a main street—Halsted or Western or Clark—from end to end, looking at the neighborhoods. We'll study the architecture there and have visits from architects and historians."

But Fenton students need not be in the gifted program to study architecture. They may take a two-course sequence in Architectural Drafting in the industrial arts department, which offers over 20 courses in eight different areas. "We look on it as general education, not vocational education," says Alex Georgas, who has taught auto mechanics, carpentry, and machine courses in his 25 years at Fenton. "This is not a typical suburban school," says Georgas. "Almost half of our students take something in our department, and we like to think these are things they can use all their lives, even if they don't make a living from them." Once again, well-equipped facilities make the offerings attractive and effective. The photography area boasts a darkroom with 12 stations in it and equipment that makes professional-level work possible. There is a foundry, as well as areas for welding, carpentry and auto mechanics, and well-stocked drafting and electronics classrooms. "All of them want to go to college when they're freshmen, even though this is kind of a blue-collar community," says Georgas. "But after they see what's available and find out what they like and what they're good at, many of them realize they might have a future in a trade."

And if they're looking for other futures, Fenton students might even look to their own teachers as models, which is not always possible in these days of embarassingly low teacher salaries. While Fenton's faculty salaries aren't lavish, especially in light of the cost of living in the areas, they are respectable enough so that the district's teachers feel they are getting some reward for their effort and credentials. About 75 of the 100 faculty have master's degrees, according to Herren. "The average faculty salary is around $32,000," he says, "and four or five make something like $45,000 a year when you add in coaching and extra days they might work in the summer." The starting salary for a B.A. with no experience is $17,500; for a beginning M.A., $19,250. After 17 years, a teacher with a M.A. plus 45 credit hours earns $38,500, according to the 1984-85 salary schedule. A few administrators earn more than $50,000 per year.

Generous pay scales help, of course, to attract highly qualified faculty. But they alone would not insure good morale and commitment among teachers. Administrators can set a tone for a school, and many at Fenton credit Herren for the upbeat spirit that seems to prevail in the halls and classrooms. Herren, who began as a chemistry teacher, first in Aurora, then at Bremen High School in south suburban Midlothian, has been the Fenton superintendent for two years. After his stint at Bremen, he served as counselor and assistant principal at Lyons Township in LaGrange for nine years before coming to Fenton as principal in 1974. When he walks the halls, students say "hi" to him easily; more importantly, he returns their greetings, seeming to know them all by name. His administrative staff, including Principal Alf Logan, Assistant Principal Larry Brandes and Business Manager Roy Doll, interact with him casually and frankly. When he goes to the cafeteria, he chats easily with faculty, speculating about the Chicago Cubs, about Fenton's athletic teams and reminiscing about a field trip he took with a social studies class to the Cook County Jail. His style sets a tone that may help Fenton as much as its substantial financial base, but Herren knows that decent salaries and first-rate facilities make his job much easier. "Sometimes it doesn't seem fair that we can offer so much while other districts are so strapped," he says. "It would be nice if every high school could offer what we can offer, but right now that doesn't seem possible."

That feeling raises a number of questions about quality and equity in Illinois public education. Clearly, Fenton is an attractive place in which to teach and learn. Decently paid teachers work in well-equipped facilities to offer students an imposing array of options and opportunities. The students seem to respond. When you look into classrooms, you see, for the most part, students involved and attentive, perhaps because they're in classes they've chosen to take, rather than ones they must be in. The halls look clean and orderly, though not repressively so. "There's not much graffiti here," says Herren, "partly because the kids don't do much of it, and partly because we paint it right over before it encourages someone else." A disciplinary system which moves systematically from warnings through more serious punishments while yet remaining flexible seems to keep unruliness in check. A policy that prohibits students from leaving campus for lunch reduces truancy and tardiness, says Herren. The student body, predominantly white with only a scattering of Hispanics, blacks and Asians, seems cheerful and lively. Larry Brandes, the assistant principal who is in charge of student activities and organizations, feels that students' pride in themselves and in the school has grown in recent years. "I sense a real anti-drug attitude among the students," he says. "And they've really getting back into the value of hard work, sports, academics and positive school spirit."

The questions raised by a visit to Fenton are fundamental: Would it be possible to provide the same kinds of opportunities for all Illinois high school students? Doesn't it seem right to try? How could we do it? What would it cost? What is the price, in missed changes and unmet needs, if we don't? Who would have the courage to propose it?

Alex Georgas may be right when he says that Fenton "is not a typical suburban school." Ah, but wouldn't it be nice if it were a typical Illinois school?●

LEGISLATION FOR UNINCORPORATED FARMERS

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MORRISON of Washington. Mr. Speaker, today I am introducing legislation along with 21 of my colleagues designed to offer this Nation's farmers a tax incentive for contributing surplus, or damaged food commodities to nonprofit, charitable organizations for distribution to the poor and needy.

This legislation simply restores a tax incentive that farmers had until 1969 and one that Congress restored for corporations, but not individuals in 1976. I want to restore equity to the majority of farmers who are not incorporated, but who donate their crops to charitable organizations. Last year, in the State of Washington, State food banks received 2.5 million pounds of produce, worth $1.25 million through a unique volunteer gleaning network. It is my belief that providing nonincorporated donors with a 10-percent tax credit for their gifts would increase those donations considerably.

Farmers donate the food because 20 to 40 percent of some crops often aren't marketable to the American consumer. But these products are perfectly edible and can help feed the hungry. It seems only natural that in these times of budget constraints that alternatives to meeting the basic food needs of our citizens be found. The gleaning approach provides one such alternative.

In my own State of Washington, there is a statewide, year-round gleaning operation. The two cornerstones to its success are transportation and communication. The director of the project receives word that a surplus commodity is available from a farmer, shipper or packer. Transportation is arranged through both private distributors and military units. Then a call is made to local food banks to offer the food for distribution.

Prior to the 1969 Tax Reform Act, the general rule was that a taxpayer who contributed crops to charity was able to deduct the fair market value of the property at the time of the gift. The charitable deduction resulted in an incentive for some taxpayers in high marginal tax brackets to donate rather than to sell the crop.

The 1969 Tax Reform Act allowed the farmer to deduct only the cost incurred in producing the dontated crop. This rule not only eliminated the abuse mentioned above, but also greatly reduced contributions of appreciated property to charitable organizations. In 1976, the Senate Finance Committee concluded that:

> It is desirable to provide a greater tax incentive than in present law for contributions of certain types of ordinary income property which the donee charity uses in the performance of its exempt purpose.

The Tax Reform Act of 1976, through a complicated formula, allowed for a tax incentive for corporate donors but not for individual farmers who wish to contribute gleaned crops. It has been estimated that only 1.7 percent of all farms are incorporated, so the majority of farmers are unable to utilize the 1976 act. Unlike the incorporated farmer who can fully deduct their costs and a significant portion of the appreciation in his crop, the individual farmer is left with no financial incentive to contribute unmarketable crops.

This legislation only provides nonincorporated donors with the same incentive already provided his corporate colleagues. This will provide the needed stimulus for farmers to participate in a gleaning effort on an even larger scale, making it possible to feed

a greater number of hungry people. I urge my colleagues to give this gleaning bill their careful attention and active support.●

A SELF-POLICING PROGRAM THAT'S WORKING

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MARLENEE. Mr. Speaker, recent efforts to curb military waste, mismanagement, and fraud by Malmstrom Air Force Base in Great Falls, MT, are proving to be a tremendous success. Everyone at Malmstrom deserves our hearty salutes.

In addition to these efforts, Malstrom should also be commended for their reduction in energy use; they are the lowest among SAC facilities with a 33-percent cut in the last 10 years.

While I understand that all areas of the military budget are not mismanaged, I cannot stress enough the importance of continuing our focus on stopping wasteful practices.

I urge and challenge all U.S. military bases to show the same professionalism and dedication as Malmstrom.

I submit to my colleagues a laudable editorial from the July 6 edition of the Great Falls (MT) Tribune.

MALMSTROM DESERVES APPLAUSE FOR PROGRAMS THAT HALT WASTE

Discovery at Malmstrom Air Force Base that the Air Force was paying $190 for a clamp used on missile wings—even though overpriced by $185—just doesn't have that same gasping notoriety as some other more publicized Pentagon purchases, including $640 toilet seat covers, $44 lightbulbs, $7,622 coffee makers or $180 flashlights.

After all, we've all bought considerably cheaper light bulbs, flashlights and coffee makers, and have a good guess what a toilet seat cover should cost.

But the fact that the incidents of waste or overpricing uncovered by Malmstrom personnel are not dramatic enough to be used in gag lines by Johnny Carson or in attacks on military spending by such Pentagon critics as Montana Sen. John Melcher does not mean they're not important.

Col. Bruce Harger, 341st Strategic Missile Wing vice commander, recently told the Tribune about Malmstrom programs to catch waste, fraud and overpricing. He listed several successes, including the $190 clamp, uncovered after a staff sergeant's complaint. The investigation bore fruit: the Air Force will save an estimated $18,000 a year and the sergeant received a $1,300 reward.

Other claims of overpricing are being reviewed, as is a complaint that a firm overcharged Malmstrom $100,000 last year for contracted services.

Harger stressed that most of Malmstrom's parts come from out-of-state military depots, so local merchants rarely are involved in overpricing investigations.

Air Force personnel are encouraged to report what they think is fraud or overpricing, but most complaints of overpricing are determined after investigation to be unfounded, he said. One reason is that the Air Force sometimes must pay a higher price for what seems a mundane hardware-store item to get special reliability needed in missile maintenance.

Malmstrom should be commended for its efforts at cost-saving. It also has reduced its energy use by 33 percent since 1975—lowest among all SAC facilities. Also due for praise are the Air Force and the entire Pentagon, which claims to have saved $500 million last year through more efficient acquisition of spare parts.

There's even something to the argument made by the military that—although it is usually military programs that uncover fraud and overpricing—it is the military that is made the whipping boy, with politicians and the press citing the expensive coffee pots and toilet seat covers as examples of how the military budget is bloated and can be cut without damaging American security.

It's an oversimplification to jump to conclusions about the entire Pentagon budget from a few overpriced items, although the revelations of major military supply companies improperly writing off thousands of dollars of campaign contributions as part of their defense contracts are troubling.

But it also is an oversimplification for defense advocates to imply that all major weapons expenditures are sacrosanct and absolutely necessary to U.S. security.

In summary, we applaud the military's internal uncovering of waste and fraud and encourage that such programs be continued with full funding.●

TAX REFORM'S STING IN PUERTO RICO

HON. JAIME B. FUSTER

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FUSTER. Mr. Speaker, a few days ago, the New York Times editorialized again regarding the effects on Puerto Rico of the tax reform which the Congress is currently considering. This time the New York Times editorial highlights not only the grave economic damage to the island that will result from the proposed repeal of IRS section 936, but also some of the political costs which such repeal would have.

I believe the July 20, 1985, editorial should be considered by all those that will be deciding on tax reform, so I request that it be inserted in the CONGRESSIONAL RECORD.

[From the New York Times, July 20, 1985]

TAX REFORM'S STING IN PUERTO RICO

Some major bad news for Puerto Rico has stirred too little concern in Washington. The resource-poor but labor-rich island has benefited for decades from a special tax provision that generated half its manufacturing jobs. So Puerto Ricans were stunned to find the Treasury proposing its instant elimination as part of tax reform. Now President Reagan offers what looks like a compromise but isn't: the benefit would be phased out in five years, to be replaced by a gimmicky wage credit.

The argument concerns Section 936 of the Internal Revenue Code, adopted in 1979 but rooted in longstanding practice. It excuses U.S. corporations from Federal taxes on earnings they repatriate from Puerto Rico. The Treasury complains it costs as much as $1.7 billion a year and that the benefits go not to mass employers but to capital-intensive industries, like pharmaceuticals.

The Treasury seems to assume that those businesses would remain in its jurisdiction. Experience argues they will move elsewhere, probably Asia. And every job thus lost in Puerto Rico will cost yet another in its service industries.

The Treasury also complains that the incentives system is cumbersome. The benefiting corporations seem to have no trouble understanding; 23 of them want to expand the idea by establishing "twin plants" that employ skilled labor in Puerto Rico and less-skilled labor in other Caribbean countries. That is now possible under President Reagan's Caribbean Basin Initiative, provided Section 936 survives.

In its place, the Treasury suggests wage credits, an accountant's nightmare. Companies would gain a credit against taxes equal to 60 percent of wages below the Federal minimum, plus 20 percent above the minimum, limited to four times the minimum. So much for simplicity.

There is also a political cost to this tampering. Puerto Ricans rightly believe they are owed their benefit under the compact that proclaimed them a commonwealth. Instead of statehood and a vote in Congress it gave them home rule and Federal tax relief. That compact should not be lightly or unilaterally altered.●

ST. PAUL-RAMSEY MEDICAL CENTER HONORED FOR HEARING IMPAIRED HEALTH AND WELLNESS PROGRAM

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. VENTO. Mr. Speaker, throughout their lives, individuals who have hearing impairments may become frustrated and isolated by their disability. A serious barrier to learning and socializing, hearing impairment can cause serious psychological repercussions, as well. Although nearly 7 percent of all Americans have hearing impairments, mental health services designed to meet the needs of the hearing impaired are limited.

Until 1975, such services were nonexistent in St. Paul, MN. That year, the Department of Psychiatry at the St. Paul-Ramsey Medical Center began collaborating with 26 agencies and organizations to establish a comprehensive network of mental health services for the hearing impaired. The result was the creation of the Hearing Impaired and Wellness Program at St. Paul-Ramsey Medical Center.

Recently, this innovative program was selected for special honor and recognition by the American Psychiatric Association at its 36th Annual Institute on Hospital and Community Psychiatry. Chosen from among 134 applicants, St. Paul-Ramsey Medical Center

received an award of significant achievement recognizing its outstanding efforts in serving the mental health needs of the hearing impaired. Furthermore, the Hearing Impaired and Wellness Program at St. Paul-Ramsey has served as a model for the establishment of similar programs at other hospitals around the Nation. The selection of St. Paul-Ramsey Medical Center for recognition of its program for the hearing impaired is especially significant in light of extensive and impressive competition as well as lengthy site visits and interviews by members of the American Psychiatric Association, the medical specialty society representing over 30,000 psychiatrists nationwide.

Mr. Speaker, I commend the St. Paul-Ramsey Medical Center for its outstanding Hearing Impaired and Wellness Program and for its exemplary commitment to the mental health needs of the hearing impaired. Hopefully, this innovative program will be duplicated in other hospitals across the country which serve those with hearing impairments.●

A TRIBUTE TO CARL CLEMENS

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MANTON. Mr. Speaker, it is my privilege to call to the attention of my colleagues the contributions made by Carl Clemens to his community, Ridgewood; to the county of Queens; and to the city of New York.

Carl Clemens is president and publisher of the Ridgewood Times, a weekly newspaper which has been in continuous publication since 1908, serving the Queens communities of Ridgewood, Glendale, Maspeth, and Middle Village. Carl Clemens joined the Ridgewood Times in 1920 at the age of 15, while a student at the Queensboro Business Institute. The institute placed him there on a temporary basis. However, Mr. Clemens exhibited such energy and dedication that George Schubel, the founder and publisher of the Times, kept him on and he eventually assumed management of the paper.

Carl Clemens has been part of every improvement in the communities he serves. His recollections include the first library built in the area, the first subway line brought in, the first bus service made available, the building of the Interborough Parkway and the Long Island Expressway, the establishment of the YMCA, the opening of the first high school in Ridgewood, the formation of the Community Boards, the reconstruction of Myrtle Avenue, the restoration of the Onderdonk House, and the designation of parts of Ridgewood as the country's largest historic district.

In January of 1985, in recognition of the contributions made by Carl Clemens during his long and distinguished career, Mayor Edward I. Koch signed a bill passed by the city council officially designating the triangle on Cornelia Street a Myrtle and Cypress Avenues as "Carl Clemens Triangle." In his remarks at the signing ceremony, Mayor Koch said, "Carl Clemens has been a lifetime New Yorker, and has worked continuously for the betterment of the quality of life for its inhabitants. His life is truly a success story and he deserves the praise we give him today."

Carl Clemens is a member of numerous civic and fraternal associations, and served as Commissioner of Public Events under Mayor John V. Lindsay in the late 1960's. In addition to his many civic affiliations, Mr. Clemens is also an active member of Community Board 5. Now 80 years of age, Mr. Clemens can be found daily at his desk at the Ridgewood Times, making his unique contribution to the paper and the community.

Mr. Speaker, one of the great rewards of my years in public office has been the opportunity to work with Carl Clemens. Carl Clemens has never failed to be in the forefront of the fight for a better life for his communities. I have always enjoyed working with Carl Clemens on behalf of the people in his area, and I look forward to many more years of fighting at his side for progress and prosperity.●

CLEVELAND'S "SHOES FOR KIDS" CAMPAIGN

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Ms. OAKAR. Mr. Speaker, on Thursday, August 1, 1985, the Shoes for Kids Program in Cleveland will launch its 1985 campaign with a continental breakfast at the Sheraton in Beachwood. All of the money raised for the campaign is used to buy clothes for needy schoolchildren, so that everyone attending will pay for their own breakfast. This year's goal is to raise $125,000.

Shoes for Kids started in 1969, when Mr. Morrie Sayre, board member of the Metropolitan Branch of the Cleveland YMCA learned through firsthand experience that there were children in Cleveland who were not attending school because they did not have shoes to wear during the bitter winter months. His response was to begin a campaign to organize enough shoes for every needy child and the Shoes for Kids project under the auspices of the YMCA began. The YMCA provides 501(c) status and serves as a fiscal agent for the project.

Over the past 16 years, the Shoes for Kids project has evolved from a 3,000 pair used shoes collection and repair effort to an activity with Cleveland and suburban impact. Thousands of dollars worth of shoes, hats, socks, mittens, boots, underwear, and other apparel are purchased at wholesale prices or lower, and distributed to Cleveland area elementary school-age children with the cooperation and assistance of Cleveland public school and volunteer personnel.

Mr. Morrie Sayre, a businessman and YMCA branch board member and past chairman, serves as the general chairman, personally supervising the Shoes for Kids project. This entails soliciting funds and other donations, the purchase of shoes and clothing, publicity and coordination of distribution throughout the entire Cleveland area. Irving B. Fine and Albert Ratner, two prominent Cleveland area citizens, assist Mr. Sayre as cochairmen.

The Greater Cleveland Shoes for Kids project, deserves the support of the entire community. Its many participants and supporters deserve commendation for their civic-mindedness and generosity.●

THE 50TH ANNIVERSARY OF SOCIAL SECURITY

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. CONTE. Mr. Speaker, I rise today to commemorate the 50th anniversary of one of the truly seminal events in our Nation's history, the enactment of the Social Security Act. The Social Security Act represents the most basic fulfillment of our social contract: that Americans should work hard and proud for their Nation, and that these Americans in turn will sleep well with the knowledge that they will have the means to survive when they become older. Yet Social Security is no handout. For the last 50 years, when older Americans have received Social Security benefits, they have done so with pride, as they have toiled long and hard to receive the money they contributed to the system for all their working years.

When President Franklin Delano Roosevelt signed the Social Security Act into law on August 19, 1935, he did so to recognize the salient changes occurring in American society. America was no longer the rural society it once was, whose older and disabled citizens could live with children and relatives as they grew older. America of 1935 found unprecedented numbers living in cities, industrial workers whose families were often hundreds of miles

away, with little hope for any future after they were retired or became disabled. Social Security allowed people to contribute to their future, and not live in mortal fear of disability, or being left alone in poverty in their golden years.

In the past 50 years we have witnessed great changes in the Social Security system, each step intended to bring the reality of a secure society closer to all. When first enacted, the Social Security package applied to only a very few workers. Yet Americans soon realized the necessity of expanding the people covered under the system's safety net. By the mid-1950's, virtually all American workers were contributing and planning their futures around the promise of Social Security benefits. The numbers of workers covered was further expanded when the maximum taxable earnings base was lowered, allowing even greater numbers to contribute to Social Security.

In the 1960's many other important changes were implemented in Social Security. Earlier benefits to widows, early retirement, and Medicare were all instituted to expand the size of our society's safety net. By the dawn of the 1970's, Social Security benefits were raised in accordance with the inflation rate, to prevent a retired person's earned benefits from being eroded away by inflation.

I also want to honor those who have worked in the Social Security district offices for the past 50 years. These workers have devoted their lives to transforming Social Security legislation from theory and putting it into practice. These workers often provide the most common interface between the Government and its people, and we cannot commemorate Social Security without thanking the excellent workers who provide these crucial services.

Today, too much of what we hear about Social Security centers around its financial problems. Pessimists will insist on the impending demise of Social Security, claiming that demographics and other factors have sapped the fund of its fiscal livelihood. Yet these pessimists and predictors of doom fail to account for the desire and will of the American people to maintain a basic guarantee of safety and security for all Americans. Social Security stems from the core of the American spirit. It grew from the suffering of the Depression, and now provides the basic measure of safety and financial solvency to all Americans. I salute 50 years of a secure society, achieved through Social Security.●

SUPPORT SUPERFUND REAUTHORIZATION

HON. FRED J. ECKERT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. ECKERT of New York. Mr. Speaker, H.R. 2817 sets up a responsible and effective program for cleaning up hazardous waste. I shall support it. Superfund is very important to the people in my district and throughout western New York.

There is currently one national priorities list site in my district and a second will be placed on the list shortly. The adjoining congressional district has the famous Love Canal site.

Superfund is also very important to the people in my district who are employed by numerous chemical producing and using businesses. For example, I want to ensure that none of the approximately 60,000 persons employed by Eastman Kodak, the 900 persons employed by Du Pont, the 475 persons employed by 3-M, the 150 persons employed by Jones Chemical Co., or the hundreds of other persons employed by chemical using or producing businesses in my district are thrown out of work as a result of being taxed out of business, regulated to the point of losing their competitive edge, or having their important trade secrets opened up to their foreign or domestic competitors.

We need a clean environment. I am committed to a clean environment and reauthorization of Superfund. I am also committed to protecting the jobs of the thousands of people working in the Greater Rochester Area in these important industries which have helped to create a quality of life which a recently prepared study for the U.S. Environmental Protection Agency ranked Rochester third in the Nation, the only community east of the Mississippi River so acclaimed, for outstanding quality of life in economic, political, environmental, health, education, and social components of urban living.

This bill is a bipartisan effort that strikes a balance between the need to continue full economic growth and employment and the need to keep the environment in as clean a state as possible. I have some reservations about the bill, including the provision that calls for a spending level of $10 billion—a sum which exceeds what the EPA says it can effectively spend. On the positive side, I find that the taxing provisions are more broad based and designed to provide the funds necessary to move ahead with the cleanup without penalizing a very few industries.

The bill accomplishes six very important things.

First, the bill establishes a schedule for cleanup by requiring the EPA Administrator to initiate remedial investigation and feasibility studies [RI/FS] at 150 sites a year, and to start remedial action at 90 percent of these sites within 12 months of completing the RI/FS's.

Second, the bill establishes cleanup standards at national priority list sites.

Third, the bill allows citizens to become involved in the Superfund process by allowing them to participate in the selection of the cleanup plan, sue the Administrator of EPA if he fails to perform a required act, or to sue individuals or corporations who violate the regulations established under the bill.

Fourth, the bill insures the protection of the community by establishing a workable community right to know plan that will provide those involved in responding to emergency situations the information to carry out their responsibilities.

Fifth, the bill emphasizes the cleanup of sites over litigation, while still providing citizens new rights to sue in order to enforce the law.

Sixth, the bill provides for adequate contractor cleanup by reducing the exposure to liability except in those cases where contractors willfully or negligently carry out their duties under the law.

The bottom line is a bill that is a bipartisan consensus that reflects the give and take of the legislative process, a bill that moves the cleanup of hazardous waste sites forward without costing thousands of people their jobs. I would urge my colleagues to support the compromise.●

WHAT IS A FARMER

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. STALLINGS. Mr. Speaker, today I would like to focus briefly on the plight of the American farmer. Many people argue that there is not an actual crisis on the American farm, or that the farmer is so inefficient he deserves the current credit crunch. I do not support either school of thought. I strongly believe that the American farmer is the most efficient producer in the world, and also worthy of our deep concern. I do not believe that the Federal Government should give the farmer a blank check or that the farmers are asking for handouts. The American farmer is merely looking to maintain a way of life which has made this Nation strong.

Ted Meyer, a farmer from Kendrick, ID, recently sent me the following poem about the plight of the farmer. I found the poem simple yet profound. The American farmer truly plants in

hope, cultivates in faith, and ends in debt.

WHAT IS A FARMER?

A farmer is a man who wears out two pairs of overalls growing enough cotton for one.

A farmer starts every year with nothing, loses everything he grows, and at the end of the year comes out even.

Planting time and harvest season, he finishes his 40-hour week by Tuesday noon—then puts in another 72 hours.

He loads his planter with $1,500 worth of seeds, fertilizer, herbicides and insecticides. That is one hour's worth.

In a normal farm afternoon (1 to 10 p.m.) he well bury $13,500 in the ground.

Odds are it will get too wet or too dry, or there will be hail, wind, early frost, bugs, brickbats, or bureaucrats.

And, if he gets a good crop, he still won't meet expenses.

He buries last year's disappointments with this spring's plowing.

And, so he plants in hope, cultivates in faith, and ends in debt—and then starts all over again.●

SUPPORT FOR MEDICAL EDUCATION IS SUPPORT FOR PATIENT CARE

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FEIGHAN. Mr. Speaker, after a decade of high-paced inflation in medical costs, the Federal Government has moved decisively over the last several years to curb health care expenditures and to promote greater efficiency in the delivery of medical services. Sharp reductions in the medical inflation rate are welcome signs that this policy has already begun to have some success.

But as we continue to pursue efforts at cost containment, we should not lose sight of two other aims that ought to remain fundamental to America's health care policy: humane care and broad access. The same technological revolution in medical procedures that has pushed up the cost of medical care has also accelerated specialization in the health professions. Doctors have been called upon to master increasingly narrow and complex techniques, while nurses have assumed a number of roles formerly held by physicians. If the quality of patient care is to be maintained through this transformation, then the Federal Government must help prepare nurses for their more extensive doctoring roles while encouraging a healthy supply of physicians committed to general patient services. Two bills passed by us last week would achieve these goals by reauthorizing assistance for a number of educational programs in the health professions. They deserve support from both sides of the aisle.

The Nurse Education Act would provide grants to support advanced nurse training as well as programs for nurse midwives, nurse anesthetists, and nurse practitioners. The Health Professions Education Assistance Act would reauthorize the Health Education Assistance Loan [HEAL] and Health Professions Student Loan [HPSL] Programs and provide assistance to family medicine and general dentistry curricula. Both bills would promote the recruitment of minority and disadvantaged students seeking careers in the health professions.

The technological push to specialization in the health professions has been amplified by economic forces. Cuts in Medicaid, the revamping of the Medicare reimbursement system, and pressures from the growing for-profit hospital sector have put the financial squeeze on many of our country's teaching hospitals. The costs of medical, dental, and nurse training have thus skyrocketed, and the financial incentives for specialization have increased accordingly. The bills before us last week would help ease some of these pressures. By increasing the supply of primary care practitioners—both nurses and doctors—by improving the geographical distribution of medical personnel and by fostering opportunities for disadvantaged students in the health professions, the bills would enrich the quality of American medicine while assuring a more equitable distribution of its benefits.●

OHIO BAND REPRESENTS UNITED STATES ABROAD

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. TRAFICANT. Mr. Speaker, I rise today to salute the Warren Junior Military Band of Mahoning County in Ohio because they have been selected as the official U.S. band to host the opening ceremonies of the International Youth Festival in Zurich, Switzerland. The Warren Junior Military Band is comprised of 116 talented young men and women who together form the best band in the land.

Because of their accomplished reputation and impeccable competition record, the Warren Junior Military Band has been chosen to spend the summer touring Europe and representing the United States in competition. The band is performing in Innsbruck, Austria; Salzburg, Munich, and Strasburg, Germany; Paris, France; and Brussels, Belgium, during the month of July 1985.

The Warren Junior Military Band was formed in 1927 in Trumbull and Mahoning Valley area of northeastern Ohio, and the band has been successful in competition ever since its formation, winning 20 national championships, 11 Canadian championships, and numerous other State and local awards.

The current band owes much of its success to the renowned director, Donald W. Hurrelbrink, who was awarded the Nation's highest award in 1973, the George Washington Award. Under the direction of Hurrelbrink, the Warren Junior Military Band has traveled from the east coast to Hawaii and from Canada to the Gulf of Mexico performing at countless events for an impressive list of dignitaries, Presidents, and Prime Ministers. They have toured Europe as goodwill ambassadors and have performed in competition, concerts, field shows, and parades such as the Macy's, Hudson's, and Gimbel's Thanksgiving Day Parades; Orange Bowl Parade; the Indy and Cleveland "500" Parades; and the Hall of Fame Parade. In 1983, the Warren Junior Military Band was the grand champion at the Flags of Freedom competition in Sun Prairie, WI. And in 1984, the band was the overall champion in the Falling Leaves Festival in Salamanca, NY.

The accomplishments of the Warren Junior Military Band speak highly of the dedication of the young men and women who have contributed to the band's success by developing their talents, and the band currently has over 5,000 alumni. The band's representation of the United States in foreign lands is worthy of pride at home in the 17th District of Ohio and the United States of America. We in Congress should remain aware of those institutions in our home districts that reinforce American pride and spirit, and the Warren Junior Military Band has been a source of community pride and spirit since its early formation in the first half of the century.●

TRIBUTE TO JOHN BISHOP, JR.

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. SHELBY. Mr. Speaker, I would like to share with my colleagues in the House of Representatives a delightful story that appeared in the July issue of Alabama magazine, written by Joanna C. Hutt.

It is a wonderful account about Mr. John Bishop, Jr., and his famous Dreamland barbeque. Following is the enjoyable story:

For a heap of folks, from California to New York, the search for the best barbecue—ribs only—ends at Dreamland Drive Inn. Here amidst the neo-neon beer-sign decor, the menu offers beer, white bread, and ribs—hence the famous rib sandwich.

Don't look for delicious side dishes. There's no slaw, french fries, baked beans, anything. Not even knives and forks. Just the ingredients for what John Bishop Jr. calls an inside picnic—beer, white bread, and ribs only.

Then why do people like Joe Namath, Ray Perkins, a Russian poet visiting the University of Alabama, a New York women's soccer team, Bart Starr, and hordes of people you haven't heard of keep coming back?

It's the ribs only.

"So, what's the secret?" which is the first question for any good barbecue joint. According to Dreamland's mountainous owner, John Bishop Sr., known affectionately to his regular customers as Big Daddy, "Well, first one thing an' another."

Bending only slightly to persistent questions, Bishop goes on in his rich black dialect, as rich as those slabs on the pit. "Some people say the sauce makes it, but the sauce is just a part. It's the wood. I use just hickory. It's in the fire. It's in the cookin'. It's in the sauce. And it's in the brains."

He fires up his pits early, and experience tells him when the temperature is just right. He choose his ribs carefully. "I'll tell you somethin' about me. I like things did right. And not everybody has good teeth. You can pull out your dentures an' eat my ribs."

The sauce, explains Bishop, has to do justice on the ribs. He started working on his recipe back in 1958 when he built the cement block building and started up the fires. He experimented for about eight months. He admits he changed it one time, but when a customer confronted him about the difference, he went back to his original creation.

Rumor has it that he adds a touch of turnip greens to his sauce, but Bishop will neither confirm or deny.

Bishop has been approached about bottling his sauce and selling it, but he says he'll wait on that a while.

Dreamland is not the easiest place to find, but lots of people have followed their noses and had no trouble. If you're in the Tuscaloosa area going east on highway 82, go through McFarland intersection and turn left on Jug Factory Road (just past McDonald's) into Jerusalem Heights. Wind around until you get to a fork in the road. Do what it says, and you can't miss it.

I am honored to be able to share this delightful story with my colleagues in the House. I always enjoy going home to Tuscaloosa and eating at Dreamland. It is barbecue at its finest, and I certainly wish Mr. Bishop the very best in all his future endeavors.●

END COLD WAR AGAINST CUBA

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. WEISS. Mr. Speaker, Dr. Wayne S. Smith, a career Foreign Service officer from 1958 until 1982 and currently an adjunct professor of Latin American studies at the Johns Hopkins University, recently gave an address before the Humanist Society of Metropolitan New York. The speech, entitled "Let's End the Cold War Against Cuba," was made to an audience which included diplomats from the United Nations. The following is a report of his speech by Prof. James Aronson, which appeared in the May newsletter of the Humanist Society of Metropolitan New York. I am sharing this article with my colleagues because I strongly believe it is in the national interest of the United States to improve our relations with Cuba.

END COLD WAR AGAINST CUBA

(By James Aronson)

In a sharp rebuke to the government of the United States for its "policy of confrontation" toward Cuba, a former chief advisor to the State Department on Cuban affairs urged the government to return to a "policy of diplomacy" and make its mission one of "encouraging a more stable world situation under the rule of law."

The criticism was leveled by Dr. Wayne S. Smith, a Foreign Service career officer from 1958 to 1982, when he resigned because of differences with the foreign policy of the Reagan Administration. Dr. Smith served as chief of the U.S. Interest Section in Havana from 1979 to 1982. He is at present a professor of Latin American studies at Johns Hopkins University. He spoke at the monthly Humanist Dialogue meeting of the Humanist Society of Metropolitan New York on April 15, on the subject, "Let's End the Cold War Against Cuba."

Dr. Smith ranged beyond Cuba in his analysis of U.S. foreign policy. "We behaved counter-productively in Angola," he said. "The U.S. was in Angola before the Cubans came in. We became involved in a stupid, inept military movement." He went on:

"We have learned nothing from the Bay of Pigs, nothing from Angola, and we are doing the same thing in Nicaragua. What is the objective? Is there to be no analysis ever? It is time we grew up as a nation and took our obligations seriously."

He was not optimistic, however, that the Reagan Administration would change its policy, and indicated that the "misinterpretation" of the facts of our involvement in the world's trouble areas would continue.

Dr. Smith said that Fidel Castro in the early stages of the Cuban revolution was "too determined to breathe fire in all directions," but that Castro had changed because he now believed "a dialogue with us is in his interests." It would be in the interests of the U.S. too, he said, because we could once again have access to Cuba's nickel, tobacco products and shellfish. But that was not the crucial element, he said: Dialogue with the Cubans could help achieve a solution in Central America too. "Conditions for accommodation between the two countries exist," Dr. Smith said, "and we should recognize that."

"Cuba is a Marxist-Leninist state and will remain one," he said. "It is an ally of the Soviet Union and is likely to remain one. We must accept the situation and begin a dialogue. Our present policy achieves absolutely nothing." He charged that the U.S. had rejected all overtures from Cuba while insisting that none had been made.

"Why this attitude?" he asked. "It is partly ideological—appeasing the Right. Cuba is declared to be the evilest part of the Evil Empire."

On the question of human rights, Dr. Smith said that it was "inconsistent to talk about human rights in Cuba when we ignored their violation elsewhere." Our policy, he said, has to do with the way the Administration projects the Soviet role in Central America. This, he said, forces our policy makers to misinterpret deliberately any Cuban overture. The fact is, he said, "there is never any response from the U.S. to Cuban overtures."

In a lively question period, Dr. Smith said that the U.S. had helped bring about the confusion and bitterness engendered by the Mariel migration of thousands of Cubans to the U.S. Beginning in 1979, he said, the Cubans had asked for talks on migration, just as they had initiated the talks on airplane hijacking; but the U.S. had refused, thus forcing the conditions governing the migrations from Mariel and their aftermath in the U.S. He said that the Cubans had begun in 1980 to seek talks, but that the Reagan Administration had dropped the whole thing, and "it took four years to get around to doing it."

Asked whether the Cubans were better off under Castro than under Fulgencio Batista, the last president, who fled to Portugal, Dr. Smith said that there had been obvious material and health gains since the revolution, but that there had also been "a heavy cost in freedom." "The judgment of history is still out," he said.

Reiterating his position that he saw little hope for immediate change in U.S. policy, he said: "The march of folly goes on. My sense is that anti-communism is the theology of our time."

Dr. Julius Manson chaired the meeting in place of Professor Richard Falk, who was called unexpectedly to Switzerland.●

QUALITY RENEWAL ACT OF 1985

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MOLINARI. Mr. Speaker, I commend the chairman and the ranking members of both the Public Works and Transportation Committee and the Subcommittee on Water Resources for their strong leadership in crafting this bill before us today and I urge my colleagues to support it. It is crucial that we reauthorize the Clean Water Act. This has, however, proven to be a difficult task due to the wide range of conflicting interests and priorities which must be addressed. The Water Quality Renewal Act of 1985 resolves many of those concerns as a practical and ambitious approach towards cleaning up and maintaining our Nation's waterways.

I am especially pleased to note that two amendments which I sponsored during consideration of the Clean Water Act last year are contained within this bill. Section 15 of the committee print prohibits the EPA Administrator from issuing any treatment works grants which are part of an approved areawide water quality plan required under section 208 of the Clean Water Act if that plan is not being implemented or developed and reasonable progress is being made towards its implementation.

The section 208 plan is an areawide, interstate waste treatment management plan, wherein States identify areas which have significant water quality problems as a result of urban-industrial discharges. The section 208 program is the only program aimed directly at identifying nonpoint source water pollution problems. Nonpoint sources contribute a major share of many serious pollutants to our waters. Effective execution of the section 208 plan could ultimately save moneys by investing in cost-effective treatment processes.

The other provision, section 17(c)(2) of the committee print, earmarks $2 million annually to the Interstate Sanitation Commission [ISC]. The ISC has been consistently underfinanced and as a consequence, has had to dramatically reduce some of its core activities. Among some of the activities which have slowed significantly or stopped altogether included: Sampling and analyzing the overall interstate waterbodies, inspecting and sampling public and private treatment plants, monitoring discharges and water conditions, and analysing toxics in effluents. The additional funding of $2 million is necessary to permit the ISC to resume the above activities at a fully effective level.

This provision is long overdue. The ISC plays a vital role in protecting the waters of the Greater New York-New Jersey-Connecticut Area. The funds provided in the legislation before us appropriately reflects the Commission's needs.

I am pleased to note that the committee amendment to H.R. 8, which will be offered on the floor and which was inserted in the July 16, 1985 CONGRESSIONAL RECORD, contains two additional provisions which I sponsored last year. One provision provides for continued and accelerated research into the harmful effect on human health and welfare caused by water pollutants, with particular emphasis on the bioaccumulation of pollutants within the indigenous aquatic population.

The current regulatory process places predominant significance on the pollution levels within a specific body of water. We need to refocus our attention on the effects of pollutants upon the indigenous population rather than simply examining the levels of pollutant concentrations within the water. This is a true test of the progress made by the Clean Water Act—whether the aquatic ecosystem has been restored and/or maintained.

The other provision within the committee amendment would include the term "leachate collection system" to the definition of point source discharge. A leachate collection system functions to collect leachate from groundwater or landfill. An EPA report listed approximately 400 landfill sites with degraded water quality due to leachate discharges. In my district alone, 4 million gallons of leachate are collected from a landfill on Staten Island and channeled daily into the water body separating New York and New Jersey. EPA has refused to require a discharge permit for the landfill claiming that it does not represent a point source. The intent of the Clean Water Act is to regulate all sources of pollutant discharge—there is no valid reason to exempt leachate collection systems from that regulatory net. This provision clarifies congressional intent by specifying leachate collections systems as a point source.

In closing, I again urge my colleagues to support quick passage of this strong and sensible reauthorization bill.●

DENY MOST-FAVORED-NATION STATUS TO ROMANIA

HON. PHILIP M. CRANE
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. CRANE. Mr. Speaker, today I am introducing a resolution to reject the President's request for a waiver under section 402 of the Trade Act of 1974, as amended. The purpose of this resolution is to deny renewal of most-favored-nation [MFN] trade status to the Socialist Republic of Romania.

Mr. Speaker, it is time for us to stop deceiving ourselves about the nature of the Romanian Government.

Since 1975, we have conducted trade with the Socialist Republic of Romania under the provisions of the Jackson-Vanik amendment to the Trade Act, which links the assignment of MFN status to the establishment of free and open emigration procedures. Time and time again, we have been presented with substantial evidence that the Romanian Government harasses and persecutes those who try to emigrate. Time and time again, President after President has chosen to overlook these violations of the basic principles of human rights and to accord the Romanians MFN status, citing Romanian "assurances" that progress would be made. Time and time again, these assurances turn out to be tragically empty promises.

Last May, our former Ambassador to Romania, David Funderburk, revealed the Romanian's latest dodge around the provisions of the Jackson-Vanik amendment. The Romanian Government has allowed our Embassy to be swamped with emigration applications. At first, we applauded. But later we learned that Romanian President Nicolae Ceausescu was merely trying to dispose of undesirable Romanian citizens unqualified for U.S. citizenship, much as Fidel Castro did with Cuban criminals in 1980. This is the type of negotiating strategy we've come to expect from the Romanian Government.

In addition to this gross violation of Jackson-Vanik we find that those citizens which are given emigration passports by the Romanian Government are termed traitors to their country and consequently are evicted from their homes, fired from their jobs, and denied food ration cards. Last April, Romania's leading dissident poet, Dorin Tudoran, began a hunger strike to protest his inability to obtain a passport from his government to emigrate. Shortly after he began his hunger strike, the Romanian Government cut off all written and telephone communication between him and the outside world. He was then apprehended by the government. No traces of him have been found since that time.

The late Senator Jackson's concern with free emigration reflected his deep commitment to the protection of all human rights, and the spirit of the Jackson-Vanik amendment speaks to the entire range of human rights issues. The most cursory examination of the abysmal Romanian record on human rights would reveal just how undeserving Romania is of MFN status.

The Romanian Government persists in its systematic persecution of the religious community. In recent years, at least seven clergymen have died during or following "questioning" by the authorities, the most recent case occurring only last year. In this case, a Catholic priest by the name of Geza Palffy was beaten by the Romanian secret police [the CIE], his liver crushed and kidneys shattered, for simply criticizing in his Christmas, 1983, sermon the policy of the Romanian Government not to allow Christmas Day to be a legal public holiday. It was recently discovered that the 20,000 Bibles which the Romanian Government so graciously allowed into the country were confiscated and recycled to make toilet paper. In addition, churches are being bulldozed, strict limitations placed on the number of students allowed into seminaries, and pastors denied licenses to preach in fast-growing congregations.

In the period in which Romania has enjoyed preferential trade status with the United States, the Romanian Government has attempted to silence critics of the regime. In July 1978 General Ion Pacepa, former deputy director of the CIE and special adviser to President Ceausescu, was instructed personally by Ceausescu to conduct secret assassinations by mailing plastic explosives to exiles critical of the Ceausescu regime. Pacepa refused and defected. Since his 1978 defection, he has been

the target of at least seven assassination attempts.

Paul Goma, the dissident writer expelled to France in 1977, was targeted for assassination in 1982. His would-be assassin, Matei Haiducu, revealed to the French secret service the details of his mission. In 1980, West Germany arrested a man who spied on Romanian emigrants for Romanian intelligence; in February 1981, parcel bombs were sent to the house of prominent Romanian exiles in Paris and Cologne, injuring two of them and a police bomb expert; in July 1981, Emil Georgescu, an outspoken Romanian program editor at Radio Free Europe was stabbed 22 times. Other Radio Free Europe personnel who have been beaten or targeted for assassination include Monica Lovinescu and Sergious Manoliu. Many more cases can be found during the period in which Romania has enjoyed MFN status.

It is interesting to note that Romania was the first country to send its airline to the Beirut airport after the United States called for an embargo of the airport which was the scene of the most recent terrorist act against the United States. Should we tolerate this blatant slap in our faces?

The abuse of religious rights, harassment of emigrant applicants, and assassination of critics of the regime continue unabated. Yet we decline to speak out forcefully.

To remain silent while these gross violations of fundamental human rights continue is unconscionable. To my mind, these abuses far outweigh the token gestures of cooperation with which the Romanian Government has been forthcoming. I cannot stand idly by while the Jackson-Vanik amendment becomes a dead letter. I ask my colleagues to join me in respectfully but firmly asking the President to withdraw his request to waive the imposition of section 402 penalties. Should he prove unresponsive, I ask you to support my resolution to disapprove his request for a waiver.●

RESPECT FOR ELDERLY—VIETNAMESE STYLE

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MRAZEK. Mr. Speaker, I think we can all agree that our perceptions of a given phenomenon can alter radically when viewed from a different perspective, and that an impartial observer often can shed new light on a set of circumstances that those of us close to a situation could never see.

These points were brought home to me recently in the form of the observations of a constituent who grew up in another land. The constituent, Hao Hoang of Port Washington, is Vietnamese. In the following passage, he gives a unique perspective of American society that we all could do well to consider, as he speaks directly to a part of our culture that is distinct from other lands. As Americans, we think of ourselves as a youthful society, an attitude which is not without its positive aspects. Yet, this same philosophy also can foster a dilemma in many of us as we consider the implications of old age on our families and, ultimately, ourselves.

I offer Hao Hoang's thoughts for the consideration of my colleagues and of the American people:

When I first came to the United States, I was shocked by what I heard about how old people are being treated in this country. I heard that an old man had been dead in his house for a week before his children knew what had happened. Old people are being put in care centers away from their homes. To me, care centers are not homes; Care Centers are places where old people are away from their grandchildren and other loved ones, and they feel rejected by their children. This was not how I used to see old people being treated in my country.

I remember when I was in Viet-Nam every new year, the first person my father took to visit was my dear old grandmother, who was living with my uncle. When all our relatives had arrived, my uncles and aunts, with my parents, each carried a cup of warm tea and walked toward my grandmother. They wished her a long life and good health. Then all her grandchildren, from the eldest to the youngest stood in line; each of us walked toward my grandmother and wished her a happy new year, and we would say things that lightened her heart. In reply, she wished us a brilliant future and a great career. This was what I used to see and remember. I used to think that being old was so rewarding, and how happy I would be to grow old.

My father had set a fine example to all his children. He had shown that old people like my grandmother need comfort, not loneliness. I will take care of my parents as they had once taken good care of theirs. It won't be a special thing to do, it will be a normal thing to do.

I want you to take a look at the world around you, it was made especially for you by the contributions of your elders. I want you to feel your heart, the blood that is pumping in your heart is as pure as your parents'. When you were born, a stranger to the world, you were not able to take care of yourself, who took care of you? Now, your parents are old, and unable to support themselves; it's your chance to take good care of them. It's not a matter of tradition, it's a matter of right. Is it right to take care of your own flesh and blood? The answer should naturally be yes.

You know, you are the one that will influence the next generation. I want you to set a fine example, to all your children, show them that you care for your parents emotionally and financially, show them you respect them. There may have been some rough times between your parents and you, but when you have finally grown, you should give and forgive.

I know I can do for my family alone, but if all in America set a fine example for their families, there will be no more bitter tears of loneliness. The problem of how to treat old people will be solved, and there will be a difference in our future.

For every action, there is a reaction. How you treat your parents will be how your children will treat you, and what your parents receive from you will be what you will receive from your children.●

REMEMBERING HIROSHIMA

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. WEISS. Mr. Speaker, 40 years ago last week, at a remote site in the New Mexico desert, the United States tested the world's first atomic bomb. Within a month, nuclear explosions would devastate Hiroshima and Nagasaki, and the war with Japan would end. Historians have often debated the link between the Japanese surrender and the use of the atomic bomb, and we will never know for sure how many American lives President Truman's decision saved. What we do know, however, is how many lives it cost. To see, as I did, the destruction at Hiroshima is to know that nuclear weapons must never again be used in war.

One concrete, practical step that the United States could take to reduce the likelihood of nuclear war is to renounce the first use of nuclear weapons. We already have a limited policy of no first use. In 1978, President Carter forswore the use of nuclear weapons against any nonnuclear nation, provided that that country was not being assisted in aggression by a nation that did possess such weapons. The Reagan administration has reaffirmed its commitment to this pledge.

It is time for this limited policy to be extended to total renunciation of the first use of nuclear weapons. Such a step is not only supported by three out of every four Americans; it also makes military sense. No one supports a strategic first strike. As former Secretary of Defense Robert McNamara recently noted in testimony before the House Committee on Foreign Affairs,

> It would be * * * reckless to attempt a disarming first strike. Nevertheless, the arms race is driven by deep-seated fears held by each side that the other has, or is seeking, the ability to execute just such a strike.

Adopting a policy of no first use would help to control those fears, and the resulting arms race that threatens us all.

Turning our attention to tactical nuclear weapons, we find that they are inherently uncontrollable, and NATO's continuing reliance upon them creates more problems than it solves. Because of their short range, such weapons must be deployed close to the front, where they are most likely to be overrun. Consequently, the authority to release them would prob-

ably have to be delegated to officers in the field, thus destroying the principle of civilian control. Many experts believe that the dispersal of nuclear weapons from their storage depots into the field would immediately provoke a preemptive attack by the adversary. Finally, the British Government's recent embarrassment over American assertions that they have agreed to accept deployment of the W88 nuclear artillery shell demonstrates that NATO's reliance upon nuclear weapons subjects the alliance to unnecessary stress.

Even the smallest nuclear weapon can cause extraordinary damage to lives and property, to civilians and combatants, and to friend and foe. Recently I had the privilege of meeting several Japanese hibakusha, or atomic bomb victims, who were visiting this country to press their plea for an end to the nuclear arms race. Nihan Hidankyo, the Japanese association of atomic bomb survivors, plans to send similar delegations to China, France, Britain, and the Soviet Union.

The testimony of the hibakusha confirms everything that we know about the horrific nature of nuclear war. Some describe the terrible physical destruction and the ghastly task of burying the dead and caring for the wounded. Others focus on the psychological effects of this horror. Among the latter is Shoji Sawada, now a professor of physics at Nagoya University, who described how his boyhood experiences at Hiroshima led to his persistent commitment to peace. I urge my collegues to read Professor Sawada's moving account, the text of which follows:

REMEMBERING HIROSHIMA

"I still hear my mother call my name"
"Get away from here, right now!"
"Forgive me, mother!"

This was the last conversation I had with my mother in the encroaching fire, and I still remember it very vividly even now, I lost my mother when the atomic bomb was dropped on Hiroshima. I was 13 and my mother was 36 years old.

When the bomb exploded, my mother and I were in the same room. Since I was sleeping in the room, I didn't see the flash of the bomb, nor was I aware that I was caught under the crushed house. Everything happened instantaneously. I struggled and wriggled in the piles of broken wood and plaster. At last I was able to crawl out of the piles. I stood up vacantly and found myself in a world of desolation which was filled with yellowish air. I could see small fires here and there.

I could not understand what was happening. Immediately, I heard mother call my name. Her voice seemed to be coming from far away, though I knew there was not much distance between me and her. So I inferred that the broken roofs and piles of crushed plaster prevented her voice from coming straight to me. My mother said her legs were caught in big beams or pillars, being unable to move. I tried to pull out the broken pillars and struggled to push up the plaster with all the power I had. But it was far beyond my ability. I called for help to adults in vain, because those wounded people could do nothing more than find a safe place for themselves.

The fire was spreading gradually. When it came nearby, my mother said to me, "That's enough, never mind your mother. Get away from here right now!" It was a faint but strong word that made me decide to leave there without her.

There was no road and I could see only piles of pieces of completely crushed houses and escaping people burned and blackened in the flames and smoke. I walked on the broken roof-tiles, woods and plaster, and swam across Enko-river to reach the dry river-bed. Standing there, I watched the burning town across the river. The smoke became a cloud and was hanging over my head. When I thought about my mother under the smoke, I felt my heart was broken. "Couldn't I really help her out? There must have been a way." I had tears of regret and repentance in my eyes.

Even now, forty years after that incident, the same feeling fills me, and I am depressed whenever I think of my mother.

After the war, the world has changed. Especially, in the field of science and technology, the progress has been remarkable. Now we can never think of our life as separate from scientific achievements. Sometimes I wonder what my mother would say about the present life, which is always followed by the feeling of regret at not having been able to rescue her.

While I studied and did research in nuclear physics, I realized the great responsibility given to the scientists in utilizing scientifically discovered truth solely for the welfare and peace of mankind. Atomic bombs were followed by far more powerful hydrogen bombs, and this nuclear arms race has never ceased to grow under the illusion of nuclear deterrence or military balance. Now, based on the development of both the strategic and tactical nuclear weapon systems, the policy makers and the strategists of the United States hold a first-nuclear-attack strategy and dream of the possibility of theatre nuclear war. They proceed on the totally mad assumption that it is possible to use nuclear weapons in practice.

Through the peace movement, we have learned that the very force which has prevented the use of nuclear weapons is the collective will of the people—the world opinion—who truly want peace. Furthermore we must strengthen the forces for peace so that they defeat the forces for war. Then we can avoid recreating the living hell, where mother and child have to call each other's names in agony under the A-bomb clouds.

This is the acute feeling I must face every summer when I think of my mother, who was burned to death, being unable to move in this burning inferno.●

SLATINGTON HOSE COMPANY NO. 1: 100 YEARS OF SERVICE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. RITTER. Mr. Speaker, today I would like to bring to the attention of my House colleagues the 100th anniversary of the Slatington Hose Company No. 1.

On August 12, 1885, a group of concerned citizens first came together to organize a system of fighting fires in their community. On September 21, 1985, citizens again will come together to mark a century of service by the heirs to this tradition.

A proud tradition it is too. The depth of community commitment was measured in the summer of 1980, when hundreds of people from the borough—and even across the country—donated hundreds of volunteer hours and thousands of dollars to restore the unique fireman's statue damaged by a hit-run driver. From this community tragedy came renewal of community spirit and a new spirit of unity.

This year, these active Slatington volunteers have undertaken a new project—to restore the Northern Lehigh Firemen's Memorial Bell, the first in the borough. The Baltimore manufacturer will acid dip, sandblast, and finally polish this 1891 bell. On its return, the bell will be mounted on a unique silicon-bronze frame, placed prominently on an octagonal slab illuminated by four lights. Borough council was unanimous in its support for this project.

As a frequent visitor to Slatington, I often gaze with admiration on the statue. Whenever I do, once again I am reminded of the quality of the fire company and dedication of its members, its ladies auxiliary and the community that supports it.●

APPLYING JACKSON-VANIK TO MFN

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. CRANE. Mr. Speaker, today I am introducing legislation which would eliminate a provision in the Trade Act of 1974 which allows the President to ask for a waiver of Jackson-Vanik human rights provisions in conjunction with granting most favored nation [MFN] trade benefits to Communist countries. My purpose in introducing this legislation is merely to insure that the intent of the Jackson-Vanik amendment is respected.

The Jackson-Vanik provisions were made a part of the trade act in an effort to improve the respect for basic human rights in Communist countries. As the amendment itself states, its purpose is "to assure the continued dedication of the United States to fundamental human rights. . . ." This is accomplished by denying MFN status to the nonmarket Communist countries that have failed to comply with the amendment's provisions regarding the right to emigrate.

In addition, the law also contains a provision which allows the President to ask for a waiver in cases where the nonmarket country does not comply with the emigration requirements of Jackson-Vanik. Unfortunately, the last three administrations have invoked this waiver authority for several Communist countries which do not even comply with the minimal emigration requirement of Jackson-Vanik. It is incomprehensible to me that we should grant MFN status to a country that does not even comply with the simple requirement of "allowing citizens the right or opportunity to emigrate." The only other requirement in Jackson-Vanik is that the Government not "impose more than a nominal tax, levy, fine, or other charge on any citizen as a consequence of the desire of such citizen to emigrate."

These dual requirements are anything but onerous or excessive, and yet we have not insisted that they be respected. Year after year successive presidents have elected to waive compliance with Jackson-Vanik. Meanwhile, merely expressing a desire to emigrate from within these Communist countries could lead to the loss of one's ration cards—without which they cannot buy food—demotions or terminations at the place of their employment, harassment of spouse and children, detainment and imprisonment, and even death. We would all agree that this is most severe treatment for expressing a wish to leave a country.

I believe that the time has come for us to let these nonmarket countries know that in order to get MFN trade status they must deserve it. We owe it to the people of these Communist countries to exercise our congressional authority over trade and remove from the President the ability to grant trade status without even considering human rights conditions. I urge my colleagues to join me in revoking the President's waiver authority.●

THE SENATE UNDER THE HANDGUN

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. EDWARDS of California. Mr. Speaker, today in the Washington Post I read a powerful article by our colleague PETER W. RODINO, JR., the distinguished chairman of the House Judiciary Committee. This article forcefully discusses why our handgun control laws need to be made tougher. I would like our colleagues to have the benefit of Chairman RODINO's careful thoughts on this very serious matter, so I am submitting the article for the RECORD today.

I agree with Chairman RODINO that weakening our gun control laws makes no sense considering the grim statistics on handgun crime in America. Handgun crime has already taken too great a toll on our Nation, taking thousands of lives and shattering innumerable futures. As Mr. RODINO points out, rather than giving criminals more tools to commit crimes, we need to give law enforcement officials more tools to fight crime.

Chairman RODINO has long been an advocate of gun control as a way to fight crime. In his article, he proposes one solution: Institute a reasonable waiting period to enable law enforcement agencies to check the records of a prospective purchaser of firearms. This would serve as a vital deterrent. And, it is a proposal that the American people overwhelmingly support.

Knowing that we are all concerned with the unacceptable level of crime in America, I hope our colleagues will bear in mind the insightful and sensible thoughts contained in the article that follows.

[From the Washington Post, July 23, 1985]

THE SENATE UNDER THE HANDGUN

(By Peter W. Rodino, Jr.)

If Congress really wants to fight crime, emasculating controls on the interstate sale of handguns surely is not the way to do it. But that is exactly what the Senate did recently with the passage of a bill that will render toothless the minimal gun control laws we now have on the books. What these laws need is strengthening, not weakening.

Considering the grim statistics on handgun crime in America, the Senate's action is surprising. In 1980, there were more than 11,000 handgun murders in the United States—as compared to four in Australia, eight in Great Britain and eight in Canada, each of which has a tough handgun control law. In 1983 handguns were used in 200,000 robberies and 120,000 aggravated assaults, and accounted for 44 percent of all murders. Even more alarming is the fact that while the Vietnam war claimed 46,121 American lives in the decade from 1963 to 1973, handgun murders killed more than 70,000 civilians back home in America.

But statistics cannot tell the whole story. Behind the numbers are thousands of personal tragedies, grieving families and shattered futures, brought about solely by reckless use of handguns by criminals. Our national memory is equally scarred by handgun-wielding assassins taking aim at our political leaders. Fortunately, presidents Reagan and Ford, as well as Gov. George Wallace, survived handgun attempts on their lives. Presidential Press Secretary James Brady barely did. Robert Kennedy, Allard Lowenstein and George Moscone did not.

Sadly, murder by handgun has become, in the words of one London newspaper, "a peculiarly American death."

So why did the Senate approve the bill weakening controls? Ostensibly to help out-of-state hunters and sportsmen who want easier access to weapons. But hunters have no use for handguns such as the easily concealed snub-nosed "Saturday night special." Only criminals do. Loosening restrictions on such weapons defies reason.

While no one wants to inconvenience hunters and sportsmen, at the same time we don't want to make it easier for criminals, drug addicts, felons and mental incompetents to get their hands on a handgun. But with the bill passed by the Senate, all a criminal has to do is cross a state line and the snub-nosed gun is his.

It's no surprise that every major police organization opposes this bill. Last year, two-thirds of the American police officers who died in the line of duty were killed by handguns. A bill that would loosen restrictions—making it easier for criminals to purchase a handgun—can only add to the crime rate and increase the chance that murder, robbery and other violent crimes will jeopardize more lives.

There is a clear consensus in America that crime must be reduced. Last year Congress passed the Comprehensive Crime Control Act with just that purpose. One of its provisions called for strict prison sentences for persons who commit crimes while carrying firearms. What we really need are laws to prevent these crimes from happening initially—after-the-fact prison sentences do little for the victims of crime. The Senate bill, however, only makes the fight against crime more difficult by affording potential criminals greater opportunity to commit a violent crime. Instead of giving law enforcement officials more tools to fight crime, this bill would end up giving criminals more tools to commit crimes.

Public opinion polls indicate that an overwhelming majority of Americans favor tougher gun control laws. So did the attorney general's 1981 Task Force on Violent Crime, which recommended a mandatory waiting period to enable law enforcement agencies to check the records of a prospective purchaser of a firearm.

To that end, I recently introduced legislation that calls for a reasonable waiting period. State and local laws with waiting periods have been highly effective: for example, two felons per week are prevented from buying handguns in Columbus, Ga., and in 1981, 1,200 felons were screened out in California. (In fact, had such a law been in place, John Hinckley might have been prevented from purchasing the handgun he used in his assassination attempt on President Reagan.)

A 1981 Gallup poll showed that 91 percent of Americans favor just such a waiting period. Americans are serious about fighting crime.

In America, we enact tough laws against drunk drivers and speeders because they cause highway deaths. We pass laws that crack down on drugs because they cause death and violent crime. Yet, if the bill passed by the Senate ever becomes law, we will be giving a free pass to criminals to purchase a gun.

For years opponents of gun control legislation have used the tired argument that guns don't kill, people do. But if the Senate's bill passes the House, more of the people who are likely to kill will find it easier to get their hands on a gun. It just doesn't make any sense.●

CONGRESSIONAL EFFORT TO ELIMINATE PENTAGON WASTE

HON. JIM KOLBE

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. KOLBE. Mr. Speaker, in recent months Congress has taken significant steps in an attempt to end massive fraud and waste within the Pentagon. These steps have also tried to make the process by which we acquire and maintain a military and national defense more efficient and cost effective.

I'm not here to add to the multitude of "horror stories" that illuminate waste in defense procurement—the $9,609 hexagonal wrenches, $1,100 plastic stool caps and $436 hammers. But it is time that serious attention and examination be given to the system of parts control which manifests these problems. Despite promises of reform by the Pentagon, the system continues, seemingly on autopilot. We can scream until we are blue in the face over thousand dollar toilet seats, but until we implement serious reforms that make the spare parts control system effective, such waste will continue.

There exists in the Department of Defense a highly touted program that was designed to save the Government millions of dollars a year on procurement of new and replacement parts for Department of Defense systems. The Defense Logistics Agency monitors the parts that contractors propose to use on Department of Defense equipment and attempts to replace contractor specified parts with parts that are already in the military supply system. If a contractor proposes that a part that shows promise for becoming a part used in various applications, it can be entered into the military supply system. According to an article written by Lt. Gen. Woodrow W. Vaughan, USA (retired) of the Defense Logistics Agency, the program seeks to minimize the variety of parts used in new design, enhance systems reliability and maintainability through the use of reliable parts, and keep specifications and standards current with the state of the art (Defense Management Journal, July 1978).

The Defense Logistics Agency contends that the parts control program is saving us money by letting fewer unique items into contracts, allowing larger buys of the parts that are standardized and using competition to buy these parts. The Defense Logistics Agency handles parts control through its four subgroups, the Defense Electronic Supply Center, the Defense Industrial Supply Center, the Defense General Supply Center, and the Defense Construction Supply Center.

Serious questions have been raised that suggest that the Defense Logistics Agency is not fulfilling its mission of saving the Defense Department or the taxpayer money. A Department of Defense Inspector General Audit Report, February 20, 1985, conducted between November 1983 and May 1984:

> . . . showed that reported program results and cost avoidance benefits resulting from the program were overstated.

Of the various problems mentioned in the report, the most serious the Department of Defense Inspector General's finding that in its sample, 88 percent of the recommendations made to contractors were overridden by the contracting officer. The report said cost avoidance of $128.6 million as a result of replacing nonstandard parts with standard parts were reported in fiscal year 1983. The report concludes that as a result of this and other problems.

> . . . reports submitted to Department of Defense and to Congress did not present a true picture of the program's accomplishments.

John A. Goldsmith, spokesman for the Defense Logistics Agency, stated that:

> There was no intent to mislead, but the recommendations of the parts control advisory groups were ignored by the services and the contractors.

He added:

> That there was no feedback procedure to subtract those projected cost avoidances from total projected cost avoidances.

This past December, a Deputy Secretary of Defense issued a memo that requested action be taken in the parts control program. Mr. Goldsmith stated that:

> The system has been corrected both with respect to their reporting of the cost avoidances and with respect to the acceptance of the recommendations.

Mr. Stephen Stromp, the Defense Electronics Supply Center spokesman said that:

> Steps have been taken to improve the reporting system and correct the deficiences.

However, it has been apparent to me through conversations with Defense Electronics Supply Center employees that the waste at that agency continues unabated.

Tomorrow, I will request the General Accounting Office to undertake a study to examine whether the Department of Defense Inspector General Audit recommendations have been implemented in regards to the Defense Electronics Supply Center. In addition, I will ask the General Accounting Office to examine spare parts management acquisition deficiencies at the Defense Electrronics Supply Center and to suggest means by which we can eliminate the waste endemic in the Department—and thereby save the American taxpayer millions of dollars at an agency originally designed to eliminate waste.●

TRIBUTE TO THE HONORABLE LESLIE C. ARENDS

SPEECH OF

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 18, 1985

● Mr. HAMMERSCHMIDT. Mr. Speaker, our late friend and colleague, Leslie C. Arends, served the people of the 15th District of Illinois with honor, determination, and success for 40 years in the House of Representatives. He served in the 74th through 93d Congresses, until he chose not to seek reelection—a record that certainly shows the excellent way in which he represented his constituents. We have lost a fine statesman in Les Arends, who passed away on July 16, and he will be missed by all of us in the years to come.

I was privileged to serve with Les in the House for 8 years, from the 90th to the 93d Congresses, during which time he held the leadership position of Republican whip. Les was a good friend and guiding hand to me as a freshman Member of Congress, and I will always appreciate his help. His exceptional abilities as a whip reflected his personal traits of integrity, loyalty, congeniality, and appetite for hard work.

In addition to serving as Republican whip, Les was also a senior member of the Armed Services Committee, where he was a strong and persuasive advocate on issues under the jurisdiction of the panel. His skillful work on legislation dealing with naval construction projects is just one aspect of his many accomplishments in this arena. Les also had a strong interest in agricultural issues, and was a diligent supporter of farm programs.

Les also served his country in the U.S. Navy during World War I, and he was a charter member of the American Legion Melvin Post No. 642 in his hometown of Melvin, IL. He served as post commander, county commander, and district commander in this organization.

I would like to express my deepest sympathy to Les' wife, Betty, his daughter, Letty, and the rest of his family.●

REAGAN'S INFLATE-THE-DEFICIT GAME

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FORD of Michigan. Mr. Speaker, I want to share with my colleagues an article from the New York Times of last Sunday by Senator PAT MOYNIHAN

entitled "Reagan's Inflate-the-Deficit Game." In this article, Senator MOYNIHAN outlines the purposeful efforts of the Reagan administration to drive up the deficit to create political pressure to cut and eliminate domestic programs. The Senator also discusses the hypocrisy of the administration's increasing the deficit while expressing support for a balanced budget. I urge my colleagues to read this article and to heed the message of Senator MOYNIHAN while we continue to work on efforts to reduce the deficit.

The article follows:

REAGAN'S INFLATE-THE-DEFICIT GAME

(By Daniel Patrick Moynihan)

WASHINGTON.—The week of July 8 began with the announcement that David A. Stockman would be leaving as budget director and ended with the Senate Judiciary Committee approving two constitutional amendments requiring a balanced budget. This marks the transition from policy to panic. It suggests we pause for a moment's reflection.

First, some definitions. The policy was the Administration's deliberate decision to create deficits for strategic, political purposes. The panic arises among those who think the deficit was caused instead by a failure of our political system.

The Reagan Administration came to office with, at most, a marginal interest in balancing the budget—contrary to rhetoric, there was no great budget problem at the time—but with a very real interest in dismantling a fair amount of the social legislation of the preceding 50 years. The strategy was to induce a deficit and use that as grounds for the dismantling.

It was a strategy devised by young intellectuals of a capacity that Washington had not seen for years. They were never understood, and as they depart they leave behind an alarming incomprehension of the coup they almost pulled off.

The key concept was that individual Government programs are relatively invulnerable to direct assault. The Congress, the staff, the constituency can usually beat you and always outwait you.

On the other hand, the Budget Act of 1974 contained little understood powers of huge potential. The budget committees, assuming agreement by the full Congress, could require other committees to cut back programs. The power—technically a "reconciliation" instruction—had never been used to the fullest, but it was there.

Thus, the plan: Reduce revenues. Create a deficit. Use the budget process to eliminate programs.

A hidden strategy? Not really. On Feb. 5, 1981, 16 days in office, the President in his first television address to the nation said: "There were always those who told us that taxes couldn't be cut until spending was reduced. Well, you know, we can lecture our children about extravagance until we run out of voice and breath. Or we can cure their extravagance by simply reducing their allowance."

This statement was noticed by Republican conservatives: What was this business of deliberately creating a Republican deficit? As it happened, a new economics was at hand to show that this need not happen. Known as "supply-side," it held that cutting taxes would increase revenues. A few weeks after the President's speech, the Office of Management and Budget issued revised budget projections showing taxes going down and receipts going up, almost doubling from $520 billion in 1980 to $940 billion in 1986.

Well, of course none of this happened. The budget was not balanced in 1984 as promised. Rather, by that time, Mr. Stockman was talking about $200 billion deficits "as far as the eye can see."

There are plenty of reasons the strategy came to grief, but the least noticed is that the budget committees just couldn't deliver. Successive chairmen, especially in the Senate, tried to transform the process from a straightforward allocation of funds for 19 "budget functions" into an item-by-item decision on everything. Committee meetings became spectacles: dazed legislators, swarming staff, exhausted journalists.

Then it collapsed. Other committees stopped paying any heed. The Senate Budget Committee itself broke apart. In 1982, the chairman in effect gave up and settled for a partyline vote on a one-page budget resolution with about a dozen numbers on it that nobody bothered to examine because by then nobody believed any of it any more.

On June 5, 1985, Mr. Stockman told the board of the New York Stock Exchange: "The basic fact is that we are violating badly, even wantonly, the cardinal rule of sound public finance: Governments must extract from the people in taxes what they dispense in benefits, services and protections . . . indeed, if the [Securities and Exchange Commission] had jurisdiction over the executive and legislative branches, many of us would be in jail."

This is taking too much blame. It was an honest effort, simply too clever. A failing, they say, of intellectuals in Government.

The constitutional amendments are another matter. They reflect a kind of desperation: Don't let us do it again. Which quite misses the point. The deficit was policy, a curious legacy of the young radicals who came to power in 1981, but not a symptom of a failed system of Government.

The budget is now out of control for the moment. Debt service was $53 billion in 1980; it will be $234 billion by 1990. The debt is compounding; we will indeed in time be borrowing abroad to pay interest owed abroad.

We can do little about this in the near-term. It is now, at minimum, a 15-year problem. On the bright side, the Social Security Trust Funds begin to grow rapidly after 1988, reaching an estimated $1 trillion surplus by 1999. The dark prospect is that some administration in the 1990's will give up and wipe out the debt by inflating the currency.

But if there isn't much we can do, there are things we can learn. Principally, that the dysfunction of the political economy is not a symptom of a failing of the political system. The disaster was planned, although not as a disaster. If we can get a truly conservative Administration into office by the 1990's, we can probably restore stability by the year 2000.●

SOVIET ACTIVE MEASURES

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1985

● Mr. BURTON of Indiana. Mr. Speaker, I commend the gentleman from California [Mr. LUNGREN] for calling this special order regarding Soviet "Active Measures." The public must be made more aware of the Soviet Union's efforts to influence American foreign policy.

Lenin said, "We must be able to agree to any sacrifice, and even if need be resort to all sorts of tricks, slyness, illegal methods, evasion, and concealment of the truth . . . and carry on Communist work at all costs." Throughout the world today the Soviet Union is carrying out this Leninist doctrine uninhibited by any bourgeouis regard for truth. Whether we call it active measures, disinformation, or propaganda, it all amounts to the same thing—lies.

People do not realize the extent to which Soviet lies can filter through the American media and powerful affects the public debate. As a member of the Western Hemisphere Subcommittee of Foreign Affairs, I am particularly aware of how Soviet-Nicaraguan-Cuban lies have affected the debate on Central America.

The Soviet Union would like nothing more than to see a string of Cubas in Central America—what better way to destroy the morale and economy of the United States than to engulf it in war on its southern border. They know that the main obstacle to a Communist Central America which would keep the United States busy for decades, is the Nicaraguan people, who are bravely fighting to prevent their country from becoming another Cuba. They also know that if they can get the word out that the Nicaraguan freedom fighters are actually thugs and barbarians, then the American people will think twice about supporting their freedom fighters. So they arrange for a human rights report on the freedom fighters that can be used in a smear campaign against them.

To do this, the Communist Sandinista regime in Nicaragua commissioned an American law firm named Reichler & Applebaum. The firm arranged for a lawyer named Reed Brody to take a team down to Nicaragua to investigate Contra atrocities. The Sandinistas obliged by providing transportation, boarding, housing, office space, and many of the "witnesses" for the report.

Since the Brody report was obviously bought and paid for by the Sandinistas, another group was sent to Nicaragua to verify the report. But this group was led by Donald Fox, whose brother-in-law is a Sandinista official.

Despite the dubious origins and blatant laundering of the Brody report, Representative SAM GEJDENSON and two leftist organizations, the Washington Office on Latin America and the International Human Rights Law Group, held a press conference and demanded congressional hearings on Contra atrocities based on its findings.

The chairman of the Western Hemisphere Subcommittee Representative BARNES, held hearings at which Mr. Brody and Mr. Fox testified.

The result of all this hoopla over blatant Sandinista propaganda was articles in the Washington Post, the New York Times, and network coverage, including a good size story on the CBS evening news.

It would not be fair to accuse the press of being willing agents of propagandists in Moscow, Havana, and Managua. What can be said is that the American people should demand that the media, instead of denying that they can be manipulated, be much more vigilant about being duped by classic active measures such as the Brody report.

I recommend that my colleagues read the article by Jim Denton in the Wall Street Journal following my remarks, describing the complicated path of the Brody report from Managua to CBS News, and into the minds of the American people. This disturbing story is just one example of how lies spread by our adversaries can affect the public debate, impinge on our foreign policy, and endanger the security of this Nation.

[From The Wall Street Journal, April 23, 1985]

CONTRA ATROCITIES, OR A COVERT PROPAGANDA WAR?—A LOBBYING DRIVE BEGAN IN MANAGUA

(By Jim Denton)

The likely congressional defeat of President Reagan's proposal to provide military aid to the anti-Sandinista contra forces comes in the wake of an extraordinary lobbying campaign. The struggle for the hearts and minds of Congress has mobilized a handful of partisans who have been enormously effective in distorting the Nicaraguan human-rights story. Although it is not uncommon for foreign governments to try persuasion on Capitol Hill, the manner and degree to which the Sandinistas have manipulated public and congressional opinion is noteworthy.

A review of the origins, the dubious handling and the reception of a report recently released by Rep. Samuel Gejdenson (D., Conn.), and two putative human-rights groups provides a case study of how Sandinista propaganda is legitimized and makes its way into the public debate and, ultimately, congressional policy.

The Washington, D.C., law firm of Reichler & Applebaum is the Nicaraguan government's official registered agent in the U.S. For its services, the firm is paid an annual rate of about $320,000. From all outside appearances the firm has ably represented its client. An accounting of the lobbyists' appointments with legislators and staff reads like a Who's Who among Senate and House liberals.

But Reichler & Applebaum's lobbying efforts on the Sandinistas' behalf have gone beyond the congressional routine. In an interview. Mr. Reichler confirmed that some months ago he originated and orchestrated a plan to send a team of "professional attorneys to Nicaragua to conduct an objective, independent investigation of contra atrocities."

Reed Brody, a 31-year-old lawyer, and Jim Bordeloin, a law-school student, were selected to conduct the "objective investigation." They spent four months in Nicaragua taking statements from witnesses of resistance-force atrocities, all with the full cooperation of the Sandinistas. Mr. Brody confirms that most of the investigators incountry transportation, boarding, housing, office space, staff and, one can assume the witnesses themselves, were provided compliments of their Marxist hosts and sympathizers in Managua.

Upon completion of the "investigation," the 141-page Brody Report, consisting of nearly 150 sworn affidavits from "witnesses," was duly processed back through the Sandinistas' lobbyists at Reichler & Applebaum. There it was prepared in final form and, according to a report submitted to the House Foreign Affairs Subcommittee on Western Hemisphere Affairs, passed to the Washington Office on Latin America (WOLA), the International Human Rights Law Group and Rep. Gejdenson for public dissemination.

These three parties all have their individual biases. WOLA, for example, has been a particularly prolific and harsh critic of the human-rights records of Latin American governments friendly to the U.S., as well as the contras, and sympathetic to the Sandinistas and other Marxist insurgents in the region. In reviewing WOLA reports, articles and studies, no serious or critical account of Fidel Castro's human-rights record in Cuba could be found. It is also worth noting, in weighing the group's objectivity, that two former WOLA employees are now employed by the Nicaraguan Foreign Ministry.

Apparently recognizing that a hasty embrace of the Sandinista-sponsored Brody report might be viewed with skepticism. Rep. Gejdenson, WOLA and the Law Group assembled a second delegation to verify the Brody findings. This second delegation consisted of Michael Glennon, former chief counsel to the Senate Foreign Relations Committee under the chairmanship of Frank Church; Donald Fox, a New York City-based international human-rights lawyer-activist; Valerie Miller, the delegation's interpreter, who lived in post-revolutionary Nicaragua for two years and wrote a book on the Sandinista literacy campaign; and, as an observer, a staff aide to Rep. Gejdenson. Mr. Fox confirmed that his Nicaraguan-born wife, now a U.S. citizen, Ana Clemenzia Tercero, accompanied the group to Managua to visit family members at WOLA's expense. Ms. Tercero's brother is a high-ranking official in the Nicaraguan Foreign Ministry assigned to Rome. This group uncovered no discrepancies in the Brody findings after having corroborated only 10 of the nearly 150 Brody affidavits during its one-week visit to Nicaragua.

Then, on March 7, in releasing the Sandinista-sponsored Brody Report, Rep. Gejdenson, WOLA and the Law Group called for a congressional investigation into contra atrocities before a packed press conference on Capitol Hill. Mr. Gejdenson stated he was forwarding the report to Rep. Lee Hamilton (D., Ind.), chairman of the House Intelligence Committee, and Rep. Michael Barnes (D., Md.), chairman of the House Foreign Affairs Subcommittee on Western Hemisphere Affairs, of which Mr. Gejdenson is a member. In their prepared press statements Mr. Gejdenson, WOLA and the Law Group did not mention the Sandinistas' role in originating and facilitating the Brody Report.

Last week the House Western Hemisphere Affairs Subcommittee held several days of hearings on aid to the contras. At Thursday's session, at the request of Mr. Gejdenson, Mr. Brody testified before the committee and had his report entered into the Congressional Record. Mr. Fox also testified, embracing the Brody report. And, apparently in order to gain some distance from the Sandinista-inspired document, Mr. Fox submitted a second report written by himself, Mr. Glennon, the Law Group and WOLA. The findings of this report substantiated and reinforced the Brody report.

The Brody document made its way into the public and congressional debate with a splash. The media fallout included articles in the Washington Post and the New York Times, and network coverage, including about 2½ minutes on the CBS Evening News. None of these accounts seriously challenged the report's origins or handling, ignoring or playing down the Sandinista sponsorship to the point that it was virtually unrecognizable to the audience.

The overall impact of the press accounts and congressional responses served the purposes of a Marxist regime to distort the U.S. public and Congress' understanding of the human-rights saga in Nicaragua—all of which will continue to shape U.S. policy in that war-torn country.●

A DOUBLE STANDARD IN BLACK AND WHITE

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LOWERY of California. Mr. Speaker, in the past few years, this body has unceasingly made clear its abhorrence of the disgraceful political and social structure in South Africa known as apartheid. However, many black-governed African nations have been increasingly subjugating other black Africans within their own borders, instituting a de facto "apartheid." There has been a double standard applied to the African Continent that few of my colleagues have recognized. I have, therefore, included an editorial from the July 22 Wall Street Journal, addressing the social, economic, and political inequities between blacks in black-governed African nations.

A DOUBLE STANDARD IN BLACK AND WHITE

(By George B.N. Ayittey)

Apartheid is an abomination. But the sad fact is that many of the black African leaders who applaud sanctions on South Africa have themselves instituted de facto "apartheid" regimes in their own countries against their own black people.

The first characteristic of apartheid is its caste system: separation of people on the basis of race. White South Africans, who control the government, have refused to share meaningful power with the disenfranchised black majority. The standards of living of the whites are far higher than those of the blacks. The second feature is a dual system of justice: a relatively lenient one for whites but a swift and brutal one for blacks. The third is an intolerance of any

opposition—the death of Steve Biko and the imprisonment of Nelson Mandela are well known. The fourth is insidious repression of the black majority in general through such devices as the pass laws.

Now, if one looks beyond the issue of skin color, similar characteristics also can be found in many black African regimes.

ONE-MAN, NO-VOTE

In black Africa, the two classes are not whites vs. blacks but rather the elites (the educated class and the military) vs. the people (the peasants). The elite minority, which controls the government, does not share power with the people. As in South Africa, the elite minority disenfranchises the peasant majority. Until 1984, the peasants of Liberia could not vote in a presidential election unless they had property valued at more than $25,000.

Indeed, some African leaders who advocate majority rule and one-man-one-vote for South Africa do not give their own black people the right to vote. Many have declared themselves "Presidents for Life." Other black regimes are military dictatorships or farcical "democracies."

The standards of living enjoyed by the elites far outstrip those for the peasants. Contrast the plush and subsidized amenities for the ruling class in the urban areas with the dingy and wretched lives of rural peasants. In Mauritania, while the elites have access to subsidized tap-water supplies, the peasants pay seven to 40 times more for their water from sellers with donkey carts. In Zaire, officials each earn between $5,000 and $9,000 a month while a peasant is lucky to make $50 a month * * *.

The prices at which the rural poor sell their produce are dictated, not by market forces, but by government directives. They face stiff penalties and outright confiscation of their produce if they sell above the dictated prices. In Ghana, farmers receive less than 10% of the world market price for their cocoa. In Gambia, they receive less than 20% of the world market price for their peanuts.

In many African countries, when peasants run afoul of the law, justice is swift and brutal. Consider two cases:

In September 1981, a 43-year-old peasant woman, Kporkporvie Dada, was beaten to death by Ghanaian border guards for taking a gallon of kerosene across a border to a relative.

Phillipine Addo, a 27-year-old peasant who in 1982 attempted to smuggle $3 worth of cocoa into Togo, was jailed for five years at hard labor.

The ruling elites also smuggle, embezzle funds, plunder state treasuries and illegally transfer their booty abroad. If corrupt ministers are apprehended, the sentences tend to be light or nonexistence: forfeiture of the booty or mere dismissals or transfers. Some examples:

In Upper Volta (now Burkina Faso), at corruption trials in 1984, former President Sangoule Lamizana, who could not account for about $1 million he was charged with embezzling, was acquitted. Three top officials of his government were ordered only to repay to the state money they had allegedly stolen while in office.

Three top officials of the Ghana Meat Marketing Board were merely sacked in 1984 for "gross abuse of office."

* * * * *

South African crackdowns on the African National Congress can be compared with those meted out to opposition elements in black Africa; many leaders have either outlawed political parties or have declared their countries one-party states and liquidated the opposition. Many opposition members have mysteriously vanished in Zaire, Kenya, Uganda, Zambia and Guinea.

There are also parallels between apartheid and black African regimes in the control of their populations. For example, black South Africans must carry passes that allow them only into certain areas; in black Africa peasants must contend with curfews and road blocks. Only members of the ruling class have the passes or permits to sail through road barriers and break curfew hours. For the majority of others harassment is the norm. Policemen have deliberately set their watches ahead in order to harass and extort money from "curfew breakers." Peasants in Ghana could not legally cross regional borders until restrictions were lifted last year by the military government of Flight Lt. Jerry J. Rawlings. (Some economic reforms demanded by the International Monetary Fund have also been implemented by Mr. Rawlings, but he shows no sign of allowing political freedoms.)

Despite the parallels, world opinion tends to apply radically different standards of morality to South Africa and black Africa. If South Africa had savagely expelled its illegal black aliens, as Nigeria recently did; or if South Africa had resettled some blacks on "homelands" in the midst of a famine, as Ethopia recently attempted, condemnations at the United Nations and in Congress would have been deafening. As if the skin color or the ideology of the tyrant makes any difference to the oppressed * * *. There are 16 million oppressed blacks in South Africa. But some 400 million people live elsewhere in black Africa, a majority under despotic rule. Why is so little attention given to their plight?

The U.N. does not condemn despotism in black Africa for fear of "interfering in the domestic affairs of sovereign nations." South Africa is not a sovereign nation, it might be argued—its government is illegitimate and unrepresentative of its people. But what black African government *is* legitimate and representative? Virulent condemnation of apartheid without parallel denunciations of tyranny in black African countries only serves to perpetuate the myth of black inferiority. Applying a lower standard of morality to black Africa betrays an insulting double standard against blacks.

REBUTTING RACISM

Some of the remaining support for the apartheid may be caused by conditions in black Africa itself. When South Africans look across their border they see the same atrocities the black African governments accuse them of committing. Furthermore, these governments have, through misguided policies, reduced their economies to tatters. Ian Smith, the former white prime minister of Rhodesia, defended his refusal to hand over power to the majority by observing that black Africans were incapable of running a country and managing an economy. That statement was rightly denounced as racist and invalid, but black Africa's execrable economic record is not a convincing rebuttal.

To the majority of black Africans, the peasants, the whole apartheid issue is largely irrelevant. Many of them would affirm that they fared better economically under the white colonialists. To many, independence has meant oppression and economic deprivation. Indeed, back in 1981, many peasants in Ghana were calling upon the British to recolonize the country. If we had to die, I and many oppressed Africans would rather be shot dead in South Africa than in an independent African nation under black rule. It seems that only in *South* Africa does the killing and subjugation of innocent blacks prompt world-wide pressure for reform.●

LITERACY ADDRESSED BY THE JOB CORPS

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. WILLIAMS. Mr. Speaker, I would like to share a description with my colleagues of how the Job Corps has responded to the problems of illiteracy. This was developed from existing Job Corps information.

DEVELOPING LITERACY IN JOB CORPS

During the twenty years since its inception in 1965, Job Corps has enrolled more than a million impoverished and undereducated young men and women in an intensive program of reeducation and job skills training. The original direction, set by Congress, was to increase the employability, enhance the life chances and improve the vocational coping skills of 16 to 21 year olds. The education and vocational training program which evolved from this direction and from the special circumstances of the Job Corps setting may be of interest as a model for improving literacy. The challenge and client characteristics that have shaped the focus and content of the Job Corps education systems are common to a number of employability programs.

The Job Corps basic education and reading programs are the result of an originally bold conception and years of dedicated tinkering. They use the systems approach to instruction and incorporate a number of teaching methodologies, of which the most prominent is programmed instruction. The advantages of the systems approach in providing individualized diagnosis of skills and instruction, promoting early success, and adapting to the input of new students at any time have made it the most distinctive and unchanging feature of the Job Corps literacy education. The more varied objectives of the vocational training program in preparing graduates for a hundred and forty-four occupations have led to some modification of the principle, but vocational education also follows a systems approach as far as is practicable.

No one would argue that the Job Corps education and training systems offer a panacea for miseducation and neglect or that they are the only successful approach to improving literacy. They do not meet all the needs of the client populations. Yet they can provide a core around which other training can be structured, and have often been and are being so used public schools, the armed services, and other community programs.

If only by virtue of longevity, the Job Corps basic education program remains the most viable, influential, and widely imitated of employability and literacy programs. It is also probably among the most economical and most easily established.

THE JOB CORPSMEMBER: TYPICAL AND ATYPICAL

Although the Job Corps population differs in a number of significant respects from other adult literacy client populations—age, work experience, home and family background—it is the needs and skills deficiencies that it shares with a large number of these groups that demonstrate the broad applicability of its literacy programs. The Job Corps population is defined by Title IV of the Job Training Partnership Act (JTPA) as yong men and women who are out of school and out of work, who need improved literacy, job training, and work experience to secure and hold meaningful jobs, participate successfully in schoolwork, or qualify for other civilian or military training. During the last program year, about two-thirds of approximately 55,000 new enrollees were men and about one-third were women. Nearly two-fifths were sixteen of seventeen, another fifth were eighteen, and the remaining two-fifths were nineteen or older. Approximately seventy-five percent were members of minority groups and nearly ninety percent came from families earning less than $6,000 a year.

In terms of previous level of literacy and education, the average entering Job Corpsmember has been in school nearly ten years and has roughly fifth or sixth grade reading skills. In other words, the average Job Corps entrant has typically advanced a little more than a half year in reading for each year of schooling, a fact that studies show is characteristic of the educational histories of disadvantaged participants in employability programs generally. Where the Job Corps population does differ educationally and socially from those in other programs, it is a matter of degree rather than kind—they have the same disadvantages, only more so.

Comparative studies of public and private school vocational training students show that Job Corps trainees have slightly worse educational preparation, lower literacy skills, and that a higher proportion come from families on welfare. They also have the least work experience of all groups surveyed. But past studies with the Neighborhood Youth Corps and current research with community programs such as Occupational Industrial Crusade (OIC) that have used or are using the Job Corps basic education approach to literacy indicate that the same techniques are at least equally effective with clients who are somewhat less seriously handicapped by their skills deficiencies than the Job Corps population.

Approximately a fifth of Job Corps entrants read and compute below the third grade level; many cannot even recognize the letters of the alphabet. But another handicap is more subtle and difficult or impossible to measure statistically. Rejected in the two socially recognized arenas of achievement, school and work, the typical corpsmember is convinced that he or she cannot learn. While he or she may momentarily hope that a new method will work, the new corpsmember is extraordinarily sensitive to the slightest sign of failure, and in the absence of clearly demonstrated progress, will assume defeat. Without clear and immediate proof of personal success, enrollees simply drop out of the program.

THE SYSTEMS APPROACH TO LITERACY

These characteristics, including the inclination of Job Corpsmembers to "vote with their feet" by dropping out of demanding and therefore threatening, public institutions, set the direction for the Job Corps literacy program which has evolved since 1985. The implied requirements in large measure established the operational philosophy of education behind the Job Corps program, which from the beginning was a combination of most suitable materials in the educational field with new materials specially developed for Job Corps. It is the Job Corps tests, progress records, and teachers' manuals that organize what would otherwise be an assortment of commercial and noncommercial materials into sequential learning systems that build literacy step by step.

It was determined from the outset that the program should, as far as possible:

Reinforce success. Overconditioned to defeat in the classroom, corpsmembers need immediate proof of success to capture attention and allay fears.

Adapt to random entry. Because corpsmembers enter the program at any time of year, the educational system must constantly absorb changing enrollments and integrate new students into a learning sequence.

Provide for individual differences. Like the one-room schoolhouse, the Job Corps classroom has to accommodate many levels and rates of achievement in a basic skill.

Be innately rewarding. Learning activities are meant to be intrinsically meaningful and rewarding. They involve students in charting their own progress in competition with themselves rather than with others.

Be relevant to life goals. Programs should be structured so as to clearly relate to goals that make sense to the learner in terms of jobs or eligibility for further training.

THE PROGRAM: BASIC EDUCATION

The basic education programs built to meet these specifications in reading, mathematics and high school equivalency preparation have certain features in common: they are diagnostic, individualized, and predominantly self-instructional. To realize the objectives of immediate success, self-competition and intrinsic reward, proper initial placement is essential. The learner can interact successfully with the material only if the proper match is established at the outset. The diagnostic tests are a device for matching student skills with units of instruction. After each unit, the corpsmember takes a progress check to demonstrate mastery of the material. A successful level of completion leads to the next unit. If the results show a need for more work on the first unit, alternative remedial or tutorial work which covers the same material in a different way is assigned.

Though there is provision for one-to-one tutorial work throughout the program, especially in the initial stages of beginning reading, the dominant mode of instruction is programmed learning. The teacher serves as a counselor, guide, and resource person to help students move through the program at their own speed rather than as a lecturer who makes textbook assignments and paraphrases their content in class.

READING

The Job Corps Reading Program is comprised of beginning reading, covering literacy skills from 0 to the equivalent of school grade 3.4; graded reading, covering skills equivalent to school grades 3.5 to 7.4; and advanced reading, covering skills equivalent to school grades 7.5 and above. Beginning and graded reading are organized as separate classes, while advanced reading is usually conducted as a supplement to the high school equivalency program. Each of these program segments contains multiple graduated skills levels, which place the students in steps of approximately a half-grade level each.

Incoming students are placed roughly at the appropriate level by means of a thirteen minute placement test specially developed for Job Corps, the Reading Job Corps Screening Test #1. Initial fine placement and subsequent advancement from one level to another are accomplished through one-to-one teacher interviewing and testing which place the student at his or her most effective performance level. Students who are placed in the beginning reading section of the program work in the Sullivan Associates Programmed Reading series, book 1-14. Although Job Corps has a policy of continuously evaluating and pilot testing new materials, this is the best series Job Corps has been able to identify during twenty years of use and field trial to provide the critical rewards of immediately reinforced success and inherent meaning.

Students move rapidly and systematically from a few sound symbol pairs, to words, to simple sentences. Experience shows that the psychological impact of finding that this is the first book they can actually read for themselves soon outweighs initial misgivings about juvenile illustrations.

Within the eight half-grade levels of the intermediate graded reading section, there are over 1,800 selections for students to choose from. Selections range from high-interest story-cards to short stories from anthologies. Students are free to choose from among 15 to 225 selections at each level by means of a master index organized by level and interest areas such as science fiction, adventure, mystery, sports, hobbies, jobs.

The advanced program serves the needs of students who have worked their way up through graded reading or whose initial placement scores were in the junior high school range. A system of progress and promotion recording like that in graded reading is used as a means for both students and teachers to monitor learning. Because of the comparable reading levels represented, the advanced reading section is most often used to supplement the advanced general education program.

The initial cost of reading materials to equip a classroom to serve 75 students a day, is approximately $2500.

RESULTS

Reliable recent gains data on the use of the Job Corps basic literacy program are difficult to obtain because the Test of Adult Basic Education (TABE) have been instituted just within the last year and insufficient data have been reported. However, preliminary data indicate that gains in reading will probably be consistent with or better than those reported for the years 1968-1974, which ranged from 1.3 to 2.5 months per month of instruction. Even if one takes the average gain of 1.7 months in reading as a conservative estimate of actual gains, it is clear that the results are better with the Job Corps literacy program than the .5 gain per month, or one-half grade level per year, the same students made during their stay in school. Allowing wide margins for the effects of relearning and measurement error, it seems safe to say that students make substantially more progress in literacy while in Job Corps than they did before they entered.●

DON'T NEGATIVELY AFFECT REAL ESTATE INVESTMENT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. HUBBARD. Mr. Speaker, I want to share with my colleagues a timely letter that I received from Donald W. Webb and Dudley Webb of The Webb Companies in Lexington, KY. Don and Dudley Webb, natives of Whitesburg in eastern Kentucky, are very successful in the real estate development business in central Kentucky.

They have written to me about the President's tax revision proposal "as it relates to depreciation and capital gains on real estate investment." Don and Dudley Webb are concerned that Tax Code changes to depreciation and capital gains on real estate will, in effect, adversely impact small businesses, industries, and the entire Nation.

I agree with their concerns and urge my colleagues to read their comments. The June 20 letter from Donald W. Webb and Dudley Webb follows:

LEXINGTON, KY,
June 20, 1985.

Congressman CARROLL HUBBARD,
Rayburn House Office Building,
Washington, DC.

DEAR CARROLL: Obviously, we in the real estate development business are quite concerned about President Reagan's tax revision proposal as it relates to depreciation and capital gains on real estate investment.

We understand the President's plan will drastically trim the investment amounts we believe are legitimate calculations for depreciation. More importantly, the proposed revisions would have a profound negative impact on investment in real estate should an individual's return on investment be taxed as "ordinary income" rather than "capital gains."

As evidenced in the government's own monthly economic indicators, commercial construction and housing starts are key barometers to the nations' economic health. Minus the automobile industry, no industry group represents the multiplier effect from dollars invested than the real estate development business.

This industry is not simply a limited group of investors who alone profit from development. Commercial, industrial, retail and residential real estate development and related construction represents a dollar that rolls over four times the number invested in any given community. Indeed, we can think of no industry that participates with small business more than real estate development.

It is our firm belief that the President's currently proposed tax revision as it relates to real estate investment will prove exactly counter-productive to Mr. Reagan's overall economic revival program. We oppose this aspect of the President's tax reform program and solicit your support in revising the program as it comes before you in Congress.

Help keep alive one of America's truly entrepreneurial industries, real estate development.

Sincerely,

THE WEBB COMPANIES,
DONALD W. WEBB.
DUDLEY WEBB.●

INTERNAL THREAT TO COSTA RICA

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. MARKEY. Mr. Speaker, I would like to urge my colleagues to take note of an article by Robert M. Sussler that recently appeared in the Boston Globe. Mr. Sussler is an American businessman whose work brings him into contact with several Costa Rican clients. Through these clients he has apparently gained an intimate knowledge of the current political climate in the region.

This administration's policy toward Central America has undermined and weakened those who should be our natural allies. While we continue to actively promote the overthrow of the Government of Nicaragua, we thwart our own interests by militarizing the tiny nation of Costa Rica, which for the last 48 years has stood as a model of democracy for the rest of the region. Mr. Sussler makes a noteworthy assessment of the detrimental effects our policy has had on Costa Rica. I share his concerns about a powerful military in Costa Rica leading to growing authoritarianism. I hope my colleagues will keep his views in mind. The text of Mr. Sussler's article follows:

INTERNAL THREAT TO COSTA RICA
(By Robert M. Sussler)

NEW LONDON, CT.—The Reagan administration has recently implemented policy decisions that may undermine the democratic system of Costa Rica. Costa Rica is known as the Switzerland of Central America, a bastion of tranquility and democracy, with a private enterprise system and a viable middle class. Reagan's policy is to support a small group of ambitious right-wing, would-be militarists by transforming a portion of the internal police into an army and providing it with training and aircraft. Because these people are vehement anticommunists, the administration is willing to disregard the potential authoritarian threat to Costa Rica's democracy.

Costa Rica is a democratic jewel in Central America. United States aid to the contras in Nicaragua, the equipping of the Salvadoran army and support for the regime of Guatemala constitute interference in countries that are already unstable and authoritarian. Costa Rica is the stable, democratic exeption.

In 1948, Costa Rica abolished the army, established private enterprise as a basis for the country's wealth and stability, appropriated 25 percent of national funds for education, developed a social security system with adequate health protection for its citizenry, and entered a stable period of democratic development. Crucial to Costa Rica's subsequent stability was the abolition of the Costa Rican army, an achievement of Jose Figueres, the founder of modern Costa Rica. He has vehemently spoken out against this new Costa Rican army, calling the new force "dangerous goosesteppers."

In Latin America, the army is the instrument for authoritarianism. It is used to nullify the results of an election when an elected party attempts to enact policies of progressive taxation or social reform.

Without an army, Costa Rica's upper class has participated constructively in the democratic process. Wealthy agriculturalists, retailers and processors in Costa Rica have for the last 35 years supported both major political parties. This has allowed Costa Ricans to develop their country through private initiative, and by sharing the profits from commodity exports among small and large producers and processors. It has resulted in a peaceable, stable democratic society in an area of chaos and violence.

The American Embassy in conjunction with Benjamin Piza, head of the National Security Forces of Costa Rica, has now introduced a growing military presence within Costa Rica. The United States has 24 advisers training Costa Rican National Security Forces in the north of the country to become an army, and is supplying helicopters. Piza, with the contrivance of the US Embassy, pressured President Luis Alberto Monge into accepting this new military force. Piza raised the specter of communist intrusions into Costa Rica by Nicaragua and the threat of a communist domestic insurgency.

Even with a small army, Costa Rica could never withstand an invasion by Nicaragua. Costa Rica's security derives from its borders being guaranteed by Venezuela, Mexico and the United States.

Are there internal dangers of insurgency? The Communist Party has never been able to achieve more than 10 percent of the vote. The police force has been able to control domestic violence, discovering and arresting criminals and terrorists.

Benjamin Piza is a key figure with full access to the US Embassy. As military commander of the augmented public security force, Piza could choose whether to implement Costa Rica's democracy or to proceed down the road toward authoritarianism.

President Reagan, if he stands for freedom fighters, should do nothing that endangers the democratic traditions of Costa Rica.

There is a need, however, for humanitarian aid for the 250,000 Nicaraguan refugees already in Costa Rica. Better to neutralize Costa Rica's northern border than to build up a domestic army. Better to aid these refugees, growing by 3,000 a week, than to spend money for helicopters and an army buildup.●

A STUDENT'S PLEDGE TO AMERICA

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. FAUNTROY. Mr. Speaker, I am pleased to take this opportunity to congratulate the District of Columbia's winning contestant in this year's Voice of Democracy contest, Junie J. Harris. More than 300,000 secondary school students participated in the annual competition sponsored by the

Veterans of Foreign Wars of the United States and its ladies auxiliary.

Mr. Speaker, I commend Miss Harris, an 11th grade student at the All Saints High School for her commitment to her country and her pledge to make it a better place for all to live.

I submit her speech for inclusion in the CONGRESSIONAL RECORD.

MY PLEDGE TO AMERICA

(By Junie J. Harris)

My pledge to America is to give back to this great nation what it has given to me. I pledge to give America my honor, my love, peace, happiness, and respect. I also pledge to uphold the standards of the Constitution and the laws of our nation.

Honor in America is defined as glory, admiration, a symbol of distinction, and to display appreciation for it. I will show appreciation for what my country stands for and promise to be a symbol of it. I will pledge allegiance to my flag.

To give those whom I meet love, I must also spread peace, happiness and unity. To love those who want to hate. To give peace to those nations who would like to go to war. To give happiness by making those who are sad, feel my warmth. Also, to give unity by the giving of my time for all to feel that they are alike whether in race, creed, or national origin. All of this makes up my pledge to America to give back love and to love someone, you must first, have respect for that person.

To respect America and not turn my back on its people shows that I am proud of what America stands for; freedom, shelter, food and a dream. To uphold the truths that are self evident. All people are created equal, so we must give the freedom of speech, the freedom of the press, and the freedom to worship as people please. To live our lives judging each other by our character and not our color.

To respect America, all of her people must have adequate shelter, I pledge to give back the shelter that has been provided for me by finding the homeless a place to live. I also pledge my service to help in the fight against hunger. I will do this by feeding those with whatever I have available. I will give of my time to help people find a way to get food. I want to pledge my service to America. As a young person this can also be done by helping the elderly, helping the handicapped, and teaching those who are younger than I. Everyone in America must have a dream and my dream is to serve America and her people where I am needed the most. I pledge to reinstill a dream that was once there, a dream our forefathers once had of the freedoms of our nation.

Martin Luther King, Jr., once said, and I quote, "We must use time creatively, in the knowledge that the time is always ripe to do right. Now is the time to make real the promise of democracy and transform our pending national elegy into a creative psalm of brotherhood. Now is the time to lift our national policy from the quicksand of racial injustice to the solid rock of human dignity".

Now is the time for us, as young Americans, to lift National policy; to act and dedicate our lives to these truths. We must also dedicate our lives to creating a better place for others to live. Now is the time for America, my America, to make a pledge for honor, love, and respect. For America to be all she can be, and for me to be all I can be.●

HOW THE SECONDARY MORTGAGE MARKET FUNCTIONS

HON. STEVE BARTLETT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. BARTLETT. Mr. Speaker, as a member of the House Banking Committee, I have spent a great deal of time learning and appreciating the secondary mortgage market. So, it is with great pleasure that I speak today on behalf of the Federal Home Loan Mortgage Corporation, Freddie Mac, which will celebrate its 15th anniversary on July 24, 1985.

Freddie Mac has been an innovator and pioneer in the secondary mortgage market since its creation. I congratulate the corporation for the outstanding job it has done in helping to make more affordable mortgage credit available to America's homebuyers.

For those of you who may be somewhat perplexed about the secondary mortgage market, I can assure you that it is not some complex thing or entity. It is merely a chain—a linkage that runs from your local homebuyer through to your local depository institution, to your secondary mortgage market conduit like Freddie Mac and then to Wall Street. And everyone benefits along the way: The homebuyer finds mortgage money more readily available and affordable; the depository institution can finance and then service more mortgages; and investors have highly liquid securities backed by pools of mortgages that often provide better yields than corporate securities.

I had the pleasure of touring Freddie Mac to see how the secondary mortgage market functions up close. It was fascinating to see the speed at which thousands of mortgage transactions were handled, and it's all so simple. There's a small room in Freddie Mac's basement where a staff of no more than six or seven talk to lenders all over the country to let them know what prices Freddie Mac can buy mortages for each day. This staff also commits Freddie Mac to buy the mortgages that lenders want to sell in order to replenish their supply of lendable funds.

Approximately 3 hours and 100 calls later, a tape of all the transactions for that day are taken by a messenger from the commitment room to the trading room 3 floors up. The traders there call 15 Wall Street firms simultaneously and the firms bid on the mortgages Freddie Mac has committed to purchase that day.

Almost 70 percent of home mortgages that lenders wrote last year were sold into the secondary mortgage market. Home buyers may not care who gets their monthly mortgage payments in the end, but they do care, as I do, about the availability and affordability of housing. Thanks to the secondary mortage market, families and individuals can be sure of getting a mortgage from their local lender, at interest rates which reflect national capital market investors' increasing willingness to provide a good price for mortgage-related securities. This willingness translates into interest rates lower than local sources could provide, which means savings on montly payments for home buyers and which means more people will qualify for loans to buy homes. Freddie Mac has been vital to housing finance in the past 15 years, and will continue to be so for many years to come. Over 60 million home buyers are coming into prime home buying age during this decade, the biggest bulge the census bureau has ever recorded. Freddie Mac will be there to ensure that these home buyers will continue to have access to the American dream with affordable mortgage credit.●

A TRIBUTE TO SAM SMITH

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LOWRY of Washington. Mr. Speaker, for nearly 30 years, Sam Smith has devoted his time, knowledge, ability, enthusiasm, and determination to the people of Washington State and the city of Seattle. In honor of his many years of dedicated service, the Washington State Legislature has proclaimed July 27 as Sam Smith Day. In addition, the board of directors of the Central Area Youth Association [CAYA] of Seattle, a nonprofit organization dedicated to improving the lives and futures of Seattle's young people, has renamed its annual Hometown Run the Sam Smith Hometown Fun Run. I would like to join the people of Seattle, Washington State, the Northwest, and other regions of the Nation in honoring Sam Smith.

Mr. Smith, the husband of Marion King Smith and the father of five sons and a daughter, is currently serving his fifth term and 18th year as a member of the Seattle City Council. For 4 of these years he was president of the council, a position to which he was elected by his colleagues. In this capacity, he served as a lightning rod for cooperation by helping to develop an atmosphere of respect and goodwill. Mr. Smith is now chairman of the Housing, Recreation, and Human Services Committee; vice chairman of the Public Safety Committee; and vice chairman of the Finance Committee. Prior to serving on the Seattle City Council, Mr. Smith served five terms in the Washington State Legislature.

The concern for equal opportunity and fair play was a part of Sam

Smith's life long before he became a public official. He has consistently championed the rights of the poor, the young, the elderly, minorities, and others who often need assistance in obtaining the opportunities and skills that will enable them to be productive, contributing members of society. Sam Smith has always known that the thing that people need the most is a chance. He has dedicated his life's work to making sure that it is forthcoming.

In addition to his years of public service, Mr. Smith has volunteered countless hours to private volunteer and service organizations. He is a former member of the board of managers of the American Baptist Churches USA, life member of the National Association for the Advancement of Colored People, member of the Seattle Urban League, president of the Brotherhood of the Mount Zion Baptist Church for 25 years, church schoolteacher for 29 years, and the area director of the National Black Caucus of Local Elected Officials.

Mr. Smith also organized and guided the Northwest Conference of Black Public Officials in Washington, Oregon, Idaho, Colorado, and Alaska. In recognition of the need to help offenders establish stable lives upon release, he organized the Black Prisoners Assistance Coalition of Washington. The Coalition has not only helped prisoners, but also their children and other loved ones who have been affected by their incarceration. Sam's concern for the elderly and the development of human potential led him to serve on the Seattle-King County Planning Council on Aging and the National League of Cities' Human Resource Policy Committee.

Sam Smith has been commended and honored for his effective leadership and tireless efforts by numerous institutions and organizations. The Seattle King County Municipal League, Seattle University, Mount Zion Baptist Church, the Seattle Urban League, the Washington State Legislature, the Veterans of Foreign Wars, the Prince Hall Grand Lodge, and the Central Area Jaycees make up only a partial list of those who have recognized Sam Smith's commitment to making our community and our Nation a better place for everyone.

I would like to add my name to the many others in congratulating Sam on a job well done. We look forward to hearing his compassionate voice, being touched by his strength, and benefiting from his experience for many years to come.●

TRIBUTE TO LES ARENDS

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 18, 1985

● Mr. CONTE. Mr. Speaker, I was surprised and saddened to hear the distinguished minority leader tell us today that Les Arends, who served as minority whip in the House until 1974, passed away Tuesday morning.

What can you say about a man who served 40 years in the House without making a single enemy on either side of the aisle? What can you say about a man who served as Republican whip for 31 years—a record which will probably never be surpassed? He served under four different leaders—all of whom considered him their right hand in the House.

When he retired in 1974, Members flooded to the floor to pay their respects to Les. Members expressed their affection for Les in many different ways: "His years in Congress brought him not only ever-increasing respect—but something very close to love." Others said that if Congress were to create a "Mr. Geniality" award, Les would win it hands down. He was called one of God's gifts to the human race by former Speaker Carl Albert, and former President Ford, who Les served under, said that Les looked at problems from "the point of view of what was right."

Many of Les positions—especially on defense matters—were controversial for many Members of the House. But his views never made enemies for him—because no matter how you felt about his views, you had to admit that he was always firm, fair, decent, and well-prepared to defend his position.

As Republican whip, he knew where his Members stood on an issue and where they could be tracked down. Once, he even asked the Pennsylvania State Police to locate a homebound Member on the Pennsylvania Turnpike to advise him to get back to the Capitol for a vote.

Elected to the Congress by 2,200 votes in 1934, Les was the only Republican House candidate to defeat an incumbent Democrat in that depression year election. His constituents in Illinois sent him back to the House 20 times—and of the over 10,000 Members who have served in this House, only 10 have served longer than Les Arends.

Mr. Speaker, when Les was saying goodbye to Members retiring from the House in 1966, he said:

> One of the great rewards of serving in the Congress is the friendships that develop. Whatever the future may bring for any one of us, we cannot look back upon those years in Congress without reflecting on the times of crisis and the failures and successes that we share with our colleagues and with our friends.
>
> One of the great rewards of my service in the House was knowing, working with, and serving with my good friend Les Arends. He will be missed.●

THE CLEAN CAMPAIGN ACT OF 1985

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LANTOS. Mr. Speaker, recently I introduced legislation to address a serious and growing campaign practice—the misuse of television and radio broadcasting for negative political commercials against a candidate for Federal office.

Negative, even slanderous, campaigning is certainly not new. What is new, however, is the power of such negative campaigning to reach masses of people through the pervasive media of radio and television. An emotional and well-staged attack on a political candidate through television advertising will certainly draw significant media attention. This fact of campaign life is not overlooked by aspiring candidates and their managers, but equally serious is the growing use of negative campaign advertisements by political action committees [PAC's] and wealthy individuals who are not themselves political candidates.

The foundation of our democracy is a well-informed public. The electorate must be informed about critical national issues which must be decided upon by our democratically elected representatives.

Negative campaigning—especially through television—threatens the right of the public to be informed. Such campaigning increasingly is being used to mislead and deceive the public on important and complex issues. Short ads on radio and television, often no more than 30 seconds long, use inuendo and half-truths to cast aspersions on candidates without providing the attacked candidate an opportunity to respond directly. Untruths and distortions of facts are deliberately broadcast, and the perpetrators cannot be held accountable.

Under recent court decisions, political action committees [PAC's] and individuals who are not candidates for public office are free to participate in political campaigns without many of the restrictions placed on official campaign committees and candidates. Often these PAC's and individuals abuse our democratic system by paying for negative campaigns against candidates for public office. Armed with millions of dollars, independent political action committees are attacking candidates whom they oppose with a deluge of vicious, even slanderous, commercials.

The most recent campaign, 1984, hit an all time high both in the tastelessness of many charges made against candidates and in the use of negative advertising. Many political candidates sponsored commercials impugning their opponent's character and record, rather than explaining or defending their own positions. The volume of PAC advertising, targeted against particular candidates, also reached new highs. This negative campaigning constitutes a growing proportion of an average campaign's advertising. In the 1950's and 1960's less than a quarter of the campaign ads were negative in tone; in the 1970's that increased to about one-third. In 1980, negative advertising took a quantum leap as conservative groups targeted individuals they opposed. Using similar negative tactics in self-defense, candidates have contributed to an escalation of this problem. Negative spending, in the 1980 election, accounted for 14 percent of all money spent on federal campaigns. Since 1980, these figures have continued to skyrocket.

Political scientists have examined the serious and unfortunate results of such attack politics—all candidates for public office are damaged and the public becomes disgusted. The American people, sick and tired of hearing and seeing these abusive ads, turn off by refusing to go to the polls. Widespread voter disenchantment and cynicism are fostered by negative campaigns.

Continuing barrages of negative advertising intensifies the negative tone of political discourse, not only among candidates but among their constituents as well. Such campaign tactics abuse the potential of television accurately to inform the public. The American people deserve informed and informative political discussion; they deserve political campaigns which present the issues and differences between candidates seriously, honestly, and with statesmanship.

Mr. Speaker, it is time for us to take effective steps to stop this snowballing trend of negative campaign advertising. I have introduced the Clean Campaign Act of 1985 in order to address this serious problem. This legislation has two major provisions to help reduce negative campaigning.

First, any references in a broadcast advertisement by a candidate for Federal office about his or her opponent must be made by that candidate in person. If this is not done, the opponent must be given free media time to respond. The same amount of time during the same period of the day on the same broadcasting station must be made available within a short, reasonable period of time under terms of this act.

While this may not entirely eliminate negative campaign advertising, it will increase the accountability of any candidate for such advertising. The public will see and hear the candidate personally make negative statements about his or her opponent. The candidate cannot hide behind the words of a paid actor speaking in pompous, omniscient tones.

Second, the legislation requires that if a PAC or an individual who is not a candidate airs a negative advertisement, the candidate against whom it was directed will receive free response time. If a PAC or an individual who is not a candidate advertises an endorsement of a candidate for Federal office, the opponents of that candidate will also receive free response time.

Mr. Speaker, there are serious questions regarding freedom of speech that must be considered. This act, however, in no way abridges that precious right. The fundamental purpose of freedom of speech is to permit the full and fair airing of all points of view in the belief that if all sides are freely and openly discussed and debated, the public will be in a position to make informed, rational choices.

This legislation requires responsibility and accountability, and it assures that all sides of an issue are presented. Present law and current legal interpretations give those who engage in negative campaigning an unfair advantage. The Clean Campaign Act restores balance by assuring that all sides have a full and fair hearing.

This act is a first step toward cleaning up dirty campaigning. It will not violate freedom of the press or freedom of speech; but it will make candidates and their supporters more accountable for their campaign statements. I urge my colleagues to join me in cosponsoring this important legislation.●

LACK OF LEADERSHIP

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. GEPHARDT. Mr. Speaker, Senator DANFORTH'S attempt to blame our present budget stalemate on House Democrats clearly demonstrates the root cause of our dilemma. There is no consensus in the Congress or the country for how to resolve our hemorrhaging deficit. No consensus exists because there is not sufficient Presidential leadership to create the agreement. If Senator DANFORTH would spend more time urging the President to do his job we might end the stalemate and save the economy.

I voted in the House with 52 other Members of Congress for a huge reduction plan much like the plan Senator DANFORTH supported in the Senate. The fact that plan only received 53 votes in the 435-Member House, indicates that such a plan is not likely to be a product of a House-Senate compromise.

The plan ultimately passed by the House was not as aggressive against the deficit as I would like, but Senator DANFORTH is wrong when he complains that it juggles numbers and does not achieve $56 billion in real deficit reductions.

The Senate passed their plan by voting the Vice President and bringing in Senator PETE WILSON on a stretcher. Now the President has sided with Representative JACK KEMP and House Republicans against the Senate Republican plan. The net result of all of this is that Republicans are attacking Republicans and Republicans are attacking Democrats and vice versa. Meanwhile, the President stands above the fray as the country is paralyzed on the most important problem we face. As the St. Louis Globe Democrat pointed out today in its lead editorial:

> There should be no question, President Reagan, as the single leader responsible to all of the people, has to take the lead not only to reach a compromise but an agreement that drastically reduces the string of monster deficits that face the Nation.

The budgetary chaos in Congress today is the direct result of the President expecting a committee of 535 to lead on difficult political issues when he neither cannot or will not lead on the issue himself. As long as the President sees goals like avoiding across-the-board spending cuts or tax increases as more important than deficit reduction, he will not effectively lead the Congress to a solution.

I can understand and share JOHN DANFORTH'S frustration. I can also understand his reluctance to identify the President, a fellow Republican, as the problem. To see Republicans and Democrats, Senators and Representatives throwing brickbats at one another would be interesting and perhaps amusing if the stakes weren't so high. I hope Senator DANFORTH will find time after his public salvos to aid Senator DOLE in privately convincing the President to do what he was elected to do.●

SYNTHETIC FUELS CORPORATION

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. SHARP. Mr. Speaker, along with several of my colleagues, I will oppose the rule on H.R. 3011, the Interior appropriations bill, in order to offer an amendment cutting spending by the Synthetic Fuels Corporation by $6 billion.

Because the Synthetic Fuels Corporation is not subject to annual authorizations and appropriations, we must use this vehicle to rescind funds if we are to ensure that they are not committed in the near future.

H.R. 935, legislation to abolish the Corporation, has been introduced by the gentleman from Oklahoma [Mr. SYNAR] and the gentleman from Michigan [Mr. WOLPE], and has been amended and reported by the Energy and Commerce Committee. It is expected to be considered soon by the Banking Committee.

Final enactment of this legislation by both Houses, however, is likely to be a lengthy effort, and the Corporation could commit billions of dollars to unnecessary projects before we can accomplish their abolition

Given the existence of the strategic petroleum reserve and the current oil glut and falling prices, we are not likely to need Synfuels production in this century. We can improve our knowledge and get ready for their eventual commercial use with a much smaller effort, which H.R. 935 would establish in the Department of Energy.

Although the risk of another oil shock and its damage to our economy must not be ignored, the economic consequences of not cutting the Federal deficit are greater, more immediate, and more certain.

The amendment I seek to offer to the interior appropriations bill is quite simple. It would rescind about $6 billion—all of the Corporation's uncommitted funds except for $500 million for transfer later to the new DOE Program. The Corporation would be prohibited from using this $500 million for any additional awards.

For the House to adopt this amendment, it will be necessary to defeat the rule for H.R. 3011 and I hope my colleagues will join me in voting to do so.

Mr. Speaker, I ask that the text of the proposed amendment be printed in the RECORD following my remarks.

Page 45, after line 18, insert the following new item:

DEPARTMENT OF THE TREASURY

ENERGY SECURITY RESERVE

(Rescission)

Except as otherwise provided in this item, all funds appropriated to the Energy Security Reserve are hereby rescinded. Funds so rescinded shall include all funds appropriated to the Energy Security Reserve by the Department of the Interior and Related Agencies Appropriations Act, 1980 (Public Law 96-126) and subsequently made available to carry out title I, part B, of the Energy Security Act by Public Laws 96-304 and 96-514, and shall be deposited in the general fund of the Treasury. This rescission shall not apply to—

(1) funds transferred from the Energy Security Reserve by this Act;

(2) $500,000,000, which may not be used for payments with respect to projects or modules under the Energy Security Act; and

(3) such amounts as may be necessary to make payments for projects or modules for which obligations were entered into under title I of the Energy Security Act before the date of enactment of this Act.●

CONGRATULATIONS TO DEBORAH NICHOLS ON AN OUTSTANDING EFFORT

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LOWRY of Washington. Mr. Speaker, I would like to share with my colleagues an outstanding essay written by Deborah Nichols of Burlington, WA, and to offer my congratulations to Deborah for being chosen as the national winner and recipient of a $10,000 scholarship of a national essay contest by the U.S. League of Savings Institutions. The national essay contest, which was a part of the savings league's deficit-reduction campaign, attracted over 1,000 hard-working students from across our Nation.

I commend Deborah and the other contestants for an excellent effort to help us act upon the crucial issue of the Federal budget deficit. Deborah's essay strengthened my faith in our young people and their commitment toward our Nation. I share this essay with my colleagues in the hope that it will help each of us to better understand and to act upon our obligation to our younger citizens, upon whom rests the future of our Nation.

YOU CAN SAVE YOUR COUNTRY: "DOUBLE DECKER DEFICIT DEDUCTION"

Roaring flames swept across America. Trees crumbled to the ground, and animals fled their homes in despair. The powerful forces of nature seemed uncontrollable. Such was the scene of George Washington's startling vision. Various interpretations have attempted to reveal the true meaning of Washington's vision. Some people think that the fire signified the Civil War which pitted brother against brother. Other analogies point toward less obvious destructions, including harmful drugs and intolerable crime. Perhaps Washington's vision of fire sweeping America was a glimpse at the runaway deficit and its impact on the economy today and in the future. The growing deficit figure, which reached $213 billion in 1985, instigated a serious reevaluation of our taxation allotments and our funding disbursements. We can blame the Executive Administration; we can blame Congress; we can blame wars, welfare, and the wealthy. Regardless of the cause, the deficit is a fact that meets each American face to face—on the job, at home, at the store, in the factory, and at the bank. Although the wild deficit paints a gloomy picture, hope and solutions abound. A moderate deficit can serve to benefit mankind by stimulating aggregate demand, production, and employment. On the other hand, a runaway deficit can become an uncontrollable fire that spreads inflation and/or high interest rates. W.R. Grace, a successful businessman and head of the Grace Commission, voiced the concern of the growing deficit when he stated, "If federal deficits continue at their current rate, it's as if every baby born in 1985 will have a $50,000 debt strapped to its back." Indeed, analyzing and activating reduction and reconstruciton plans for the federal budget system will help control the runaway financial fire and, in turn, lighten the burden for young citizens.

The saga of deficit spending dates back to the phenomenal ideas and theories of a British economist in the middle 1930's named John Maynard Keynes. Keynesian economics provided a plausible solution for a world suffering from the Great Depression and for the United States where millions of people were unemployed and unable to buy food. "Around 1935, fully 25 percent of American workers were unemployed, and an additional large percentage were not working on a full-time basis." Keynes taught that increased government spending would put money into the hands of consumers, thereby increasing the demand for goods and services as well as providing employment. For the first time in the history of this country, the federal government adopted the role of caretaker and job-provider. Although the public-investment projects were ill-planned and inefficient, the work programs provided employment. An extreme case of such "make-work" plans was the mythical "dig holes and then refill them" project. Even though our nation shifted away from most wasteful public-works spending after the Great Depression, we allowed the "let the government provide" attitude to smolder.

Thirty years after Keynes' initial seed of deficit spending was planted, the United States faced the economic havoc of World War II, the Cold War, and the Korean War. GNP growth from 1953 to 1960 averaged out to barely 2.5 percent per year in the United States, while Western Germany, Japan, Italy, France, and Western Europe generally were achieving sustained real growth rates several times this amount. The enormous cost of the war-production effort was, for the most part, financed by U.S. government borrowing.

When John F. Kennedy stepped into the executive chair, he found conditions favorable for expansion and promised to open the New Frontier for America. Increased spending provided the stimulus. Meanwhile, the Federal Reserve was manipulating the monetary supply in an earnest effort to balance our payment deficit and maintain an acceptable dollar exchange rate. Before his assassination, President Kennedy persuasively advocated a deliberate deficit and a deliberate tax cut to stimulate economic growth.

The smoldering deficit continued to burn unauspiciously as Lyndon B. Johnson entered the Presidential office. Johnson promoted poverty programs of the New Frontier and of his Great Society, consequently increasing government responsibilities. The national debt expanded. In 1965 came Johnson's fateful decision to accelerate the Vietnam War. Purposely disregarding economists' advice to raise taxes, President Johnson thrust the full burden of monetary contraction on the Federal Reserve.

Through the "money crunch" of 1966 and the "stagflation" of 1974, the United States government continued to sponsor benefits, subsidies, and pensions without sufficient funds to cover the costs of such programs. Each year, expenditures rose, partly because military appropriations were increased from $146 billion in 1980 to $265 billion in 1984 and partly because indexed

Social Security payments and soaring Medicare costs overrode reductions that had been gained by slashing away at welfare. The result was the phenomenal monster deficit of $111 billion in fiscal 1982; a second, larger deficit of $195 billion in fiscal 1983; and the probable $213 billion deficit in fiscal 1985. This deficit must be extinguished or controlled if we are to avoid the scramble for funds that could send interest rates out of sight.

What is upsetting about these deficits, however, is not only their size, but their structural nature. As a result of a complex role confusion between the government and the people, entwined with a selfish, materialistic attitude, citizens of the United States have allowed the skyrocketing deficits to literally explode. Instead of working out problems on the individual or state level, we obligate the government to step in. Big Brother to the rescue! We are becoming a nation in distress, seeking world power and prestige through ridiculously high defense increases. In fact, defense costs the taxpayer an average $2,175, nearly 30 percent of total government spending. Granted, defense contracts and military payments increase employment and protect the nation. These work programs, however, seem no different than the "dig a hole and refill it" projects of the Great Depression. Slowly, but surely, the trend of high deficit spending is internally decaying our nation by weakening economic stability to the point that defense spending becomes self-defeating. From $2,000 hammers to triple-dipping recipients, we see that the range and magnitude of government spending is neither necessary nor tolerable. What good is a warehouse of missiles when quality education is neglected or when a huge deficit awaits posterity? Clearly, the response should not be accelerated deficit spending.

An analysis of the deficit spending structure illustrates the extremely contradictory values of our nation. With enough missiles to destory the world several times, we have an all-time high defense budget of $277.5 billion. Abortion, crime, and teenage suicides accelerate at phenomenal rates, while we build the missiles and bombs that will supposedly protect our country. As a guardian angel of our country and as a watchdog of the world, the federal government has confused the values, resources, and needs of the people themselves.

The spiralling deficit is entangling the people of this country in a dangerous trap. The fire is blazing, yet few persons seem to understand the impact of high deficits or agree upon any proposed corrections. A number of simple solutions include a limit on personal wealth, a nation-wide lottery, and end to Social Security and retirement programs, or bankruptcy. Obviously, simple solutions are neither practical nor saleable. A complex network of historical events, from Keynes to Reagan, have contributed to the egotistic attitude and opposing values that cause the deficit dissolvement to seem impossible, both monetarily and socially. As a result, several decades will be required to bring the federal deficit under control.

My proposal to curb the federal deficits centers upon redefining the role of the federal government by distributing the burden of the debt to each state based on population according to the current census. This plan, called the Double Decker Deficit Deduction, returns all taxing power to the state where local interests, climates, and industries can best be served. Free from all programs, except the national defense, the federal government would apportion the costs of national security and domestic protection to the states and would maintain an annual balanced defense budget. Double decker refers to taxation upon individuals to pay for the programs in their particular state, and taxation upon the states to pay their portion of national defense. The states respectively would have 85 years to reduce their share of the national debt and annual deficit to a level acceptable by the standards of their state. The more wealthy states may completely dissolve their deficits much sooner than expected. Existing programs may be cut entirely or reduced, but education would rank high on the budget priority. Of course every plan has its disadvantages, and the Double Decker Deficit Deduction would certainly anger the lobbying groups and individuals who depend upon the federal government to set food on their tables, buy artificial hearts, research fossils in Africa, abort unwanted babies, and provide retirement benefits. Burdening the states will bring the runaway deficit back home where the flames can be controlled. The alternative? The runaway federal deficits could sweep the nation, making Washington's vision of fire a reality.●

SOCIAL SECURITY MARKS ITS 50TH ANNIVERSARY: A PARTNERSHIP WITH TOMORROW

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. HAWKINS. Mr. Speaker, 1930's President Franklin D. Roosevelt characterized the social condition of the third of this Nation's population as "ill-housed, ill-clad, ill-nourished." In the 1980's there are still a number of poorly cared for people in this land, but hardly as many as there would be without the Social Security Administration and the many services it has provided for millions of Americans for 50 years.

Social Security was begun as a program to help prevent the kind of widespread economic insecurity of the elderly that occurred during the 1930's. That purpose lives on in the work that Social Security does now. When it became apparently necessary to provide for those who fall through the cracks of society because of youthful situation, unemployment, or medical need, Social Security became a family program, rather than one just for the aged, by providing benefits for certain dependents and survivors of insured workers.

With the formation of Medicare in the sixties, the Social Security Administration provided the medical assistance so many senior citizens needed to survive. Medicare is still vitally important to the livelihood of millions of senior Americans. Now, the medical and financial needs of many of our citizens are addressed and we will be able to address them with certainty for at least another three generations because of legislation that has increased the old-age survivors and disability insurance fund.

Social Security has done a great deal, an immeasurable amount to address ill-nourishment, poor housing, and other indicators of poverty, old age, and family infirmity in this Nation. Social Security has served a priceless purpose in this Nation. Each time proposals are made to reduce the benefits of this program a thorough analysis shows that a multitude of Americans face the risk of impoverishment. We all must strengthen our resolve to insure that Social Security will be available as needed for another 50 years and beyond. I applaud the Social Security Administration and its successes on its 50th anniversary.●

CAPTIVE NATIONS WEEK

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. EMERSON. Mr. Speaker, President Reagan has issued a proclamation declaring the week of July 21 through July 27, 1985, as the 27th annual observance of Captive Nations Week. In so doing, the President has kept an annual tradition of designating the third week of July as a time when we remember those in other countries who are held captive under the long, dark shadow of communism. The Soviet Union has been doing all in its power to cast that shadow as widely as it can, and as we all are painfully aware, they have met with success even in recent years.

In 1920, Armenia, Azerbaijan, Byelorussia, Cossackia, Georgia, Udel-Ural, North Caucasia, and the Ukraine fell to Soviet domination. Others were not far behind: the Far Eastern Republic and Turkestan in 1922; Mongolia in 1924; Estonia, Latvia, and Lithuania in 1940; Albania, Bulgaria, and Yugoslavia in 1946; Poland and Romania in 1947; Czechoslovakia and North Korea in 1948; Hungary and East Germany in 1949; Tibet in 1951; Cuba in 1960; Cambodia, South Vietnam, and Laos in 1975; and Afghanistan in 1980.

Even more horrendous than their brutal invasion of many of these countries is their treatment of the citizens of these new Soviet satellites. Recently, we have seen the oppression of the Polish labor union Solidarity, the attempted assassination of the Pope, a Cuban and Soviet presence in Grenada, and the tragic downing of a Korean commercial airliner. We need only to look to their activities in Central America and Southeast Asia to see that they have every intention of casting that shadow into other corners of the world.

This week, all Americans, and particularly Members of Congress, should

pause and reflect on how we can ensure that no more countries are added to the list of captive nations, and on the consequences of our failure to do so. As the strongest democracy in the world, we must set an example and work toward the day when all captive nations can take their rightful place among the free nations of the world.●

CAN WE USE REASON ABOUT OUR USE OF ANIMALS?

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. LANTOS. Mr. Speaker, the ancient lawmaker, Seneca, in the first century B.C. said, "Man is a reasoning animal," And yet, some 20 centuries later, members of the official bureaucracy in our generally enlightened democracy too often fail to use reason.

A serious case in point is the recent victory won for animal welfare last week, when Secretary Margaret Heckler ordered the suspension of funding for the University of Pennsylvania brain-trauma experiments on primates. I was joined by several of my colleagues in the House in calling for a halt to this experimentation months ago. As more information became available to us, despite the reluctance to the National Institutes of Health to cooperate, our shock and horror over the blatant abuses in this laboratory increased. It was clear from the outset—to any reasoning person—that the use of public funds for this research was in violation of regulations governing research procedures using animals. Scientific procedures as well as ethical and humane concerns were blatantly compromised. And yet, the Department of Health and Human Services continued to defend and fund this research, and even to accept without hesitation a recommendation for continued funding for another 5 years. Where is the use of reason?

What finally forced the attention of the Secretary was a disconcerting demonstration by an activist animal welfare group that organized a sit-in in the offices of the National Institute of Neurological and Communicative Diseases and Stroke. The demonstration, coupled with inquiries and pressure from some of us in Congress, resulted in this long overdue action by HHS. The research at the University of Pennsylvania brain-trauma laboratory should have been stopped as soon as the violations were first made public almost a year ago.

In today's Washington Post, James J. Kilpatrick offers a balanced perspective on this sensitive issue. Kilpatrick does not mention that the report of the investigating committee, which confirmed claims about the research, was released—as if by coincidence—after the takeover of NIH by the demonstrators and after stepped-up congressional pressure. He does, however, clearly expose the resistance to reason exhibited by responsible officials in the National Institutes of Health. Unfortunately, experiences of this kind merely encourage the future use of such displays of force, rather than reasoned persuasion. This should not happen in a democracy such as ours.

I am inserting in the RECORD Mr. Kilpatrick's article from the Post for the benefit of my colleagues.

BRUTALITY AND LAUGHTER IN THE LAB

Early in the morning of May 28, 1984, members of the Animal Liberation Front broke into the Head Injury Clinical Research Center at the University of Pennsylvania. They stole more than 60 hours of videotapes of animal experiments and launched a campaign to halt further federal grants to the center. Last week they could claim a well-won victory.

The story of the laboratory break-in created a small flurry last summer. Clinic officials and university spokesmen stoutly defended the research. Dr. James Wyngaarden, director of the National Institutes of Health, was quoted in Science magazine in June 1984. The center, he said, "is considered one of the best laboratories in the world." Last week he appeared to have suspended that judgment.

The animal lovers who stole the videotapes edited the 60 hours down to a 30-minute shocker. Under the auspices of PETA (People for the Ethical Treatment of Animals), the 30-minute film was selectively circulated. I watched it a few days ago, and though I am no anti-vivisectionist, I found it appalling. Half a dozen members of Congress viewed it. They wrote to Margaret Heckler, secretary of Health and Human Services, demanding that the experiments be halted. The government at long last began to pay attention.

The story goes back about 13 years, to the time that medical doctors at the University of Pennsylvania got their first federal grant for head-injury research. One series of experiments involved enclosing a test animal's head in a hard plastic helmet, positioning the head in a machine that delivers a piston blow of up to 1,000 g's, and then chipping off the helmet with hammer and screwdriver. The brain-damaged primate is then subjected to various experiments, some of them involving recent memory, and finally the animal is killed and its brain tissues and fluids analyzed.

If the research were done carefully and humanely, perhaps a case could be made for it. Whiplash injuries are serious injuries. Brain concussion is no trivial matter. But PETA spokesmen charged that the research was not being done ethically. They contended, for one thing, that the anesthetic used in the experiements, Sernalyn (phencyclidine hydrochloride, or PCP), was inadequate to prevent the animals from suffering serious pain. They charged that lab assistants were violating rules having to do with sterile procedures. The hammer blows to remove the protective helmets, they said, affected whatever findings might be disclosed by later dissection.

The stolen film shows animals with various levels of brain damage. It depicts researchers as having a really fun time. One lab assistant flops a dazed baboon around a table. He waves the rag-doll arms and jokes about the trainer "who taught him how to do those tricks." Ho, ho, ho. Over in a corner is baboon B-10, who gazes at the camera in misery. "As you can see, B-10 is alive . . . B-10 wishes his counterpart well. B-10 is watching and hoping for a good result." The mockery provokes a big laugh. Other researchers try to make an animal shake hands. This is hilarious. "He says, 'You're going to rescue me from this, aren't you?'"

Well, it was high time for someone to rescue these baboons from the hands of their tormentors. Under pressure from PETA and the shocked congressmen, Wyngaarden, who originally had stonewalled, a month ago named a committee to investigate. Last Wednesday the committee filed its preliminary report. There has been "material failure to comply with public health policy for the care and use of laboratory animals." The committee was especially critical of anesthetic procedures. There had been inadequate "supervision and training" of lab personnel.

Heckler did not wait upon a final report. She telephoned Wyngaarden Thursday morning to say she was suspending the federal grants at once. If the outraged House members have anything to say about it—and they do—the funding will be halted for good.

Fine with me. After 13 years and $13 million, what's to be gained by bashing in the brains of more baboons? According to PETA, published papers have been mostly of mild academic interest, though the researchers' analysis of brain fluids may have proved useful in treating some human head injuries. The whole unhappy business smacks of grantsmanship at its most avaricious. Get the grant, and never mind the poor baboons.●

JOHNNIE, WE REMEMBER

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. GEPHARDT. Mr. Speaker, on Wednesday, June 5, 1985, the St. Louis Metropolitan Police Department lost one of its finest. Patrolman Johnnie Corbin, 41 years of age, an 18-year veteran with the police department, met an untimely death.

Officer Corbin was a former member of the mobile reserve, a police unit that knew how to deal with trouble. Johnnie was a member of the St. Louis Hostage Negotiating Team, an elite unit of officers trained to react in hostage situations.

Johnnie was a survivor. In 1974, Corbin was awarded a meritorious service award, the department's second highest award, for his role in a shootout with three desperadoes. One bandit was killed and two others wounded when Corbin and other officers interrupted a hold-up in my district. Johnnie knew what danger was.

Johnnie was a survivor. The ex-Marine Corps sergeant underwent open heart surgery in 1983, and after a

short recuperation returned to police duty. Johnnie wasn't very different from the thousands of other peace officers in this country—men who do a very important job for our country and their community, men we citizens often take for granted.

On Wednesday, June 5, 1985, Officer Johnnie Corbin, was doing his job. Johnnie didn't die in a hail of gunfire. Johnnie wasn't freeing a hostage from the terrorists. Johnnie was giving out parking tickets. He was assigned to traffic safety, and he was doing his job. Fifteen minutes before his death, Corbin gave a motorist a $4 ticket for a parking violation. The motorist in a rage ran Johnnie down as he sat on his tri-car. That wasn't enough, his assailant proceeded to kick Officer Corbin in the head—just for doing his job.

Mr. Speaker, we in America, read about or see on television daily, the sensational efforts put forth by our police officers. And in those brief moments, we think, "Thank God they were there to help." But how often do we just take for granted the job they do? The pay is not always good, the hours are sometimes bad, and their lives are always on the line.

To the anonymous citizen, who apprehended the assailant with Officer Corbin's own gun, and to all the Johnnies in law enforcement, thanks for the job you do. We do remember. To Johnnie's family, friends, and fellow officers, our deepest sympathy. And you Johnnie, we remember.●

SOVIET ACTIVE MEASURES: LUNGREN S.O.

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 17, 1985

● Mr. DORNAN of California. Mr. Speaker, this special order is of great interest to me, because I am convinced that one of the most consistent and significant efforts the Soviet Union makes in its public affairs at home or abroad, is trying to make the world see things that aren't there, or not to see things that are. The Soviet Government does this in order to gain the maximum advantage available by making this country and others, including its own citizens, misdirect attention and energy, or sleep, blissfully unaware of what is being done to them.

Their work of misdirection ranges from placement of black propaganda articles in friendly foreign publications to timing the activities of their military and defense construction so as to be quiescent and invisible as U.S. intelligence satellites pass overhead.

Since the pictures of the world we make in our minds are the models on which we base our plans of action, it is critical that we be aware of the Soviet proclivity for lying. They instinctively lie, preferring the protection of misdirection to the advantages of truth. And, when the truth comes out, they do their best to raise doubts as to the accuracy of the true reports.

So important is the Soviet propensity for misdirection, deceit, and deception, that they actually have a chief directorate for strategic deception, headed by General N.V. Ogarkov. This department guides and controls all military censorship in the Soviet Union, which means all publications in science, technology, economics, or anything which might have military implications. Viktor Suvorov, in his revealing and insightful study "Inside the Soviet Army," tells us that "Everything in this huge country must be done in such a way that the enemy always has a false impression of what is going on." He goes on to say that some things are hidden, others are exaggerated "out of all recognition." Further, Suvorov tells us, Soviet military intelligence and the directorate have recruited mercenary hack journalists abroad, who disseminate Soviet-inspired false information.

Within the first directorate of the KGB, the active measures service carries out parallel operations, with attention to far more than simply disinformation and forgeries. It is worth noting that since World War II the Soviets have upgraded that office from a disinformation office to an active measures office to its present status as a full-fledged service. That service has six departments, and is charged with supporting foreign active measures conducted by the Politburo. Deception is a key element in the Soviet strategy of world domination.

One way to look at the Soviet art of lying is to remember that they have small lies, and big lies. The small lie is the slight distortion, the statistical exaggeration or shell game, which exaggerates progress or success, or minimizes failure. A significant example of this was General Ogarkov's promotion of the belief that they were capable of producing a successful antiballistic missile. Now, the Soviets did have some excellent surface-to-air missiles in their armory at that time, and they were capable of destroying some ballistic missiles. They were by no means able to destroy an incoming American Minuteman missile. But, by displaying an otherwise unidentified huge missile during a Moscow parade, building a building in plain sight of Moscow, and broadcasting some computer signals from it, they gave the impression that they had something going. They even faked up some films showing an antiballistic missile in action. The result was that this country came to the bargaining table with the Soviets and relinquished our right to develop a weapons system which would have given us an advantage, because the Soviets really didn't have the capacity to produce such missiles. The tipoff to this should have been General Ogarkov's presence at the Geneva bargaining table.

Another side of this is the absence of news in the Soviet media about natural disasters or even plane crashes, despite the fact that many Soviet citizens are directly affected by such events.

The other kind of Soviet lie is the big lie, a lie told when no Soviet would dare tell the truth, but silence is impossible. The record is replete with such examples. Soviet troops are in Afghanistan because the Western Powers are running an operation against the Afghan Government. The Government of Czechoslovakia invited Soviet troops into that country in 1968. The United States caused the cold war. Flight KAL 007 was shot down because it was engaged in a spy mission. I could go on, but the point is clear.

The problem this presents for U.S. policymakers, and lawmakers, is that we spend so much time sorting out what we can believe and what we cannot. Our intelligence services gather data, and provide reports. At the same time the Soviets hide some things completely—like their recent real missile production—and put out misleading stories on more public developments, seeking to undercut public faith in official U.S. reports.

The Soviets are fond of besmirching the United States reputation by circulating what used to be called black propaganda through news organs around the world. One of Ogarkov's puppet journalists writes a story which might appear in the Bombay Blitz, for instance, accusing an American Embassy official of spying or other misbehavior. The story is then picked up by Pravda or Izvestia, and then reported in a Western newspaper, by which time some people accept it as true. It is hard enough to keep track of normal political polemics as practiced in this country by rivals and opponents, let alone the complications of international news deliberately slanted and distorted to blind the American public to what our adversaries are about.

A case in point was the cleverly arranged demise of the enhanced radiation weapon, or neutron bomb. The Soviets spent about $100 million to shape the public debate to their purposes, successfully. In the NATO Review for April 1983, Larry Eagleburger reported that "the U.S.S.R. was able to distort the public debate on the topic and direct attention from the massive Soviet military buildup and the clear threat to European security posed by Warsaw Pact convention-

al forces—the threat which enhanced-radiation weapons can so effectively counter." The unfortunate part was that responsible and informed American journalists fell into the Soviet trap. To this day, some people believe the neutron bomb was rejected because it was immoral, "that it killed people instead of destroying property," rather than because the Soviets cleverly torpedoed it. Other writers have described Soviet capabilities and practices in the area of active measures. I call attention to John Barron's masterful study, "The KGB Today," which details the operations of that Soviet secret intelligence/counterintelligence agency. Arnaud Deborchgrave's excellent series in the Washington Times detailed the network of organizations which manipulate American public and official opinion, especially with regard to Central America.

There are many examples we could cite, and I am sure the wide range of institutional and organizational connections in the peace and antinuclear movements in Western Europe and the United States fit nicely into the active measures strategy. Tens of thousands of well-meaning, idealistic citizens of the United States and of Western European democracies are deftly herded into the streets to serve Moscow's aims—the delaying of deployment of a defensive weapons system to counter the Soviet threat.

We must be on our guard, and we must recognize the Soviet design and intention as the Soviet Union practices "active measures," which is to confuse and mislead us that they can gain fatal advantage over this Nation.●

NATIONAL POW/MIA RECOGNITION DAY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, July 23, 1985

● Mr. KEMP. Mr. Speaker, this has been a year for remembering. We celebrated the 40 anniversary of the victory of the Allies ending World War II, and we remembered those who gave their lives in that war, and those who suffered the horror of the Holocaust. We looked back 10 years ago to the fall of Saigon, and we remembered why we were in that war, the honor of those who served, the tragedy of Vietnam today.

Today we observe another day of national remembering. July 19, 1985 is National POW/MIA Recognition Day. As President Reagan said in his proclamation of this day, "we recognize the special debt all Americans owe to our fellow citizens who gave up their freedom in the service of our country; we owe no less to their families."

The families and loved ones of the 2,500 Americans unaccounted for in Vietnam, who have held on to their faith and their determination never to let any of us forget, are truly American heroes. No greater courage nor love has any man or women than they who refuse to surrender hope. Their extraordinary sacrifice, and extraordinary spirit, command our admiration and demand our unrelenting commitment to be adamant in our insistence that Hanoi provide a full accounting of our missing countrymen.

That national commitment is more than a promise; it is a solemn responsibility that we owe not only to those 2,500 and their families, but to the future generations who will serve their country, that they may be secure in the knowledge of our unfailing support for them in combat and commitment to their safe return home.

We know that the Governments of Vietnam and Laos have information which could resolve the status of a large number of American POW/MIA's. The refusal of the Communist Governments of Vietnam and Laos to provide this information, despite repeated official demarches and poignant personal humanitarian pleas, highlights as much as anything why it was right for those who love freedom and human decency to fight against the Communist forces of North Vietnam. And that fight is not over, not in Indochina, where the democratic resistance continues, and not here, where the families of our POW/MIA's unceasingly continue to speak out, to never give up, to never forget.

That fight is noble, as President Reagan has said; indeed it is the noblest of fights because its goal is the noblest of goals, which is to make it possible to believe that one day all mankind will be free of the horror of totalitarian fanaticism, free to grow and reach our full potential.

For several weeks this summer, America held its breath while Americans were held hostage in Beirut. The families of our POW/MIA's have been holding their breath for a dozen or more years. If they had tied yellow ribbons to their doors and mailboxes, those ribbons would long ago have become tattered and torn. But their ribbons aren't tied to their mailboxes, they're tied to their hearts. They will never fade, not until our missing are accounted for, our countrymen brought home.

In western New York, our community continues to remember, thanks to the courage and relentless determination of people like Barbara Rausch, and Sue Czajkowski, and Ellen Cooper, and Mafalda DiTommaso and Christine Waz, and many others. On July 6 and 7, under the chairmanship of Donna Lee Glair, Missing-In-Action ceremonies were held at the Vietnam Veterans' Memorial and the Buffalo Naval and Serviceman's Park. I was very sorry that I was unable to attend in person, but my thoughts and prayers were with these dedicated friends as always but especially as they met together this year to dedicate a new display case that contains special MIA/POW bracelets in honor of our missing men.

Mr. Speaker, I would like to include for the RECORD an article that appeared in the Buffalo News of June 23, 1985 by Bob Curran concerning this very special event, and the extraordinarily special people responsible for these ceremonies of remembrance.
